

Mailing Standards of the United States Postal Service, Domestic Mail Manual

May 12, 2008

Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM) provides our official prices and standards for all domestic mailing services. Many commercial mailers find it helpful to reference these standards as they prepare and enter large mailings.

For household mailers who need information about our retail products and services, we offer *A Customer's Guide to Mailing* in English, Spanish, and Chinese. New business mailers can start with *An Introduction to Mailing for Businesses and Organizations*. It provides an overview of business mail and walks mailers through the decisions they will make when designing a mailing. Both publications are updated and available in many Post Offices and on our Postal Explorer Web site at pe.usps.com. Postal Explorer also provides helpful search features, mailing tools, and price calculators to make mailing easy.

Summary of Changes

The DMM is updated frequently on Postal Explorer at pe.usps.com. Revisions are published in the Summary of Changes by effective date and by DMM module. Mailing standards in the DMM are revised by notices in the *Postal Bulletin* or the *Federal Register*.

Availability

Public – The public can access the updated DMM in PDF and HTML formats on Postal Explorer at pe.usps.com. Annual subscriptions for printed copies are available only through the U.S. Government Printing Office, 202-512-1800.

USPS – Postal employees can access the updated DMM in PDF and HTML formats on Postal Explorer at pe.usps.com or on the Postal Explorer CD-ROM. Offices can order printed copies through the Material Distribution Center using standard ordering procedures.

How to Use This Book

An introduction is located at the beginning of the book. It explains how information is organized around four basic concepts — mailing method, shape of mail, class of mail, and topic — and how the DMM is numbered. Also included is a series of *Quick Service Guides*, two-page overviews of mail classification and preparation.

Comments

Contact your local Post Office, business mail entry office, or the Pricing and Classification Service Center (PCSC) with comments or questions about our mailing standards (see [608.8.4](#) for addresses and telephone numbers of business mail entry offices and the PCSC).

101 Physical Standards

Overview

- 1.0 Physical Standards for Letters
- 2.0 Physical Standards for Flats
- 3.0 Physical Standards for Parcels
- 4.0 Additional Physical Standards for Express Mail
- 5.0 Additional Physical Standards for Priority Mail
- 6.0 Additional Physical Standards for First-Class Mail
- 7.0 Additional Physical Standards for Parcel Post
- 8.0 Additional Physical Standards for Media Mail
- 9.0 Additional Physical Standards for Library Mail

1.0 Physical Standards for Letters

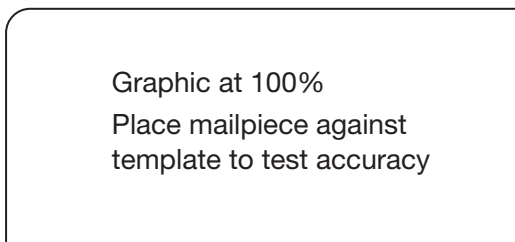

1.1 Dimensional Standards for Letters

Letter-size mail is:

- a. Not less than 5 inches long, 3-1/2 inches high, and 0.007-inch thick.
- b. Not more than 11-1/2 inches long, or more than 6-1/8 inches high, or more than 1/4-inch thick.
- c. Not more than 3.5 ounces (First-Class Mail letter-size pieces over 3.5 ounces pay flat-size prices).
- d. Rectangular, with four square corners and parallel opposite sides. Letter-size, card-type mailpieces made of cardstock may have finished corners that do not exceed a radius of 0.125 inch (1/8 inch). See [Exhibit 1.1d](#).

Exhibit 1.1d Maximum Corner Radius for Letter-Size, Card-Type Mailpieces

Corner Radius Maximum 1/8"

101.1.2

1.2 Nonmachinable Criteria

A letter-size piece is nonmachinable (see [6.4](#)) if it has one or more of the following characteristics (see [601.1.4](#) to determine the length, height, top, and bottom of a mailpiece):

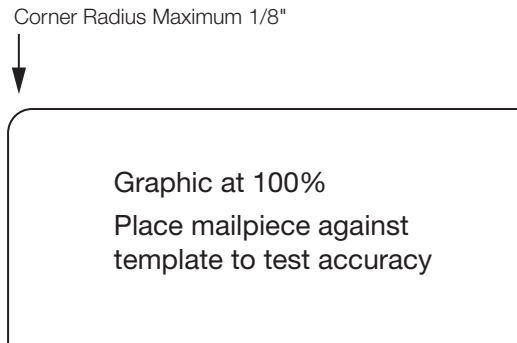

- a. Has an aspect ratio (length divided by height) of less than 1.3 or more than 2.5.
- b. Is polybagged, polywrapped, or enclosed in any plastic material.
- c. Has clasps, strings, buttons, or similar closure devices.
- d. Contains items such as pens, pencils, or loose keys or coins that cause the thickness of the mailpiece to be uneven (see [601.2.3, Odd-Shaped Items in Paper Envelopes](#)).
- e. Is too rigid (does not bend easily when subjected to a transport belt tension of 40 pounds around an 11-inch diameter turn).
- f. For pieces more than 4-1/4 inches high or 6 inches long, the thickness is less than 0.009 inch.
- g. Has a delivery address parallel to the shorter dimension of the mailpiece.
- h. Is a self-mailer with a final folded edge perpendicular to the address if the piece is not folded and secured according to [201.3.14.1](#).
- i. Booklet-type pieces with the bound edge (spine) along the shorter dimension of the piece or at the top, unless prepared according to [201.3.14.2](#).

2.0 Physical Standards for Flats

2.1 General Definition of Flat-Size Mail

Flat-size mail is:

- a. More than 11-1/2 inches long, or more than 6-1/8 inches high, or more than 1/4 inch thick.
- b. Not more than 15 inches long, or more than 12 inches high, or more than 3/4 inch thick.
- c. Flexible (see [2.3](#)).
- d. Rectangular with four square corners or with finished corners that do not exceed a radius of 0.125 inch (1/8 inch). See [Exhibit 2.1d](#).

**Exhibit 2.1d Maximum Corner Radius for Flat-Size Mailpieces**

- e. Uniformly thick (see 2.4).
- f. Unwrapped, sleeved, wrapped, or enveloped.

2.2 Length and Height of Flats

The length of a flat-size mailpiece is the longest dimension. The height is the dimension perpendicular to the length.

2.3 Minimum Flexibility Criteria for Flat-Size Pieces

Flat-size pieces must be flexible. Boxes—with or without hinges, gaps, or breaks that allow the piece to bend—are not flats. Tight envelopes or wrappers that are filled with one or more boxes are not flats. At the customer's option, a customer may perform the following test on their own mailpieces. When a postal employee observes a customer demonstrating that a flat-size piece is flexible according to these standards, the employee does not need to perform the test. Test flats as follows:

- a. All flats (see Exhibit 2.3a):
 1. Place the piece with the length parallel to the edge of a flat surface and extend the piece halfway off the surface.
 2. Press down on the piece at a point 1 inch from the outer edge, in the center of the piece's length, exerting steady pressure.
 3. The piece is *not* flexible if it cannot bend at least 1 inch vertically without being damaged.
 4. The piece *is* flexible if it can bend at least 1 inch vertically without being damaged and it does not contain a rigid insert. No further testing is necessary.
 5. Test the piece according to 2.3b or 2.3c below if it can bend at least 1 inch vertically without being damaged and it contains a rigid insert.

Exhibit 2.3a Flexibility Test—All Flats

- b. Flats 10 inches or longer that pass the test in [2.3a](#) and contain a rigid insert (see [Exhibit 2.3b](#)):
 1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece 5 inches off the surface.
 2. Press down on the piece at a point 1 inch from the outer edge, in the center of the piece's width, exerting steady pressure.
 3. Turn the piece around and repeat steps 1 and 2. The piece is flexible if both ends can bend at least 2 inches vertically without being damaged.

Exhibit 2.3b Flexibility Test—Flats 10 Inches or Longer

- c. Flats less than 10 inches long that pass the test in [2.3a](#) and contain a rigid insert (see [Exhibit 2.3c](#)):
 1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece one-half of its length off the surface.
 2. Press down on the piece at a point 1 inch from the outer edge, in the center of the piece's width, exerting steady pressure.
 3. Turn the piece around and repeat steps 1 and 2. The piece is flexible if both ends can bend at least 1 inch vertically without being damaged.

Exhibit 2.3c Flexibility Test—Flats Less Than 10 Inches Long

2.4 Uniform Thickness

Flat-size mailpieces must be uniformly thick so that any bumps, protrusions, or other irregularities do not cause more than 1/4-inch variance in thickness. When determining variance in thickness, exclude the outside edges of a mailpiece (1 inch from each edge) when the contents do not extend into those edges. Also, exclude the selvage of any polywrap covering (see [301.3.3](#)) from this determination. Mailers must secure nonpaper contents to prevent shifting of more than 2 inches within the mailpiece if shifting would cause the piece to be nonuniform in thickness or would result in the contents bursting out of the mailpiece (see [601.2.3](#)).

2.5 Flat-Size Pieces Not Eligible for Flat-Size Pricing

Mailpieces that do not meet the standards in [2.1](#) through [2.4](#) are not eligible for flat-size pricing and must pay applicable parcel prices.

3.0 Physical Standards for Parcels

3.1 Maximum Weight and Size

No mailpiece may weigh more than 70 pounds. Lower weight limits apply to First-Class Mail, Standard Mail, and Bound Printed Matter. Pieces may not measure more than 108 inches in length and girth combined, except Parcel Post, which may not measure more than 130 inches in length and girth combined. For parcels, length is the distance of the longest dimension and girth is the distance around the thickest part. Lower size or weight standards apply to mail addressed to some APOs and FPOs subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#).

**3.2 Two or More Packages**

Two or more packages may be mailed as a single parcel, if they are about the same size or shape, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.

3.3 Machinable Parcels

A machinable parcel is any piece that is (see [Exhibit 3.3](#)):

- a. Not less than 6 inches long, 3 inches high, 1/4 inch thick, and 6 ounces in weight. (A mailpiece exactly 1/4 inch thick is subject to the 3 1/2-inch height minimum under [601.1.2](#).)
- b. Not more than 34 inches long, or 17 inches high, or 17 inches thick, or 35 pounds in weight. For books, or other printed matter, the maximum weight is 25 pounds.

Exhibit 3.3 Machinable Parcel Dimensions

Maximum weight = 35 pounds
Books and printed matter may not weigh more than 25 pounds.

Minimum weight = 6 oz.
(for details, see machinable parcel criteria in [401.1.5.1](#))

101.3.4

3.4 **Soft Goods and Enveloped Printed Matter**

Soft goods wrapped in paper or plastic bags and enveloped printed matter are machinable only if all packaging standards in [601.2.0](#) are met.

3.5 **Irregular Parcels**

An irregular parcel is a parcel not meeting the dimensional criteria in [3.3, *Machinable Parcels*](#). This processing category also includes parcels that cannot be processed by Bulk Mail Center parcel sorters, including rolls and tubes up to 26 inches long; merchandise samples that are not individually addressed and are not letter-size or flat-size; unwrapped, paper-wrapped, or sleeve-wrapped articles that are not letter-size or flat-size; and articles enclosed in envelopes that are not letter-size, flat-size, or machinable parcels.

3.6 **Outside Parcel**

An outside parcel is a parcel that exceeds any of the maximum dimensions for a machinable parcel. This processing category also includes high-density parcels (other than books and printed matter) weighing more than 15 pounds and exerting more than 60 pounds per square foot (0.4167 pound per square inch) pressure on their smallest side; cartons containing more than 24 ounces of liquid in one or more glass containers; cartons containing 1 gallon or more of liquid in metal or plastic containers; cans, paints; rolls and tubes longer than 26 inches; metal-band strapped boxes, metal boxes, and wood boxes; articles not mailed in boxes or other containers; harmful matter; hazardous materials except ORM-D materials; and containers with all dimensions exceeding the minimum dimensions for a machinable (regular) parcel, if their coefficient of friction or ability to slide on a smooth, hard surface is not similar to that of a domestic-class fiberboard box of the same approximate size and weight.

4.0 Additional Physical Standards for Express Mail

4.1 **Physical Standards of Mailpieces**

Each piece of Express Mail may not weigh more than 70 pounds. The combined length and girth of a piece (the length of its longest side plus the distance around its thickest part) may not exceed 108 inches. Lower size or weight standards apply to Express Mail addressed to certain APOs and FPOs.

4.2 **Outside Parcels**

Express Mail items not required to be presented in a pouch (outside parcels) must be large enough to hold the required mailing labels and indicia without bending or folding on a single optical plane.

4.3 **Two or More Packages**

With the exception of USPS-produced Express Mail flat-rate envelopes, two or more packages may be mailed as a single parcel if they are about the same size or shape, are securely wrapped or fastened together, and do not exceed the weight or size limits.

5.0 Additional Physical Standards for Priority Mail

5.1 Physical Standards of Mailpieces

The maximum weight is 70 pounds. The combined length and girth of a piece (the length of its longest side plus the distance around its thickest part) may not exceed 108 inches. Lower size and weight standards apply for some APO and FPO mail subject to [703.2.0, Overseas Military Mail](#), and [703.4.0, Mail Sent by U.S. Armed Forces](#), and for Department of State mail subject to [703.3.0](#).

5.2 Two or More Packages

With the exception of USPS-produced Priority Mail flat-rate envelopes or boxes, two or more packages may be mailed as a single parcel if they are about the same size or shape, are securely wrapped or fastened together, and do not exceed the weight or size limits.

5.3 Balloon Price

Addressed for delivery to zones 1-4 (including local) and weighing less than 20 pounds but measuring more than 84 inches in combined length and girth are charged the price for a 20-pound parcel for the zone to which it is addressed. See [123.1.2](#).

5.4 Dimensional Weight Price

Postage for parcels addressed for delivery to zones 5-8 and exceeding 1 cubic foot (1,728 cubic inches) is based on the actual weight or the dimensional weight (see [123.1.3](#)), whichever is greater.

6.0 Additional Physical Standards for First-Class Mail

6.1 Maximum Weight and Size

First-Class Mail cannot exceed 13 ounces. First-Class Mail weighing more than 13 ounces is Priority Mail ([123, Prices and Eligibility](#)). The combined length and girth of a piece (the length of its longest side plus the distance around its thickest part) may not exceed 108 inches. Lower size or weight standards apply to mail claimed at certain prices or addressed to some APOs and FPOs subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail subject to [703.3.0](#).

6.2 Minimum Standards

Pieces are subject to the minimum standards in [601.1.2](#) and may be subject to other minimum dimensions, based on the standards for specific prices.

6.3 Cards Claimed at Card Prices

6.3.1 Card Price

A card may be a single or double (reply) stamped card or a single or double postcard. Stamped cards are available from USPS with postage imprinted on them. Postcards are commercially available or privately printed mailing cards. To be eligible for card pricing, a card and each half of a double card must meet the physical standards in [6.3](#) and the applicable eligibility and preparation standards for the price

claimed. Ineligible cards are subject to letter-size pricing. Cards may be prepared and mailed at the First-Class Mail single-piece card, Presorted card, or automation card prices.

6.3.2 Postcard Dimensions

Each card (each stamped card or postcard or each half of a double stamped card or postcard) claimed at card pricing must be:

- a. Rectangular.
- b. Not less than 3-1/2 inches high, 5 inches long, and 0.007 inch thick.
- c. Not more than 4-1/4 inches high, or more than 6 inches long, or greater than 0.016 inch thick.

6.3.3 Other Cards

A card that does not meet the applicable standards in [6.3](#) must not bear the words “Postcard” or “Double Postcard.”

6.3.4 Paper or Card Stock

A card must be of uniform thickness and made of unfolded and uncreased paper or cardstock of approximately the quality and weight of a stamped card (i.e., a card available from the USPS). A card must be formed either of one piece of paper or cardstock or of two pieces of paper permanently and uniformly bonded together. The stock used for a card may be of any color or surface that permits the legible printing of the address, postmark, and any required markings.

6.3.5 Acceptable Attachments

A card may bear an attachment that is:

- a. A paper label, such as a wafer seal or decal affixed with permanent adhesive to the back side of the card, or within the message area on the address side (see [Exhibit 202.2.1](#)), or to the left of the address block.
- b. A label affixed with permanent adhesive for showing the delivery or return address.
- c. A small reusable seal or decal prepared with pressure-sensitive and nonremovable adhesive that is intended to be removed from the first half of a double card and applied to the reply half.

6.3.6 Unacceptable Attachment

A card may not bear an attachment that is:

- a. Other than paper.
- b. Not totally adhered to the card surface.
- c. An encumbrance to postal processing.

6.3.7 Tearing Guides

A card may have perforations or tearing guides if they do not eliminate or interfere with any address element, postage, marking, or endorsement and do not impair the physical integrity of the card.

6.3.8 Address Side of Cards

The address side of a card is the side bearing the delivery address and postage. The address side may be formatted to contain a message area. Cards that do not contain a message area on the address side are subject to the applicable standards for the price claimed. For the purposes of 6.3, miscellaneous graphics or printing, such as symbols, logos, or characters, that appear on the address side of cards not containing a message area are generally acceptable provided the items are not intended to convey a message.

6.3.9 Special Rules for Single-Piece Cards

Cards claimed at the single-piece price that have the format characteristics in 201.1.2.6a.3. or 201.1.2.6b.3. and are part of a mailing of 200 or more identical pieces must:

- a. Have addresses that include the correct ZIP Code or ZIP+4 code.
- b. Have postage paid with permit imprints, meter stamps, or precanceled stamps.
- c. Be prepared under 235.5.2, *Machinable Preparation*.

6.3.10 Double Cards

A double card (a double stamped card or double postcard) consists of two attached cards, one of which is designed to be detached by the recipient and returned by mail as a single card. Double cards are subject to these standards:

- a. The reply half of a double card must be used for reply only and may not be used to convey a message to the original addressee or to send statements of account. The reply half may be formatted for response purposes (e.g., contain blocks for completion by the addressee).
- b. A double card must be folded before mailing and prepared so that the address on the reply half is on the inside when the double card is originally mailed. The address side of the reply half may be prepared as Business Reply Mail, Courtesy Reply Mail, meter reply mail, or as a merchandise return service label.
- c. Plain stickers, seals, or a single wire stitch (staple) may be used to fasten the open edge at the top or bottom once the card is folded if affixed so that the inner surfaces of the cards can be readily examined. Fasteners must be affixed according to the applicable preparation requirements for the price claimed. Any sealing on the left and right sides of the cards, no matter the sealing process used, is not permitted.
- d. The first half of a double card must be detached when the reply half is mailed for return.

6.3.11 Enclosures

Enclosures in double postcards are prohibited at card prices.

6.4 Nonmachinable Pieces

6.4.1 Nonmachinable Letters

Letter-size pieces (except card-size pieces) that meet one or more of the nonmachinable characteristics in 1.2 are subject to the nonmachinable surcharge (see 133.1.10).

101.6.4.2

6.4.2 Nonmachinable Flats

Flat-size pieces that do not meet the standards in [2.0](#) are subject to the applicable postage for a parcel-size piece, based on weight.

6.5 Two or More Packages

Two or more packages may be mailed as a single parcel, if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.

7.0 Additional Physical Standards for Parcel Post

7.1 Dimension and Weight Standards

These standards apply to Parcel Post:

- a. No piece may weigh more than 70 pounds.
- b. Parcel Post pieces measuring over 108 inches in combined length and girth, but not more than 130 inches in combined length and girth, are mailable at the applicable oversized price.
- c. Parcel Post pieces measuring over 84 inches in combined length and girth, but not more than 108 inches in combined length and girth, and weighing less than 20 pounds are mailable at the price equal to that of a 20-pound parcel for the zone to which the parcel is addressed (balloon price).
- d. Two or more packages may be mailed as a single parcel, if they are about the same size or shape, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.
- e. Lower size or weight standards apply to mail addressed to some APOs and FPOs subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#).

7.2 Nonmachinable Parcel Post Standards

Mailpieces described in this section that are mailed at the Inter-BMC/ASF Parcel Post or Intra-BMC/ASF Parcel Post prices are subject to the applicable nonmachinable surcharge in [153.1.0, *Parcel Post Prices and Fees*](#), unless the applicable special handling fee is paid. An oversized parcel as described in [7.1b](#) is not subject to the nonmachinable surcharge. Mailpieces are nonmachinable if they meet any of the following criteria:

- a. A parcel more than 34 inches long, 17 inches wide, or 17 inches high.
- b. A parcel less than 6 inches long, 1/4 inch thick, or 3 inches high.
- c. A parcel that weighs less than 6 ounces or more than 35 pounds.
- d. A parcel containing more than 24 ounces of liquid in glass containers, or 1 gallon or more of liquid in metal or plastic containers.
- e. An insecurely wrapped or metal-banded parcel.
- f. A can, roll, or tube, or wooden or metal box.
- g. Books, printed matter, or business forms weighing more than 25 pounds.

- h. A high-density parcel weighing more than 15 pounds and exerting more than 60 pounds per-square-foot pressure on its smallest side.
- i. A film case weighing more than 5 pounds or with strap-type closures, except any film case the USPS authorizes to be entered as a machinable parcel under [3.3](#) through [3.5](#) in *Physical Standards for Parcels* and to be identified by the words "Machinable in United States Postal Service Equipment" permanently attached as a nontransferable decal in the lower right corner of the case.
- j. Parcels with characteristics (such as inadequate packaging) that could result in damage to the contents of the mailpiece, other parcels, or postal machinery if mechanical sortation is used.

8.0 Additional Physical Standards for Media Mail

8.1 Dimension and Weight Standards

These standards apply to Media Mail:

- a. No piece may weigh more than 70 pounds.
- b. The combined length and girth of a piece (the length of its longest side plus the distance around its thickest part) may not exceed 108 inches.
- c. Two or more packages may be mailed as a single parcel, if they are about the same size or shape, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.
- d. Lower size or weight standards apply to mail addressed to certain APOs and FPOs, subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#).

9.0 Additional Physical Standards for Library Mail

9.1 Dimension and Weight Standards

These standards apply to Library Mail:

- a. No piece may weigh more than 70 pounds.
- b. The combined length and girth of a piece (the length of its longest side plus the distance around its thickest part) may not exceed 108 inches.
- c. Two or more packages may be mailed as a single parcel, if they are about the same size or shape, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.
- d. Lower size or weight standards apply to mail addressed to certain APOs and FPOs, subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#).

102 Elements on the Face of a Mailpiece

Overview

- [1.0 All Mailpieces](#)
- [2.0 Address Placement for Letters](#)
- [3.0 Placement and Content of Mail Markings](#)
- [4.0 Endorsement Placement](#)

1.0 All Mailpieces

1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements.

1.2 Delivery and Return Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. Except for mail prepared with detached address labels under [602.4.0](#), the piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage. A return address is required in specific circumstances (see [4.2](#) and [602.1.5](#) for more information about return addresses). See [602](#) for additional information regarding addressing.)

1.3 Postage Payment

The mailer is responsible for proper payment of postage. Standards for postage payment are specified for each shape and class of mail.

2.0 Address Placement for Letters

2.1 Delivery Address Placement

On a letter-size piece, the recommended address placement is within the optical character reader (OCR) read area, which is a space on the address side of the mailpiece defined by these boundaries (see [Exhibit 2.1, OCR Read Area](#)):

- a. Left: 1/2 inch from the left edge of the piece.
- b. Right: 1/2 inch from the right edge of the piece.
- c. Top: 2-3/4 inches from the bottom edge of the piece.
- d. Bottom: 5/8 inch from the bottom edge of the piece.

Exhibit 2.1 OCR Read Area

2.2 Address Placement Causing Mail to be Nonmailable or Nonmachinable

The location of the delivery address on a letter-size mailpiece determines which dimensions are the length and height of the piece. Consequently, the placement of the address may render a piece nonmailable or nonmachinable.

3.0 Placement and Content of Mail Markings

3.1 Placement of Priority Mail Marking

The marking "Priority" or "Priority Mail" must be placed prominently on the address side of each piece of Priority Mail. Matter mailed in USPS-provided Priority Mail packaging is subject to Priority Mail prices regardless of how the packaging is reconfigured or how markings may be obliterated. If shipping address labels are used, it is recommended that they contain the Priority Mail service indicator composed of two elements, the service icon and service banner (see [Exhibit 3.1, Priority Mail Service Indicator](#)):

- The service icon should appear in a 1-inch square in the upper left corner of the shipping label. The letter "P" must be printed inside the 1-inch square and must be 0.75 inches (3/4 inch) or greater. A minimum 3/4-point line must border the 1-inch square.
- The service banner should appear directly below the postage payment area and the service icon, and it should extend across the shipping label. When the service banner is used, the text "USPS PRIORITY MAIL" must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text.

Exhibit 3.1 Priority Mail Service Indicator**3.2 Placement of First-Class Mail Markings**

Each single-piece price First-Class Mail piece must have a delivery address but is not required to bear the price marking “First-Class” or “First-Class Mail.”

3.3 Mail Markings

Mailers must print the basic required Package Services subclass marking—“Parcel Post” or “PP,” “Media Mail,” or “Library Mail”—on each piece claimed at the respective price. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 3.3, Package Services Indicator Examples](#)):

- a. The service icon that will identify all Package Services subclasses will be a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.
- b. The service banner must appear directly below the postage payment area and the service icon, and it must extend across the shipping label. If the service banner is used, the appropriate subclass marking (e.g., “PARCEL POST,” “MEDIA MAIL”) must be preceded by the text “USPS” and must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text.

Exhibit 3.3 Package Services Indicator Examples

4.0 Endorsement Placement

4.1 Endorsements for Delivery Instructions and Ancillary Services

The mailer must place the correct endorsement on each mailpiece to provide delivery instructions (retention period under [507.4.4.4, *Holding Mail*](#), or carrier release under [508.1.2, *Carrier Release for Uninsured Parcels*](#)) or to request an ancillary service (forwarding, return, or address correction under [507.1.1](#) and [507.1.8 in *Treatment of Mail*](#)), subject to the corresponding standards for use and availability.

4.2 Return Address

When an ancillary service endorsement is used, a domestic return address must be placed in the upper left corner of the address side of the mailpiece or the upper left corner of the addressing area. If the return address is a multiple delivery address, it must show a unit designator (e.g., an apartment number).

4.3 Placement of Endorsement

Placement of the endorsement on the mailpiece is determined as follows:

- a. The carrier release endorsement must be placed directly below the return address. If any other endorsement is used, the carrier release endorsement must be separated by the equivalent of one blank line of the type size used.
- b. A retention period specified by the mailer must be placed directly above the return address.

- c. Any ancillary service endorsement (e.g., Address Service Requested, Forwarding Service Requested, Return Service Requested, Change Service Requested) must be placed in one of these four positions:
 - 1. Directly below the return address.
 - 2. Directly above the delivery address area (which includes the delivery address block and any related nonaddress elements such as a barcode, keyline, or optional endorsement line).
 - 3. Directly to the left of the postage area and below or to the left of any price marking.
 - 4. Directly below the postage area and below any price marking.

4.4 **Physical Standards for Endorsements**

The endorsement or, if combined, endorsements must meet these physical standards:

- a. The type size of the endorsement must be at least 8 points.
- b. The read direction of the endorsement and return address must be the same as the read direction of the delivery address.
- c. The color contrast between the endorsement and the mailpiece background must be kept at a reasonable degree. A brilliant colored background or reverse printing is not permitted.
- d. A clear space of at least 1/4 inch around (above, below, and both sides) the total area containing the endorsement(s) is required. This 1/4-inch clear space is not required for an endorsement that is applied with a multiline optical character reader (MLOCR) inkjet and placed in the location directly below the postage area and any price marking if the endorsement is clear and legible.

113 Prices and Eligibility

Overview

- [1.0 Express Mail Prices and Fees](#)
- [2.0 Basic Eligibility Standards for Express Mail](#)
- [3.0 Content Standards for Express Mail](#)
- [4.0 Service Features of Express Mail](#)

1.0 Express Mail Prices and Fees

1.1 Prices Charged Per Piece

Express Mail postage is charged for each addressed piece according to its weight and zone. For shipments presented in Express Mail pouches under an Express Mail Custom Designed Service agreement, each pouch is considered an addressed piece.

1.2 Price Application

Except under [1.4, Flat-Rate Envelope](#), Express Mail items are charged the 0.5-pound price for items up to 0.5 pound. Items over 0.5 pound are rounded up to the next whole pound. For example, if a piece weighs 0.25 pound, the weight (postage) increment is 0.5 pound; if a piece weighs 0.75 pound, the weight (postage) increment is 1 pound; if a piece weighs 1.2 pounds, the weight (postage) increment is 2 pounds. Except for the Express Mail flat-rate envelope, Express Mail prices are based on weight and zone.

1.3 Prices

See [Exhibit 1.3, Express Mail—Retail Letters, Flats, & Parcels](#).

1. For Sunday/holiday delivery, add \$12.50.
2. \$16.50 is charged for material sent in an Express Mail flat-rate envelope provided by the USPS regardless of weight or destination.
3. Commercial Prices: \$16.00 is charged for material sent in an Express Mail flat-rate envelope provided by the USPS regardless of weight or destination. Postage paid through Click-N-Ship service at usps.com, registered end-users of PC Postage, and Express Mail Corporate Accounts receive a 3% price reduction. Additional volume incentives available, see 413.1.0.

1.4 Flat-Rate Envelope

[7-3-08] Material mailed in the special flat-rate envelope available from the USPS is charged \$16.50, regardless of the actual weight of the piece or its destination. Only USPS-produced flat-rate envelopes are eligible for the flat-rate envelope price. Custom Designed items are not eligible for flat-rate pricing.

1.5 Sunday and Holiday Premium

When delivery is guaranteed for a Sunday or holiday, there is a premium of \$12.50, unless paying via an Express Mail Manifesting Agreement. Customers not desiring delivery on a Sunday or a holiday may avoid the premium by opting for guaranteed delivery on the subsequent delivery day.

1.6 Pickup on Demand**1.6.1 Pickup on Demand Fee**

Per occurrence: \$14.75. May be combined with Priority Mail and Package Services pickups (see [507.6.0](#)).

1.6.2 Pickup on Demand Service

The Pickup on Demand fee is charged every time pickup service is provided, regardless of the number of pieces picked up, as described in [507.6.0](#).

1.7 Computing Postage

Determine single-piece weight and weight (postage) increment for each addressed piece. For Express Mail, affix postage to each piece under [114.1.2, Affixing Postage—Single-Piece Mailings](#).

2.0 Basic Eligibility Standards for Express Mail**2.1 Definition**

Express Mail is an expedited service for shipping any mailable matter, with guaranteed delivery, subject to the standards below. Express Mail International is available between the United States and most foreign countries (see the *International Mail Manual*).

2.2 Matter Closed Against Postal Inspection

Matter closed against postal inspection includes First-Class Mail, Priority Mail, and Express Mail. The USPS may open mail other than First-Class Mail, Priority Mail, or Express Mail to determine whether the proper postage is paid. Material wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail, Priority Mail or Express Mail price.

3.0 Content Standards for Express Mail**3.1 Eligibility**

All mailable matter may be sent as Express Mail, except matter prohibited by standards (e.g., certain hazardous materials).

113.3.2

3.2 Matter Required to be Mailed as First-Class Mail

Mailers have the option to use Express Mail service for mailpieces required to be mailed as First-Class Mail or Priority Mail. Complete descriptions of matter requiring the use of First-Class Mail are provided in [133.3.0](#).

4.0 Service Features of Express Mail

4.1 General

[9-11-08] The service features are as follows:

- a. Customers may access delivery information on the Internet by visiting www.usps.com or calling 1-800-222-1811 toll-free and providing the article number. A delivery record, including the recipient's signature, will be faxed or mailed upon request.
- b. When a waiver of signature is authorized by the mailer, the delivery employee signs upon delivery. The item is delivered to the addressee's mail receptacle or other secure location. Customers who waive the signature requirement will be provided only the delivery date and will not receive an image of the signature when accessing the delivery record on the Internet or when calling the toll-free number. Restrictions for waiver of signature are defined in [503.1.1.6, Insurance and Indemnity](#), and [503.1.1.7, Additional Insurance](#).

4.2 Express Mail Next Day Delivery

4.2.1 Availability

Express Mail Next Day Delivery is available at designated USPS facilities, designated Express Mail collection boxes, or through Carrier Pickup or Pickup on Demand service, for overnight service to designated destination 3-digit ZIP Code delivery areas, facilities, or locations (Post Office to Addressee Service). Items are delivered by noon or 3 p.m. on the next day. If delivery is not made, the addressee is notified, a second notice is left on the third day, and a second delivery is attempted upon customer request. For additional options, see [4.2.4, Hold for Pickup](#) and [4.5, Custom Designed](#).

4.2.2 Where Not Available

Next Day Delivery may not be available at or between all Post Offices or at all times of deposit. An Express Mail Next Day Delivery directory, showing detailed local information about Express Mail Next Day Delivery, is available at Post Offices.

4.2.3 Acceptance Times

Express Mail Next Day Delivery items must be presented no later than the times authorized by the postmaster. Express Mail Next Day Delivery items mailed after the time authorized by the postmaster are accepted for delivery on the second day after mailing, subject to the standards for this service, unless the item was:

- a. Delayed by strike or work stoppage.
- b. Made available for claim, or delivery was attempted within the times specified by the standards for this service, and then the item was delayed because forwarding or return service was provided.

4.2.4 Hold for Pickup

Under Hold for Pickup service, items presented under [4.2.1](#) are available for claim by the addressee at the destination facility by 10 a.m., 12 p.m., or 3 p.m. of the next day the destination office is open for retail business.

4.2.5 Refunds

For Express Mail Next Day Delivery, the USPS refunds the postage for an item not available for customer pickup at destination or for which delivery to the addressee was not attempted, subject to the standards for this service, unless the delay was caused by one of the situations in [114.3.1, Postage Not Refunded](#).

4.3 Express Mail Second Day Delivery

4.3.1 Availability

Express Mail Second Day Delivery is available to any 3-digit or 5-digit ZIP Code destination not listed in the Next Day Delivery directory mentioned in [4.2.2](#) (Post Office to Addressee Service). Items are delivered to the addressee by noon or 3 p.m. on the second delivery day. If delivery is not made, the addressee is notified, a second notice is left on the third day, and a second delivery is attempted upon customer request. For additional options, see [4.3.4, Hold for Pickup](#) and [4.5, Custom Designed](#).

4.3.2 Acceptance

Express Mail Second Day Delivery is accepted at designated USPS facilities, at Express Mail collection boxes, and through Pickup on Demand service.

4.3.3 Acceptance Times

Express Mail Second Day Delivery shipments must be presented by 5 p.m., or such later time authorized by the postmaster. For Second Day Delivery, the USPS refunds postage for an item not available for customer pickup or for which delivery was not attempted, subject to the standards for this service, unless the item was:

- a. Delayed by strike or work stoppage.
- b. Made available for claim, or delivery was attempted within the times specified by the standards for this service, and then the item was delayed because forwarding or return service was provided.

4.3.4 Hold for Pickup

Under Hold for Pickup service, items presented under [4.3.3](#) are available for pick up by the addressee at the destination facility by 10 a.m., 12 p.m., or 3 p.m. of the second delivery day that the destination office is open for retail business.

4.3.5 Refunds

For Express Mail Next Day Delivery, the USPS refunds the postage for an item not available for customer pickup at destination or for which delivery to the addressee was not attempted, subject to the standards for this service, unless the delay was caused by one of the situations in [114.3.1, Postage Not Refunded](#).

113.4.4

4.4 Express Mail Military Service (EMMS)

4.4.1 Objectives

For Express Mail Military Service (EMMS), items presented at APO/FPO facilities before the published cut-off time are delivered the second day after acceptance. Items presented after the published cut-off time are delivered the third day after acceptance. For EMMS, the USPS refunds postage for an item not available for customer pickup at the APO/FPO of address or for which delivery to the addressee was not attempted domestically within the times specified by the standards for this service, unless the item was delayed by Customs; the item was destined for an APO/FPO that was closed on the intended day of delivery (delivery is attempted the next business day); or the delay was caused by one of the situations in [114.3.1, Postage Not Refunded](#).

4.4.2 Availability

EMMS (under [703.2.6, Express Mail Military Service \(EMMS\)](#)) is available between the United States and designated APOs and FPOs to provide Department of Defense personnel stationed overseas, and others entitled to APO and FPO mailing privileges, an expedited delivery service to or from the United States. EMMS Custom Designed Service and EMMS drop shipment service are available to authorized APO/FPO destinations.

4.5 Custom Designed

4.5.1 Availability

A service agreement is required for Custom Designed mailings (see [413.4.4](#)). An Express Mail Manifesting agreement is required for all manifested Express Mail items accepted under [705.2.6, Express Mail Manifesting Agreements](#).

4.6 Drop Shipment

Express Mail Custom Designed Service, Express Mail Next Day Service, and Express Mail Second Day Service may be used to expedite movement of any other class of mail from one domestic USPS facility to another by Express Mail drop shipment, subject to the corresponding standards. For more information, see [705.16.0](#).

114 Postage Payment Methods

Overview

- [1.0 Postage Payment Methods](#)
- [2.0 Corporate Accounts](#)
- [3.0 Postage Refunds](#)

1.0 Postage Payment Methods

1.1 Payment Method

Retail Express Mail postage may be paid with adhesive stamps (see [604.1.0](#)) or with meter stamps (see [604.4.0](#)). The mailer is responsible for proper payment of postage.

1.2 Affixing Postage—Single-Piece Mailings

In a postage-affixed Express Mail mailing, the mailer must affix to each piece a value in adhesive stamps or meter stamps equal to at least the postage required.

1.3 Prepaid Reply Postage

Meter stamps may be used to prepay reply postage on any Express Mail shipment. The mailer must place meter stamps, sufficient to prepay postage in full, on the envelope, tube, or other mailing container that bears the return address of the meter license holder. Reply mail prepaid with meter stamps is delivered only to the address of the meter license holder. If the address is altered, the mail is held for postage.

2.0 Corporate Accounts

2.1 Availability

A corporate account (see [414.2.0](#)) is available to any mailer, subject to [414.2.3](#) through [414.2.6](#) and the terms on Form 5639. The address provided by the mailer on Form 5639 must be valid as a condition of an account being opened.

3.0 Postage Refunds

3.1 Postage Not Refunded

Postage refunds may not be available if delivery was attempted within the times required for the specific service, or if the delay of the item was caused by any of the following reasons:

- a. Properly detained for law enforcement purpose; strike or work stoppage; delayed because of an incorrect ZIP Code or address; forwarding or return service was provided after the item was made available for claim; delay or cancellation of flights. Attempted delivery occurs under any of these situations when the delivery is physically attempted, but cannot be made; the shipment is available for delivery, but the addressee made a written request that the

114.3.1

shipment be held for a specific day or days; the delivery employee discovers that the shipment is undeliverable as addressed before leaving on the delivery route.

- b. As authorized by USPS Headquarters, when the delay was caused by governmental action beyond the control of the USPS or air carriers; war, insurrection, or civil disturbance; breakdown of a substantial portion of the USPS transportation network resulting from events or factors outside the control of the USPS; or acts of God.

115 Mail Preparation

Overview

- 1.0 Express Mail Packaging
- 2.0 Express Mail Next Day and Second Day
- 3.0 Firm Mailing Book

1.0 Express Mail Packaging

1.1 Packaging Supplies Provided by USPS

Express Mail packaging provided by the USPS must be used only for Express Mail. Regardless of how the packaging is reconfigured or how markings may be obliterated, any matter mailed in USPS-provided Express Mail packaging is charged the appropriate Express Mail price.

2.0 Express Mail Next Day and Second Day

2.1 Mailing Label

For each Express Mail item, the mailer must complete a mailing label – either Label 11-A or Label 11-E for Hold for Pickup service, or Label 11-B or Label 11-F for Post Office to Addressee service. Mailers authorized to present Next Day or Second Day Express Mail items using an Express Mail Manifesting System are required to follow label preparation procedures in Publication 97, *Express Mail Manifesting Technical Guide*.

2.2 Waiver of Signature

[9-11-08] A mailer sending an Express Mail item may instruct the USPS to deliver an Express Mail Next Day Delivery or Express Mail Second Day Delivery item without obtaining the signature of the addressee or the addressee's agent by checking and signing the waiver of signature on Label 11-B or Label 11-F, Express Mail Post Office to Addressee, or indicating waiver of signature is requested on single-ply commercial label. Completion of the waiver of signature authorizes the delivery employee to sign upon delivery. The item is delivered to the addressee's mail receptacle or other secure location. Mailers who request waiver of signature will be provided only the delivery date and time, and not an image of the signature when accessing delivery information on the Internet or when calling the toll-free number.

2.3 ZIP Code Determination

For Express Mail Next Day Delivery, the mailer must determine whether the item is destined to a 3-digit ZIP Code area to which Express Mail Next Day Delivery is offered from the point of origin. An Express Mail Next Day Delivery directory, showing detailed local information about Express Mail Next Day Delivery, is available at Post Offices. If the destination is not listed, the mailer must use Express Mail Second Day Delivery.

115.3.1

3.0 Firm Mailing Book

3.1 **Completing a Firm Mailing Book**

Form 3877 is available at no cost to any mailer who mails an average of three or more Express Mail items at one time, following these instructions:

- a. The mailer must prepare Express Mail Next Day Delivery or Second Day Delivery items as described above.
- b. Form 3877 must be presented with the items to be mailed.
- c. The mailer must enter on Form 3877 the full number of each Express Mail item and the addressee's name and address.
- d. All entries must be made in duplicate. One copy is kept by the accepting employee. The other is receipted and returned to the mailer.
- e. All unused parts of the address column in Form 3877 must be obliterated by drawing a diagonal line through the unused part. Any alteration must be initialed by the mailer and accepting employee.
- f. For Express Mail Manifesting, a special verification manifest is used to present Express Mail items for acceptance as described in Publication 97, *Express Mail Manifesting Technical Guide*. Form 3877, *Firm Mailing Book for Accountable Mail*, may be used only to list items for which extra services have been requested. See [705.2.6, Express Mail Manifesting Agreements](#), for information.

116 Deposit

Overview

- [1.0 Express Mail Next Day and Second Day Delivery](#)
- [2.0 Express Mail Military Service](#)
- [3.0 Pickup on Demand Service](#)

1.0 Express Mail Next Day and Second Day Delivery

1.1 Deposit of Next Day and Second Day Delivery

Express Mail Next Day and Second Day Delivery items:

- a. If not prepaid, must be deposited at places and times designated by the postmaster, including Post Offices, branches, or stations. The “time and date of mailing” for these items is the time and date when the items are presented and accepted.
- b. If prepaid, may be deposited in Express Mail collection boxes, handed to delivery and collection employees during their normal delivery and collection duties, or picked up by USPS Pickup on Demand service. The “time and date of mailing” for items deposited in these ways is the time and date the items are brought to the Express Mail acceptance unit.
- c. If manifested, will be accepted at the locations specified in the Express Mail Manifesting agreement.

2.0 Express Mail Military Service

2.1 Deposit

Express Mail Military Service items must be presented by the times authorized by the local postmaster.

3.0 Pickup on Demand Service

3.1 Availability

Express Mail Pickup on Demand service is available from designated Post Offices.

3.2 Pickup on Demand Fee

The Pickup on Demand fee is assessed and paid as described in [507.6.0](#).

116

Retail Mail: Express Mail Deposit

- 126 Deposit

123 Prices and Eligibility

Overview

- [1.0 Priority Mail Prices and Fees](#)
- [2.0 Basic Eligibility Standards for Priority Mail](#)
- [3.0 Content Standards for Priority Mail](#)

1.0 Priority Mail Prices and Fees

1.1 Price Application

Except under [1.2](#), [1.3](#), and [1.4](#), Priority Mail prices are charged per pound; any fraction of a pound is rounded up to the next whole pound. For example, if a piece weighs 1.2 pounds, the weight (postage) increment is 2 pounds. The minimum postage amount per addressed piece is the 1-pound price. The Priority Mail price up to 1 pound is based on weight only; prices for pieces weighing more than 1 pound are based on weight and zone. Other charges may apply. See [Exhibit 1.2, Priority Mail Prices—Retail](#).

1.2 Balloon Price

Parcels addressed for delivery to Zones 1-4 (including Local) that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable zone price for a 20-pound parcel (balloon price).

123

Retail Mail: Priority Mail Prices and Eligibility

70	32.45	32.45	48.90	61.80	69.80	78.90	103.10

1. Parcels addressed for delivery to zones 1-4 (including local) that weigh less than 20 pounds but measure more than 84 inches in combined length and girth (but not more than 108 inches) are charged the applicable price for a 20-pound parcel (balloon price).
2. Parcels addressed for delivery to zones 5-8 that exceed 1 cubic foot (1,728 cubic inches) are charged based on the actual weight or the dimensional weight (as calculated in [123.1.3](#)), whichever is greater.
3. For keys and ID devices that weigh:
 - Up to 13 ounces, refer to retail First-Class Mail parcel prices.
 - More than 13 ounces but not more than 1 pound, \$5.52.
 - More than 1 pound but not more than 2 pounds, \$6.32.
4. \$4.80 is charged for matter sent in a Priority Mail flat-rate envelope provided by the USPS, regardless of weight or destination.
5. \$9.80 is charged for material sent in a Priority Mail regular flat-rate box provided by the USPS, regardless of weight or destination.
6. \$12.95 is charged for material sent in a Priority Mail large flat-rate box provided by the USPS, regardless of weight to domestic addresses, and \$10.95 for material sent in a Priority Mail large flat-rate box to APO/FPO destination addresses.

1.3 Dimensional Weight Price for Low-Density Parcels to Zones 5-8

Postage for parcels addressed for delivery to Zones 5-8 and exceeding 1 cubic foot (1,728 cubic inches) is based on the actual weight or the dimensional weight (as calculated in [1.3.1](#) or [1.3.2](#)), whichever is greater.

1.3.1 Determining Dimensional Weight for Rectangular Parcels

Follow these steps to determine the dimensional weight for a rectangular parcel:

- a. Measure the length, width, and height in inches. Round off (see [604.7.0](#)) each measurement to the nearest whole inch.
- b. Multiply the length by the width by the height.
- c. If the result exceeds 1,728 cubic inches, divide the result by 194 and round up (see [604.7.0](#)) to the next whole number to determine the dimensional weight in pounds.

1.3.2 Determining Dimensional Weight for Nonrectangular Parcels

Follow these steps to determine the dimensional weight for a nonrectangular parcel:

- a. Measure the length, width, and height in inches at their extreme dimensions. Round off (see [604.7.0](#)) each measurement to the nearest whole inch.
- b. Multiply the length by the width by the height.
- c. Multiply the result by an adjustment factor of 0.785.
- d. If the final result exceeds 1,728 cubic inches, divide the result by 194 and round up (see [604.7.0](#)) to the next whole number to determine the dimensional weight in pounds.
- e. If the dimensional weight exceeds 70 pounds, the mailer pays the 70-pound price.

1.4 Flat-Rate Envelope and Boxes

Any amount of material may be mailed in a USPS-produced Priority Mail flat-rate box or flat-rate envelope. When sealing a flat-rate box or flat-rate envelope, the container flaps must be able to close within the normal folds. Tape may be applied to the flaps and seams to reinforce the container, provided the design of the container is not enlarged by opening the sides and the container is not reconstructed in any way.

1.4.1 Flat-Rate Envelope—Price and Eligibility

Each USPS-produced Priority Mail flat-rate envelope is charged \$4.80, regardless of the actual weight of the piece or its destination. Only USPS-produced flat-rate envelopes are eligible for the flat-rate envelope price.

1.4.2 Flat-Rate Boxes—Price and Eligibility

Items to an APO/FPO address may be shipped in the Priority Mail large flat-rate box or in a special version of the box identified with the additional logo:

“Americasupportsyoudomestic.mil.” If the special version of the APO/FPO flat-rate box is used for non-APO/FPO addresses, the domestic or international large flat-rate box prices will apply. Only USPS-produced flat-rate boxes are eligible for the flat-rate box prices.

Each USPS-produced Priority Mail flat-rate box, regardless of the actual weight of the piece or its destination, is charged:

- a. \$9.80 for material sent in Priority Mail regular flat-rate boxes (FRB-1) or (FRB-2) to domestic and APO/FPO addresses.
- b. \$10.95 for material sent in a Priority Mail large flat-rate box to APO/FPO destination addresses (see 703.2).
- c. \$12.95 for material sent in a Priority Mail large flat-rate box to domestic destinations.

1.5 Prices for Keys and Identification Devices

WEIGHT NOT OVER (pounds)	PRICE ¹
1 pound	\$5.52
2 pounds ²	6.32

- 1. Prices shown include \$0.72 fee.
- 2. Zone 4 postage charged for all pieces.

1.6 Keys and Identification Devices

Keys and identification devices (e.g., identification cards or uncovered identification tags) that weigh more than 13 ounces but not more than 1 pound are returned at the 1-pound Priority Mail price plus the fee. Keys and identification devices weighing more than 1 pound but not more than 2 pounds are mailed at the 2-pound Priority Mail price for zone 4 plus the fee. The key or identification device must bear, contain, or have securely attached the name and complete address of a person, organization, or concern, with instructions to return the key or identification device to that address and a statement guaranteeing payment of postage due on delivery.

1.7 Pickup on Demand Fee

Per occurrence: \$14.75. May be combined with Express Mail and Package Services pickups (see 507.6.0, [Pickup on Demand Service](#)).

1.8 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.9 Computing Postage

Determine single-piece weight increment for each piece and affix postage to each piece under 124.1.2, [Affixing Postage—Single-Piece Mailings](#) (as applicable) or, for permit imprint mailings, multiply the number of addressed pieces at each price increment by the corresponding postage price.

2.0 Basic Eligibility Standards for Priority Mail

2.1 Definition

Priority Mail is an expedited service and may contain any mailable matter weighing no more than 70 pounds except for APO and FPO mail subject to [703.2.0](#), [Overseas Military Mail](#), [703.4.0](#), [Mail Sent by U.S. Armed Forces](#), and Department of State mail subject to [703.3.0](#). Priority Mail prices are based on zone and weight.

2.2 Service Objectives

All Priority Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information.

2.3 Matter Closed Against Postal Inspection

Matter closed against postal inspection includes First-Class Mail, Priority Mail, and Express Mail. The USPS may open mail other than First-Class Mail, Priority Mail or Express Mail to determine whether the proper postage is paid. Material wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail, Priority Mail, or Express Mail price.

3.0 Content Standards for Priority Mail

3.1 Eligibility

All mailable matter may be sent as Priority Mail, except matter prohibited by standards (e.g., certain hazardous materials).

3.2 Matter Required to be Mailed as First-Class Mail

Unless Express Mail is used, Priority Mail prices are required for a mailpiece that weighs more than 13 ounces when the mailpiece contains matter that must be mailed as First-Class Mail. Complete descriptions of matter requiring the use of First-Class Mail are provided in [133.3.0](#).

124 Postage Payment Methods

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Postage Paid With Permit Imprint](#)

1.0 Basic Standards for Postage Payment

1.1 Payment Method

Priority Mail postage may be paid with postage stamps (see [604.1.0](#)), meter stamps (see [604.4.0](#)), or permit imprint (see [604.5.0](#)).

1.2 Affixing Postage—Single-Piece Mailings

In a postage-affixed mailing, the mailer must apply enough value in adhesive stamps or meter stamps equal to the postage required (including any surcharges). A mailer also may use precanceled stamps on Priority Mail.

2.0 Postage Paid With Permit Imprint

2.1 Advance Deposit Account

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees. This method must not be used to pay postage on any mailpiece that is designed for reply mail purposes.

2.2 Minimum Quantity

Permit imprint mailings must contain at least 200 pieces or 50 pounds submitted under the terms of an approved manifest mailing system agreement with exceptions allowed under a minimum volume reduction provision.

2.3 Postage Statement

A complete postage statement must accompany each mailing paid with a permit imprint.

125 Mail Preparation

Overview

- [1.0 Preparation](#)
- [2.0 Marking for Priority Mail](#)
- [3.0 Preparation for a Permit Imprint Mailing](#)

1.0 Preparation

1.1 Priority Mail Packaging Provided by the USPS

Priority Mail packaging provided by the USPS must be used only for Priority Mail. Regardless of how the packaging is reconfigured or how markings may be obliterated, any matter mailed in USPS-provided Priority Mail packaging is charged the appropriate Priority Mail price.

1.2 Required Use

The sender's domestic return address must appear legibly on Priority Mail.

2.0 Marking for Priority Mail

2.1 Marking

The marking "Priority" or "Priority Mail" must be placed prominently on the address side of each piece of single-piece price Priority Mail.

3.0 Preparation for a Permit Imprint Mailing

3.1 Preparing a Permit Imprint Mailing

To use a permit imprint, the pieces must be of identical weight and, unless all the pieces are in a weight category for which the price does not vary by zone, the pieces must be separated by zone when presented to the Post Office.

3.2 Payment Method

A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

126 Deposit

Overview

- [1.0 Deposit](#)
- [2.0 Pickup on Demand Service](#)

1.0 Deposit

1.1 Pieces Weighing 13 Ounces or Less

Priority Mail weighing 13 ounces or less may be deposited into any collection box, mail chute, or mail receptacle or at any place where mail is accepted if the full required postage is paid with adhesive stamps. Metered mail must be deposited in locations under the jurisdiction of the licensing Post Office, except as permitted under [604.4.0, Postage Meters and PC Postage Products \("Postage Evidencing Systems"\)](#). Permit imprint mail must be presented at a Post Office under [604.5.0, Permit Imprint \(Indicia\)](#) or [705, Advanced Preparation and Special Postage Payment Systems](#).

1.2 Pieces Weighing More than 13 Ounces

Priority Mail weighing more than 13 ounces must be presented at a Post Office retail counter if postage is paid with adhesive stamps. The sender may be required to provide identification before the mail is accepted by the USPS. Such mail may be presented by a sender known to the postal carrier at the sender's residence or place of business. Priority Mail weighing more than 13 ounces and not complying with the requirements of this section is returned to the sender for proper deposit.

2.0 Pickup on Demand Service

2.1 Availability

Priority Mail Pickup on Demand service is available from designated Post Offices.

130 Retail Mail First-Class Mail

- 133 Prices and Eligibility
- 134 Postage Payment Methods
- 135 Mail Preparation
- 136 Deposit

133 Prices and Eligibility

Overview

- [1.0 First-Class Mail Prices and Fees](#)
- [2.0 Basic Eligibility Standards for First-Class Mail](#)
- [3.0 Content Standards](#)

1.0 First-Class Mail Prices and Fees

1.1 First-Class Mail Single-Piece Price Application

The single-piece prices for First-Class Mail are applied as follows:

- a. The card price applies to a card meeting the applicable standards in [101.6.3, Cards Claimed at Card Prices](#).
- b. The letter price applies to letter-size pieces that meet the standards in [101.1.1](#) and weigh 3.5 ounces or less, and that are not eligible for and claimed at the card price.
- c. The flat price applies to flat-size pieces that meet the standards in [101.2.1](#).
- d. The parcel price applies to parcel-size pieces under [101.3.0](#) and to flat-size pieces that do not meet the standards in [101.2.0](#)

1.2 Price Computation for First-Class Mail

First-Class Mail prices are charged per ounce or fraction thereof; any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 1.2 ounces, the weight (postage) increment is 2 ounces. The minimum postage per addressed piece is that for a piece weighing 1 ounce.

1.3 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1. For keys and ID devices, add \$0.72. If more than 13 ounces, see retail Priority Mail prices.

1.7 Keys and Identification Devices

Keys and identification devices (such as identification cards and uncovered identification tags) that weigh 13 ounces or less are returned at the applicable single-piece First-Class Mail parcel price plus the fee. Keys and identification devices that weigh more than 13 ounces but not more than 1 pound are returned at the 1-pound Priority Mail price plus the fee. Keys and identification devices weighing more than 1 pound but not more than 2 pounds are mailed at the 2-pound Priority Mail price for zone 4 plus the fee. The key or identification device must bear, contain, or have securely attached the name and complete address of a person, organization, or concern, with instructions to return the key or identification device to that address and a statement guaranteeing payment of postage due on delivery.

2 pounds	6.32

1. Prices shown include \$0.72 fee.

1.9 Nonmachinable Surcharge

Surcharge per piece: \$0.20.

1.10 Applicability of Nonmachinable Surcharge

The nonmachinable surcharge applies to letter-size pieces that meet one or more of the nonmachinable characteristics in [101.1.2](#). Pieces mailed at the card price are not subject to the nonmachinable surcharge.

1.11 Computing Postage—First-Class Mail

Determine single-piece weight and weight (postage) increment for each addressed piece as prescribed in [1.2, Price Computation for First-Class Mail](#), and [1.7, Keys and Identification Devices](#). For First-Class Mail, affix postage to each piece under [134.1.2, Affixing Postage—Single-Piece Price Mailings](#), or, for permit imprint mailings, multiply the number of addressed pieces at each price increment by the corresponding postage.

2.0 Basic Eligibility Standards for First-Class Mail

2.1 Description of Service

2.1.1 Service Objectives

First-Class Mail receives expeditious handling and transportation. Service objectives for delivery are 1 to 3 days; however, delivery time is not guaranteed.

2.1.2 Price Options

First-Class Mail offers shape-based single-piece prices in [1.0](#).

2.2 Defining Characteristics

2.2.1 Inspection of Contents

First-Class Mail is closed against postal inspection. Federal law and USPS regulations restrict both opening and reviewing the contents of First-Class Mail by anyone other than the addressee.

2.2.2 Forwarding Service

The price of First-Class Mail includes forwarding service to a new address for up to 12 months.

2.2.3 Return Service

The price of First-Class Mail includes return service if the mailpiece is undeliverable.

2.2.4 Extra Services Exclusive to First-Class Mail

First-Class Mail (including Priority Mail) is the only class of mail eligible to receive the following extra services: Registered Mail service and Certified Mail service.

2.2.5 Additional Extra Services

Additional extra services available with First-Class Mail are certificate of mailing service, COD service, Delivery Confirmation service (parcels only), insured mail service (merchandise only), return receipt service, restricted delivery service, Signature Confirmation service (parcels only), and special handling. See information regarding extra services in [503](#).

3.0 Content Standards

3.1 General Eligibility

With the exception of restricted material as described in [601.8.0](#), any mailable item, including postcards, letters, flats, and small packages, may be mailed as First-Class Mail.

3.2 Bills and Statements of Account

Bills and statements of account must be mailed as First-Class Mail, Priority Mail, or Express Mail and are defined as follows:

- a. Bills and statements of account assert a debt in a definite amount owed by the addressee to the sender or a third party. In addition, bills include a demand for payment; statements of account do not include a demand for payment. The debt does not have to be due immediately but may become due at a later time or on demand. The debt asserted need not be legally collectible or owed.
- b. Bills and statements of account do not need to state the precise amount due if they contain information that would enable the debtor to determine that amount.

3.3 Personal Information

Mail containing personal information must be mailed as First-Class Mail, Priority Mail, or Express Mail. Personal information is any information specific to the addressee.

133.3.4

3.4 Handwritten and Typewritten Material

Mail containing handwritten or typewritten material must be mailed as First-Class Mail or Express Mail.

3.5 Matter Marked Postcard or Double Postcard

Any matter marked “Postcard” or “Double Postcard” must be mailed as First-Class Mail or Express Mail.

3.6 Matter Not Required to be Mailed as First-Class Mail

Matter eligible for Standard Mail or Package Services prices or authorized as Periodicals is not required to be mailed as First-Class Mail or Express Mail.

3.7 Prohibited Air Transportation

All First-Class Mail is subject to limitations for air transportation. Generally, all mailable matter may be transported by aircraft, unless restricted in [601.10.0, Hazardous Materials](#).

134 Postage Payment Methods

Overview

- [1.0 Postage Payment Methods for First-Class Mail](#)
- [2.0 Postage Paid With Permit Imprint](#)

1.0 Postage Payment Methods for First-Class Mail

1.1 Payment Method

Postage for single-piece First-Class Mail must be paid with affixed postage stamps ([604.1.0](#)), metered postage ([604.4.0](#)) or permit imprint ([604.5.0](#)) as specified in [1.0](#). A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters. The mailer is responsible for prompt payment of postage.

1.2 Affixing Postage—Single-Piece Price Mailings

In a postage-affixed single-piece mailing, the mailer must apply enough value in adhesive stamps or meter stamps equal to the postage required (including any surcharges). A mailer also may use precanceled stamps on single-piece First-Class Mail under [604.3.5](#), *Stamp Collectors*.

1.3 More Than One Mailer

When two or more individuals or organizations, or a party acting as their agent, mail in one package the bills, statements of account, or other letters of the individuals or organizations, to an addressee in common, First-Class Mail postage may be paid on the weight of the entire package of aggregated mail. Postage is not required on each individual piece of First-Class Mail.

1.4 More Than One Letter

An individual or organization may mail in one envelope more than one of the mailer's own letters and pay First-Class Mail postage on the weight of the entire package of letters if:

- a. The letters are for persons at the same residence or working for the same organization at the address on the envelope (if the letters relate to the business of such organization); or
- b. The letters are sent to a party who turns them over to other persons as part of a minor service provided in addition to a substantial and independent sales, service, or other business function that party performs for such persons.

1.5 Agent

Any agent of a licensing authority may forward completed applications in one envelope to an office of the licensing authority and pay First-Class Mail postage on the weight of the piece.

134.2.1

2.0 Postage Paid With Permit Imprint

2.1 **Advance Deposit Account**

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees. This method must not be used to pay postage on any mailpiece that is designed for reply mail purposes.

2.2 **Minimum Quantity**

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except that an occasional First-Class Mail mailing may contain fewer than 200 pieces if from a mailer whose total daily mailings are not much more than 200 pieces but who, to cooperate with the Post Office, presents a part of that mail early in the day.

2.3 **Postage Statement**

A complete postage statement must accompany each mailing paid with a permit imprint.

135 Mail Preparation

Overview

[1.0 Preparation for First-Class Mail](#)

1.0 Preparation for First-Class Mail

1.1 Preparation of First-Class Mail

The following standards apply to single-piece First-Class Mail:

- a. Each piece must have a delivery address but is not required to bear the marking “First-Class” or “First-Class Mail.”
- b. No minimum quantity is required unless postage is paid with a permit imprint (in which case the mailing must contain at least 200 pieces or 50 pounds of pieces).
- c. There are no sorting requirements for single-piece First-Class Mail, but five or more letter-size pieces bearing metered postage and all pieces bearing permit imprints must be faced with the addresses in one direction and bundled. Bundling of letter-size pieces is not required if they fill a letter tray. Metered mail and permit imprint mail may not be bundled or trayed together.

136 Deposit

Overview

[1.0 Deposit for First-Class Mail](#)

1.0 Deposit for First-Class Mail

1.1 **Single-Piece and Card Mailings**

Single-piece First-Class Mail letters and cards may be deposited into any collection box, mail receptacle, or at any place where mail is accepted if the full required postage is paid with adhesive stamps. Metered mail must be deposited in locations under the jurisdiction of the licensing Post Office, except as permitted under [604.4.0, *Postage Meters and PC Postage Products \("Postage Evidencing Systems"\)*](#). Permit imprint mail must be presented at a Post Office under [604.5.0, *Permit Imprint \(Indicia\)*](#), or [705, *Advanced Preparation and Special Postage Payment Systems*](#).

1.0 Parcel Post Prices and Fees

1.1 Price Eligibility

There are two Parcel Post retail price categories: Intra-BMC and Inter-BMC. Intra-BMC and Inter-BMC Parcel Post prices are calculated based on the zone to which the parcel is addressed and the weight of the parcel. Requirements for Parcel Post prices are as follows:

- a. Intra-BMC applies to all Parcel Post that originates and destines in the service area of the same BMC or ASF. Intra-BMC also apply to Parcel Post that originates and destines in the same state for Alaska and Hawaii and in the same territory for Puerto Rico. See [Exhibit 1.1, BMC/ASF Service Areas](#). Nonmachinable pieces ([101.3.3, Machinable Parcels](#), and [101.7.2, Nonmachinable Parcel Post Standards](#)) mailed at Intra-BMC prices are subject to a nonmachinable surcharge in addition to postage.
- b. Inter-BMC applies to all Parcel Post that originates in the service area of a BMC or ASF or in Alaska, Hawaii, or Puerto Rico and destines outside that area, state, or territory. Nonmachinable pieces ([101.3.3, Machinable Parcels](#), and [101.7.2, Nonmachinable Parcel Post Standards](#)) mailed at Inter-BMC prices are subject to a nonmachinable surcharge in addition to postage.
- c. The oversized price applies to pieces that measure over 108 inches but not more than 130 inches in combined length and girth.
- d. Parcels that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable price for a 20-pound parcel (balloon price).

Other	
Puerto Rico	006-009
Hawaii	967-969
Alaska	995-999

1.2 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.3 Parcel Post Price Application

The Parcel Post price is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage per piece is the 1-pound price.

1.4 Computing Postage—Parcel Post With Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable price per piece.

1.5 Computing Postage—Parcel Post With Postage Affixed

For each piece, affix the postage for the weight increment (including any surcharges) and the zone to which the piece is addressed, as shown in [1.7](#) through [1.11](#) in [Parcel Post Prices and Fees](#).

1.6 Pickup on Demand Fees

Parcel Post only, per occurrence: \$14.75.

May be combined with Express Mail and Priority Mail pickups (see [507.6.0](#), [Pickup on Demand Service](#)).

1.7 Inter-BMC/ASF Machinable Parcel Post

Parcels that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable price for a 20-pound parcel (balloon price).

1.8 Inter-BMC/ASF Nonmachinable Parcel Post

Prices include the \$3.70 nonmachinable surcharge. Regardless of weight, a parcel with any of the characteristics in [101.7.2](#), [Nonmachinable Parcel Post Standards](#), must pay the price listed in [Exhibit 1.9](#). Parcels that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable price for a 20-pound parcel (balloon price). The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

1.9 Inter-BMC/ASF Machinable and Nonmachinable Parcel Post Prices

See [Exhibit 1.9](#), [Inter-BMC/ASF Machinable and Nonmachinable Parcel Post Prices](#).

- For parcels that destinate to different BMC service areas (see 153.1.1).
- Parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound price (balloon price).
 - More than 108 inches but not more than 130 inches, use oversized prices regardless of weight.
- Regardless of weight, a parcel that meets any of the criteria in 101.7.2 must pay the nonmachinable price.
- Prices include the \$3.70 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

- For parcels that destinate to different BMC service areas (see 153.1.1).
- Parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound price (balloon price).
 - More than 108 inches but not more than 130 inches, use oversized prices regardless of weight.
- Regardless of weight, a parcel that meets any of the criteria in 101.7.2 must pay the nonmachinable price.
- Prices include the \$3.70 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

153.1.10

1.10 Local and Intra-BMC/ASF Machinable Parcel Post

Prices for parcels that originate and destinate in the same BMC service area are in [Exhibit 1.12, Local and Intra-BMC/ASF Machinable and Nonmachinable Parcel Post Prices](#). Parcels that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable price for a 20-pound parcel (balloon price). Regardless of weight, a parcel with any of the characteristics in [101.7.2](#) must pay the price for a nonmachinable parcel in [1.11](#).

1.11 Local and Intra-BMC/ASF Nonmachinable Parcel Post

Prices include the \$2.73 nonmachinable surcharge. Regardless of weight, a parcel with any of the characteristics in [101.7.2, Nonmachinable Parcel Post Standards](#), must pay the prices in [Exhibit 1.12](#). Parcels that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable price for a 20-pound parcel (balloon price). The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

1.12 Local and Intra-BMC/ASF Machinable and Nonmachinable Parcel Post Prices

- For parcels that originate and destinate in the same BMC service area.
- Parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound price (balloon price).
 - More than 108 inches but not more than 130 inches, use oversized prices regardless of weight.
- Regardless of weight, a parcel that meets any of the criteria in [101.7.2](#) must pay the nonmachinable price.
- Prices include the \$2.73 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

2.0 Basic Eligibility Standards for Parcel Post

2.1 Definition of Parcel Post

Parcel Post is a subclass of Package Services. Any Package Services matter may be mailed at Parcel Post prices.

2.2 Service Objectives

The USPS does not guarantee the delivery of Parcel Post within a specified time. Parcel Post might receive deferred service. The local Post Office can provide more information concerning delivery times within its area.

2.3 Postal Inspection

Parcel Post mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Parcel Post prices constitutes consent by the mailer to postal inspection of the contents.

2.4 Delivery and Return Addresses

All Parcel Post mail must bear a delivery address. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address.

3.0 Content Standards

3.1 General Content Standards

Parcel Post mail consists of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (except as permitted under [3.2](#) or permitted or required under [707.7.9](#)). The general public (other than publishers or registered news agents) may mail copies of Periodicals publications at Parcel Post prices.

3.2 Attachments or Enclosures of Periodicals Sample Copies

Sample copies of authorized and pending Periodicals publications may be enclosed or attached with merchandise sent at Parcel Post prices. Postage at Parcel Post prices is based on the combined weight of the host piece and the sample copies enclosed.

4.0 Attachments and Enclosures

4.1 Enclosures

Parcel Post may contain any printed matter mailable as Standard Mail, in addition to the enclosures and additions listed in [4.0](#).

4.2 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.

153.4.3

- c. Words or phrases such as “Do Not Open Until Christmas” and “Happy Birthday, Mother.”
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

4.3 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Parcel Post piece or in an envelope marked “Invoice Enclosed” and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

4.4 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Parcel Post piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Parcel Post price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

154 Postage Payment Methods

Overview

- [1.0 Postage Payment Methods for Parcel Post](#)
- [2.0 Postage Paid With Permit Imprint](#)

1.0 Postage Payment Methods for Parcel Post

1.1 Payment Method

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Parcel Post mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only under [705, *Advanced Preparation and Special Postage Payment Systems*](#). Permit imprint may be used for identical-weight pieces provided the mail can be separated at acceptance into groups that each contain pieces subject to the same zone and same combination of prices. Identical-weight permit imprint mail also may be mailed under [705](#).

1.2 Affixing Postage—Single-Piece Mailings

In a postage-affixed single-piece mailing, the mailer must apply enough value in adhesive stamps or meter stamps equal to the postage required (including any surcharges).

2.0 Postage Paid With Permit Imprint

2.1 Advance Deposit Account

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees and must not be used to pay postage on any mailpiece that is designed for reply mail purposes.

2.2 Minimum Quantity

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except for single-piece mailings submitted under the terms of an approved manifest mailing system agreement with a minimum volume reduction provision.

2.3 Postage Statement

A complete postage statement must accompany each mailing paid with permit imprint.

155 Mail Preparation

Overview

1.0 Preparation for Parcel Post

1.0 Preparation for Parcel Post

1.1 Basic Preparation

There are no presort, sacking, or labeling standards for single-piece Parcel Post.

1.2 Delivery and Return Addresses

All Parcel Post mail must bear a delivery address. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address.

1.3 Basic Markings

The basic required marking—"Parcel Post" or "PP"—must be printed on each piece. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 102.3.3, Package Services Indicator Examples](#)):

- a. The service icon that will identify all Parcel Post pieces will be a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.
- b. The service banner must appear directly below the postage payment area and the service icon, and it must extend across the shipping label. If the service banner is used, the marking "PARCEL POST" must be preceded by the text "USPS" and must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text.

1.4 Required Use

Except as provided in [602.1.5, Return Addresses](#), the sender's domestic return address must appear legibly on Parcel Post mail.

156 Deposit

Overview

1.0 Deposit for Parcel Post

1.0 Deposit for Parcel Post

1.1 Single-Piece Mailings

Single-piece Parcel Post mail must be deposited at a time and place specified by the postmaster or designee at the office of mailing. Metered mail may be deposited at other than the licensing Post Office only as permitted under [705.18.0, *Metered Mail Drop Shipment*](#). Permit imprint mail must be presented at the Post Office under [604.5.0, *Permit Imprint \(Indicia\)*](#).

1.2 Designated Mailing Office

Parcel Post must be mailed at the Post Office from which the zone postage was computed, except under [1.3](#) and [1.4](#).

1.3 Redirected Mailings

A mailer who presents large mailings of zoned Parcel Post mail may be authorized or directed to deposit such mailings at another postal facility when processing or logistics make such an alternative desirable for the USPS, subject to these conditions:

- a. Zoned postage need not be recomputed if both the original Post Office of mailing and the alternative facility use the same zone chart for computing zoned postage, based on the 3-digit prefix of their ZIP Codes.
- b. Postage *must* be recomputed on pieces in mailings redirected to a postal facility that uses a different zone chart for computing zoned postage.
- c. Postage for pieces claimed at the Parcel Post Intra-BMC local zone prices must be recomputed at the applicable zone price for the alternative postal facility. Postage also may be recomputed for other pieces that are ineligible for the Parcel Post Intra-BMC local zone prices but could become eligible at the postal facility to which the mailing is redirected.

1.4 BMC Acceptance of Zoned Parcel Post

A mailer may present zoned Parcel Post at a BMC for acceptance if:

- a. Metered postage is paid through a postage meter licensed at the BMC parent Post Office, or permit imprint postage is paid through an advance deposit account at the BMC parent Post Office or another Post Office in the BMC service area, unless otherwise permitted by standard.
- b. Zoned postage is computed from the BMC parent Post Office.
- c. The BMC is authorized by Form 4410 to act as acceptance agent for the entry Post Office.

1.5 Pickup on Demand Fees

The Parcel Post Pickup on Demand fee must be paid every time Pickup on Demand service is provided, subject to the corresponding standards in [507.6.0](#).

- [3.0 Content Standards](#)
- [4.0 Attachments and Enclosures](#)

1.0 Media Mail Prices and Fees

1.1 Prices

Media Mail prices are based on the weight of the piece without regard to zone. Single-piece applies to pieces not mailed at a 5-digit or basic price.

1.2 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.3 Media Mail Price Application

Media Mail is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. (Price application is identical for the single-piece and presort prices.) For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage per piece is that for a piece weighing 1 pound.

1.4 Barcode Discount—Machinable Parcels

The barcode discount applies to Media Mail machinable parcels (see [101.3.3](#)) that are included in a mailing of at least 50 pieces of Media Mail. The pieces must bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [708.5.0, Standards for Postal Routing Barcodes](#).

1.5 Media Mail Prices

For barcode discount for single-piece, deduct \$0.03 per parcel (machinable parcels only, 50-piece minimum). See [Exhibit 1.5, Media Mail Prices](#).

Exhibit 1.5 Media Mail Prices

Weight Not Over (pounds)	Single-Piece	Weight Not Over (pounds)	Single-Piece

35	14.13	70	26.38

**1.6 Computing Postage—Media Mail With Permit Imprint**

To compute the total postage for a mailing, for each weight increment multiply the number of pieces by the applicable price per piece.

1.7 Computing Postage—Media Mail With Postage Affixed

For each piece, affix the postage for the weight increment as shown in [Exhibit 1.5](#).

2.0 Basic Eligibility Standards for Media Mail**2.1 Service Objectives**

The USPS does not guarantee the delivery of Media Mail within a specified time. Media Mail might receive deferred service. The local Post Office can provide more information concerning delivery times within its area.

2.2 Postal Inspection

Media Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Media Mail prices constitutes consent by the mailer to postal inspection of the contents.

2.3 Delivery and Return Addresses

All Media Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address.

3.0 Content Standards**3.1 General**

Mailable matter meeting one of the specific eligibility standards in [3.2](#), and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Media Mail.

3.2 Qualified Items

Only these items may be mailed at the Media Mail prices:

- a. Books, including books issued to supplement other books, of at least eight printed pages, consisting wholly of reading matter or scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising matter other than incidental announcements of books. Advertising includes paid advertising and the publishers' own advertising in display, classified, or editorial style.
- b. 16-millimeter or narrower width films, which must be positive prints in final form for viewing, and catalogs of such films of 24 pages or more (at least 22 of which are printed). Films and film catalogs sent to or from commercial theaters do not qualify for the Media Mail price.
- c. Printed music, whether in bound or sheet form.

- d. Printed objective test materials and their accessories used by or on behalf of educational institutions to test ability, aptitude, achievement, interests, and other mental and personal qualities with or without answers, test scores, or identifying information recorded thereon in writing or by mark.
- e. Sound recordings, including incidental announcements of recordings and guides or scripts prepared solely for use with such recordings. Video recordings and player piano rolls are classified as sound recordings.
- f. Playscripts and manuscripts for books, periodicals, and music.
- g. Printed educational reference charts designed to instruct or train individuals for improving or developing their capabilities. Each chart must be a single printed sheet of information designed for educational reference. The information on the chart, which may be printed on one or both sides of the sheet, must be conveyed primarily by graphs, diagrams, tables, or other nonnarrative matter. An educational reference chart is normally but not necessarily devoted to one subject. A chart on which the information is conveyed primarily by textual matter in a narrative form does not qualify as a printed educational reference chart for mailing at the Media Mail prices even if it includes graphs, diagrams, or tables. Examples of qualifying charts include maps produced primarily for educational reference, tables of mathematical or scientific equations, noun declensions or verb conjugations used in the study of languages, periodic table of elements, botanical or zoological tables, and other tables used in the study of science.
- h. Loose-leaf pages and their binders consisting of medical information for distribution to doctors, hospitals, medical schools, and medical students.
- i. Computer-readable media containing prerecorded information and guides or scripts prepared solely for use with such media.

4.0 Attachments and Enclosures

4.1 Loose Enclosures

In addition to the enclosures and additions listed in [4.0](#), any printed matter that is mailable as Standard Mail may be included loose with any qualifying material mailed at the Media Mail prices.

4.2 Enclosures in Books

Enclosures in books mailed at Media Mail prices are subject to these additional standards:

- a. Either one envelope or one addressed postcard may be bound into the pages of a book. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [4.2b](#).
- b. One order form may be bound into the pages of a book. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [4.2a](#).

- c. Announcements of books may appear as book pages. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related or other materials or services. Announcements may fully describe the conditions and methods of ordering books and may contain ordering instructions for use with a separate order form. Up to three of these announcements may contain as part of their format a single order form, which may also serve as a postcard. The order forms permitted with these announcements are in addition to, and not in place of, order forms that may be enclosed under [4.2a](#) or [4.2b](#).

4.3 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

4.4 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Media Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

173.4.5

4.5 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Media Mail piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Package Services price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

174 Postage Payment Methods

Overview

- [1.0 Postage Payment Methods for Media Mail](#)
- [2.0 Postage Paid With Permit Imprint](#)

1.0 Postage Payment Methods for Media Mail

1.1 Payment Method

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Media Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Identical-weight permit imprint mail also may be mailed under [705, *Advanced Preparation and Special Postage Payment Systems*](#).

1.2 Affixing Postage—Single-Piece Price Mailings

In a postage-affixed single-piece mailing, the mailer must apply enough value in adhesive stamps or meter stamps equal to the postage required.

2.0 Postage Paid With Permit Imprint

2.1 Advance Deposit Account

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees and must not be used to pay postage on any mailpiece that is designed for reply mail purposes.

2.2 Minimum Quantity

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except in the case of single-piece mailings submitted under the terms of an approved manifest mailing system agreement with a minimum volume reduction provision.

2.3 Postage Statement

A complete postage statement must accompany each mailing paid with permit imprint.

175 Mail Preparation

Overview

1.0 Preparation for Media Mail

1.0 Preparation for Media Mail

1.1 Basic Preparation

There are no presort, sacking, or labeling standards for single-piece Media Mail.

1.2 Delivery and Return Addresses

All Media Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address.

1.3 Basic Markings

The basic required marking—"Media Mail"—must be printed on each piece. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 102.3.3, Package Services Indicator Examples](#)). The service icon that will identify Media Mail is a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.

176 Deposit

Overview

[1.0 Deposit for Media Mail](#)

1.0 Deposit for Media Mail

1.1 **Single-Piece Mailings**

Single-piece Media Mail must be deposited at a time and place specified by the postmaster or designee at the office of mailing. Metered mail may be deposited at other than the licensing Post Office only as permitted under [705.18.0, Metered Mail Drop Shipment](#). Permit imprint mail must be presented at the Post Office under [604.5.0](#).

1.6 Computing Postage—Library Mail With Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable price per piece.

1.7 Computing Postage—Library Mail With Postage Affixed

For each piece, affix the postage for the weight increment as shown in [Exhibit 1.5](#).

2.0 Basic Eligibility Standards for Library Mail**2.1 Service Objectives**

The USPS does not guarantee the delivery of Library Mail within a specified time. Library Mail might receive deferred service. The local Post Office can provide more information concerning delivery times within its area.

2.2 Postal Inspection

Library Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Library Mail prices constitutes consent by the mailer to postal inspection of the contents.

2.3 Delivery and Return Addresses

All Library Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address.

3.0 Sender, Recipient, and Content Standards**3.1 General**

Mailable matter meeting one of the specific eligibility standards in [3.3](#) or [3.4](#), as applicable, and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Library Mail.

3.2 Sender, Recipient, and Contents

Each piece must show in the address or return address the name of a school, college, university, public library, museum, or herbarium or the name of a nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organization or association. For Library Mail standards, these nonprofit organizations are defined in [703.1.0](#). Only the articles described in [3.3](#) and [3.4](#) may be mailed at the Library Mail price.

3.3 Qualified Mailings Between Entities

The items described in this section may be mailed at the Library Mail price when sent between: (1) schools, colleges, universities, public libraries, museums, and herbariums and nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, and fraternal organizations or associations; (2) any such institution, organization, or association and an individual who has no financial interest in the sale, promotion, or distribution of the materials; or (3) any such institution, organization, or association and a publisher, if such institution, organization, or association has placed an order to buy such materials for delivery to itself:

183.3.4

- a. Books, consisting wholly of reading matter, scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising, except for incidental announcements of books.
- b. Printed music, whether in bound or sheet form.
- c. Bound volumes of academic theses, whether in typewritten or duplicated form.
- d. Periodicals, whether bound or unbound.
- e. Sound recordings.
- f. Other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts.
- g. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials for informing and furthering the educational work and interests of museums and herbariums.

3.4 Qualified Mailings “To” or “From”

The following specific items may be mailed at the Library Mail price when sent to or from schools, colleges, universities, public libraries, museums, and herbariums and to or from nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organizations:

- a. 16-millimeter or narrower width films, filmstrips, transparencies, slides, and microfilms. All must be positive prints in final form for viewing.
- b. Sound recordings.
- c. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials intended for informing and furthering the educational work and interests of museums and herbariums.
- d. Scientific or mathematical kits, instruments, or other devices.
- e. Catalogs of the materials in [3.4a.](#) through [3.4d](#) and guides or scripts prepared solely for use with such materials.

4.0 Attachments and Enclosures

4.1 Enclosures in Books and Sound Recordings

Books and sound recordings mailed at the Library Mail price may contain these enclosures as well as the additions and enclosures permitted under [4.3](#) through [4.5](#):

- a. Either one envelope or one addressed postcard. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [4.1b](#).
- b. One order form. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [4.1a](#).
- c. With books, announcements of books in book pages or as loose enclosures. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related materials or services.

Announcements may fully describe the conditions and methods of ordering books (such as by membership in book clubs) and may contain ordering instructions for use with the single order form permitted in 4.1b.

- d. With sound recordings, announcements of sound recordings on title labels, on protective sleeves, on the carton or wrapper, or on loose enclosures. These announcements of sound recordings must be incidental and exclusively devoted to sound recordings. They may not contain extraneous advertising of recording-related materials or services. Announcements may fully describe the conditions and methods of ordering sound recordings (such as by membership in sound recording clubs) and may contain ordering instructions for use with the single order form permitted in 4.1b.

4.2 Other Material

Material mailed at the Library Mail price other than books and sound recordings may contain only those additions and enclosures permitted under 4.3 through 4.5.

4.3 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

4.4 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Library Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.

183.4.5

- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

4.5 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Library Mail piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Library Mail price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

Commercial Letters and Cards Design Standards

201 Physical Standards

202 Elements on the Face of a Mailpiece

201 Physical Standards

Overview

- [1.0 Physical Standards for Machinable Letters and Cards](#)
- [2.0 Physical Standards for Nonmachinable Letters](#)
- [3.0 Physical Standards for Automation Letters and Cards](#)

1.0 Physical Standards for Machinable Letters and Cards

1.1 Physical Standards for Machinable Letters

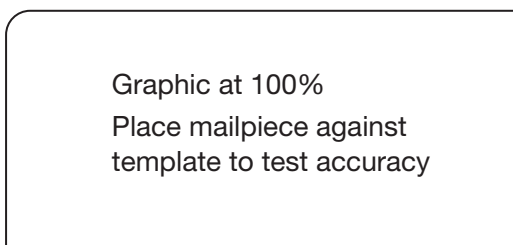

1.1.1 Dimensional Standards for Letters

Letter-size mail is:

- a. Not less than 5 inches long, 3-1/2 inches high, and 0.007-inch thick.
- b. Not more than 11-1/2 inches long, or more than 6-1/8 inches high, or greater than 1/4-inch thick.
- c. Rectangular, with four square corners and parallel opposite sides. Letter-size, card-type mailpieces made of cardstock may have finished corners that do not exceed a radius of 0.125 inch (1/8 inch). See [Exhibit 1.1.1c](#).

Exhibit 1.1.1c Maximum Corner Radius for Letter-Size, Card-Type Mailpieces

Corner Radius Maximum 1/8"

1.1.2 Weight Standards for Machinable Letters

The maximum weight for Presorted First-Class Mail machinable letters is 3.3 ounces (0.2063 pound). The maximum weight for Standard Mail machinable letters is 3.3 ounces (0.2063 pound).

1.1.3 All Machinable Letters

All pieces of machinable First-Class Mail letters and Standard Mail machinable letters must not have any of the characteristics in [2.1, Criteria for Nonmachinable Letters](#). Each piece must bear a delivery address that includes the correct ZIP Code or ZIP+4 code.

1.2 Physical Standards for Cards Claimed at Card Prices

1.2.1 Dimensional Standards for Cards

Each card (each stamped card or postcard or each half of a double stamped card or postcard) claimed at a card price must be:

- a. Not less than 3-1/2 inches high, 5 inches long, and 0.007 inch thick.
- b. Not more than 4-1/4 inches high, or more than 6 inches long, or greater than 0.016 inch thick.
- c. Rectangular, with four square corners and parallel opposite sides. Card-size pieces meeting the standards in 1.2.1 may have finished corners that do not exceed a radius of 0.125 inch (1/8 inch). See [Exhibit 1.1.1c](#).

1.2.2 Other Cards

A card that does not meet the applicable standards in 1.2 must not bear the words “Postcard” or “Double Postcard.”

1.2.3 Paper or Cardstock

A card must be of uniform thickness and made of unfolded and uncreased paper or cardstock of approximately the quality and weight of a stamped card (i.e., a card available from the USPS). A card must be formed either of one piece of paper or cardstock or of two pieces of paper permanently and uniformly bonded together. The stock used for a card may be of any color or surface that permits the legible printing of the address, postmark, and any required markings.

1.2.4 Acceptable Attachments

A card may bear an attachment that is:

- a. A paper label, such as a wafer seal or decal affixed with permanent adhesive to the back side of the card, or within the message area on the address side (see [1.2.6](#)), or to the left of the address block.
- b. A label affixed with permanent adhesive for showing the delivery or return address.
- c. A small reusable seal or decal prepared with pressure-sensitive and nonremovable adhesive that is intended to be removed from the first half of a double card and applied to the reply half.

1.2.5 Unacceptable Attachment

A card may not bear an attachment that is:

- a. Other than paper.
- b. Not totally adhered to the card surface.
- c. An encumbrance to postal processing.

1.2.6 Address Side of Cards

The address side of a card is the side bearing the delivery address and postage. The address side may be formatted to contain a message area. Cards that do not contain a message area on the address side are subject to the applicable standards for the price claimed. For the purposes of [1.2](#), miscellaneous graphics or printing, such as symbols, logos, or characters, that appear on the address side of cards not

containing a message area are generally acceptable provided the items are not intended to convey a message. Cards claimed at the Presorted or automation card prices that contain a message area on the address side must be divided vertically or horizontally and meet the following additional standards, as applicable:

- a. Vertically divided cards.
 1. The address side of the card must be divided into a right portion and a left portion, with or without a vertical rule. The left portion is the message area.
 2. The delivery address, postage, and any USPS marking or endorsement must appear in the right portion. The right portion must be at least 2-1/8 inches wide (measured from the right edge of the card, top to bottom inclusive).
 3. For cards claimed at the Presorted price, nondelivery address information may extend into the right portion only above the address block and if the information is shaded or surrounded by a border that has at least 1/8 inch clearance between the delivery address block and the border. Mailers may choose not to shade or border the nondelivery address information if there is at least 1/8 inch of clear space around the delivery address block.
 4. For cards claimed at the automation price, the standards for automation-compatible mail in [3.0, Physical Standards for Automation Letters and Cards](#), and [202.5.0, Barcode Placement](#), must be met.
- b. Horizontally divided cards.
 1. The address side of the card must be divided into an upper portion and a lower portion, with or without a horizontal rule. The portion of the address side that does not contain the delivery address is the message area.
 2. The delivery address, postage, and any USPS marking or endorsement must appear within the portion containing the delivery address. As an alternative, when the delivery address appears within the lower portion, it is permissible for the postage, return address, and any USPS marking or endorsement to appear in the upper portion. The portion bearing the delivery address must be at least 1-1/2 inches high (measured from the top or bottom edge of the card, as applicable, right edge to left edge inclusive).
 3. For cards claimed at the Presorted price, nondelivery address information may extend into the portion containing the delivery address only if it appears above the address block and if the information is shaded or surrounded by a border that has at least 1/8 inch clearance between the delivery address block and the border. Mailers may choose not to shade or border the nondelivery address information if there is at least 1/8 inch of clear space around the delivery address block.
 4. For cards claimed at the automation price, the standards for automation-compatible mail in [3.0, Physical Standards for Automation Letters and Cards](#), and [202.5.0, Barcode Placement](#), must be met.

201.1.2.7

1.2.7 Tearing Guides

A card may have perforations or tearing guides if they do not eliminate or interfere with any address element, postage, marking, or endorsement and do not impair the physical integrity of the card.

1.2.8 Double Cards

A double card (a double stamped card or double postcard) consists of two attached cards, one of which is designed to be detached by the recipient and returned by mail as a single card. Double cards are subject to these standards:

- a. The reply half of a double card must be used for reply only and may not be used to convey a message to the original addressee or to send statements of account. The reply half may be formatted for response purposes (e.g., contain blocks for completion by the addressee).
- b. A double card must be folded before mailing and prepared so that the address on the reply half is on the inside when the double card is originally mailed. The address side of the reply half may be prepared as business reply mail, courtesy reply mail, meter reply mail, or as a merchandise return service label.
- c. Plain stickers, seals, or a single wire stitch (staple) may be used to fasten the open edge at the top or bottom once the card is folded if affixed so that the inner surfaces of the cards can be readily examined. Fasteners must be affixed according to the applicable preparation requirements for the price claimed. Any sealing on the left and right sides of the cards, no matter the sealing process used, is not permitted.
- d. The first half of a double card must be detached when the reply half is mailed for return.

1.2.9 Enclosures in Double Cards

Enclosures in double postcards are prohibited at card prices.

2.0 Physical Standards for Nonmachinable Letters

2.1 Criteria for Nonmachinable Letters

A letter-size piece is nonmachinable if it has one or more of the following characteristics (see [601.1.4](#) to determine the length, height, top, and bottom of a mailpiece):

- a. Is over 3.3 ounces, unless prepared as an automation-price letter.
- b. Has an aspect ratio (length divided by height) of less than 1.3 or more than 2.5.
- c. Is polybagged, polywrapped, or enclosed in any plastic material.
- d. Has clasps, strings, buttons, or similar closure devices.
- e. Contains items such as pens, pencils, or loose keys or coins that cause the thickness of the mailpiece to be uneven (see [601.2.3, *Odd-Shaped Items in Paper Envelopes*](#)).
- f. Is too rigid (does not bend easily when subjected to a transport belt tension of 40 pounds around an 11-inch diameter turn).

- g. For pieces more than 4-1/4 inches high or 6 inches long, the thickness is less than 0.009 inch.
- h. Has a delivery address parallel to the shorter dimension of the mailpiece.
- i. Self-mailers with a final folded edge perpendicular to the address if the piece is not folded and secured according to [3.14.1](#), *Folded Self-Mailer*.
- j. Booklet-type pieces with the bound edge (spine) along the shorter dimension of the piece or at the top, unless prepared according to [3.14.2](#).

2.2 Additional Criteria for First-Class Mail Nonmachinable Letters

Letter-price pieces (except card-price pieces) that meet one or more of the nonmachinable characteristics in [2.1](#) are subject to the nonmachinable surcharge (see [133.1.10](#)). All letter-size pieces over 3.5 ounces are prepared as letters and charged the flat-size prices.

2.3 Additional Criteria for Standard Mail Nonmachinable Letters

The nonmachinable prices in [243.1.7](#) apply to Standard Mail letter-size pieces that weigh 3.3 ounces or less and have one or more of the nonmachinable characteristics in [2.1](#). Mailers must prepare nonmachinable letters over 3.3 ounces as described in [245.5.0](#), mark each piece “Not Flat-Machinable” or “NFM” as described in [402.2.0](#), and pay the Not Flat-Machinable prices.

2.4 Additional Criteria for Periodicals Nonmachinable Letters

The nonbarcoded letter prices in [707.1.1.2](#) apply to Periodicals letter-size pieces that have one or more of the nonmachinable characteristics in [2.1](#).

3.0 Physical Standards for Automation Letters and Cards

3.1 Basic Standards for Automation Letters and Cards

[\[8-14-08\]](#) Letters and cards claimed at automation letter prices and at Standard Mail Enhanced Carrier Route prices must meet the standards in [3.0](#). Unless prepared as a self-mailer, booklet, or postcard under [3.14.1](#) through [3.14.3](#), each mailpiece must be a sealed envelope (the preferred method) or, if unenveloped, must be sealed or glued along all four sides. All references in [3.0](#) to paper basis weight are based on measured weight for 500 17-inch by 22-inch sheets. Envelopes, or letter-size mailpieces sealed along all four sides, must be made of paper with a minimum 16 pounds basis weight or equivalent. See [3.4](#) for additional standards for mailpieces with disc enclosures.

3.2 Dimensions and Shape Standards for Automation Letters

Each letter-size piece must be rectangular (see [1.1.1](#)) and:

- a. For height, no more than 6-1/8 or less than 3-1/2 inches high.
- b. For length, no more than 11-1/2 or less than 5 inches long.
- c. For thickness, no more than 0.25 or less than
 - 1. 0.007 inch thick *if no more than 4-1/4 inches high and 6 inches long; or*
 - 2. 0.009 inch thick *if more than 4-1/4 inches high or 6 inches long, or both.*

3.3 Standards for Letter-Size Pieces Containing Discs (CDs or DVDs)

3.3.1 Basic Standards for Discs in Envelopes

Letter-size mailpieces containing a single disc and meeting the standards in [3.3.2](#), [3.3.3](#), and [3.11](#) are considered automation-compatible. Mailpieces with one enclosed disc not meeting these standards must be tested and approved for automation-compatibility.

3.3.2 Disc Size and Placement

Position the disc symmetrically at the vertical centerline and as near to the top edge of the mailpiece as is practical. Secure the disc to prevent it from shifting more than 1/2 inch in any direction. The maximum disc size is:

- a. 120 mm (4.7 inches) in diameter.
- b. 2 mm (0.08 inch) in thickness.

3.3.3 Dimensions and Shape Standards for Automation-Compatible Enveloped Letters Containing Discs

Each enveloped letter must meet the basic standards for machinable letters in [1.0](#) and have the following characteristics:

- a. Height, not more than 6 inches or less than 5.5 inches high.
- b. Length, not more than 9.75 inches or less than 7.25 inches long.
- c. Thickness, not more than 0.25 inch or less than 0.009 inch thick.
- d. Weight, not more than 3 ounces.
- e. A piece up to 8 inches long must be made of paper with a minimum 28-pound basis weight or equivalent.
- f. A piece over 8 inches long (up to 9.75 inches long) must be made of paper with a minimum 32-pound basis weight or equivalent.
- g. Discs in mailpieces made of the minimum basis weight paper must be inserted into a protective sleeve.

3.3.4 Dimensions and Shape Standards for Automation-Compatible Folded Self-Mailers Containing Discs

Each folded self-mailer must meet the basic standards for machinable letters in [1.0](#) and have the following characteristics:

- a. Height, not more than 6 inches or less than 5.5 inches high.
- b. Length, not more than 9.75 inches or less than 7.25 inches long.
- c. Thickness, not more than 0.25 inch or less than 0.009 inch thick.
- d. Weight, not more than 3 ounces.
- e. Be prepared from paper stock meeting the industry standard for a basis weight of 75 pounds or greater, with none less than 71.25 pounds (measured weight for 500 25- by 38-inch sheets). The stock must be free from groundwood unless coated with a substance adding to the stock's ability to resist an applied bending force.
- f. Any folds or perforations in the mailpiece must be parallel to the address.

- g. Must meet the tabbing requirements for pieces prepared with folds or perforations parallel to the address provided in [3.14](#).

3.3.5 Unacceptable Characteristics for Automation-Compatible Letter-Size Pieces with Discs

Discs in letter-sized envelopes and folded self-mailers may not be enclosed in:

- a. Packaging such as plastic "clamshells," plastic "jewel cases," or inflexible cardboard sleeves.
- b. Window envelopes.

3.4 Weight Standards for First-Class Mail Automation Letters and Cards

Maximum weight for First-Class Mail automation letters is 3.5 ounces (0.2188 pound). See [3.14.4](#) for pieces heavier than 3 ounces.

3.5 Weight Standards for Standard Mail Automation Letters

Maximum weight for Standard Mail mailed at automation and Enhanced Carrier Route letter prices is 3.5 ounces (0.2188 pound). See [3.14.4](#) for pieces heavier than 3 ounces.

3.6 Weight Standards for Periodicals Barcoded (Automation) Letters

The maximum weight for Periodicals barcoded (automation) letters is 3.5 ounces (0.2188 pound). See [3.14.4](#) for pieces heavier than 3 ounces.

3.7 Aspect Ratio

The aspect ratio (length of the mailpiece divided by height) must be between 1.3 and 2.5, inclusive. Length and height are defined in [601.1.4](#).

3.8 Wraps and Closures

An automation-compatible mailpiece may not be polywrapped, polybagged, or shrinkwrapped; have clasps, strings, buttons, or similar closure devices; or have protrusions that might impede or damage the mail or mail processing equipment.

3.9 Staples and Saddle Stitching

Staples or saddle stitching may be used only on booklet-type mailpieces to join the bound edge (spine). Inserted staples or stitching must parallel the bound edge, seat tightly and securely, and have no protrusions that might impede or damage the mail or mail processing equipment.

3.10 Rigid and Odd-Shaped Items

Rigid items (e.g., pens, pencils, keys, bottle caps) are prohibited within mailpieces. Reasonably flexible items (e.g., credit cards) are permitted. Subject to [3.12](#), [Flexibility Standards for Automation Letters](#), odd-shaped items (e.g., coins and tokens) are permitted if firmly affixed to and wrapped within the contents of the mailpiece and envelope to streamline the shape of the mailpiece for automated processing.

3.11 Tabs, Wafer Seals, Tape, and Glue

Tabs, wafer seals, cellophane tape, or permanent glue (continuous or spot) may be used as applicable to the particular type of mailpiece under [3.14](#), [Self-mailers](#), [Booklets](#), [Postcards](#), and [Heavy Letter Mail](#), if the sealing devices do not interfere with the recognition of the barcode, price marking, postage information, or delivery

or return addresses. In all cases, additional tabs or seals may be used. Cellophane tape is not acceptable within the barcode clear zone. Tabs or wafer seals placed in the barcode clear zone must contain a paper face meeting the standards for background reflectance and, if the barcode is not preprinted by the mailer, the standards for acceptance of water-based ink. Tabs, wafer seals, and tape must have a peel adhesion (shear strength) value of at least 15 ounces/inch at a speed of 12 inches/minute after application to a stainless steel plate; the test is to be conducted 10 minutes after the material is applied to the plate.

3.12 Flexibility Standards for Automation Letters

3.12.1 Machinability

To ensure transport through automated mail processing machines, a mailpiece and its contents must bend easily when subjected to a transport belt tension of 40 pounds around an 11-inch-diameter drum.

3.12.2 USPS Services for Flexibility Testing

A mailer wanting to have mailpieces tested for flexibility must submit at least 50 sample pieces and a written request to USPS Engineering at least 6 weeks before the mailing date. The request must describe mailpiece contents and construction, number of pieces being produced, and preparation level (e.g., presort). Engineering advises the mailer by letter of its findings. If the mailpiece is approved, the letter includes a unique number identifying the piece tested and serves as evidence that the piece meets the relevant standards. A copy of the letter must be attached to each postage statement submitted for mailings of the approved piece. If requested by the USPS, the mailer must show that pieces presented for mailing are the same as those tested and approved.

3.13 Standards for Labels and Stickers Affixed to the Outside of an Envelope

3.13.1 Using Labels and Stickers

Permanent labels and stickers (those designed not to be removed or relocated) must be affixed directly to the outside of the mailpiece with permanent adhesive. A mailer may provide recipients with relocatable labels to place on the outside of response pieces sent back to the mailer. On pieces mailed at First-Class Mail card prices or at Periodicals prices, labels and stickers may be used only if permitted by the applicable standards.

3.13.2 Pressure-Sensitive Label

Any pressure-sensitive label or sticker affixed directly to a mailpiece before mailing must have a minimum peel adhesion to stainless steel of 8 ounces/inch. This standard does not apply to pressure-sensitive labels provided by the USPS to label bundles to sortation levels.

3.13.3 “Sandwich” Label

A face stock/liner label (“sandwich” label) is a two-part unit with a face stock (top label) attached to a liner (bottom label) affixed to the mailpiece. The face stock must have a peel adhesion value of at least 2 ounces/inch with respect to the liner label and at least 8 ounces/inch when reapplied to stainless steel.

3.14 Self-mailers, Booklets, Postcards, and Heavy Letter Mail

3.14.1 Folded Self-Mailer

Except as noted in 3.14.1c, a folded self-mailer must be prepared with the folded edge parallel to the longest dimension and the address of the mailpiece. Based on the number of tabs used, these additional standards apply:

- a. With one tab or wafer seal, the folded edge must be at the bottom of the self-mailer. The tab or wafer seal must be placed in the middle of the top edge of the piece. If formed of a single folded sheet, the self-mailer must be prepared from paper with a minimum basis weight of 28 pounds (measured weight for 500 17- by 22-inch sheets) or 70 pounds (measured weight for 500 25- by 38-inch sheets). If formed of multiple folded sheets, the self-mailer must be prepared from paper with a minimum basis weight of 24 pounds (measured weight for 500 17- by 22-inch sheets) or 60 pounds (measured weight for 500 25- by 38-inch sheets).
- b. With two tabs or wafer seals, the folded edge may be at the top or bottom of the self-mailer. The two tabs or wafer seals must be placed on the open edge, opposite the folded edge. One tab or wafer seal must be placed within 1 inch of the left edge of the piece; the other, within 1 inch of the right edge of the piece. See Exhibit 3.14.1b. The whole tab need not be placed within 1 inch of the edge. The tabs must not obscure the FIM, postage, or required address information. The folded self-mailer must be prepared from paper with a minimum basis weight of 20 pounds (measured weight for 500 17- by 22-inch sheets).

Exhibit 3.14.1b Sealing the Top Edge With Fold at the Bottom

- c. In specifically identified formats, a self-mailer may have the final fold on the right side (leading edge) of the piece. The left edge (trailing edge) and other open edges must be secured with at least one tab or a glue line. The number of tabs required is determined by the final trim size and paper basis weight of the piece. If the piece is 7 inches long or more, the piece must be sealed on the top and the bottom. In all cases, additional tabs, seals, or glue spots or glue lines may

201.3.14.2

be used. Newsprint paper is acceptable if the basis weight of the paper meets the minimum standards in [3.14.1a](#) and the piece is certified by the USPS mailpiece design analyst to be acceptable for automated processing.

3.14.2 Booklets

A booklet-type piece must meet these standards:

- a. The front and back covers must be prepared from paper with a minimum basis weight of 20 pounds (measured weight for 500 17- by 22-inch sheets).
- b. Except as noted in [3.14.2d](#), the bound edge (spine) must be the longest edge of the piece and at the bottom, parallel to the address.
- c. The unbound edge (top) must be secured with at least two tabs or wafer seals. One tab or wafer seal must be placed within 1 inch of the left edge of the piece; the second tab or seal, within 1 inch of the right edge of the piece. As an alternative, one tab or wafer seal must be placed within 1 inch from the top left side (trailing edge) of the piece; the second tab or seal, within 1 inch from the top right side (leading edge) of the piece. See [Exhibit 3.14.2c](#).

Exhibit 3.14.2c Alternative Sealing for Booklet With Spine on the Bottom

- d. In specifically identified formats, prepared with a minimum paper basis weight of 24-pound bond paper, the spine may be on the shorter side (leading edge) of the piece. The address must still be parallel to the longest side of the piece. The unbound edges must be secured with at least two tabs or wafer seals. If the outside covers are prepared with a minimum paper basis weight of 20-pound bond or equivalent, the spine may be on the right side (leading edge) of the piece. The address must still be parallel to the longest side of the piece. The following restrictions apply:
 1. If the final trim size of the piece is no more than 4-1/4 inches high and no more than 6 inches long, the unbound left edges must be secured with at least one tab or wafer seal placed at the vertical center of the piece.
 2. If the final trim size of the piece is more than 4-1/4 inches high or more than 6 inches long, the unbound left edge must be secured with two tabs or wafer seals placed within 1 inch of the top and bottom edges.

3.14.3 Postcard

Any postcard must be prepared from paper stock meeting the industry standard for a basis weight of 75 pounds or greater, with none less than 71.25 pounds (measured weight for 500 25- by 38-inch sheets). The stock must be free from groundwood unless coated with a substance adding to the stock's ability to resist

an applied bending force. A double postcard not prepared with all edges sealed must have the folded edge at the top or bottom, and the open edge parallel to the address must be secured with one tab (or other permitted closure) in the middle of the length. Pieces claimed at First-Class Mail automation card prices also must meet the standards in [1.2, Physical Standards for Cards Claimed at Card Prices](#).

3.14.4 Heavy Letter Mail

Heavy letter mail (barcoded letter-size mail weighing more than 3 ounces) must have a barcode in the address block (see [202.5.0, Barcode Placement](#)) and must be prepared in a sealed envelope. Heavy letter mail may neither contain stiff enclosures nor be prepared as a self-mailer or booklet-type mailpiece.

3.15 Enclosed Reply Cards and Envelopes

3.15.1 Basic Standard

All letter-size reply cards and envelopes (business reply mail (BRM), courtesy reply mail (CRM), and meter reply mail (MRM)) provided as enclosures in automation First-Class Mail, Periodicals, and Standard Mail and addressed for return to a domestic delivery address must meet the applicable standards for automation-compatible mail in [3.0](#). The mailer's signature on the postage statement certifies that this standard, and the standards listed below, have been met when the corresponding mail is presented to the USPS:

- a. Each reply piece must include the appropriate facing identification mark (FIM) under [708.9.0, Facing Identification Mark \(FIM\)](#).
- b. Each BRM piece must bear the correct BRM ZIP+4 barcode; each MRM and CRM piece must bear the correct barcode for the delivery address, subject to [202.5.0, Barcode Placement](#).
- c. Each BRM piece must meet any applicable standard under [507.9.0](#); each MRM piece must meet any applicable standard under [604.4.0, Postage Meters and PC Postage Products \("Postage Evidencing Systems"\)](#); and each CRM piece as defined in [3.15.2](#) must meet the standards of this section.

3.15.2 Courtesy Reply Mail (CRM)

For these standards, courtesy reply mail (CRM) is reply mail other than BRM or MRM enclosed in other mail, with or without prepayment of postage, for return to the address on the reply piece. If postage is required, the customer returning the piece affixes the applicable First-Class Mail postage. Each piece must meet the physical standards in [1.0](#) or [2.0](#). CRM has no additional required design standards unless enclosed in automation mail.

202 Elements on the Face of a Mailpiece

Overview

- [1.0 All Mailpieces](#)
- [2.0 Address Placement](#)
- [3.0 Placement and Content of Mail Markings](#)
- [4.0 Placement and Physical Standards for Endorsements](#)
- [5.0 Barcode Placement](#)

1.0 All Mailpieces

1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements.

1.2 Delivery and Return Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. Except for mail prepared with detached address labels under [602.4.0](#), the piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage. A return address is required in specific circumstances (see [4.2](#) and [602.1.5](#) for more information about return addresses). See [602](#) for additional information regarding addressing.)

1.3 Postage Payment

The mailer is responsible for proper payment of postage. Standards for postage payment are specified for each shape and class of mail.

2.0 Address Placement

2.1 Address Placement Causing Mail to be Nonmailable and Nonmachinable

The location of the delivery address on a letter-size mailpiece determines which dimensions are the length and height of the piece. The *length* is the dimension parallel to the address as read; the *height* is the dimension perpendicular to the length. Consequently, the placement of the address may render a piece nonmailable or nonmachinable. On a letter-size piece, the recommended address placement is within the optical character reader (OCR) read area, which is a space on the address side of the mailpiece defined by these boundaries (see [Exhibit 2.1, OCR Read Area](#)):

- a. Left: 1/2 inch from the left edge of the piece.
- b. Right: 1/2 inch from the right edge of the piece.
- c. Top: 2-3/4 inches from the bottom edge of the piece.
- d. Bottom: 5/8 inch from the bottom edge of the piece.

Exhibit 2.1 OCR Read Area

3.0 Placement and Content of Mail Markings

3.1 Enclosures

Enclosures, attachments, and mixed price mailpieces must be marked under the applicable standards in [703.9.0, Mixed Classes](#).

3.2 Printing and Designs

Required markings may be printed by a postage meter or other means that ensures a legible marking. A marking may not include or be part of a decorative design or advertisement.

3.3 Placement of Mail Markings

[8-14-08] Markings must be placed as follows:

- a. Basic Marking. The basic required marking that indicates the class or subclass which must be printed or produced as part of; directly below; or to the left of the permit imprint, meter imprint, or stamp as follows:
 1. "First-Class"
 2. "Standard" or "STD"
 3. "Presorted Standard" or "PRSRT STD"
 4. "Nonprofit Organization," "Nonprofit Org.," or "Nonprofit"
- b. Other Markings. The price-specific markings "AUTO," "Presorted" (or "PRSRT"); "Single-Piece" (or "SNGLP") (First-Class Mail only); and "ECRLOT," "ECRWSH," "ECRWSS," and "Customized MarketMail" (or "CUST MKTMAIL" or "CMM") (Standard Mail only) may be placed as follows:

1. In the location specified in [3.3a](#).
 2. In the address area on the line directly above or two lines above the address if the marking appears alone or if no other information appears on the line with the marking except optional endorsement line information under [708.7.0](#) or carrier route bundle information under [708.6.0](#).
 3. If preceded by two asterisks (**), the “AUTO,” “PRESORTED” (or “PRSRT”), “CUSTOMIZED MARKETMAIL” (or “CUST MKTMAIL” or “CMM”), or “Single-Piece” (or “SNGLP”) marking also may be placed on the line directly above or two lines above the address in a mailer keyline or a manifest keyline, or it may be placed above the address and below the postage in an MLOCR ink-jet printed date correction/meter drop shipment line. Alternatively, the “AUTO,” “PRSRT,” or “SNGLP” marking may be placed to the left of the barcode clear zone (subject to the standards in [5.0, Barcode Placement](#)) on letter-size pieces.
- c. Additional Requirements for Carrier Route. “ECRLOT,” “ECRWSH,” and “ECRWSS” (Standard Mail only) must appear in their entirety wherever placed, except “ECR” may be placed in the postage area if “LOT,” “WSH,” or “WSS,” as applicable, is placed in the line above or two lines above the address, as specified in [3.3b](#). Pieces not mailed at ECR prices must not bear these markings.

3.4 Exceptions to Markings

[8-14-08] Exceptions are as follows:

- a. Automation Letters. First-Class Mail and Standard Mail letters do not require an “AUTO” marking if they bear a DPBC or an Intelligent Mail barcode with a delivery point routing code in the address block or on an insert visible through a window. First-Class Mail letters not marked “AUTO” must bear both the “Presorted” or “PRSRT” and “First-Class” markings. Standard Mail letters not marked “AUTO” must bear the appropriate basic marking in [3.3a](#).
- b. Manifest Mailings. The basic marking must appear in the postage area on each piece as required in [3.3a](#). The two-letter price category code, printed in the keyline on manifest mailing system pieces using batch processing under [705.2.0, Manifest Mailing System](#), meets the requirement for other price markings when those pieces are part of a manifest mailing or another automation mailing. If a single-piece marking (“SP”) has been applied to pieces that subsequently become part of a presorted or automation mailing, the “SP” marking must be marked out and replaced with a “Presorted” or “PRSRT” marking.
- c. MLOCR Prepared Automation Mailings. The basic marking must appear in the postage area on each piece as required in [3.3a](#). The other “AUTO” marking described in [3.3b](#) must be replaced by the appropriate identifier/price code marking described in [705.5.0, First-Class Mail or Standard Mail Mailings With Different Payment Methods](#), on those pieces that have the marking applied by an MLOCR. This seven-character marking provides a description of the Product

202.3.5

Month Designator, MASS/FASTforward System Identifier, postage payment method, and the price of postage affixed for metered and precanceled stamp mail or other postage information for permit imprint mail.

3.5 Marking Hazardous Materials

All mailable hazardous materials must be labeled and/or marked as required in [601.10.0](#).

4.0 Placement and Physical Standards for Endorsements

4.1 Endorsements for Delivery Instructions and Ancillary Services

The mailer must place the correct endorsement on each mailpiece to provide delivery instructions (retention period under [507.4.4.4](#) or carrier release under [508.1.2](#)) or to request an ancillary service (forwarding, return, or address correction under [507.1.0](#), *Treatment of Mail*), subject to the corresponding standards for use and availability.

4.2 Return Address

When an ancillary service endorsement is used, a domestic return address must be placed in the upper left corner of the address side of the mailpiece or the upper left corner of the addressing area. If the return address is a multiple delivery address, it must show a unit designator (e.g., an apartment number).

4.3 Placement of Endorsement

Placement of the endorsement on the mailpiece is determined as follows:

- a. The carrier release endorsement must be placed directly below the return address. If any other endorsement is used, the carrier release endorsement must be separated by the equivalent of one blank line of the type size used.
- b. A retention period specified by the mailer must be placed directly above the return address.
- c. Any ancillary service endorsement (e.g., Address Service Requested, Forwarding Service Requested, Return Service Requested, Change Service Requested) must be placed in one of these four positions:
 1. Directly below the return address.
 2. Directly above the delivery address area (which includes the delivery address block and any related nonaddress elements such as a barcode, keyline, or optional endorsement line).
 3. Directly to the left of the postage area and below or to the left of any price marking.
 4. Directly below the postage area and below any price marking.

4.4 Physical Standards for Endorsements

The endorsement or, if combined, endorsements must meet these physical standards:

- a. The type size of the endorsement must be at least 8 points.

- b. The read direction of the endorsement and return address must be the same as the read direction of the delivery address.
- c. The color contrast between the endorsement and the mailpiece background must be kept at a reasonable degree. A brilliant colored background or reverse printing is not permitted.
- d. A clear space of at least 1/4 inch around (above, below, and both sides) the total area containing the endorsement(s) is required. This 1/4-inch clear space is not required for an endorsement that is applied with a multiline optical character reader (MLOCR) inkjet and placed in the location directly below the postage area and any price marking if the endorsement is clear and legible.

5.0 Barcode Placement

5.1 Barcode Clear Zone

Each letter-size piece in an automation price or an Enhanced Carrier Route price mailing must have a barcode clear zone unless the piece bears a POSTNET or an Intelligent Mail barcode with a delivery point routing code (see [708.4.3](#)) in the address block. The barcode clear zone and all printing and material in the clear zone must meet the reflectance standards in [708.4.4](#). The barcode clear zone is a rectangular area in the lower right corner of the address side of cards and letter-size pieces defined by these boundaries:

- a. Left: 4-3/4 inches from the right edge of the piece.
- b. Right: right edge of the piece.
- c. Top: 5/8 inch from the bottom edge of the piece.
- d. Bottom: bottom edge of the piece.

5.2 General Barcode Placement for Letters

Automation price letters and letters claimed at an Enhanced Carrier Route saturation or high density price may bear a POSTNET or an Intelligent Mail barcode with a delivery point routing code (see [708.4.0](#)). Mailers must print the barcode either in the address block or in the barcode clear zone, except for pieces that weigh more than 3 ounces which must include the barcode in the address block. See [5.7](#) when placing barcodes in the address block.

5.3 Barcode on a Mailpiece

Except as noted in [5.5, 5-Digit Barcode Placement in Clear Zone](#), for 5-digit barcodes, if the barcode is printed directly on the mailpiece in the lower right corner, the entire barcode must be within the barcode read area defined by these limits:

- a. Horizontally, the leftmost bar must be between 3-1/2 inches and 4-1/4 inches from the right edge of the piece.
- b. Vertically, the barcode must be within the area between 3/16 inch and 7/16 inch from the bottom edge of the piece; the bottom of the bars must be 1/4 inch \pm 1/16 inch from the bottom edge of the piece.

202.5.4

5.4 5-Digit and ZIP+4 Barcode Permissibility

An automation price letter-size piece may not bear a 5-digit or ZIP+4 barcode in the lower right corner (barcode clear zone). The piece may bear a 5-digit or ZIP+4 barcode in the address block only if a POSTNET or an Intelligent Mail barcode with a delivery point routing code appears in the lower right corner. The ZIP+4 barcode may appear in the address block when printed on an insert that appears through a window or on an address label affixed directly to the piece; or it may appear in the lower right corner either printed directly on the mailpiece or on an insert that appears through a window.

5.5 5-Digit Barcode Placement in Clear Zone

Any 5-digit barcode must be located as specified in 5.4, except that, if placed in the barcode clear zone, the leftmost bar of the barcode must be between 4-1/8 and 4-1/4 inches from the right edge of the mailpiece.

5.6 DPBC Numeric Equivalent

In delivery point barcoded automation price mailings only, the numbers corresponding to the POSTNET bars in a correct delivery point barcode (DPBC) may appear in the delivery address. If read from left to right, a correct DPBC numeric equivalent consists of five digits, a hyphen, and seven digits.

5.7 Barcode in Address Block

When the barcode is included as part of the address block:

- a. The barcode must be placed in one of these positions:
 1. Above the address line containing the recipient's name.
 2. Below the city, state, and ZIP Code line.
 3. Above or below the keyline information.
 4. Above or below the optional endorsement line.
- b. The printing of the barcode is prohibited anywhere between the address line containing the recipient's name and the city, state, and ZIP Code line.
- c. The minimum clearance between the barcode and any information line above or below it within the address block must be at least 0.040 (1/25) inch for POSTNET barcodes or 0.028 inch for Intelligent Mail barcodes. The separation between the barcode and top line or bottom line of the address block must not exceed 0.625 (5/8) inch. The clearance between the leftmost and rightmost bars and any adjacent printing must be at least 0.125 (1/8) inch.
- d. If a window envelope is used, the clearance between the leftmost and rightmost bars and any printing or window edge must be at least 0.125 (1/8) inch. The clearance between the barcode and the top and bottom window edges must be at least 0.040 (1/25) inch for POSTNET barcodes or 0.028 inch for Intelligent Mail barcodes. These clearances must be maintained during the insert's range of movement in the envelope. Address block windows on heavy letter mail (as defined in 5.2, *General Barcode Placement for Letters*) must be covered; such windows may be covered on other mail. Covers for address block windows are subject to 5.11.

- e. If an address label is used, a clear space of at least 0.125 (1/8) inch must be left between the barcode and the left and right edges of the address label. The clearance between the barcode and the top and bottom edges of the address label must be at least 0.040 inch for POSTNET barcodes or 0.028 inch for Intelligent Mail barcodes.
- f. The rightmost bar must be at least 1/2 inch from the right edge of the mailpiece, and the leftmost bar must be less than 10-1/2 inches from the right edge of the mailpiece and at least 1/2 inch from the left edge of the mailpiece; the top of each bar must be less than 4 inches from the bottom edge of the mailpiece; and the bottom line of the address block, including the barcode, must be at least 5/8 inch from the bottom of the mailpiece.

5.8 Barcode on Insert

If the barcode is printed on an insert to appear through a window in the lower right corner of an envelope:

- a. The envelope and window must meet the physical standards in [5.9](#) through [5.11 in Barcode Placement](#).
- b. The entire barcode must be within the barcode clear zone (but need not be completely within the barcode read area).
- c. When the insert showing through the window is moved to any of its limits inside the envelope, the entire barcode must remain within the barcode clear zone. In addition, a clear space must be maintained that is at least 0.125 (1/8) inch between the barcode and the left and right edges of the window, at least 0.1875 (3/16) inch between the barcode and the bottom edge of the mailpiece, and at least 0.040 (1/25) inch between the barcode and the top edge of the window for POSTNET barcodes or 0.028 inch for Intelligent Mail barcodes.

5.9 Edges of Barcode Window

The edges of the barcode window must meet these criteria:

- a. Left: at least 4-3/4 inches from the right edge of the envelope.
- b. Right: at least 1/4 inch from the right edge of the envelope.
- c. Top: at least 5/8 inch from the bottom of the envelope.
- d. Bottom: form part of the bottom edge of the envelope.

5.10 Window Construction

A barcode window must extend fully to the bottom edge of the envelope, must be of wraparound construction, and must be covered subject to [5.11](#).

5.11 Window Cover

The window cover must be of a nontinted clear or transparent material (e.g., cellophane or polystyrene) that permits the barcode and its background, as viewed through the window material, to meet the reflectance standards in [708.4.4](#). The edges of the window cover must be securely glued to the envelope.

230 Commercial Letters and Cards First-Class Mail

233 Prices and Eligibility

234 Postage Payment and Documentation

235 Mail Preparation

236 Enter and Deposit

233 Prices and Eligibility

Overview

- [1.0 Prices and Fees for First-Class Mail](#)
- [2.0 Content Standards for First-Class Mail Letters](#)
- [3.0 Basic Standards for First-Class Mail Letters](#)
- [4.0 Additional Eligibility Standards for Nonautomation First-Class Mail Letters](#)
- [5.0 Additional Eligibility Standards for Automation First-Class Mail Letters](#)
- [6.0 Eligibility Standards for Card Price First-Class Mail](#)

1.0 Prices and Fees for First-Class Mail

1.1 Price Application

Postage is based on the letter price that applies to the weight of each addressed piece.

1.2 Price Computation for First-Class Mail Letters

First-Class Mail letter prices are charged per ounce or fraction thereof; any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 1.2 ounces, the weight (postage) increment is 2 ounces. The minimum postage per addressed piece is that for a piece weighing 1 ounce.

1.3 Presorted and Automation Prices for Cards and Letters

Weight Not Over (ounces)	Automation				Nonautomation
	5-Digit	3-Digit	AADC	Mixed AADC	Presorted ¹
1	\$0.324	\$0.346	\$0.351	\$0.369	\$0.394
2	0.449	0.471	0.476	0.494	0.519
3	0.574	0.596	0.601	0.619	0.644
3.5	0.699	0.721	0.726	0.744	0.769 ²
Postcard ³	0.199	0.210	0.213	0.223	0.242

1. Letters that meet one or more of the nonmachinable characteristics in DMM 201.2.1 are subject to the \$0.20 nonmachinable surcharge.

2. The maximum weight for machinable letter preparation is 3.3 ounces.

3. The card price applies to each single or double postcard when originally mailed; reply half of double postcard must be designed for reply mail purposes only.

1.4 Nonmachinable Surcharge

Surcharge per Presorted price piece (see [201.2.1, Criteria for Nonmachinable Letters](#), and [4.3, Nonmachinable Surcharge for Letter-Size Pieces](#)): \$0.20.

1.5 Presort Mailing Fee

Presort mailing fee, per 12-month period, per office of mailing: \$180.00.

1.6 Computing Postage for First-Class Mail

Determine single-piece weight and weight (postage) increment for each addressed piece as prescribed in [1.7](#) and [1.2, Price Computation for First-Class Mail Letters](#). For First-Class Mail, affix postage to each piece under [234.2.2, Affixed Postage for](#)

233.1.7

Presorted First-Class Mail, or, for permit imprint mailings, multiply the number of addressed pieces at each price increment (and in each price category, if applicable) by the corresponding postage price, add the *unrounded* products, and round off the total postage to the nearest whole cent.

1.7 **Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

2.0 Content Standards for First-Class Mail Letters

2.1 **General**

With the exception of restricted material as described in [601.8.0](#), any mailable item may be mailed as First-Class Mail.

2.2 **Bills and Statements of Account**

Bills and statements of account must be mailed as First-Class Mail (or Express Mail) and are defined as follows:

- a. Bills and statements of account assert a debt in a definite amount owed by the addressee to the sender or a third party. In addition, bills include a demand for payment; statements of account do not include a demand for payment. The debt does not have to be due immediately but may become due at a later time or on demand. The debt asserted need not be legally collectible or owed.
- b. Bills and statements of account do not need to state the precise amount due if they contain information that would enable the debtor to determine that amount.

2.3 **Personal Information**

Mail containing personal information must be mailed as First-Class Mail (or Express Mail). Personal information is any information specific to the addressee.

2.4 **Handwritten and Typewritten Material**

Mail containing handwritten or typewritten material must be mailed as First-Class Mail or Express Mail.

2.5 **Matter Marked Postcard or Double Postcard**

Any matter marked "Postcard" or "Double Postcard" must be mailed as First-Class Mail or Express Mail.

2.6 **Matter Not Required to be Mailed as First-Class Mail**

Matter eligible for Standard Mail or Package Services prices or authorized as Periodicals is not required to be mailed as First-Class Mail or Express Mail.

2.7 Prohibited Air Transportation

All First-Class Mail is subject to limitations for air transportation. Generally, all mailable matter may be transported by aircraft, unless restricted in [601.10.0, Hazardous Materials](#).

3.0 Basic Standards for First-Class Mail Letters**3.1 3.1 Description of Service****3.1.1 Service Objectives**

First-Class Mail receives expeditious handling and transportation. Service objectives for delivery are 1 to 3 days; however, delivery time is not guaranteed.

3.1.2 Price Options

First-Class Mail letters offer shape-based single-piece prices in [133.1.0](#) and discounted prices in [1.0](#) for presorted mailings of 500 or more pieces that weigh 3.5 ounces or less.

3.2 Defining Characteristics**3.2.1 Inspection of Contents**

First-Class Mail is closed against postal inspection. Federal law and USPS regulations restrict both opening and reviewing the contents of First-Class Mail by anyone other than the addressee.

3.2.2 Forwarding Service

The price of First-Class Mail includes forwarding service to a new address for up to 12 months.

3.2.3 Return Service

The price of First-Class Mail includes return service if the mailpiece is undeliverable.

3.2.4 Extra Services Exclusive to First-Class Mail

First-Class Mail is the only class of mail eligible to receive the following extra services: Registered Mail service and Certified Mail service.

3.2.5 Additional Extra Services

Additional extra services available with First-Class Mail are certificate of mailing service, COD service, Delivery Confirmation service (parcels only), insured mail service (merchandise only), return receipt service, restricted delivery service, Signature Confirmation service (parcels only), and special handling. See information regarding extra services in [503](#).

3.3 Additional Basic Standards for First-Class Mail

All presorted First-Class Mail letters must:

- a. Meet the basic content standards for First-Class Mail in [2.0](#).
- b. Weigh 3.5 ounces or less.
- c. Meet the applicable standards in [234, Postage Payment and Documentation](#), and [1.0, Prices and Fees for First-Class Mail](#).
- d. Be part of a single mailing of at least 500 pieces of Presorted First-Class Mail.

233.3.4

- e. Meet the applicable physical standards in:
 - 1. [201.1.0, Physical Standards for Machinable Letters and Cards.](#)
 - 2. [201.2.0, Physical Standards for Nonmachinable Letters.](#)
 - 3. [201.3.0, Physical Standards for Automation Letters and Cards.](#)
- f. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
 - 1. The Move Update standard in [3.5](#).
 - 2. The ZIP Code accuracy standard in [3.6](#).
 - 3. If an alternative addressing format is used, the additional standards in [602.3.0](#).

3.4 Presort Mailing Fee

A First-Class Mail presort mailing fee must be paid once each 12-month period at each office of mailing by any person or organization entering mailings at automation or Presorted First-Class Mail prices. Payment of one fee allows a mailer to enter mail at all those prices. Persons or organizations paying this fee may enter mail of their clients as well as their own mail. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

3.5 Move Update Standard

3.5.1 Basic Standards

The Move Update standard is a means of reducing the number of mailpieces in a mailing that require forwarding or return by the periodic matching of a mailer's address records with customer-filed change-of-address orders received and maintained by the USPS. For the purposes of this standard, *address* means a specific address associated with a specific occupant name. Addresses subject to the Move Update standard must meet these requirements:

- a. Each address and associated occupant name used on the mailpieces in a mailing must be updated within 185 days before the mailing date, with one of the USPS-approved methods in [3.5.2](#).
- b. Each individual address in the mailing is subject to the Move Update standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is updated with an approved method (e.g., Address Change Service), the same address may be used during the following 185 days and meets the Move Update standard.
- d. Except for mail bearing an alternative address format, addresses used on pieces claiming First-Class Mail Presorted prices, regardless of any required surcharge, must meet the Move Update standard.

3.5.2 USPS-Approved Methods

The following methods are authorized for meeting the Move Update standard:

- a. Address Change Service (ACS).
- b. National Change of Address Linkage System (NCOA^{Link}).

- c. *FASTforward* MLOCR processes if used each time before mail entry. If a mailpiece that initially uses *FASTforward* MLOCR processing is rejected and then entered into a Direct View Encoding Desk (DVED) operation (or similar system), the piece does not meet the Move Update standard. The name and address information on the piece must then be processed through a *FASTforward* RVE system to meet the Move Update standard. *FASTforward* RVE processes also meet the Move Update standard if used each time before mail entry.
- d. Mailer Move Update Process Certification and USPS-approved alternative methods for mailers with legitimate restrictions on incorporating USPS-supplied change-of-address information into their mailing lists. The National Customer Support Center (see [608.8.1](#) for address) administers and approves both Mailer Move Update Process Certification and alternative methods.
- e. Ancillary service endorsements under [507.1.5.1, First-Class Mail and Priority Mail](#), except “Forwarding Service Requested.”

3.5.3 Mailer Certification

The mailer’s signature on the postage statement certifies that the Move Update standard has been met for each address in the corresponding mailing presented to the USPS.

3.6 ZIP Code Accuracy

3.6.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain prices under [3.6.1d](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.6.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming First-Class Mail prices, regardless of any required surcharges, must meet the ZIP Code accuracy standard.

3.6.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

233.3.6.3

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
 1. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
 2. Any mailing list service in [507.7.0](#).
 3. An authorized service provider.
 4. CASS-certified matching software.
 5. USPS Web site www.usps.com.

3.6.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

4.0 Additional Eligibility Standards for Nonautomation First-Class Mail Letters

4.1 Additional Standards for Machinable First-Class Mail

In addition to the standards in [3.0, *Basic Standards for First-Class Mail Letters*](#), all pieces in a First-Class Mail Presorted price mailing must be marked, sorted, and documented as specified in [235.5.0, *Preparing Nonautomation Letters*](#).

4.2 Barcodes

Any POSTNET barcode on a mailpiece in a nonautomation First-Class Mail mailing must be correct for the delivery address and meet the standards in [202.5.0, *Barcode Placement*](#), and [708.3.0, *Coding Accuracy Support System \(CASS\)*](#) and [708.4.0, *Standards for POSTNET and Intelligent Mail Barcodes*](#).

4.3 Nonmachinable Surcharge for Letter-Size Pieces

The nonmachinable surcharge in [1.4](#) applies to letter-rate pieces (except card-price pieces) that meet one or more of the nonmachinable characteristics in [201.2.1](#).

5.0 Additional Eligibility Standards for Automation First-Class Mail Letters

5.1 Basic Standards for Automation First-Class Mail Letters

All pieces in a First-Class Mail automation price mailing must:

- a. Meet the basic standards for First-Class Mail in [3.0](#).
- b. Be part of a single mailing of at least 500 pieces of automation price First-Class Mail.

- c. Meet the physical standards in [201.3.0, Physical Standards for Automation Letters and Cards](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets the address matching and coding standards in [5.4, Address Standards for Barcoded Pieces](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).
- e. Bear an accurate DPBC or Intelligent Mail barcode (see [708.4.3](#)) matching the delivery address and meeting the standards in [202.5.0, Barcode Placement](#), and [708.4.0, Standards for POSTNET and Intelligent Mail Barcodes](#). Mailers must apply the barcode either on the piece or on an insert showing through a window.
- f. Be marked, sorted, and documented as specified in [235.6.0, Preparing Automation Price Letters](#), for letters and cards.

5.2 Maximum Weight for Automation Letters

Maximum weight for First-Class Mail automation letters is 3.5 ounces (0.2188 pound) (see [201.3.14.4, Heavy Letter Mail](#), for pieces heavier than 3 ounces).

5.3 Price Application—Automation Cards and Letters

Automation prices apply to each piece that is sorted under [235.6.0](#) into the corresponding qualifying groups:

- a. Groups of 150 or more pieces in 5-digit/scheme trays qualify for the 5-digit price. Preparation to qualify for the 5-digit price is optional. Pieces placed in full 3-digit/scheme trays in lieu of 5-digit/scheme overflow trays under [235.6.6](#) are eligible for the 5-digit prices.
- b. Groups of 150 or more pieces in 3-digit/scheme trays qualify for the 3-digit price. Pieces placed in full AADC trays in lieu of 3-digit/scheme overflow trays under [235.6.6](#) are eligible for the 3-digit prices.
- c. Groups of fewer than 150 pieces in origin 3-digit/scheme trays and pieces in AADC trays qualify for the AADC price. Pieces placed in mixed AADC trays in lieu of AADC overflow trays under [235.6.6](#) are eligible for the AADC prices.
- d. Pieces in mixed AADC trays qualify for the mixed AADC price, except for pieces prepared under [5.3c](#).

5.4 Address Standards for Barcoded Pieces

5.4.1 Basic Address Standards for Barcodes

To qualify for automation prices, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode that appears on a mailpiece claimed at an automation price must be the correct barcode for the corresponding delivery address on the piece.

5.4.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits.

5.4.3 Numeric Delivery Point Barcode (DPBC)

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [202.5.6](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code.

5.4.4 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product.

5.4.5 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used.

5.4.6 Secondary Designator

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used.

5.4.7 P.O. Box

A Post Office box address must contain a Post Office box number that can be exactly matched with the USPS ZIP+4 Product in effect.

5.5 Reply Cards and Envelopes Enclosed in Automation Price First-Class Mail

All letter-size reply cards and envelopes provided as enclosures in automation First-Class Mail and addressed for return to a domestic delivery address must meet the standards in [201.3.0, *Physical Standards for Automation Letters and Cards*](#), for enclosed reply cards and envelopes. The mailer must certify that this standard has been met when the corresponding mail is presented to the USPS.

6.0 Eligibility Standards for Card Price First-Class Mail

6.1 Card Price

A card may be a single or double (reply) stamped card or a single or double postcard. Stamped cards are available from USPS with postage imprinted on them. Postcards are commercially available or privately printed mailing cards. To be eligible for a card price, a card and each half of a double card must meet the physical standards in [201.1.2](#) and the applicable eligibility and preparation standards for the

price claimed. Ineligible cards are subject to letter-size prices. Cards may be prepared and mailed at the First-Class Mail single-piece card price, Presorted card price, or automation card prices.

6.2 Cards and Letters

Pieces claimed at card prices and pieces claimed at letter prices are subject to separate minimum volume criteria, but may be combined in the same mailing and reported on the same postage statement.

234 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Postage Payment for Presorted Letters](#)
- [3.0 Postage Payment for Automation Letters](#)
- [4.0 Mailing Documentation](#)

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

Postage for discount (Presorted or automation) price -First-Class Mail must be paid with affixed postage ([604.1.0](#) for stamps, [604.3.0](#) for precanceled stamps, or [604.4.0](#) for metered postage) or permit imprint ([604.5.0](#)) as specified in [2.0, Postage Payment for Presorted Letters](#), and [3.0, Postage Payment for Automation Letters](#). A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

2.0 Postage Payment for Presorted Letters

2.1 Payment Methods for Presorted Prices

Presorted First-Class Mail price postage must be paid with meter stamps under [604.4.0](#), permit imprints under [604.5.0](#), or precanceled postage under [604.3.0](#), subject to the corresponding standards for these methods. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization.

2.2 Affixed Postage for Presorted First-Class Mail

Unless permitted by other standards or by Business Mailer Support, USPS Headquarters, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. The full postage at the First-Class Mail price for which it qualifies (no postage documentation is required).
- b. A precanceled stamp or the full postage at the lowest First-Class Mail first-ounce price applicable to the mailing job, and full postage on metered pieces for any additional ounce(s) or nonmachinable surcharge; postage documentation may be required by standard.
- c. Postage in an amount not less than the lowest available First-Class Mail first-ounce letter or card price (as applicable) in the mailing job if authorized by Business Mailer Support, plus full postage on metered pieces for any extra ounce(s); postage documentation may be required by standard.

2.3 Additional Postage

Additional postage for pieces not bearing sufficient postage when presented to the USPS must be paid before acceptance either using an advance deposit account or with a meter stamp affixed to the postage statement accompanying the mail. When the amount of postage affixed is subject to Business Mailer Support authorization under [2.2c](#), credit is not given for postage affixed in excess of the authorized amount.

3.0 Postage Payment for Automation Letters

3.1 Payment Methods for Automation Prices

First-Class Mail automation price postage must be paid with meter stamps, permit imprints, or precanceled stamps. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization. Permit imprints may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support.

3.2 Affixing Postage for Automation Price First-Class Mail

Unless permitted by other standards or Business Mailer Support authorization, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. Each metered piece weighing more than 1 ounce must bear the correct additional postage to pay for the additional ounce(s).
- b. Each piece must bear a precanceled stamp or meter postage in the exact amount or at the lowest price applicable to pieces in the mailing job. If exact postage is not affixed, all additional postage must be paid at the time of mailing with an advance deposit account or with a meter stamp affixed to the required postage statement.
- c. Documentation meeting the standards in [4.0, Mailing Documentation](#), must be presented with the postage statement to show the number of pieces at each price and the computation of the additional postage due for pieces not bearing full postage at the applicable price (i.e., the difference between what the pieces bear and the correct postage at the price for which each qualifies).

3.3 Nondenominated Precanceled Stamps

A mailer may use available nondenominated precanceled stamps if:

- a. Stamps are affixed to every piece in the mailing.
- b. Additional postage is paid at the time of mailing either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.
- c. Documentation is presented with the postage statement showing, by 5-digit and 3-digit ZIP Code, the number of pieces at each price and the computation of the additional postage due at the applicable price (i.e., the difference between the value of the nondenominated stamp affixed and the correct postage at the price for which each piece qualifies).

3.4 Lower Denomination Precanceled Stamps

A mailer may use precanceled stamps of a denomination less than the postage for the first ounce at the lowest price in the mailing if:

- a. The stamps do not bear an improper price marking.
- b. The same denomination of stamp is affixed to every piece in the mailing.
- c. Additional postage is paid at the time of mailing either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.
- d. Documentation is presented with the postage statement showing, by 5-digit and 3-digit ZIP Code, the number of pieces at each price and the computation of the additional postage due at the applicable price (i.e., the difference between the value of the stamps affixed and the correct postage at the price for which each piece qualifies).

3.5 Postage Affixed at Lowest Price to All Pieces

Where it is not practicable for the mailer to affix the exact postage to each piece or to affix the lowest postage price to all pieces in the mailing, the mailer may compute postage for the mailing as if the lowest price affixed to any piece in the mailing were affixed to all pieces. Additional postage is computed based on the difference between the lowest price affixed to any piece in the mailing and the price for each price level in the mailing. This computation must be documented to meet the basic standards in [4.0, Mailing Documentation](#). No refund is paid for any piece where postage is affixed at a price higher than the lowest price claimed for or affixed to any piece. The total additional postage must be paid either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.

4.0 Mailing Documentation**4.1 Completing Postage Statements**

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

4.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the preparation, price levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

234.4.3

4.3 Documentation Standards for Automation Mailings

A complete postage statement must accompany each mailing. Each mailing also must be accompanied by presort and price documentation produced by PAVE-certified or MAC-certified software or by standardized documentation. *Exception:* For mailings of fewer than 10,000 pieces, presort and price documentation is not required if postage at the correct price is affixed to each piece or if each piece is of identical weight and the pieces are separated by price when presented for acceptance. Mailers may use a single postage statement and a single documentation report for all price levels in a single mailing. First-Class Mail mailings prepared under the value added refund procedures or as combined mailings must meet additional standardized documentation requirements under [604.9.0, Refunds and Exchanges](#), and [705.5.0, First-Class Mail or Standard Mail Mailings With Different Payment Methods](#).

4.4 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

4.5 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

4.6 Standard Format for Documentation

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and price claimed, or the documentation must be prepared as standardized documentation. Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation.

4.7 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0, Rulings on Mailing Standards](#).

4.8 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

4.9 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

235 Mail Preparation

Overview

- [1.0 General Definition of Terms](#)
- [2.0 Bundles](#)
- [3.0 Letter Trays](#)
- [4.0 Tray Labels](#)
- [5.0 Preparing Nonautomation Letters](#)
- [6.0 Preparing Automation Price Letters](#)

1.0 General Definition of Terms

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared.

1.2 Definition of Mailings

A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, automation and nonautomation letters must be prepared as separate mailings. Cards and letters must be prepared as separate mailings except that they may be sorted together if each meets separate minimum volume requirements. Machinable and nonmachinable letters must not be part of the same mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *5-digit scheme (trays) for automation letters*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in the USPS City State Product.
- c. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- d. *Unique 3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits, and that the 3-digit prefix is so identified in [L002](#), Column A.
- e. *3-digit scheme*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L003](#).

- f. *Origin/optional entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- g. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- h. *ADC/AADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) or automated area distribution center (AADC) (see [L004](#) or [L801](#)).
- i. *Mixed [ADC, AADC, etc.]*: the pieces are for delivery in the service area of more than one ADC, AADC, etc.
- j. *Residual pieces/bundles/sacks* contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort price. Residual mail is also referred to as *nonqualifying* or *working* mail.

1.4 Preparation Definitions and Instructions

[8-14-08] For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full letter tray* is one in which faced, upright pieces fill the length of the tray between 85% and 100% full.
- c. A *less-than-full* letter tray is one that contains mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full trays may be prepared only if permitted by the standards for the price claimed.
- d. An *overflow* letter tray is a less-than-full tray that contains all pieces remaining after preparation of full trays for the same destination. Overflow trays may be prepared only if permitted by the standards for the price claimed.
- e. A *5-digit scheme sort for automation letters* yields 5-digit scheme trays for those 5-digit ZIP Codes identified in the USPS City State Product and 5-digit trays for other areas. Mail prepared using 5-digit scheme sort must be entered no later than 90 days after the release date of the City State Product used to obtain the scheme information (see [708.3.0, Coding Accuracy Support System \(CASS\)](#)). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Trays prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still

considered 5-digit scheme sorted and are labeled accordingly. When standards require 5-digit/scheme sorting, mailers must prepare all possible 5-digit scheme trays, then prepare all possible 5-digit trays.

- f. A *3-digit scheme sort* yields 3-digit scheme trays for those 3-digit ZIP Code prefixes listed in [L003](#) and 3-digit trays for other areas. The 3-digit ZIP Code prefixes in each scheme are treated as a single presort destination subject to a single minimum tray volume, with no further separation by 3-digit prefix required. Trays prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit areas are still considered 3-digit scheme sorted and are labeled accordingly. The 3-digit scheme sort is required for automation price letter-size First-Class Mail. When standards require 3-digit/scheme sorting, mailers must prepare all possible 3-digit scheme trays, then prepare all possible 3-digit trays.
- g. An *origin 3-digit* (or *origin 3-digit scheme*) tray contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray must be prepared for each.
- h. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- i. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- j. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer’s location, the Post Office of entry determines the *entry* facility. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs.
- k. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- l. A *bundle* is a group of addressed pieces secured together as a unit. Bundle preparation is described in [2.0, Bundles](#).

- m. A “logical” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container due to applicable preparation requirements or the size of the individual pieces as described in 2.3.

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit. The term *bundle* does not apply to pieces grouped or prepared loose in trays.

2.2 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.3 Preparing Bundles

[8-14-08] Cards and letter-size pieces are subject to these bundling standards:

- a. The maximum thickness for bundles is 6 inches.
- b. Mailings consisting entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch) must always be prepared in bundles.
- c. Bundles must be prepared for mail in all less-than-full trays (including overflow trays) and for nonmachinable Presorted First-Class Mail.
- d. For mailings consisting entirely of card-size pieces and mail in less-than-full trays, mailers must secure bundles with rubber bands, elastic strapping, flat plastic strapping, or string. Elastic strapping must be approved by USPS Engineering. If requested, the mailer must be able to show such approval for the strapping material used for a mailing.
- e. Bundling of automation and machinable letters or cards under 2.3d is required to retain the orientation of the pieces within the tray. Bundles are not required to be identified with an optional endorsement line or a barcoded pressure-sensitive bundle label when placed into a correctly labeled tray.
- f. Bundles up to 1 inch thick must be secured with appropriate banding placed once around the girth (narrow dimension). Bundles over 1 inch thick must be secured with at least two bands, one around the length and one around the girth.

2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.

- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Except under [2.3f, Preparing Bundles](#), bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing.

2.5 Exception to Bundle Preparation—Full Single-Sort-Level Trays

In mailings not entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch), mailers need not prepare bundles when placing mail in a full tray and none of the mail in that tray would have been more finely sorted if bundled. For example, the content of a full ADC tray need not be bundled if it would have all been prepared in ADC bundles to the same destination.

2.6 Pieces With Simplified Address

For mail prepared with a simplified address, all pieces for the same Post Office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, Post Office boxholder).

2.7 Bundles With Fewer Than the Minimum Number of Pieces Required

An individual bundle may be prepared with fewer than the minimum number of pieces required if the pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

2.8 Labeling Bundles

Unless excepted by standard, the presort level of each bundle must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. On letter-size mail (including card-size pieces), the bundle label must be placed in the lower left corner of the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. 5-digit presort level, red Label 5.
- b. 3-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X.

235.3.1

3.0 Letter Trays

3.1 Standard Containers

Mailings must be prepared in letter trays with sleeves. However, a postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing.

3.2 Letter Tray Sizes

These approximate measurements define the tray sizes that apply to all letter-size mail preparation standards:

- a. 2-foot managed mail (MM) trays: 21 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- b. 1-foot MM trays: 10-1/4 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- c. 2-foot extended MM (EMM) trays: 21-3/4 inches long by 11-1/2 inches wide (inside bottom dimensions) by 6-1/8 inches high.

3.3 Letter Tray Preparation

Letter trays are prepared as follows:

- a. Subject to availability of equipment, standard MM trays must be used for all letter-size mail, except that EMM trays must be used when available for letter-size mail that exceeds the inside dimensions of MM trays defined in [3.2, Letter Tray Sizes](#). When EMM trays are not available for those larger pieces, they must be placed in MM trays, angled back, or placed upright perpendicular to the length of the tray in row(s) to preserve their orientation.
- b. Pieces must be “faced” (oriented with all addresses in the same direction with the postage area in the upper right).
- c. Each tray prepared must be filled before filling the next tray, with the contents in multiple trays relatively balanced. When preparing full trays, mailers must fill all possible 2-foot trays first; if there is mail remaining for the presort destination, mailers must use a combination of 1-foot and 2-foot trays that results in the fewest total number of trays for that presort level. As an alternative, if there is mail remaining, mailers may move those pieces to the next higher presort level at which there is a minimum quantity (e.g., 150 pieces).
- d. For presort destinations that do not require full trays, pieces are placed in a less-than-full tray.
- e. Mailers must use as few trays as possible without jeopardizing price eligibility. For instance, a mailer will never have two 1-foot trays to a single destination; instead, that mail must be placed in a single 2-foot tray. A 1-foot tray is prepared only if it is a full tray with no overflow; or if there is less than 1 foot of mail for that destination; or if the overflow from a full 2-foot tray is less than 1 foot of mail.
- f. Each tray must bear the correct tray label.

- g. Each tray must be sleeved and strapped under [3.4, Tray Sleevling and Strapping](#), and [3.5, Strapping Exception](#).
- h. If a mailing is prepared using an MLOCR/barcode sorter and is submitted with standardized documentation, then pieces do *not* have to be grouped by 3-digit ZIP Code prefix (or by 3-digit scheme, if applicable) in AADC trays, or by AADC in mixed AADC trays.

3.4 Tray Sleevling and Strapping

Letter trays are secured using USPS-provided sleeves. Each sleeved letter tray must then be secured with one plastic strap placed tightly around the length of the tray without crushing the tray or sleeve.

3.5 Strapping Exception

If the processing and distribution manager gives a written waiver, strapping is not required for any mixed AADC letter tray of First-Class Mail or for any letter tray that originates and destines in the same SCF (mail processing plant) service area.

3.6 Origin/Entry 3-Digit/Scheme Trays

After all finer sort levels are prepared, an origin/entry 3-digit tray (or, if applicable, origin/entry 3-digit scheme tray) must be prepared to contain any remaining mail for each 3-digit (or 3-digit scheme) area serviced by the SCF serving the Post Office where the mail is verified (origin), and may be prepared for each 3-digit (or 3-digit scheme) area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the Post Office where the mail is verified). In all cases, only one less-than-full tray may be prepared for each 3-digit (or 3-digit scheme) area.

4.0 Tray Labels

4.1 Basic Standards

Tray labels are subject to these basic standards:

- a. Use 2-inch labels.
- b. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.
- c. Tray labels for automation price mailings are subject to [4.9.1, Basic Standards for Barcoded Tray Labels](#), and [708.6.0](#).

4.2 Physical Characteristics of a Tray Label

A tray label must meet these specifications:

- a. Color: white or manila.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- e. Thickness: 0.005 inch minimum.

4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the tray.

4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the tray and other information as specified by standards.
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of tray labels.

CONTENT TYPE	CODE
Barcoded	BC
Barcoded and Nonbarcoded	BC/NBC
Digit	D
First-Class Mail	FCM
Letters	LTR or LTRS
Machinable	MACH
Mixed	MXD
Nonmachinable	MAN or MANUAL
Working	WKG

4.5 Line 3 (Office of Mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry Post Office or the mailer’s name and the city and state of the mailer’s location. It is recommended that the mailer’s name also appear with the city and state of the entry Post Office.

4.6 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.7 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

4.8 Placement of Tray Label

A tray label must be securely placed in an adhesive-backed label holder that is affixed to the specific location designated on the tray. Where no specific location is indicated the label must be securely placed in an adhesive-backed label holder that is affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert labels completely into the label holder to ensure that they do not fall out during processing. Do not insert labels upside down.

4.9 Barcoded Tray Labels

4.9.1 Basic Standards for Barcoded Tray Labels

Barcoded tray labels must be used for automation-price letter-size mailings. Barcoded labels must meet these general standards:

- a. Use 2-inch labels.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Mailers must insert barcoded labels completely into the label holder on the tray to prevent their loss during transport and processing.

5.0 Preparing Nonautomation Letters

5.1 Basic Standards

5.1.1 All Mailpieces

Each Presorted First-Class Mail mailing must meet the applicable standards in [233.4.0, Additional Eligibility Standards for Nonautomation First-Class Mail Letters](#), and in [235, Mail Preparation](#); All pieces must be in the same processing category, subject to [5.1.4, Cards and Letters](#), and must be sorted together and prepared under [5.2, Machinable Preparation](#), or [5.3, Nonmachinable Preparation](#). Letter-size pieces (including card-size pieces) must be prepared in letter trays.

5.1.2 Single-Piece Price Pieces Presented With Presort Mailings

Regardless of postage payment method, mailers may present single-piece price First-Class Mail with pieces claimed at automation or presort prices and report all pieces on the same postage statement. The following standards apply:

- a. The mailer must prepare the single-piece price pieces in separate trays from the automation and presort pieces. As an option, mailers may label the trays with barcoded or nonbarcoded tray labels. Create barcoded tray labels under [708.6.0](#) using content identifier numbers 246, 260, or 268, as appropriate. Label barcoded and nonbarcoded trays as follows:
 1. Line 1: Use [L201](#); for mail originating in ZIP Code areas in Column A, use “MXD” followed by city, state, and 3-digit ZIP Code prefix in Column C (use “MXD” instead of “OMX” in the destination line and ignore Column B).
 2. Line 2: For barcoded labels use the human-readable content line corresponding to the content identifier number (see [Exhibit 708.6.1.4](#)); for nonbarcoded labels use “FCM SNGLP WKG.”
 3. Line 3: Office of mailing or mailer information.
- b. The single-piece price pieces must bear no price marking or be marked “First-Class” or, if not affixed with full single-piece price postage, “Single-Piece” (or “SNGLP”). See [202.3.0, Placement and Content of Mail Markings](#).
- c. The mailer must affix additional postage to the single-piece price pieces to yield the correct amount on each piece, or (if prepared with a corrective price marking) the mailer must pay all additional postage at the time of mailing.

5.1.3 Marking

Subject to [202.3.0, Placement and Content of Mail Markings](#), all pieces must be marked “Presorted” (or “PRSRT”) and “First-Class.”

5.1.4 Cards and Letters

Pieces claimed at card prices and pieces claimed at letter prices are each subject to a separate minimum volume criterion whether prepared as separate or combined mailings. Either way, card-size and letter-size pieces may be presented at the same time and reported on the same postage statement.

5.2 Machinable Preparation

5.2.1 Machinable Bundling

Machinable pieces are not bundled, except for (see [2.0, Bundles](#)):

- a. Card-size pieces.
- b. All pieces in a less-than-full origin 3-digit tray.
- c. All pieces in a less-than-full mixed AADC tray.

5.2.2 Traying and Labeling

Preparation sequence, tray size, and labeling:

- a. Separate 3-digit origin trays required for each origin 3-digit ZIP Code; no minimum piece requirement; one less-than-full tray permitted for each origin ZIP Code; labeling:

1. Line 1: [L002](#), Column A.
 2. Line 2: "FCM LTR 3D MACH."
- b. AADC (required); full trays (no overflow), with pieces grouped by 3-digit ZIP Code prefix; labeling:
1. Line 1: [L801](#).
 2. Line 2: "FCM LTR AADC MACH."
- c. Mixed AADC (required); no minimum, with pieces grouped by AADC; labeling:
1. Line 1: Use [L201](#); for mail originating in ZIP Code areas in Column A, use "MXD" followed by city, state, and 3-digit ZIP Code prefix in Column C (use "MXD" instead of "OMX" in the destination line and ignore Column B).
 2. Line 2: "FCM LTR MACH WKG."

5.3 Nonmachinable Preparation

5.3.1 Nonmachinable Bundling

Except as provided in [2.5, Exception to Bundle Preparation—Full Single-Sort-Level Trays](#), bundling is required before traying. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Preparation sequence, bundle size, and labeling:

- a. 5-digit (required); 10-piece minimum; red Label 5 or optional endorsement line (OEL); labeling not required for pieces in full 5-digit trays.
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL.

5.3.2 Traying and Labeling

Preparation sequence, tray size, and labeling:

- a. 5-digit (required); full trays (no overflow); labeling:
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0, Tray Labels](#), for overseas military mail).
 2. Line 2: "FCM LTR 5D MANUAL."
- b. 3-digit (required); full trays (no overflow), except for one less-than-full tray for each origin 3-digit(s); labeling:
 1. Line 1: [L002](#), Column A.
 2. Line 2: "FCM LTR 3D MANUAL."
- c. ADC (required); full trays (no overflow); labeling:
 1. Line 1: [L004](#), Column B.
 2. Line 2: "FCM LTR ADC MANUAL."
- d. Mixed ADC (required); no minimum; labeling:

235.6.1

1. Line 1: Use [L201](#); for mail originating in ZIP Code areas in Column A, use “MXD” followed by city, state, and 3-digit ZIP Code prefix in Column C (use “MXD” instead of “OMX” in the destination line and ignore Column B).
2. Line 2: “FCM LTR MANUAL WKG.”

6.0 Preparing Automation Price Letters

6.1 Basic Standards

Mailers must prepare letter-size automation price First-Class Mail under [6.0](#). Bundle and tray preparation are subject to [235](#). Use barcoded tray labels under [4.9](#) and [708.6.0](#).

6.2 Mailings

The requirements for mailings are as follows:

- a. General. All pieces in a mailing must meet the standards in [201.3.0, *Physical Standards for Automation Letters and Cards*](#), and must be sorted together to the finest extent required for the price claimed except under [6.2c](#). The definitions of a mailing and permissible combinations are in [1.0, *General Definition of Terms*](#).
- b. First-Class Mail. A single automation price First-Class Mail mailing may include pieces prepared at 5-digit, 3-digit, AADC, and mixed AADC prices.
- c. Regardless of the method of postage payment, pieces of single-piece price First-Class Mail may be presented with and reported on the same postage statement as pieces claimed at automation or presort prices if the single-piece price pieces are physically separated from other pieces; bear no price marking, or are marked only “First-Class,” or (if not affixed with full single-piece price postage) are marked “Single-Piece” or “SNGLP” under [202.3.0, *Placement and Content of Mail Markings*](#), in addition to any other marking; and either have additional postage affixed to yield the correct amount on each piece or (if prepared with a corrective price marking) have all additional postage paid at the time of mailing.

6.3 Marking

All automation price pieces must be marked under [202.3.0, *Placement and Content of Mail Markings*](#), and [202.4.0, *Placement and Physical Standards for Endorsements*](#). Pieces claimed at an automation price must bear the appropriate class marking and, except as provided in [202.3.0, *Placement and Content of Mail Markings*](#), and [202.4.0, *Placement and Physical Standards for Endorsements*](#), “AUTO.” Pieces not claimed at an automation price must not bear “AUTO” unless single-piece price postage is affixed or the corrective single-piece price marking (“SNGLP” or “Single-Piece”) is applied.

6.4 General Preparation

Grouping, bundling, and labeling are not generally required or permitted, except bundling is required in any mailing consisting entirely of card-size pieces and for pieces in overflow and less-than-full trays, and grouping is required under [6.6](#).

6.5 Cards

Pieces claimed at First-Class Mail card prices and pieces claimed at First-Class Mail letter prices are each subject to a separate minimum volume criteria whether prepared as separate or combined mailings. Either way, card-size and letter-size pieces may be presented at the same time and reported on the same postage statement.

6.6 Tray Preparation

[6-5-08] Instead of preparing overflow trays with fewer than 150 pieces, mailers may include these pieces in the next tray level when a tray of 150 or more pieces can be made. Mailers must note these trays on standardized documentation (see [708.1.2](#)). Pieces that are placed in the next tray level must be grouped by destination and placed in the front or back of that tray. Mailers may use this option selectively for 3-digit and AADC ZIP Codes. This option does not apply to origin/entry 3-digit/scheme trays. Preparation sequence, tray size, and Line 1 labeling:

- a. 5-digit/scheme (see [1.4e](#)): optional, but required for 5-digit price (150-piece minimum); overflow allowed.
 1. For 5-digit scheme trays, use destination shown in the current USPS City State Product.
 2. For 5-digit trays, use city, state, and 5-digit ZIP Code destination on pieces (see [4.0](#) for overseas military mail).
- b. 3-digit/scheme: required (150-piece minimum except no minimum for required origin/optional entry 3-digit(s)/scheme); overflow allowed; for Line 1, use [L002](#), Column B.
- c. AADC: required (150-piece minimum); overflow allowed; group pieces by 3-digit ZIP Code prefix (or 3-digit/scheme if applicable); for Line 1, use [L801](#), Column B.
- d. Mixed AADC: required (no minimum); group pieces by AADC. For Line 1 use [L201](#); for mail originating in ZIP Code areas in Column A, use “MXD” followed by city, state, and 3-digit ZIP Code prefix in Column C (use “MXD” instead of “OMX” in the destination line and ignore Column B).

6.7 Tray Line 2

Line 2: “FCM LTR” and:

- a. 5-digit scheme: “BC 5D SCHEME.”
- b. 5-digit: “5D BC.”
- c. 3-digit scheme: “BC 3D SCHEME” and, if applicable, as shown in [L002](#), Column B, followed by the letter “A,” “B,” or “C.”
- d. 3-digit: “3D BC.”
- e. AADC: “AADC BC.”
- f. Mixed AADC: “BC WKG.”

235.6.8

6.8 Presentation

Upon presentation of letter-size automation price First-Class Mail mailings to USPS for verification, mailers must present all mixed AADC trays together, and such trays must either be adjacent to one another, or side by side, and must be placed as the top layer(s) on any given container. Containerization instructions for First-Class Mail letters and cards may be established by local USPS managers.

236 Enter and Deposit

Overview

- [1.0 Deposit](#)
- [2.0 Verification](#)

1.0 Deposit

1.1 Service Objectives

All First-Class Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information.

1.2 Time and Location of Deposit

First-Class Mail paid at the Presorted price or at any automation price must be deposited at locations and times designated by the postmaster. Metered mail must be deposited in locations under the jurisdiction of the licensing Post Office except as permitted in [604.4.5.3](#). Permit imprint mail must be deposited under [604.5.0](#) or [705, Advanced Preparation and Special Postage Payment Systems](#).

1.3 Approved Collections

The USPS may collect Presorted First-Class Mail and automation price First-Class Mail at a mailer's facility if part of an approved collection service for other classes of mail; space is available on the transportation required for those classes; and:

- a. Acceptance and verification are done at the customer's facility; or
- b. Postage is paid with permit imprint under an optional procedure; or
- c. Postage is paid with meter or precanceled stamps.

1.4 Permit Imprint Collection

The USPS does not collect presort mailings from a customer's facility if paid with a permit imprint and not covered by optional procedures.

2.0 Verification

2.1 USPS Verification and Mailer Correction

Mailings are subject to USPS procedures to verify correct preparation and postage payment. The mailer is responsible for correcting irregularities found in the mailing. If, at the acceptance unit, a mailing is found not to qualify for a Presorted First-Class Mail price or an automation First-Class Mail price, the mailer must either take corrective action or pay the full single-piece price. The return of such mailings to the mailer's facility for any reworking is the mailer's responsibility.

2.2 Timeframe for Corrective Action

If a mailer corrects the presort or preparation problems in a metered or precanceled stamped mailing that caused its disqualification when originally presented for acceptance, but cannot resubmit that mailing on the same day, the date shown in the meter or mailer's precancel postmark must be corrected. The mailer may either

236.2.3

reenvelope each piece and reapply postage and request a postage refund under [604.9.0, Refunds and Exchanges](#), or apply a legible “.00” meter impression that includes the correct mailing date.

2.3 Payment at Single-Piece Price Rather Than Correcting Errors

A mailer who pays the single-piece First-Class Mail price rather than correcting errors in a mailing paid with meter or precanceled stamps must pay the difference in cash at the window and present the copy of the cash receipt to the acceptance point before the mail may be released for processing. A mailer who makes the same choice for a mailing paid with a permit imprint must correct the postage statement presented with the mailing to show that postage is to be paid at the higher price.

- 1.0 Prices and Fees for Standard Mail
- 2.0 Content Standards for Standard Mail Letters
- 3.0 Basic Standards for Standard Mail Letters
- 4.0 Price Eligibility for Standard Mail
- 5.0 Additional Eligibility Standards for Nonautomation Standard Mail Letters
- 6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Letters
- 7.0 Eligibility Standards for Automation Price Standard Mail

1.0 Prices and Fees for Standard Mail

1.1 Price Application

Postage is based on the price that applies to the weight (postage) increment of each addressed piece.

1.2 Standard Mail Price Application

Standard Mail prices are based on the weight of the pieces as follows:

- a. The appropriate minimum per piece price applies to any Standard Mail piece that weighs 3.3 ounces (0.2063 pound) or less.
- b. A price determined by adding the per piece charge and the corresponding per pound charge applies to any Standard Mail piece that weighs more than 3.3 ounces.

1.3 Regular Standard Mail—ECR and Automation Prices

	Entry Discount	Enhanced Carrier Route (ECR) ¹			Automation			
		Saturation	High Density	Basic	5-Digit	3-Digit	AADC	Mixed AADC
Letters weighing 3.3 oz. or less per piece price	None	\$0.179	\$0.190	\$0.234	\$0.225	\$0.241	\$0.244	\$0.257
	DBMC	0.146	0.157	0.201	0.192	0.208	0.211	0.224
	DSCF	0.137	0.148	0.192	0.183	0.199	0.202	---
	DDU	---	---	---	---	---	---	---
more than 3.3 oz. ² per pound price	None	0.604	0.604	0.635	0.733	0.733	0.733	0.733

1. For pieces over 3.3 ounces, see Standard Mail Not Flat-Machinable prices.

1.7 Fees**1.7.1 Presort Mailing Fee**

Mailing fee, per 12-month period: \$180.00.

1.7.2 Weighted Fee

For return of pieces bearing the ancillary service markings “Address Service Requested” and “Forwarding Service Requested.”

WEIGHTED FEE

Single Piece Weight Not Over (ounces)	Weighted Fee per Piece¹
Card Price	\$0.67
1	1.04
2	1.46
3	1.88
3.5	2.30

1. Weighted fee equals single-piece First-Class Mail or Priority Mail price (plus the nonmachinable surcharge, if applicable) multiplied by 2.472.

1.8 Computing Postage for Standard Mail**1.8.1 Weight**

To compute the total weight of the addressed pieces in a mailing or mailing segment for:

- a. Identical-weight pieces, multiply the computed average weight of a single piece by the corresponding number of pieces; do not round the product.
- b. Nonidentical-weight pieces, add the actual weight of the individual pieces or weigh the entire mailing in bulk; do not round either result.

1.8.2 Determining Single-Piece Weight

To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. To determine single-piece weight in a mailing of nonidentical-weight pieces, weigh each piece individually. Express all single-piece weights in decimal pounds, rounded off to four decimal places.

1.8.3 Net Postage

Postage is computed at the applicable prices on the entire mailing to be mailed at one time. The net postage price is either the applicable minimum per piece price or the piece/pound price, as adjusted for any discounts and surcharges.

1.8.4 Per Piece and Per Pound Charges

The per piece charge is computed based on the total number of addressed pieces for each price category claimed. The minimum price may apply to each piece as detailed in [1.2, Standard Mail Price Application](#). Otherwise, the per piece charge must be added to the per pound charge to determine total postage. Where applicable, the per pound charge is computed based on the total weight of the

addressed pieces for each price category claimed, and is added to the per piece charge to determine total postage. For example, a quantity of pieces weighing 100.25 pounds is charged 100.25 times the applicable price per pound, based on the price claimed, plus one unit of the applicable per piece charge for each addressed piece.

1.8.5 Computing Affixed Postage

To compute postage to be affixed to each piece, multiply the weight of the piece (in pounds) by the applicable price per pound; add the applicable per piece charge and any surcharge; and round the sum up to the next tenth of a cent. The applicable minimum per piece charge must be affixed if it is more than the total computed per piece postage.

1.8.6 Computing Affixed Postage—Heavy Letters

To compute postage to be affixed to each piece, multiply the weight of the piece (in pounds) by the applicable price per pound; add the applicable per piece charge, subtract the heavy letter discount (see 1.8.8 through 1.8.9); and round the sum up to the next tenth of a cent.

1.8.7 Permit Imprint

In any permit imprint mailing:

- a. For each price or price category, multiply the number of addressed pieces by the corresponding price per piece and (if applicable) multiply the *unrounded* total weight of the pieces by the corresponding price per pound; round off each product to four decimal places.
- b. Add the per piece and per pound charges and round off the total postage to the nearest whole cent.

1.8.8 Discount for Heavy Automation Letters

Automation letters that weigh more than 3.3 ounces but not more than 3.5 ounces are charged postage equal to the automation piece/pound price for that piece and receive a discount equal to the corresponding automation flat-size piece price (3.3 ounces or less) minus the corresponding automation letter-size piece price (3.3 ounces or less). If a destination entry price is claimed, the discount is calculated using the corresponding prices.

1.8.9 Discount for Heavy ECR Letters

Pieces that otherwise qualify for the high density or saturation letter price and weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the piece/pound price and receive a discount equal to the flat-size piece price (3.3 ounces or less) minus the letter-size piece price (3.3 ounces or less). If a destination entry price is claimed, the discount is calculated using the corresponding prices.

2.0 Content Standards for Standard Mail Letters

2.1 Definition and Weight

Standard Mail consists of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (unless permitted or required by standard) and that weighs less than 16 ounces. Standard Mail includes matter formerly classified as Standard Mail (A) and third-class mail.

2.2 Personal Information

Personal information may not be included in a Standard Mail mailpiece unless all of the following conditions are met:

- a. The mailpiece contains explicit advertising for a product or service for sale or lease or an explicit solicitation for a donation.
- b. All of the personal information is directly related to the advertising or solicitation.
- c. The exclusive reason for inclusion of all of the personal information is to support the advertising or solicitation in the mailpiece.

2.3 Bills and Statements of Account

Mail containing bills or statements of account as defined in [233.2.2](#) may not be entered as Standard Mail except under the conditions described in [2.5.2](#).

2.4 Handwritten and Typewritten Matter

Mail containing handwritten or typewritten matter may not be entered as Standard Mail except under the conditions described in [2.6](#).

2.5 Attachments and Enclosures

2.5.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Standard Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

2.5.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to Standard Mail merchandise (including books but excluding merchandise samples) without payment of First-Class Mail postage. Incidental First-Class Mail matter may not be enclosed in or attached to matter mailed as Customized MarketMail under [705.1.0](#). An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared not to encumber postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel.

243.2.5.3

Postage at the Standard Mail or Package Services price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

2.5.3 Nonincidental First-Class Mail Enclosures

Letters or other pieces of nonincidental First-Class Mail, subject to postage at First-Class Mail prices, may be enclosed with Standard Mail pieces (except matter mailed as Customized MarketMail under [705.1.0](#)). Postage for the First-Class Mail enclosure must be placed on the outside of the piece. It may be affixed separately or added to the postage for the host piece. The endorsement "First-Class Mail Enclosed" must be placed on the piece, below the postage and above the address.

2.5.4 Nonincidental First-Class Mail Attachments

Letters or other pieces of nonincidental First-Class Mail may be placed in an envelope and securely attached to the address side of a Standard Mail piece (except matter mailed as Customized MarketMail under [705.1.0](#)), or of the principal piece, as applicable. Combination envelopes or containers with separate parts for the two classes of mail may be used. The names and addresses of the sender and addressee must be placed on both the principal piece and the attachment. Alternatively, the sender's name and address must be placed on one part and the addressee's name and address on the other. If the piece is a combination container with inseparable parts or compartments, the names and addresses may appear on only one part. The applicable Standard Mail postage for the Standard Mail matter must be prepaid and placed in the upper right corner of the address space. Postage at the applicable First-Class Mail price must be paid for and affixed to the First-Class Mail attachment, unless other payment methods are permitted by standard.

2.5.5 Attachment of Other Standard Mail Matter

Standard Mail pieces may bear an attachment that is eligible as Standard Mail matter if these additional conditions are met:

- a. The piece bearing the attachment is claimed as Customized MarketMail (CMM) under [705.1.0](#) or as Enhanced Carrier Route Standard Mail under [6.0](#).
- b. The face of the attachment may bear only the price markings and endorsements permitted for the price claimed for the host piece.
- c. At the time of mailing, the piece shows only one complete delivery address. If the attachment is a reply card, the address for returning the piece is not visible.
- d. Enhanced Carrier Route host pieces are larger than 6 by 11 inches. CMM host pieces are any size permitted under [705.1.1.3, Physical Standards](#).
- e. The attachment is not larger than the host piece and does not extend beyond the host piece. An attachment affixed to a CMM piece may not be greater than 1/4 inch thick at its thickest point.
- f. Each piece in the mailing bears the attachment, and the attachment is of identical size, weight, and positioning on the host piece. Different wording or designs may be used.
- g. The attachment does not interfere with processing or delivery. Folded or multipage attachments must be secured to prevent opening during handling.

2.6 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

3.0 Basic Standards for Standard Mail Letters

3.1 Description of Service

3.1.1 Service Objectives

Standard Mail may receive deferred handling. Service objectives for delivery are 2 to 9 days; however, delivery time is not guaranteed.

3.1.2 Minimum Quantity

Standard Mail provides economical prices for mailings of 200 or more pieces or 50 or more pounds of mail.

3.2 Defining Characteristics

3.2.1 Mailpiece Weight

All Standard Mail pieces must weigh less than 16 ounces. The following weight limits also apply to pieces mailed at Standard Mail letter prices:

- a. Pieces mailed at machinable and nonmachinable letter prices may weigh up to 3.3 ounces. Letter-size pieces weighing more than 3.3 ounces and prepared as nonmachinable letters are mailable at Not Flat-Machinable prices (see [443](#)) and must be marked "Not Flat-Machinable" or "NFM" according to [402.2.0](#), unless they are barcoded and eligible to be mailed as automation flats under [301.3.0](#).

243.3.2.2

- b. Pieces mailed at automation letter prices or Enhanced Carrier Route prices may weigh up to 3.5 ounces.

3.2.2 Preparation Requirements

Standard Mail is subject to specific volume, marking, and preparation requirements.

3.2.3 Inspection of Contents

Standard Mail is not sealed against postal inspection.

3.2.4 Forwarding Service

The price of Standard Mail typically does not include forwarding service. Forwarding service is available under [507.1.5](#).

3.2.5 Return Service

The price of Standard Mail does not include return service. Return service is available under [507.1.5](#) for an additional fee.

3.2.6 Extra Services

Extra services available with Standard Mail are insured mail service (bulk insurance only), certificate of mailing service (bulk certificate of mailing only), return receipt for merchandise service, and Delivery Confirmation service (parcels only). See information regarding extra services in [503](#).

3.2.7 Periodicals

Authorized Periodicals may not be entered as Standard Mail unless permitted by standard.

3.2.8 Identical Pieces

The contents of printed matter in a Standard Mail mailing must be identical to a piece sent to at least one other addressee. Standard Mail may include the addressee's name and address but may not transmit personal information except as permitted under [2.2](#).

3.3 Additional Basic Standards for Standard Mail

Each Standard Mail mailing is subject to these general standards:

- a. All pieces in a mailing must be of the same processing category.
- b. Each mailing must contain at least 200 pieces or 50 pounds of pieces. See [3.6](#), [Residual Volume Requirement](#), for volume requirement eligibility unique to Presorted Standard price mailings. Other volume standards also can apply, based on the price claimed.
- c. All pieces in an automation mailing must be eligible for an automation price.
- d. All pieces in a mailing must be sorted together and marked under the standards for the price claimed.
- e. Each piece must bear the addressee's name and delivery address, including the correct ZIP Code or ZIP+4 code (see [3.8.1](#)), unless an alternative addressing format is used subject to [602.3.0](#). Detached address labels may be used subject to [602.4.0](#).
- f. Postage must be paid under [244.1.0](#) through [244.3.0](#) with precanceled stamps, meter stamps, or permit imprint.

- g. A postage statement, completed and signed by the mailer, using the correct USPS form or an approved facsimile, must be submitted with each mailing. In addition, mailings must be documented under [244.4.2, Basic Documentation Standards](#), and the standards for the price claimed.
- h. Each piece must meet the standards for any other price or discount claimed.
- i. Any POSTNET barcode on a mailpiece must be correct for the delivery address and meet the standards in [202.5.0, Barcode Placement](#), [708.3.0, Coding Accuracy Support System \(CASS\)](#), and [708.4.0, Standards for POSTNET and Intelligent Mail Barcodes](#).
- j. Mailings must be deposited at a business mail entry unit of the Post Office where the postage permit or license is held and the annual mailing fee paid, unless deposit elsewhere is permitted by standard.

3.4 Presort Mailing Fees

An annual mailing fee must be paid once each 12-month period at each Post Office of mailing. A mailer paying this fee may enter clients' mail as well as the mailer's own. The mailer whose permit imprint appears on pieces in a mailing paid with a permit imprint must show that permit number on the postage statement and must pay the annual mailing fee for that permit; this fee is in addition to the one-time fee for an application to use permit imprints. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

3.5 Merging Similar Standard Mailings

Mailings are subject to the general definitions and conditions in [245.1.0, General Information for Mail Preparation](#). Generally, mailers may merge similar Standard Mail matter into a single mailing. Differences in text, address labels, and address lists or list key numbers do not prohibit the mailer from merging and sorting pieces together. Pieces with different methods of postage payment may be combined in the same mailing only if authorized by Business Mailer Support (BMS). Pieces of nonidentical weight, if merged in the same mailing, must bear the correct postage when mailed, unless otherwise authorized by BMS.

3.6 Residual Volume Requirement

Pieces in an Enhanced Carrier Route price mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted price mailing, provided that the Enhanced Carrier Route price mailing and the Presorted price mailing are part of the same mailing job. Likewise, pieces in an automation price mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted price mailing, provided that the automation price mailing and the Presorted mailing are part of the same mailing job. Pieces mailed at Presorted Standard Mail prices must not be counted toward the minimum volume requirements for an Enhanced Carrier Route price or an automation price mailing.

3.7 Residual Mail Subject to First-Class Mail or Priority Mail Prices

Pieces prepared as Standard Mail (i.e., that bear Standard Mail price markings, ACS codes, etc.) that do not qualify for Enhanced Carrier Route, automation, or Presorted Standard Mail prices are subject to the single-piece First-Class Mail or Priority Mail prices as applicable for the weight of the mailpiece. Metered pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail prices and any pieces that do not qualify for Standard Mail prices for which First-Class Mail or Priority Mail service is desired must be re-enveloped or otherwise prepared so that they do not bear Standard Mail markings, endorsements, and ACS codes and must bear the proper First-Class Mail or Priority Mail price markings and ACS codes. Mailers who have pieces (other than metered pieces weighing over 13 ounces but less than 16 ounces) that do not qualify for Standard Mail prices but that are prepared as Standard Mail and who do not desire to receive First-Class Mail or Priority Mail service for those pieces may enter their mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), provided the requirements in [244.5.1, Residual Standard Mail Subject to First-Class Mail Prices](#), and [244.5.2, Residual Standard Mail Subject to Priority Mail Prices](#), are met.

3.8 ZIP Code Accuracy

3.8.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain prices under [3.8.1d](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.8.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Standard Mail prices, regardless of any required surcharges, must meet the ZIP Code accuracy standard.

3.8.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:

1. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
2. Any mailing list service in [507.7.0](#).
3. An authorized service provider.
4. CASS-certified matching software.
5. USPS Web site www.usps.com.

3.8.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

4.0 Price Eligibility for Standard Mail

4.1 General Information

All Standard Mail prices are presorted prices (including all nonprofit prices). These prices apply to mailings meeting the basic standards in [2.0](#) through [4.0](#) and the corresponding standards for Presorted prices under [3.0](#) and [5.0](#), Enhanced Carrier Route prices under [6.0](#), automation prices under [7.0](#), or Customized MarketMail prices under [705.1.0](#). Except for Customized MarketMail pieces, destination entry discount prices are available under [246.2.0](#) through [246.5.0](#). Nonprofit prices may be used only by organizations authorized by the USPS. Not all processing categories qualify for every price. Pieces are subject to either a single minimum per piece price or a combined piece/pound price, depending on the weight of the individual pieces in the mailing.

4.2 Minimum Per Piece Prices

The minimum per piece prices (the minimum postage that must be paid for each piece) apply as follows:

- a. Basic Requirement. Pieces mailed at Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route prices are subject to minimum per piece prices when they weigh no more than 3.3 ounces (0.2063 pound).
- b. In applying the minimum per piece prices, a mailpiece is categorized as either a letter or a nonletter, based on whether the piece meets the letter-size standard in [201.1.1.1](#), *Dimensional Standards for Letters*, without regard to placement of the address on the piece, except under these conditions:
 1. If the piece meets both the definition of a letter in [201.1.1.1](#) and the definition of an automation flat in [301.3.0](#), the piece may be prepared and entered at an automation flat price.
 2. If the piece is prepared for automation letter prices, address placement is used to determine the length when applying the size standards and aspect ratio requirements to qualify for automation letter prices under [201.3.0](#), *Physical Standards for Automation Letters and Cards*. For this purpose, the length is considered to be the dimension parallel to the address.

243.4.3

3. Pieces mailed as Customized *MarketMail* under [705.1.0](#) must pay the Regular or Nonprofit Standard Mail 5-digit nonentry prices for Not Flat-Machinable pieces and must not exceed 3.3 ounces.
- c. Individual Prices. There are separate minimum per piece prices for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing.

4.3 Piece/Pound Prices

Pieces that exceed 3.3 ounces (0.2063 pound) are subject to a two-part piece/pound price that includes a fixed charge per piece and a variable pound charge based on weight. Pieces exceeding 3.3 ounces may not be mailed as Customized MarketMail. There are separate per piece prices for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing under [3.0](#) through [7.0](#). There are separate per pound prices for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) under [3.0](#) through [7.0](#). Discounted per pound prices also may be claimed for destination entry mailings (destination bulk mail center (DBMC) and destination sectional center facility (DSCF)) under [246](#).

5.0 Additional Eligibility Standards for Nonautomation Standard Mail Letters

5.1 Basic Standards

All pieces in a Regular Standard Mail or Nonprofit Standard Mail nonautomation price mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0](#) in *Prices and Eligibility*.
- b. Except as provided in [3.6](#), *Residual Volume Requirement*, be part of a single mailing of at least 200 addressed pieces or 50 pounds of pieces qualifying for nonautomation Standard Mail. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
 1. The ZIP Code accuracy standard in [3.8](#).
 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- d. Be marked, sorted, and documented as specified in [245](#), *Mail Preparation*, or [705.8.0](#), *Preparing Pallets*.

5.2 Weight Standards for Machinable Pieces

Maximum weight limit for machinable nonautomation Standard mail is 3.3 ounces (0.2063 pound).

5.3 Price Application

Nonautomation prices for Regular and Nonprofit Standard Mail apply to letters that meet the eligibility standards in [2.0, Content Standards for Standard Mail Letters](#), and the preparation standards in [245, Mail Preparation](#), or [705.8.0, Preparing Pallets](#).

5.4 Machinable Price Application

Machinable letters are subject only to AADC and mixed AADC prices.

5.4.1 AADC Price

The AADC price applies to qualifying letter-size machinable pieces (see [201.1.0, Physical Standards for Machinable Letters and Cards](#)) placed in origin/entry 3-digit trays, to quantities of 150 or more pieces prepared in AADC trays for a single AADC, and to pieces placed in mixed AADC trays in lieu of overflow AADC trays.

5.4.2 Mixed AADC Price

The mixed AADC price applies to qualifying letter-size machinable pieces that the mailer prepares in mixed AADC trays, except for pieces placed in mixed AADC trays in lieu of overflow AADC trays (see [245.5.3.2](#)).

5.5 Nonmachinable Price Application

Nonmachinable prices in [1.0](#) apply only to Standard Mail letter-size pieces (including card-size pieces) weighing 3.3 ounces or less that have one or more of the nonmachinable characteristics in [201.2.1](#). Except for Enhanced Carrier Route letter-size pieces, nonmachinable letter-size pieces weighing more than 3.3 ounces are subject to Not Flat-Machinable prices (see [443](#)), unless they are barcoded and eligible to be mailed as automation flats under [301.3.0](#). Nonmachinable Enhanced Carrier Route letter-size pieces over 3.3 ounces are subject to the Enhanced Carrier Route flats prices.

5.5.1 5-Digit Price

The 5-digit price applies to letter-size pieces subject to the nonmachinable prices (see [5.5](#)) prepared in quantities of 150 or more pieces for a 5-digit ZIP Code and presented in 5-digit trays under [245.5.0](#).

5.5.2 3-Digit Price

The 3-digit price applies to letter-size pieces subject to the nonmachinable prices (see [5.5](#)) prepared in quantities of 150 or more pieces for a 3-digit ZIP Code and presented in 3-digit trays under [245.5.0](#).

5.5.3 ADC Price

The ADC price applies to letter-size pieces subject to the nonmachinable prices (see [5.5](#)) placed in 3-digit origin/entry trays and to pieces prepared in quantities of 150 or more for an ADC and presented in ADC trays under [245.5.0](#).

5.5.4 Mixed ADC Price

The mixed ADC price applies to letter-size pieces that are subject to the nonmachinable prices and prepared in mixed ADC trays.

243.6.1

6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Letters

6.1 General Enhanced Carrier Route Standards

6.1.1 Optional Preparation

Preparation to qualify for any Enhanced Carrier Route price is optional and need not be performed for all carrier routes in a 5-digit area. An Enhanced Carrier Route mailing may include pieces at basic, high density, and saturation (simplified address and other addressing) Enhanced Carrier Route prices.

6.1.2 Basic Eligibility Standards

All pieces in an Enhanced Carrier Route or Nonprofit Enhanced Carrier Route Standard Mail mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0 in *Prices and Eligibility*](#).
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of Enhanced Carrier Route Standard Mail. ECR and Nonprofit ECR mailings must meet separate minimum volumes.
- c. Be sorted to carrier routes, marked, and documented under [245.6.0, *Preparing Enhanced Carrier Route Letters*](#), or [705.8.0, *Preparing Pallets*](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
 1. The carrier route accuracy standard in [6.2](#).
 2. The address matching and coding standards in [7.4, *Address Standards for Barcoded Pieces*](#), and [708.3.0, *Coding Accuracy Support System \(CASS\)*](#).
 3. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Meet the applicable sequencing requirements in [6.3](#) through [6.5](#) and [245.6.8](#).
- f. Meet the applicable documentation and postage payment standards in [244, *Postage Payment and Documentation*](#), and [1.8, *Computing Postage for Standard Mail*](#).
- g. Must meet the requirements for automation compatibility in [201.3.0](#) and bear an accurate DPBC or Intelligent Mail barcode matching the delivery address and meeting the standards in [202.5.0, *Barcode Placement*](#), and [708.4.0, *Standards for POSTNET and Intelligent Mail Barcodes*](#). Pieces prepared with a simplified address format are exempt from this requirement.

6.1.3 Maximum Weight for Enhanced Carrier Route Letters

Maximum weight for Standard Mail Enhanced Carrier Route pieces: 3.5 ounces (0.2188 pound) (see [201.3.14.4, *Heavy Letter Mail*](#), for pieces heavier than 3 ounces).

6.2 Carrier Route Accuracy

6.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming certain prices under [6.2.2](#) that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [3.8.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and price is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and price.

6.2.2 Mail Classes and Prices

Except as provided in [243.6.2.3](#), addresses used on pieces claiming all Enhanced Carrier Route prices for Standard Mail, regardless of any required surcharges, must meet the carrier route accuracy standard.

6.2.3 Exception

The carrier route accuracy standard does not apply to mail of any class bearing a simplified address format under [602.3.0, Use of Alternative Addressing](#).

6.2.4 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, Address Information System Products](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).

6.2.5 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

6.3 Basic Price Enhanced Carrier Route Standards

6.3.1 Sequencing

All pieces mailed at basic prices must be prepared in walk sequence or in line-of-travel (LOT) sequence according to LOT schemes prescribed by the USPS (see [245.6.8](#) through [245.6.9](#) in *Preparing Enhanced Carrier Route Letters*).

6.3.2 Basic Price Eligibility

Basic prices apply to each piece sorted under [245.6.0](#) or [705.8.0](#) in a full carrier route tray, in a carrier route bundle of 10 or more pieces, or in groups of 10 or more pieces placed in a 5-digit carrier routes or a 3-digit carrier routes tray. Basic prices also apply under these conditions:

- a. Basic letter prices apply to each piece that is automation-compatible according to [201.3.0, *Physical Standards for Automation Letters and Cards*](#), and has an accurate delivery point barcode or Intelligent Mail barcode under [202.5.0, *Barcode Placement*](#), and [708.4.0, *Standards for POSTNET and Intelligent Mail Barcodes*](#).
- b. Pieces that are not automation-compatible or not barcoded are mailable at the basic price for flat-size pieces.

6.4 High Density Enhanced Carrier Route Standards

6.4.1 Basic Eligibility Standards for High Density Prices

High density prices apply to each piece that is automation-compatible according to [201.3.0](#), and has an accurate delivery point barcode or Intelligent Mail barcode matching the delivery address and meeting the standards in [202.5.0, *Barcode Placement*](#), and [708.4.0, *Standards for POSTNET and Intelligent Mail Barcodes*](#). High density prices also apply under these additional conditions: Mailpieces must be in a full carrier route tray or in a carrier route bundle of 10 or more pieces placed in a 5-digit carrier routes or 3-digit carrier routes tray.

- a. Pieces that are not automation-compatible or not barcoded are mailable at the high density price for flat-size pieces.
- b. Pieces bearing a simplified address do not need to meet the standards in [201.3.0, *Physical Standards for Automation Letters and Cards*](#), and are not required to have a barcode to qualify for letter prices.

6.4.2 High Density Prices for Letters

All pieces mailed at high density prices must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [245.6.8](#) through [245.6.9](#) in [Preparing Enhanced Carrier Route Letters](#)).
- b. Meet the density requirement of at least 125 pieces for each carrier route. Multiple pieces per delivery address can count toward this density standard.

6.4.3 High Density Discount for Heavy Letters

Pieces that otherwise qualify for the high density letter price and weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the piece/pound price and receive a discount equal to the high density flat-size piece price (3.3 ounces or less) minus the high density letter piece price (3.3 ounces or less). If claiming a destination entry price, the discount is calculated using the corresponding prices.

6.5 Saturation ECR Standards

6.5.1 Basic Eligibility Standards for Saturation Prices

Saturation prices apply to each piece that is automation-compatible according to [201.3.0](#), and has an accurate delivery point barcode or Intelligent Mail barcode matching the delivery address and meeting the standards in [202.5.0, Barcode Placement](#), and [708.4.0, Standards for POSTNET and Intelligent Mail Barcodes](#).

Saturation prices also apply under these additional conditions:

- a. Mailpieces must be in a full carrier route tray or in a carrier route bundle of 10 or more pieces placed in a 5-digit carrier routes or 3-digit carrier routes tray.
- b. Pieces that are not automation-compatible or not barcoded are mailable at the saturation price for flat-size pieces.
- c. Pieces bearing a simplified address do not need to meet the standards in [201.3.0, Physical Standards for Automation Letters and Cards](#), and are not required to have a barcode to qualify for letter prices.

6.5.2 Saturation Prices for Letters

All pieces mailed at saturation prices must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [245.6.8](#) through [245.6.9 in Preparing Enhanced Carrier Route Letters](#)).
- b. Meet the density requirement of at least 90% or more of the active residential addresses or 75% or more of the total number of active possible delivery addresses on each carrier route receiving this mail. Pieces bearing a simplified address must meet the coverage standards in [602.3.0, Use of Alternative Addressing](#). Multiple pieces per delivery address do not count toward this density standard.

6.5.3 Saturation Discount for Heavy Letters

Pieces that otherwise qualify for the saturation letter price and weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the piece/pound price and receive a discount equal to the saturation flat-size piece price (3.3 ounces or less) minus the saturation letter piece price (3.3 ounces or less). If claiming a destination entry price, the discount is calculated using the corresponding prices.

7.0 Eligibility Standards for Automation Price Standard Mail

7.1 Basic Eligibility Standards for Automation Price Standard Mail

All pieces in a Regular Standard Mail or Nonprofit Standard Mail automation price mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0 in Prices and Eligibility](#).
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of automation price Standard Mail (Regular and Nonprofit mailings must meet separate minimum volumes).

243.7.2

- c. Be in the same processing category and meet the physical standards in [201.3.0, *Physical Standards for Automation Letters and Cards*](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
 - 1. The address matching and coding standards in [7.4, *Address Standards for Barcoded Pieces*](#), and [708.3.0, *Coding Accuracy Support System \(CASS\)*](#).
 - 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Bear an accurate DPBC or Intelligent Mail barcode matching the delivery address and meeting the standards in [202.5.0, *Barcode Placement*](#), and [708.4.0, *Standards for POSTNET and Intelligent Mail Barcodes*](#). Mailers must apply the barcode either on the piece or on an insert showing through a window.
- f. Be marked and sorted according to [245.7.0, *Preparing Automation Price Letters*](#).
- g. Meet the applicable documentation and postage payment standards in [1.8, *Computing Postage for Standard Mail*](#), and [244.1.0](#) through [244.3.0](#) in [244.1.0, *Postage Payment and Documentation*](#).

7.2 Maximum Weight for Automation Letters

Maximum weight limit for automation price mail is 3.5 ounces (0.2188 pound). See [201.3.14.4, *Heavy Letter Mail*](#), for pieces heavier than 3 ounces.

7.3 Price Application for Automation Letters

Automation prices apply to each piece that is sorted under [245.7.0, *Preparing Automation Price Letters*](#), into the corresponding qualifying groups:

- a. Groups of 150 or more pieces in 5-digit/scheme trays qualify for the 5-digit price. Preparation to qualify for that price is optional. Pieces placed in full 3-digit/scheme trays under [245.7.5](#) in lieu of 5-digit/scheme overflow trays are eligible for 5-digit prices (see [245.7.5](#)).
- b. Groups of 150 or more pieces in 3-digit/scheme trays qualify for the 3-digit price. Pieces placed in full AADC trays under [245.7.5](#) in lieu of 3-digit/scheme overflow trays are eligible for 3-digit prices (see [245.7.5](#)).
- c. Groups of fewer than 150 pieces in origin/entry 3-digit/scheme trays and groups of 150 or more pieces in AADC trays qualify for the AADC price. Pieces placed in mixed AADC trays under [245.7.5](#) in lieu of AADC overflow trays also are eligible for AADC prices (see [245.7.5](#)).
- d. Pieces in mixed AADC trays qualify for the mixed AADC price, except for pieces prepared under [7.3c](#).

7.4 Address Standards for Barcoded Pieces

7.4.1 Basic Address Standards for Barcodes

To qualify for automation prices, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode as defined in [202.5.0, Barcode Placement](#), and [708.4.0, Standards for POSTNET and Intelligent Mail Barcodes](#), that appears on a mailpiece claimed at an automation price must be the correct barcode for the corresponding delivery address on the piece.

7.4.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits.

7.4.3 Numeric Delivery Point Barcode (DPBC)

The numeric equivalent is formed by adding three digits directly after the ZIP+4 code.

7.4.4 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product.

7.4.5 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used.

7.4.6 Secondary Designator

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used.

7.4.7 Rural and Highway Contract Routes

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery

243.7.4.8

point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line.

7.4.8 Post Office Box

A Post Office box address must contain a Post Office box number that can be exactly matched with the USPS ZIP+4 Product in effect.

7.5 Enclosed Reply Cards and Envelopes

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures in automation Regular or Nonprofit Standard Mail, and addressed for return to a domestic delivery address, must meet the standards in [201.3.0, *Physical Standards for Automation Letters and Cards*](#), for enclosed reply cards and envelopes. The mailer's signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS.

7.6 Discount for Heavy Automation Letters

Automation letters that weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the automation piece/pound price and receive a discount equal to the automation nonletter piece price (3.3 ounces or less) minus the automation letter piece price (3.3 ounces or less). If claiming a destination entry price, the discount is calculated using the corresponding prices.

244 Postage Payment and Documentation

Overview

- 1.0 Basic Standards for Postage Payment
- 2.0 Postage Payment for Presorted and Enhanced Carrier Route Letters
- 3.0 Postage Payment for Automation Letters
- 4.0 Mailing Documentation
- 5.0 Residual Pieces

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Postage for Standard Mail must be paid with meter (604.4.0), permit imprint (604.5.0), or precanceled stamps (604.3.0). Postage-affixed pieces must bear the correct postage unless excepted by standard. A permit imprint may be used for mailings that contain nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

2.0 Postage Payment for Presorted and Enhanced Carrier Route Letters

2.1 Identical-Weight Pieces

Mailings of identical-weight pieces may have postage affixed to each piece at the exact price for which the piece qualifies, or each piece in the mailing may have postage affixed at the lowest price applicable to pieces in the mailing or mailing job. Alternatively, a nondenominated precanceled stamp may be affixed to every piece in the mailing or mailing job, or each piece may bear a permit imprint. If exact postage is not affixed, all additional postage and surcharges must be paid at the time of mailing with an advance deposit account or with a meter strip affixed to the required postage statement. If exact postage is not affixed, documentation meeting the standards in 4.0 must be submitted to substantiate the additional postage unless the pieces are identical weight and separated by price when presented for acceptance.

2.2 Nonidentical-Weight Pieces

Postage for nonidentical-weight pieces subject to the minimum per piece prices may be paid by meter stamps, precanceled stamps, or precanceled stamped envelopes. Mailings of nonidentical-weight pieces subject to the piece/pound prices may have postage paid by permit imprint (if the mailer is authorized by Business Mailer Support) or by meter or precanceled stamps (if each piece has the full postage affixed). Alternatively, except for heavy automation and Enhanced Carrier Route letters, the mailer may affix the per piece price to each piece and pay the pound price for the mailing through an advance deposit account. Under this alternative, the mailer must provide a postage statement for each payment method and mark each piece "Pound Price Pd via Permit," in the postage meter indicium or ad plate or other means that ensures a legible endorsement. For mailings of

nonidentical-weight pieces, “nonidentical” must be shown as the weight of a single piece on the applicable postage statement; other entries must be completed as directed.

2.3 Combined Price

Meter postage may be used for combined price mailings containing both pieces subject to pound prices and pieces subject to minimum per piece charges. Postage for such mailings may be paid with permit imprint only if authorized by Business Mailer Support.

3.0 Postage Payment for Automation Letters

3.1 All Pieces

Unless authorized by the USPS under [705.2.0](#) through [705.5.0 in *Advanced Preparation and Special Postage Payment Systems*](#), when precanceled postage or meter stamps are used, only one payment method may be used in a mailing, and each piece must bear the correct postage at the price claimed based on its eligibility. For mailings of nonidentical-weight pieces subject to the piece/pound prices, the mailer may affix the applicable per piece price to each piece and pay the pound price for the mailing by a permit imprint advance deposit account. All pieces prepared this way in the same mailing must be subject to the same pound price. A postage statement must be submitted for each payment method and each piece must be marked “Pound Price Pd via Permit,” in the postage meter indicium or ad plate or other means that ensures a legible endorsement. “Nonidentical” must be shown as the weight of a single piece on the applicable postage statement.

3.2 Adding Additional Postage

In a metered or precanceled stamp mailing:

- a. Each piece must bear a precanceled stamp or meter postage in the exact postage or at the lowest price applicable to pieces in the mailing job. If exact postage is not affixed, all additional postage must be paid at the time of mailing through an advance deposit account or with a meter stamp affixed to the required postage statement.
- b. Documentation presented with the postage statement must show the computation of the additional postage due for pieces not bearing full postage at the applicable price (i.e., the difference between what the pieces bear and the correct postage at the price for which each qualifies).

3.3 Nondenominated Precanceled Stamps

A mailer may use nondenominated precanceled stamps if:

- a. Stamps are affixed to every piece in the mailing.
- b. Additional postage is paid at the time of mailing by advance deposit account or meter stamp affixed to the back of the accompanying postage statement.
- c. Documentation is presented with the postage statement as described in [3.2b, *Adding Additional Postage*](#).

3.4 Precanceled Stamps in Lower Price Denominations

A mailer may use precanceled stamps of a denomination less than the postage for the lowest price in the mailing if:

- a. The stamps do not bear an improper price marking.
- b. The same denomination of stamp is affixed to every piece in the mailing.
- c. Additional postage is paid at the time of mailing by advance deposit account or meter stamp affixed to the back of the accompanying postage statement.
- d. Documentation is presented with the postage statement as described in [3.2b](#), *Adding Additional Postage*.

3.5 Mixed Price Mailing Documentation

Where it is not practicable for the mailer to affix the exact postage to each piece or to affix the lowest postage price to all pieces in the mailing, the mailer may compute postage for the mailing as if the lowest price affixed to any piece in the mailing were affixed to all pieces. Additional postage is computed based on the difference between the lowest price affixed to any piece in the mailing and the price for each price level in the mailing. This computation must be documented to meet the basic standards in [4.0](#). No refund is paid for any piece where postage is affixed at a price higher than the lowest price claimed for or affixed to any piece. The total additional postage must be paid either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.

4.0 Mailing Documentation**4.1 Completing Postage Statements**

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

4.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the preparation, price levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

4.3 Documentation Standards for Automation Mailings

A complete postage statement must accompany each mailing. Each mailing also must be accompanied by presort and price documentation produced by PAVE-certified or MAC-certified software or by standardized documentation. *Exception:* For mailings of fewer than 10,000 pieces, presort and price

documentation is not required if postage at the correct price is affixed to each piece or if each piece is of identical weight and the pieces are separated by price when presented for acceptance. Mailers may use a single postage statement and a single documentation report for all price levels in a single mailing. Standard Mail mailings prepared under the value added refund procedures or as combined mailings must meet additional standardized documentation requirements under [604.9.0, Refunds and Exchanges](#), and [705.5.0, First-Class Mail or Standard Mail Mailings With Different Payment Methods](#).

4.4 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

4.5 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

4.6 Standard Format for Documentation

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and price claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in [708.1.0 in Standardized Documentation for First-Class Mail, Periodicals, Standard Mail, and Flat-Size Bound Printed Matter](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation.

4.7 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0, Rulings on Mailing Standards](#).

4.8 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job (e.g., an Enhanced Carrier Route Standard Mail price mailing, an automation price mailing, and a nonautomation price mailing) on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

4.9 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple parts on a single facsimile. For example: Part A, lines A5, A6, and total – Part A from Form 3602-R, and Part F, lines F1, F2, and total – Part F from Form 3602-R, can be consolidated onto a single Form 3602-R (Facsimile). Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

5.0 Residual Pieces

5.1 Residual Standard Mail Subject to First-Class Mail Prices

Mailers who have pieces weighing 13 ounces or less that do not qualify for Standard Mail prices but that are prepared as Standard Mail must pay single-piece First-Class Mail postage for such pieces. If mailers do not desire to receive First-Class Mail service for such pieces they may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.
- b. Mail bearing metered or precanceled stamp postage must pay the difference between the postage affixed at the Standard Mail prices and the single-piece First-Class Mail prices by means of an advance deposit account or by affixing a meter stamp for the appropriate amount to Form 3600-R. These pieces are reported in Part C on Form 3600-R under the heading “From Standard Mail mailing.”
- c. Mail bearing permit imprints must pay the appropriate single-piece First-Class Mail prices by completing Form 3600-R. These pieces are reported in Part C on Form 3600-R under the heading “From Standard Mail mailing.” For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job.

5.2 Residual Standard Mail Subject to Priority Mail Prices

Mailers who have permit imprint pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail prices but that are prepared as Standard Mail must pay Priority Mail postage for such pieces. Mailpieces paid with meters or permit imprints must re-envelope or otherwise prepare the pieces so that when mailed they bear only the appropriate Priority Mail markings, ancillary service

244.5.2

endorsements, and ACS codes and do not bear Standard Mail markings, endorsements, or ACS codes. Mailpieces paid with permit imprints for which mailers do not desire to receive Priority Mail service may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.
- b. The appropriate Priority Mail prices must be paid by completing Part E of Form 3600-R on the line titled “Pieces From Standard Mail mailing” in the postage calculation section. For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job.

245 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Letter Trays](#)
- [4.0 Tray Labels](#)
- [5.0 Preparing Nonautomation Letters](#)
- [6.0 Preparing Enhanced Carrier Route Letters](#)
- [7.0 Preparing Automation Price Letters](#)

1.0 General Information for Mail Preparation

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared.

1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation, enhanced carrier route) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Standard Mail. Except as provided in [243.3.6, Residual Volume Requirement](#), the types of Standard Mail listed below may not be part of the same mailing.
 1. Automation price and any other type of mail.
 2. Enhanced Carrier Route and any other type of mail.
 3. Enhanced Carrier Route letter price pieces and Enhanced Carrier Route nonletter price pieces.
 4. Presorted price mail and any other type of mail.
 5. Machinable and nonmachinable pieces.
 6. Except as provided by standard, Regular mail may not be in the same mailing as Nonprofit mail, and Enhanced Carrier Route mail may not be in the same mailing as Nonprofit Enhanced Carrier Route mail.
 7. Customized MarketMail and any other type of mail.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, Post Office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *5-digit scheme (trays) for automation letters*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in the USPS City State Product.
- d. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- e. *3-digit scheme*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L003](#).
- f. *Origin/entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Separation is optional for each such 3-digit area.
- g. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- h. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- i. *ADC/AADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) or automated area distribution center (AADC) (see [L004](#) or [L801](#)).
- j. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- k. *Mixed [ADC or AADC]*: the pieces are for delivery in the service area of more than one ADC or AADC.
- l. *Residual pieces/bundles*: contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow preparation to a particular destination, and usually does not qualify for a presort price.

1.4 Preparation Definitions and Instructions

[8-14-08] For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces.

- b. A *full letter tray* is one in which faced, upright pieces fill the length of the tray between 85% and 100% full.
- c. A *less-than-full* letter tray is one that contains mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full trays may be prepared only if permitted by the standards for the price claimed.
- d. An *overflow* letter tray is a less-than-full tray that contains all pieces remaining after preparation of full trays for the same destination. Overflow trays may be prepared only if permitted by the standards for the price claimed.
- e. A *5-digit scheme sort* for automation letters yields 5-digit scheme trays for those 5-digit ZIP Codes identified in the USPS City State Product and 5-digit trays for other areas. Mail prepared using 5-digit scheme sort must be entered no later than 90 days after the release date of the City State Product used to obtain the scheme information (see [708.3.0, Coding Accuracy Support System \(CASS\)](#)). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Trays prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. When standards require 5-digit/scheme sort, mailers must prepare all possible 5-digit scheme trays, then prepare all possible 5-digit trays.
- f. A *3-digit scheme sort* yields 3-digit scheme trays for those 3-digit ZIP Code prefixes listed in [L003](#) and 3-digit trays for other areas. The 3-digit ZIP Code prefixes in each scheme are treated as a single presort destination subject to a single minimum tray volume, with no further separation by 3-digit prefix required. Trays prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit areas are still considered 3-digit scheme sorted and are labeled accordingly. When standards require 3-digit/scheme sort, mailers must prepare all possible 3-digit scheme trays, then prepare all possible 3-digit trays.
- g. An *origin 3-digit* (or *origin 3-digit scheme*) tray contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. A separate tray may be prepared for each 3-digit ZIP Code (or 3-digit scheme) area.
- h. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- i. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size.

Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.

- j. *Entry [facility] (or origin [facility])* refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the Post Office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- k. The *group pieces* instruction means the pieces are to be sorted together but not secured into a bundle.
- l. A *bundle* is a group of addressed pieces secured together as a unit. Bundle preparation is described in 2.0.
- m. A “*logical presort destination*” represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (tray or pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Standard Mail “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable restrictions on bundles.

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit. The term *bundle* does not apply to pieces grouped or prepared loose in trays.

2.2 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.3 Preparing Bundles

[8-14-08] Cards and letter-size pieces are subject to these bundling standards:

- a. The maximum thickness for bundles of carrier route price mail is 4 inches. The maximum thickness for other bundles is 6 inches.
- b. Mailings consisting entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch) must always be prepared in bundles.
- c. Bundles must be prepared for mail in all less-than-full trays (including overflow trays) and for nonmachinable Standard Mail.

- d. For mailings consisting entirely of card-size pieces and mail in less-than-full trays, mailers must secure bundles with rubber bands, elastic strapping, flat plastic strapping, or string. Elastic strapping must be approved by USPS Engineering. If requested, the mailer must be able to show such approval for the strapping material used for a mailing.
- e. Bundling of automation and machinable letters or cards under [2.3d](#) is required to retain the orientation of the pieces within the tray. Bundles are not required to be identified with an optional endorsement line or a barcoded pressure-sensitive bundle label when placed into a correctly labeled tray.
- f. Bundles up to 1 inch thick must be secured with appropriate banding placed once around the girth (narrow dimension). Bundles over 1 inch thick must be secured with at least two bands, one around the length and one around the girth.

2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing.

2.5 Exception to Bundle Preparation— Full Single-Sort-Level Trays

In mailings not entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch), mailers need not prepare bundles when placing mail in a full tray and none of the mail in that tray would have been more finely sorted if bundled. For example, the content of a full ADC tray need not be bundled if it would have all been prepared in ADC bundles to the same destination.

2.6 Pieces With Simplified Address

For mail prepared with a simplified address, all pieces for the same Post Office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, Post Office boxholder). Bundles must be secure subject to specific thickness limits in [2.3](#).

2.7 Bundles With Fewer Than the Minimum Number of Pieces Required

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the price claimed without loss of price eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of 28 pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

2.8 Labeling Bundles

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. On letter-size mail (including card-size pieces), the bundle label must be placed in the lower left corner of the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X.

2.9 Use of Carrier Route Information Lines

Bundles for individual carrier routes, rural routes, highway contract routes, Post Office box sections, or general delivery units must be prepared with facing slips under [2.0](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Enhanced Carrier Route Standard Mail mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level.

2.10 Facing Slips—All Carrier Route Mail

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “STD LTR BC R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin Post Office.

3.0 Letter Trays

3.1 Standard Containers

Mailings must be prepared in letter trays with sleeves. Containers for Customized MarketMail are specified in [705.1.4](#). The following additional standards apply:

- a. Palletized mail is also subject to [705.8.0](#).
- b. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing.

3.2 Tray Sizes

These approximate measurements define the letter tray sizes that apply to all Standard Mail preparation standards:

- a. 2-foot managed mail (MM) trays: 21 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- b. 1-foot MM trays: 10-1/4 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- c. 2-foot extended MM (EMM) trays: 21-3/4 inches long by 11-1/2 inches wide (inside bottom dimensions) by 6-1/8 inches high.

3.3 Letter Tray Preparation

Letter trays are prepared as follows:

- a. Subject to availability of equipment, standard managed mail (MM) trays must be used for all letter-size mail, except that extended managed mail (EMM) trays must be used when available for letter-size mail that exceeds the inside dimensions of MM trays defined in [3.2](#). When EMM trays are not available for those larger pieces, they must be placed in MM trays, angled back, or placed upright perpendicular to the length of the tray in row(s) to preserve their orientation.
- b. Pieces must be “faced” (oriented with all addresses in the same direction with the postage area in the upper right).
- c. Each tray prepared must be filled before filling the next tray, with the contents in multiple trays relatively balanced. When preparing full trays, mailers must fill all possible 2-foot trays first; if there is mail remaining for the presort destination, mailers must use a combination of 1-foot and 2-foot trays that results in the fewest total number of trays for that presort level. As an alternative, if there is mail remaining, mailers may move those pieces to the next higher presort level at which there is a minimum quantity (e.g., 150 pieces).
- d. For presort destinations that do not require full trays, pieces are placed in a less-than-full tray.
- e. Mailers must use as few trays as possible without jeopardizing price eligibility. For instance, a mailer will never have two 1-foot trays to a single destination; instead, that mail must be placed in a single 2-foot tray. A 1-foot tray is prepared only if it is a full tray with no overflow; or if there is less than 1 foot of mail for that destination; or if the overflow from a full 2-foot tray is less than 1 foot of mail.
- f. Each tray must bear the correct tray label.
- g. Each tray must be sleeved and strapped under [3.4](#) and [3.5](#).

- h. If a mailing is prepared using an MLOCR/barcode sorter and is submitted with standardized documentation, then pieces do *not* have to be grouped by 3-digit ZIP Code prefix (or by 3-digit scheme, if applicable) in AADC trays, or by AADC in mixed AADC trays.

3.4 Tray Slewing and Strapping

Each letter tray must be sleeved using USPS-provided sleeves. Except under [3.5](#), each sleeved letter tray must then be secured with one plastic strap placed tightly around the length of the tray without crushing the tray or sleeve.

3.5 Strapping Exception

Strapping is not required for any letter tray placed on a 5-digit, 3-digit, or SCF pallet secured with stretchwrap. In addition, if the processing and distribution manager gives a written waiver, strapping is not required for any letter tray that originates and destines in the same SCF (mail processing plant) service area.

3.6 Origin/Entry 3-Digit/Scheme Trays

After all finer sort levels are prepared, an origin/entry 3-digit tray (or, if applicable, origin/entry 3-digit scheme tray) must be prepared to contain any remaining mail for each 3-digit (or 3-digit scheme) area serviced by the SCF serving the Post Office where the mail is verified (origin), and may be prepared for each 3-digit (or 3-digit scheme) area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the Post Office where the mail is verified—e.g., a PVDS deposit site). In all cases, only one less-than-full tray may be prepared for each 3-digit (or 3-digit scheme) area.

4.0 Tray Labels

4.1 Basic Standards

Tray labels are subject to these basic standards:

- a. Use 2-inch labels.
- b. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.
- c. Tray labels for automation price mailings are subject to [4.9.1, Basic Standards for Barcoded Tray Labels](#), and [708.6.0](#).

4.2 Physical Characteristics of Tray Labels

A tray label must meet these specifications:

- a. Color: white or manila.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- e. Thickness: 0.005 inch minimum.

4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., "ADC"). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit trays for overseas military destinations, Line 1 shows, from left to right, "APO" or "FPO," followed by "AE" (for ZIP Codes within the ZIP Code prefix range 090-098), "AA" (for ZIP Codes within the 3-digit ZIP Code prefix 340), or "AP" (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the tray.

4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the tray and other information as specified by standards.
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of tray and pallet labels.

CONTENT TYPE	CODE
Barcoded	BC
Barcoded and Nonbarcoded	BC/NBC
Carrier Route	C (type of route)
Carrier Routes	CR-RT or CR-RTS
Digit	D
General Delivery Unit	G
Highway Contract Route	H
Letters	LTR or LTRS
Machinable	MACH
Mixed	MXD
Nonmachinable	MAN or MANUAL
Nonbarcoded	NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0)
Post Office Box Section	B
Rural Route	R
Standard Mail	STD
Working	WKG

4.5 Line 3 (Office of Mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

4.6 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.7 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It may appear below Line 3.
- A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

4.8 Placement of Tray Label

A tray label must be securely placed in an adhesive-backed label holder that is affixed to the specific location designated on the tray. Where no specific location is indicated the label must be securely placed in an adhesive-backed label holder that is affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert labels completely into the label holder to ensure that they do not fall out during processing. Do not insert labels upside down.

4.9 Barcoded Tray Labels**4.9.1 Basic Standards for Barcoded Tray Labels**

[Exhibit 4.9.1](#) shows the types of mail requiring barcoded tray labels. Barcoded labels must meet these general standards:

- a. Use 2-inch labels.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray to prevent their loss during transport and processing.

Exhibit 4.9.1 Required Barcoded Container Labels

PRICE OR TYPE	PROCESSING CATEGORY
Standard Mail	
Automation price	Letter-size
Enhanced Carrier Route	Letter-size (barcoded labels not required for letter-size pieces with simplified addresses or paid at nonletter prices)

5.0 Preparing Nonautomation Letters**5.1 Basic Standards**

All mailings and all pieces in each mailing at Regular Standard Mail and Nonprofit Standard Mail nonautomation prices are subject to specific preparation standards in [5.0](#) and to these general standards (automation price mailings must be prepared under [7.0](#)):

- a. All pieces must meet the eligibility standards in [243.2.0](#) through [243.5.0](#). Nonprofit Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. All pieces in each mailing must be in the letter-size processing category. Unless excepted by standard, letter-size pieces must be prepared in letter trays.
- c. All pieces must meet the applicable general preparation standards in [202](#), *Elements on the Face of a Mailpiece*.
- d. All pieces in the mailing must meet the specific sortation and preparation standards in [5.0](#).

- e. Sortation determines price eligibility as specified in [243.5.0, Additional Eligibility Standards for Nonautomation Standard Mail Letters](#).

5.2 Marking

[8-14-08] All regular and Nonprofit Standard Mail pieces must be marked under [202.3.0, Placement and Content of Mail Markings](#). Regular and Nonprofit Standard Mail pieces must not be marked “ECRLOT,” “ECRWSH,” “ECRWSS,” “AUTO,” or “Single-Piece” (or “SNGLP”).

5.3 Machinable Preparation

5.3.1 Machinable Bundling

Machinable pieces are not bundled, except for the following (see [2.3](#)):

- a. Card-size pieces.
- b. All pieces in a less-than-full mixed AADC tray.

5.3.2 Traying and Labeling

Instead of preparing overflow AADC trays with fewer than 150 pieces, mailers may include these pieces in mixed AADC trays. Preparation sequence, tray size, and labeling:

- a. Origin/entry 3-digit (optional, no minimum); labeling:
 - 1. Line 1: [L002](#), Column A.
 - 2. Line 2: “STD LTR 3D MACH.”
- b. AADC (required); 150-piece minimum (overflow allowed); labeling:
 - 1. Line 1: [L801](#), Column B.
 - 2. Line 2: “STD LTR AADC MACH.”
- c. Mixed AADC (required); no minimum; labeling:
 - 1. Line 1: [L011](#), Column B. Use [L010](#), Column B, if entered at an ASF or BMC or for mail placed on an ASF, BMC, or SCF pallet under the option in [705.8.10.2](#).
 - 2. Line 2: “STD LTR MACH WKG.”

5.4 Nonmachinable Preparation

5.4.1 Nonmachinable Bundling

Except as provided in [2.5, Exception to Bundle Preparation—Full Single-Sort-Level Trays](#), bundling is required before traying. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Preparation sequence, bundle size, and labeling:

- a. 5-digit (required); 10-piece minimum; red Label 5 or optional endorsement line (OEL); labeling not required for pieces in full 5-digit trays.
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL.

5.4.2 Traying and Labeling

Overflow trays are not allowed. Preparation sequence, tray size, and labeling:

- a. 5-digit (required); 150-piece minimum; labeling
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0, Tray Labels](#), for overseas military mail).
 2. Line 2: “STD LTR 5D MANUAL.”
- b. 3-digit (required); 150-piece minimum (mailers may prepare 3-digit origin/entry trays with as few as 10 pieces per tray); labeling:
 1. Line 1: [L002](#), Column A.
 2. Line 2: “STD LTR 3D MANUAL.”
- c. ADC (required); 150-piece minimum; labeling:
 1. Line 1: [L004](#), Column B.
 2. Line 2: “STD LTR ADC MANUAL.”
- d. Mixed ADC (required); no minimum; labeling:
 1. Line 1: [L011](#), Column B. Use [L010](#), Column B, if entered at an ASF or BMC or for mail placed on an ASF, BMC, or SCF pallet under the option in [705.8.10.2](#).
 2. Line 2: “STD LTR MANUAL WKG.”

6.0 Preparing Enhanced Carrier Route Letters

6.1 Basic Standards

All mailings and all pieces in each mailing at Enhanced Carrier Route Standard Mail and Nonprofit Enhanced Carrier Route Standard Mail nonautomation prices are subject to specific preparation standards in [6.0](#) and to these general standards:

- a. All pieces must meet the standards for basic eligibility in [243.2.0](#) through [243.4.0](#) and specific eligibility in [243.6.0, Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Letters](#). Nonprofit Enhanced Carrier Route Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. All pieces in each mailing must be in the letter-size processing category. Unless excepted by standard, letter-size pieces must be prepared in letter trays.
- c. All pieces must meet the applicable general preparation standards in [2.0](#) through [4.0](#) and [202, Elements on the Face of a Mailpiece](#), and the following:
 1. Pieces must be sequenced according to [6.8, Delivery Sequence Standards](#).
 2. Pieces with a simplified address format must meet the standards in [602.3.0, Use of Alternative Addressing](#).
- d. All pieces in the mailing must meet the specific sortation and preparation standards in [6.0](#) or the palletization standards in [705.8.0](#).

- e. Sortation determines price eligibility as specified in [243.6.0, *Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Letters*](#).

6.2 **Marking**

[8-14-08] All regular and Nonprofit Standard Mail Enhanced Carrier Route pieces must be marked under [202.3.0, *Placement and Content of Mail Markings*](#). All pieces must also be marked “ECRL0T” for basic price, “ECRWSH” for high density price, or “ECRWSS” for saturation price. Pieces in carrier route mailings under 6.7 must bear carrier route information lines under [708.8.0](#).

6.3 **Residual Pieces**

Pieces not sorted as a carrier route mailing must be prepared as a separate mailing at Standard Mail automation or Presorted prices or at single-piece First-Class Mail or Priority Mail prices.

6.4 **Carrier Route Bundle Preparation**

Prepare carrier route bundles of letter-size mail as follows:

- a. Mailers must prepare only carrier route bundles, except under [6.7](#). Carrier route bundles are not permitted in full carrier route trays, except for card-size pieces.
- b. Except under [2.7](#) or [6.5](#), carrier route bundles must contain at least 10 pieces.
- c. The method of labeling a carrier route bundle is based on the following tray levels:
 - 1. Carrier route tray: No bundle labeling is required.
 - 2. 5-digit or 3-digit carrier routes tray: Bundles must have a facing slip unless the pieces in the bundle have a carrier information line or an optional endorsement line (OEL).

6.5 **Bundles and Trays With Fewer Than the Minimum Number of Pieces Required**

As a general exception to [6.4](#), a mailer may prepare a bundle with fewer than 10 pieces and a less-than-full carrier route tray when they are claiming the saturation price for the contents and the applicable density standard is met.

6.6 **General Traying and Labeling**

For all ECR letters over 3 ounces and all ECR letters that are not automation-compatible or delivery-point barcoded, prepare trays as explained below. Also prepare trays as explained below when a mailing contains some pieces over 3 ounces and some pieces up to 3 ounces. Pieces with simplified addresses must be prepared in separate trays from pieces with other forms of addressing. For ECR automation-compatible letters that are delivery-point barcoded and weigh up to 3 ounces, prepare trays under [6.7](#). Preparation sequence, tray size, and labeling:

- a. Carrier route: required; full trays only, no overflow.
 - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0, *Tray Labels*](#), for overseas military mail).

2. Line 2: for saturation, “STD LTR MACH WSS,” followed by route type and number; for high-density, “STD LTR MACH WSH,” followed by route type and number; for basic, “STD LTR MACH LOT,” followed by route type and number.
- b. 5-digit carrier routes: required if full tray, optional with minimum one 10-piece bundle.
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0, Tray Labels](#), for overseas military mail).
 2. Line 2: “STD LTR 5D CR-RT MACH.”
- c. 3-digit carrier routes: optional with minimum one 10-piece bundle for each of two or more 5-digit areas.
 1. Line 1: city, state, and 3-digit ZIP Code prefix shown in [L002](#), Column A, that corresponds to 3-digit ZIP Code prefix on mail.
 2. Line 2: “STD LTR 3D CR-RT MACH.”
- d. For trays containing barcoded automation-compatible letter-size pieces over 3 ounces or nonmachinable letter-size pieces, use these Line 2 label designations in place of “MACH”:
 1. Trays containing barcoded, automation-compatible pieces over 3 ounces: “BC.”
 2. Trays containing nonmachinable pieces: “MAN.”
 3. Trays containing simplified address pieces: “MAN.”

6.7 Traying and Labeling for Automation-Compatible ECR Letters

Mailers must make full carrier route and 5-digit carrier routes trays, when possible, for automation-compatible, delivery-point barcoded ECR letters that weigh up to 3 ounces. Except for card-size pieces, pieces must not be bundled. Group pieces together by carrier route in 5-digit and 3-digit carrier routes trays. If pieces for one carrier route do not result in a full tray, mailers must combine pieces from at least two routes to make full 5-digit carrier routes trays, grouping pieces together by carrier route. If pieces for multiple carrier routes do not result in a full 5-digit tray, mailers must combine pieces from at least two 5-digit ZIP Codes to make 3-digit carrier routes trays, grouping pieces together by carrier route. If pieces fill more than one tray but do not fill an additional tray, mailers must place excess pieces in a tray at the next sortation level. Preparation sequence, tray size, and labeling:

- a. Carrier route: required; full trays only, no overflow.
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0](#) for overseas military mail).
 2. Line 2: for saturation, “STD LTR BC WSS,” followed by route type and number; for high-density, “STD LTR BC WSH,” followed by route type and number; for basic, “STD LTR BC LOT,” followed by route type and number.
- b. 5-digit carrier routes: required; no overflow, no bundling.
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0](#) for overseas military mail).

2. Line 2: “STD LTR 5D CR-RT BC.”
- c. 3-digit carrier routes: required; bundling required in less-than-full trays.
 1. Line 1: city, state, and 3-digit ZIP Code prefix shown in [L002](#), Column A, that corresponds to 3-digit ZIP Code prefix on mail.
 2. Line 2: “STD LTR 3D CR-RT BC.”

6.8 Delivery Sequence Standards

6.8.1 Basic Standards

Mailpieces for which a walk-sequence discount is claimed must be organized in the delivery sequence determined by the USPS and prepared as a carrier route mailing under [6.1](#) through [6.7](#) in *Preparing Enhanced Carrier Route Letters* and the standards below. Pieces prepared with a simplified address must also meet the corresponding standards.

6.8.2 Missing Addresses

Some mailpieces cannot be sequenced because an exact match for a name or address cannot be obtained. These pieces may be included in a sequenced mailing only if they are placed behind or after the sequenced mail. Arrange these pieces:

- a. Alphabetically by complete street name, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.
- b. Numerically for numbered streets, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.

6.8.3 Updating Walk Sequence Information—General

Walk-sequence price pieces prepared with other than a simplified address format under [6.8.4](#) must be sequenced using USPS data from one of the following sources, issued within 90 days before the mailing date:

- a. The Computerized Delivery Sequence (CDS) file.
- b. The Delivery Sequence File (DSF) or Delivery Sequence File, Second Generation (DSF²).
- c. Delivery sequence information from USPS address sequencing services, as requested by the customer.

6.8.4 Updating Walk Sequence Information for Simplified Addressing

Walk-sequence price pieces prepared with a simplified address must be based on delivery stop information obtained within 90 days before the mailing date, either from the Delivery Statistics File or from the postmaster of the destination office.

6.8.5 Out-of-Date Walk Sequence Information

Mailings prepared with out-of-date walk-sequencing information are not eligible for walk-sequence prices.

6.8.6 Updating Line-of-Travel Sequence Information

Unless the mail is prepared in carrier walk sequence, line-of-travel (LOT) sequence is required for mailings at Standard Mail Enhanced Carrier Route basic prices. LOT sequence is not an exact walk sequence but a sequence of ZIP+4 codes arranged

in the order that the route is served by a carrier. (First the ZIP+4 groups are sequenced, then the addresses within each are identified as being in ascending or descending order.) The USPS eLOT product provides a list of the ZIP+4 codes each carrier route serves, identifies the order in which they are delivered, and provides an indicator specifying whether the addresses that share the same ZIP+4 code must be sorted in ascending or descending order. When a range of ZIP+4 codes on the same carrier route are assigned the same sequence number, the addresses bearing those ZIP+4 codes must be arranged in ascending ZIP+4 code order before the sequence number is assigned. LOT information must be updated within 90 days before the date of mailing.

6.9 Delivery Sequence Documentation

6.9.1 Basic Standards

The postage statement must be annotated in the “Carrier Route Sequencing Date” block on page 1. The mailer must annotate the postage statement to show the earliest (oldest) date of the method used to obtain sequencing information for the mailing. The mailer’s signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The mailer must maintain documentation to substantiate compliance with the standards for carrier route sequencing. Unless submitted with each corresponding mailing, the mailer must be able to provide the USPS with documentation (if requested) of accurate sequencing or delivery statistics for each carrier route to which pieces are mailed. Acceptable forms of documentation are:

- a. The invoice showing that the addresses came from CDS.
- b. DSF² invoice or documentation.
- c. Copies of the delivery unit summaries that served as the mailer’s bills for address sequencing service charges.
- d. Evidence of receipt of information from postmasters for simplified address mailings (see [509.1.0, Address Information System Products](#)).
- e. Form 3553 showing the date of the eLOT product used, or the date from the USPS Qualification report produced by presort software.

6.9.2 High Density

For each carrier route to which high density price mail is addressed, the mailer must document the total number of addressed pieces to the route.

6.9.3 Saturation Density—Simplified Address Mail

For each carrier route to which mail with a simplified address is sent at the saturation price, the mailer must be able to document that the mailing meets the applicable density standard. This documentation must show the total number of active possible deliveries and the total number to which mailpieces in the mailing are being addressed, by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing.

6.9.4 Saturation Density—Other Mail

For each carrier route to which mail without a simplified address is sent at the saturation price, the mailer must be able to document that the mailing meets the applicable density standards. This documentation must show either the total

number of active possible *residential* deliveries and the number and percentage to which mailpieces are addressed, or the total number of *all* active possible deliveries and the number and percentage to which mailpieces are addressed, depending on whether qualification is based on the 90% or 75% criterion, respectively. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing.

6.9.5 Both Prices

If a mailing contains pieces qualifying for both walk-sequence prices, the documentation required by [6.9.2, High Density](#), and either [6.9.3, Saturation Density—Simplified Address Mail](#), or [6.9.4, Saturation Density—Other Mail](#), may be combined. Entries for pieces at the high density price must be so annotated on the documentation. For the entire mailing, a summary of the total number of pieces at each price must be provided. This documentation must be submitted with each applicable mailing.

6.9.6 Carrier Route Price

If a mailing includes high density and saturation price and basic carrier route price pieces, in addition to the applicable information required by [6.9.2](#) through [6.9.5 in Delivery Sequence Documentation](#), the documentation for the basic carrier route price mail must show, by 5-digit ZIP Code and, within each, by carrier route, the total number of addressed pieces at each price for each carrier route to which pieces are addressed. Pieces qualifying for the basic carrier route price must be so annotated. For the entire mailing, a summary by 5-digit ZIP Code of the total number of pieces at each price must be provided. This documentation must be submitted with each applicable mailing to meet the documentation standard for the carrier route price.

7.0 Preparing Automation Price Letters

7.1 Basic Standards

Letter-size automation price Standard Mail must be prepared under [7.0](#) and the eligibility standards for the price claimed. Trays must bear barcoded tray labels under [4.9](#).

7.2 Mailings

All pieces in a mailing must meet the standards in [201.1.0, Physical Standards for Machinable Letters and Cards](#), and [201.3.0, Physical Standards for Automation Letters and Cards](#), and must be sorted together to the finest extent required for the price claimed. The definitions of a mailing and permissible combinations are in [1.0, General Information for Mail Preparation](#).

7.3 Marking

All Standard Mail automation price pieces must be marked under [202.3.0, Placement and Content of Mail Markings](#). Pieces claimed at an automation price must bear the appropriate class marking and “AUTO,” except as provided in [202.3.0](#). Pieces not claimed at an automation price must not bear “AUTO” unless First-Class Mail single-piece price postage is affixed or a corrective single-piece price marking (“Single-Piece” or “SNGLP”) is applied.

7.4 General Preparation

Grouping, bundling, and labeling are not generally required or permitted, except bundling is required in any mailing consisting entirely of card-size pieces and for pieces in overflow and less-than-full trays, and grouping is required under [7.5](#).

7.5 Tray Preparation

[6-5-08] Instead of preparing overflow trays with fewer than 150 pieces, mailers may include these pieces in the next tray level when a tray of 150 or more pieces can be made. Mailers must note these trays on standardized documentation (see [708.1.2](#)). Pieces that are placed in the next tray level must be grouped by destination and placed in the front or back of that tray. Mailers may use this option selectively for 3-digit and AADC ZIP Codes. This option does not apply to origin/entry 3-digit/scheme trays. Preparation sequence, tray size, and Line 1 labeling:

- a. 5-digit/scheme (see [1.4e](#)): optional, but required for 5-digit price (150-piece minimum); overflow allowed; for Line 1, label as follows:
 1. For 5-digit scheme trays, use destination shown in the current USPS City State Product.
 2. For 5-digit trays, use city, state, and 5-digit ZIP Code destination on pieces (see [4.0](#) for overseas military mail).
- b. 3-digit/scheme; required (150-piece minimum, except no minimum for optional origin/entry 3-digit/scheme(s)); overflow allowed; for Line 1, use [L002](#), Column B.
- c. AADC: required (150-piece minimum); overflow allowed; group pieces by 3-digit ZIP Code prefix (or 3-digit/scheme if applicable); for Line 1, use [L801](#), Column B.
- d. Mixed AADC: required (no minimum); group pieces by AADC; for Line 1 labeling: use [L011](#), Column B. Use [L010](#), Column B if entered at an ASF or BMC or for mail placed on an ASF, BMC, or SCF pallet under the option in [705.8.10.2](#).

7.6 Tray Line 2

Line 2: "STD LTR" and:

- a. 5-digit scheme: "BC 5D SCHEME."
- b. 5-digit: "5D BC."
- c. 3-digit scheme: "BC 3D SCHEME" and, if applicable, as shown in [L002](#), Column B, followed by the letter "A," "B," or "C."
- d. 3-digit: "3D BC."
- e. AADC: "AADC BC."
- f. Mixed AADC: "BC WKG."

7.7 Presentation

Upon presentation of letter-size automation price Standard Mail mailings to USPS for verification, mailers must present all mixed AADC trays together, and such trays must either be adjacent to one another or side by side, and must be placed as the top layer(s) on any given container.

245

Commercial Letters: Standard Mail Preparation

245.7.7

246 Enter and Deposit

Overview

- [1.0 Presenting a Mailing](#)
- [2.0 Destination Entry](#)
- [3.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [4.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [5.0 Destination Delivery Unit \(DDU\) Entry](#)

1.0 Presenting a Mailing

1.1 Basic Standards for Standard Mail Deposit

All Standard Mail must be presented at the Post Office where the permit or license is held and the presort mailing fee is paid, at the locations and times specified by the postmaster, except as follows:

- a. Plant-verified drop shipment (PVDS) mailings must be presented under [705.15.0](#).
- b. Plant-loaded mailings must be presented as specified by the plant load agreement.
- c. Metered mailings may be deposited at other than the licensing Post Office only as permitted under [705.18.0](#).
- d. Nonprofit Standard Mail must be presented only at Post Offices where the organization producing the mailing has an approved nonprofit authorization ([703.1.0](#)).

1.2 Separation of Mailings

Pieces at different prices may be combined in the same mailing as provided in [245.1.0](#). Separate mailings may be reported on the same postage statement if the pieces in the mailings are in the same letter-size processing category, are part of the same mailing job, and are presented for verification at the same time.

2.0 Destination Entry

2.1 General

Except for Customized MarketMail pieces defined in [705.1.0](#), all Standard Mail pieces meeting the basic standards in [243.2.0](#) through [243.4.0](#) may qualify for destination entry prices, if deposited at the correct destination postal facility, subject to the standards below and in [3.0](#), [4.0](#), and [5.0](#). Only one destination entry price may be claimed for each piece. A pallet may contain mail claimed at different destination entry prices.

2.2 Minimum Volume

A destination entry price Standard Mail mailing is subject to these minimum volume requirements:

246.2.3

- a. Each mailing must contain at least 200 addressed pieces or 50 pounds of addressed pieces.
- b. Except as provided in [2.2d](#), each group of pieces prepared for deposit at different destination entry facilities must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by a postage statement.
- c. If a facility is authorized to accept mail at more than one entry level, all pieces claimed at the different entry prices may be in one mailing and may be recorded on the same postage statement.
- d. When pieces from different price Standard Mail mailings are presented together under plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from one presort file (i.e., mailing job) reported on one Form 3602 and accompanied by Form 3602-C (or a postage statement register) to meet the minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 200 pieces or 50 pounds at a single destination entry facility if there is at least 200 pieces or 50 pounds of Presorted price mail, 200 pieces or 50 pounds of automation price mail, and/or 200 pieces or 50 pounds of Enhanced Carrier Route mail for all entry points combined for the single presort file.

2.3 Postage Payment and Documentation

Postage payment for destination entry mailings is subject to the same standards that apply generally to Standard Mail. No documentation for destination entry discounts is required.

2.4 Plant Loads

Plant load mailings are not eligible for destination entry discounts.

2.5 Verification

2.5.1 Mail Separation and Presentation

Destination entry price mail must be verified under a PVDS system ([705.15.0](#)) or be presented for verification and acceptance at a BMEU located at a destination postal facility. Only PVDS mailings may be deposited at a destination facility not co-located with a postal facility having a business mail entry unit. Destination entry mailings must meet the following requirements:

- a. The mailer must present each mailing separately for verification. For PVDS, each mailing for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow reconciliation with each required accompanying Form 8125, 8125-C, or 8125-CD.
- b. Mail must be separated from freight transported on the same vehicle.
- c. If Periodicals mail is on the same vehicle as Standard Mail, the mailer should load the Periodicals mail toward the tail of the vehicle so that Periodicals mail can be offloaded first.

2.5.2 Form 8125

When mailings are verified and paid for at a postal facility different from the one at which they are accepted and deposited as mail, the mailer must ensure that they are accompanied by a completed Form 8125 (or 8125-C or 8125-CD).

2.5.3 At BMC

For a mailing verified at a BMC, the Post Office where the mailer's account or license is held must be within the service area of that BMC. The Post Office must authorize the BMC to act as its agent by sending Form 4410 to the BMC.

2.5.4 Mailer Transport

The mailer must transport the PVDS mailing from the place where it was verified to the appropriate destination postal facility.

2.5.5 Volume Standards

Except as permitted for a local mailer under [2.6.13](#), destination entry mailings are subject to these volume standards:

- a. The pieces for which a destination price is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, *mailer* is the party presenting the mail to the USPS.
- b. The same mailer (or agent) may not in a 24-hour period present for verification and acceptance more than four destination price mailings at the same destination postal facility, unless the mailer or agent has received a waiver when scheduling the deposit of the mailings. There is no maximum for PVDS mailings.

2.6 Deposit**2.6.1 Time and Location of Deposit**

Each mailing claimed at a destination price must be deposited at the time and location specified by the USPS.

2.6.2 Freight

Drop shipments are freight until deposited and accepted as mail at the destination facility.

2.6.3 Appointments

Appointments must be made for destination entry price mail as follows:

- a. Except for a local mailer under [2.6.13](#) and mailings of perishable commodities, appointments for deposit of destination entry price mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.

246.2.6.4

- b. Electronic appointments may be made by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancellations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.
- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often.
- d. When Periodicals are transported together with Standard Mail or Package Services as a mixed load ([707.29.0, Destination Entry](#)), an appointment must be obtained for deposit at a destination entry facility.

2.6.4 Advance Scheduling

Mailers must schedule appointments for deposit of destination entry price mail under [2.6.3](#) and the conditions below. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type.

2.6.5 Adherence to Schedule

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units.

2.6.6 Redirection by USPS

A mailer may be directed to transport destination entry price mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints.

2.6.7 Redirection at Mailer's Request

For service reasons, a mailer may ask to transport destination SCF price mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF price in this situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF.

2.6.8 Recurring Appointments

Recurring refers to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule.

2.6.9 Vehicle Unloading

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. At BMCs, ASFs, and SCFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At destination delivery units (DDUs), drivers must unload all mail within 1 hour of arrival. Unloading procedures are as follows:
 1. If pallets or pallet boxes are stacked, drivers must unload, unstrap, and unstack them.
 2. At DDUs that cannot handle pallets, drivers must unload any mail from pallets and place it into containers as delivery unit employees specify.

246.2.6.10

- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area.

2.6.10 Drop and Pick

Drop and pick service is not available for destination entry Standard Mail.

2.6.11 Demurrage

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry price mailings.

2.6.12 Appeals

Mailers who believe they are denied equitable treatment may appeal to the manager, customer service (district), responsible for the destination postal facility.

2.6.13 Exception for Local Mailer

The restrictions in [2.5.5, Volume Standards](#), and [2.6.4, Advance Scheduling](#), do not apply when a mailer deposits mailings for verification and acceptance at the local Post Office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment authorization. Under this exception, the mailer may claim the destination entry prices for mailings or portions of mailings deposited at the local Post Office that meet the standards in [3.0](#) through [5.0](#) in *Enter and Deposit*.

3.0 Destination Bulk Mail Center (DBMC) Entry

3.1 Definition

For this standard, *destination bulk mail center (DBMC)* includes all bulk mail centers (BMCs) and auxiliary service facilities (ASFs) as shown in [Exhibit 3.1, BMC/ASF—DBMC Price Eligibility](#).

Exhibit 3.1 BMC/ASF – DBMC Price Eligibility

ELIGIBLE DESTINATION ZIP CODES	ENTRY FACILITY
005, 068-079, 085-098, 100-119, 124-127	BMC New Jersey NJ 00102

3.2 Eligibility

Pieces in a mailing that meets the standards in [2.0](#) and [3.0](#) are eligible for DBMC prices when they meet all of the following conditions:

- a. The pieces are deposited at a BMC, ASF, or SCF under [3.3](#).

246.3.3

- b. The pieces are addressed for delivery to one of the 3-digit ZIP Codes served by the BMC or ASF where deposited (see [Exhibit 3.1](#)).
- c. The pieces are properly placed in a tray or pallet that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within the service area of that BMC or ASF (see [Exhibit 3.1](#)).

3.3 Eligibility for ADC or AADC Mailpieces

All pieces in an ADC sack or tray or AADC tray are eligible for the DBMC discount if the ADC or AADC facility ZIP Code (as shown on Line 1 of the corresponding container label) is within the service area of the BMC or ASF at which the sack or tray is deposited as shown in [Exhibit 3.1](#). All pieces in a palletized ADC bundle are eligible for the DBMC discount if the ADC facility that is the destination of the bundle (determined by using the "Label To" ZIP Code in Column B of [L004](#)) is within the service area of the BMC or ASF at which it is deposited as shown in [Exhibit 3.1](#). All pieces in an AADC tray properly placed on an SCF pallet under [705.8.10.2](#) are eligible for DBMC prices when the 3-digit ZIP Code on the tray label is within that SCF's service area according to [L005](#).

3.4 Eligibility for Mixed ADC Bundles, Trays, or Mixed AADC Trays

Mailpieces either in a mixed ADC or a mixed AADC tray can qualify for DBMC prices when entered at a BMC/AFC or SCF facility responsible for the processing of those trays for that BMC/AFC facility (see [705.8.10.2f](#)), if the following standards are met: All pieces in the bundle or tray must destinate within the ASF or BMC service area shown in [Exhibit 3.1](#), [BMC/ASF—DBMC Price Eligibility](#).

- a. Use labeling list [L010](#) when labeling bundles or trays containing such pieces.
- b. Pieces claiming DBMC prices and any mixed ADC or mixed AADC pieces not claiming DBMC prices must be prepared in separate mixed ADC bundles or trays or in separate mixed AADC trays.

3.5 Vehicles

Mailings deposited at a DBMC must be presented in vehicles compatible with BMC dock and yard operations.

3.6 Form 4410

Mailings may be deposited at the DBMC only if that facility is authorized (by Form 4410) to act as acceptance agent for the entry Post Office (where the meter license, precanceled stamp permit, or permit imprint authorization is held). Form 4410 is not required for plant-verified drop shipments.

4.0 Destination Sectional Center Facility (DSCF) Entry

4.1 Definition

For this standard, *destination sectional center facility (DSCF)* refers to the facilities listed in [L002](#), Column C, and [L006](#), Column C.

4.2 Eligibility

Pieces in a mailing that meet the standards in [2.0](#) and [4.0](#) are eligible for DSCF prices under either [4.2a](#) or [4.2b](#) below:

- a. When deposited at a DSCF (or USPS-designated facility), addressed for delivery within that SCF's service area, and:
 1. Placed in a tray labeled to that DSCF.
 2. Placed in a tray labeled to a postal facility within that DSCF's service area.
- b. When entered and deposited at a DDU, addressed for delivery within that facility's service area, placed in a tray labeled to that DDU, and either:
 1. The pieces are prepared with simplified addresses under [602.3.2](#).
 2. The mailer holds a mailing permit at the DDU entry office and deposits only one mailing of fewer than 2,500 pieces per day.

4.3 Vehicles

Mailings deposited at a DSCF must be presented in vehicles that are compatible with SCF dock and yard operations.

5.0 Destination Delivery Unit (DDU) Entry**5.1 Definition**

For this standard, *destination delivery unit (DDU)* refers to the facility designated by the USPS district drop shipment coordinator (for automation price Standard Mail) or the facility (Post Office, branch, station, etc.) where the carrier cases mail for delivery to the addresses on pieces in the mailing (for other Standard Mail).

5.2 Eligibility

Letter-size mailpieces are not eligible for a destination delivery unit (DDU) discount. Mailers may not pay ECR flat-size prices and claim the DDU discount for letter-size pieces. Mailers may deposit letter-size pieces that meet the standards in [2.0](#) and [5.0](#) at a DDU when:

- a. Those pieces are addressed for delivery within that facility's service area (enhanced carrier route only).
- b. The pieces are placed in properly prepared and labeled carrier route trays or 5-digit carrier routes trays, or on pallets under [705.8.0](#).
- c. The pieces are eligible for and claimed at a carrier route price.

Commercial Flats Design Standards

301 Physical Standards

302 Elements on the Face of a Mailpiece

301 Physical Standards

Overview

- 1.0 Physical Standards for Flats
- 2.0 Physical Standards for Nonautomation Flats
- 3.0 Physical Standards for Automation Flats

1.0 Physical Standards for Flats

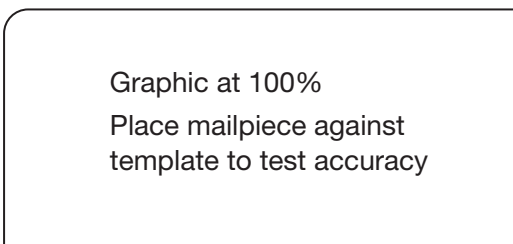

1.1 General Definition of Flat Size Mail

Flat-size mail other than that in [3.0, Physical Standards for Automation Flats](#), is:

- a. More than 11-1/2 inches long, or more than 6-1/8 inches high, or more than 1/4 inch thick.
- b. Not more than 15 inches long, or more than 12 inches high, or more than 3/4 inch thick, except for Periodicals mail under [707.26.0](#).
- c. Rectangular with four square corners or with finished corners that do not exceed a radius of 0.125 inch (1/8 inch). See [Exhibit 1.1c](#).

Exhibit 1.1c Maximum Corner Radius for Flat-Size Mailpieces

Corner Radius Maximum 1/8"

- d. Other size or weight standards may apply to mail claimed at certain prices, mail addressed to certain APOs and FPOs, and mail sent by the Department of State to U.S. government personnel abroad.

1.2 Length and Height of Flats

The *length* of a flat-size mailpiece is the longest dimension. The *height* is the dimension perpendicular to the length.

1.3 Minimum Flexibility for Flat-Size Pieces

Flat-size pieces must be flexible. Boxes—with or without hinges, gaps, or breaks that allow the piece to bend—are not flats. Tight envelopes or wrappers that are filled with one or more boxes are not flats. At the customer's option, a customer may perform the following test on their own mailpieces. When a postal employee observes a customer demonstrating that a flat-size piece is flexible according to these standards, the employee does not need to perform the test. Test flats as follows: All flats (see [Exhibit 1.30](#)):

1. Place the piece with the length parallel to the edge of a flat surface and extend the piece halfway off the surface.
2. Press down on the piece at a point 1 inch from the outer edge, in the center of the piece's length, exerting steady pressure.
3. The piece is *not* flexible if it cannot bend at least 1 inch vertically without being damaged.
4. The piece *is* flexible if it can bend at least 1 inch vertically without being damaged and it does not contain a rigid insert. No further testing is necessary.
5. Test the piece according to [1.3a](#) or [1.3b](#) below if it can bend at least 1 inch vertically without being damaged and it contains a rigid insert.

Exhibit 1.30 Flexibility Test—All Flats

- a. Flats 10 inches or longer that pass the test in 1.3d and contain a rigid insert (see Exhibit 1.3a):
 - 1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece 5 inches off the surface.
 - 2. Press down on the piece at a point 1 inch from the outer edge, in the center of the piece's width, exerting steady pressure.
 - 3. Turn the piece around and repeat steps 1 and 2. The piece is flexible if both ends can bend at least 2 inches vertically without being damaged.

Exhibit 1.3a Flexibility Test—Flats 10 Inches or Longer

301.1.4

- b. Flats less than 10 inches long that pass the test in 1.3d and contain a rigid insert (see Exhibit 1.3b):
 1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece one-half of its length off the surface.
 2. Press down on the piece at a point 1 inch from the outer edge, in the center of the piece's width, exerting steady pressure.
 3. Turn the piece around and repeat steps 1 and 2. The piece is flexible if both ends can bend at least 1 inch vertically without being damaged.

Exhibit 1.3b Flexibility Test—Flats Less Than 10 Inches Long

1.4 Uniform Thickness

Flat-size mailpieces must be uniformly thick so that any bumps, protrusions, or other irregularities do not cause more than 1/4-inch variance in thickness. When determining variance in thickness, exclude the outside edges of a mailpiece (1 inch from each edge) when the contents do not extend into those edges. Also, exclude the selvage of any polywrap covering (see 3.3) from this determination. Mailers must secure nonpaper contents to prevent shifting of more than 2 inches within the mailpiece if shifting would cause the piece to be nonuniform in thickness or would result in the contents bursting out of the mailpiece (see 601.2.3).

1.5 Flat-Size Pieces Not Eligible for Flat-Size Prices

Mailpieces that do not meet the standards in 1.1 through 1.4 are not eligible for flat-size prices and must pay applicable prices as follows:

- a. First-Class Mail—parcel prices.
- b. Standard Mail—Not Flat-Machinable or parcel prices.
- c. Bound Printed Matter—parcel prices.

2.0 Physical Standards for Nonautomation Flats

2.1 First-Class Mail

These additional standards apply to First-Class Mail flat-size pieces:

- a. First-Class Mail cannot exceed 13 ounces. First-Class Mail weighing more than 13 ounces is Priority Mail.
- b. Flat-size pieces that do not meet the standards in 1.1 through 1.4 must be prepared as parcels and pay the applicable parcel price.

2.2 Standard Mail

2.2.1 Basic Physical Standards

These additional standards apply to Standard Mail flat-size pieces:

- a. Each piece must weigh less than 16 ounces.
- b. Flat-size pieces that do not meet the standards in 1.3 through 1.4 must be prepared as parcels or Not Flat-Machinable pieces and pay the parcel or Not Flat-Machinable prices (see 401).

2.2.2 Cover Page and Protective Cover

If the piece is not completely enclosed in a mailing wrapper, then any protective cover or cover page must cover both the front and back of the host publication and extend to within at least 3/4 inch of the edge opposite the fold or binding. *Exception:* Flat-size pieces may have short covers as provided in 3.5.2.

2.3 Bound Printed Matter

2.3.1 General Standards

These additional standards apply to Bound Printed Matter:

- a. Flat-size pieces that do not meet the standards in 1.3 through 1.4 must be prepared as parcels and pay the applicable parcel prices.
- b. Bound Printed Matter may not weigh more than 15 pounds.
- c. Two or more flats may be mailed as a single piece if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.

2.4 Media Mail

2.4.1 General Standards

These additional standards apply to Media Mail:

- a. Flat-size pieces that do not meet the standards in 1.3 through 1.4 must be prepared as parcels.
- b. No piece may weigh more than 70 pounds.

301.2.5

- c. Two or more flats may be mailed as a single piece if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.

2.5 Library Mail

2.5.1 General Standards

These additional standards apply to Library Mail:

- a. Flat-size pieces that do not meet the standards in [1.3](#) through [1.4](#) must be prepared as parcels.
- b. No piece may weigh more than 70 pounds.
- c. Two or more flats may be mailed as a single piece if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.

3.0 Physical Standards for Automation Flats

3.1 Basic Standards for Automation Flats

Flat-size pieces claimed at automation prices must meet the standards in [3.0](#) and the eligibility standards for the class of mail and price claimed. Pieces prepared with polywrap film must meet the standards in [3.3](#).

3.2 Additional Criteria for Automation Flats

3.2.1 Shape and Size

Each flat-size piece must be rectangular, except that flat-size mailpieces may have finished corners that do not exceed a radius of 0.125 inch (1/8 inch). See [Exhibit 1.1c](#). The following minimum and maximum dimensions apply to First-Class Mail, Standard Mail, Periodicals (except under [707.26.0](#)), and Bound Printed Matter pieces:

- a. Minimum height is 5 inches. Maximum height is 12 inches.
- b. Minimum length is 6 inches. Maximum length is 15 inches.
- c. For bound or folded pieces, the edge perpendicular to the bound or folded edge may not exceed 12 inches.
- d. Minimum thickness is 0.009 inch. Maximum thickness is 0.75 inch.

3.2.2 Maximum Weight

Maximum weight limits are as follows:

- a. For First-Class Mail, 13 ounces.
- b. For Periodicals, 20 ounces.
- c. For Standard Mail, less than 16 ounces.
- d. For Bound Printed Matter, 20 ounces.

3.2.3 Maximum Deflection for Automation Flat-Size Pieces

An automation flat-size mailpiece must be flexible (see [1.3](#)) and must meet maximum deflection standards. Test deflection as follows:

- a. For pieces 10 inches or longer (see [Exhibit 3.2.3a](#)):
 - 1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece 5 inches off the surface. Turn the piece around and repeat the process.
 - 2. The piece is automation-compatible if it does not droop more than 4 inches vertically.

Exhibit 3.2.3a Deflection Test—Pieces 10 Inches or Longer

301.3.2.3

- b. For pieces less than 10 inches long (see [Exhibit 3.2.3b](#)):
 1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece one-half of its length off the surface. Turn the piece around and repeat the process.
 2. The piece is automation-compatible if it does not droop more than 1 inch less than the extended length. For example, a piece 8 inches long would extend 4 inches off a flat surface. It must not droop more than 3 inches vertically.

Exhibit 3.2.3b Deflection Test—For Pieces Less Than 10 Inches Long

- c. For pieces with bound or folded edges, perform the test in [3.2.3a](#) or [3.2.3b](#) above by placing the bound or final folded edge perpendicular to the edge of the flat surface.

3.3 Polywrap Coverings

3.3.1 Polywrap Films and Similar Coverings

When mailers use polywrap film or similar material to enclose flat-size mailpieces claimed at automation prices, the material must meet the standards in 3.3. Film approved for use under 3.3.5 must meet the specifications in Exhibit 3.3.1 as follows:

- a. Films or similar coverings must meet all six properties in Exhibit 3.3.1.
- b. If the address label is affixed to the outside of the polywrap, the haze property (property 2) does not apply.

Exhibit 3.3.1 Polywrap Specifications

Mailers who polywrap automation-price flats must use polywrap that meets all of the properties in this exhibit.

PROPERTY	REQUIREMENT	TEST METHODS IN USPS T-3204	COMMENT
1. Kinetic Coefficient of Friction, MD			
a. Film on Stainless Steel with No. 8 (Mirror) Finish	<0.45	USPS-T-3204 Section 4.5.2	
b. Film on Film	0.20 to 0.55	USPS-T-3204 Section 4.5.1	
2. Haze	<70	USPS-T-3204 Section 4.5.3	Affixing address labels to outside of polywrap is an alternative to meeting this requirement.
3. Secant Modulus, 1% elongation			
a. TD	>50,000 psi	USPS-T-3204 Section 4.5.4	
b. MD	>40,000 psi	USPS-T-3204 Section 4.5.4	
4. Nominal Gauge	>0.001 in	USPS-T-3204 Section 4.5.5	
5. Static Charge	<2.0 kV	USPS-T-3204 Section 4.5.7	
6. Blocking	<15 g	USPS-T-3204 Section 4.5.6	To be conducted at 140 (±3.6°) degrees Fahrenheit.

3.3.2 Wrap Direction and Seam Placement

Wrap direction, seam direction, and seam placement must follow these standards:

- a. The wrap direction must be around the longer axis of the mailpiece, with the seam parallel to that axis. The longer axis is always parallel to the length of the mailpiece.

301.3.3.3

- b. The preferred seam placement is on the nonaddressed side of the mailpiece. If the seam is placed on the addressed side, the seam must not cover any part of the delivery address and barcode, postage area, or any required markings or endorsements. Regardless of seam placement, the polywrap over the address area must be a smooth surface to avoid interference with address and barcode readability.

3.3.3 Overhang

For purposes of the polywrap standards for overhang (selvage) only, the top edge of the mailpiece is one of the two physically longer edges of the piece, regardless of address orientation and whether bound or unbound. Any polywrap overhang (selvage) around the four edges of the mailpiece (top, bottom, and left and right sides) must meet these standards:

- a. When the mailpiece contents are totally positioned at the bottom of the polywrap, the overhang must not be more than 0.5 inch at the top of the mailpiece.
- b. When the mailpiece contents are totally positioned to the left or to the right side of the polywrap, the overhang must not be more than 1.5 inches on the opposite side.
- c. The polywrap covering must not be so tight that it bends the mailpiece.

3.3.4 Polywrap on Mailpieces

Mailers claiming automation flat prices for polywrapped pieces must use polywrap that meets the specifications in 3.3.1. Only products listed on the USPS RIBBS Web site (<http://ribbs.usps.gov>) may be used on automation-price flats.

3.3.5 Polywrap Certification Process for Manufacturers

To ensure that all polywrap manufacturers use the same criteria in meeting the new specifications, the Postal Service developed specification USPS-T-3204, *Test Procedures for Automatable Polywrap Films*. This specification describes exact test procedures and acceptable values for polywrap film characteristics. Independent testing laboratories may certify products for manufacturers who do not have the facilities or experience to conduct each of the test procedures in specification USPS-T-3204. The specification includes a list of laboratories experienced in conducting these tests. Customers may obtain the new test procedures by contacting USPS Engineering (see 608.8.1 for address) or on the USPS RIBBS Web site (<http://ribbs.usps.gov>). Manufacturers must submit a letter, on their letterhead, indicating the value for each of the specifications in 3.3.1 for each polywrap film, to USPS Mailing Standards (see 608.8.1 for address). When USPS receives the certificate of conformance, films with values meeting the standards will be listed on <http://ribbs.usps.gov>. Manufacturers should follow this process before submitting the letter certifying compliance with the specifications:

- a. Test each film according to procedures listed in USPS-T-3204, *Test Procedures for Automatable Polywrap Films*.

- b. Test each surface treatment separately. Manufacturers may test the thinnest film of one product with identical surface treatment and characteristics. If the thinnest film satisfactorily meets the characteristics after being tested, USPS will list the product as approved for all gauges of that product that also meet the gauge test.

3.4 Prohibitions

3.4.1 Protrusions

Clasps, strings, buttons, or like materials, or other protrusions that impede or damage mail processing equipment are prohibited.

3.4.2 Staples

Staples must not be substituted for tabs or wafer seals on pieces in automation price mailings. As a binding method, staples may be placed in the fold or spine of a magazine or booklet-type or similar mailpiece if parallel with the bound edge, tightly and securely inserted, and not protruding to damage or interfere with mail processing equipment.

3.5 Tabs, Wafer Seals, Tape, and Glue

3.5.1 General

Although not required, mailpieces may be prepared with tabs, wafer seals, cellophane tape, or permanent glue (continuous or spot) if these sealing devices do not interfere with the recognition of the barcode, price marking, postage information, and delivery and return addresses. Cellophane tape may not be placed over the barcode or where any part of the barcode will be printed. Tabs or seals placed in the area on which any part of the barcode is printed must contain a paper face meeting the standards for background reflectance. Tabs, wafer seals, and tape must have a peel adhesion (shear strength) value of at least 15 ounces/inch at a speed of 12 inches/minute after application to a stainless steel plate; the test is to be conducted 10 minutes after the material is applied to the plate.

3.5.2 Short Covers

Flats may be prepared with a cover page or protective cover that is more than 3/4 inch from each edge if the cover page is secured with at least two tabs, wafer seals, or glue spots placed within 1 inch of the top and bottom edges of the cover page or protective cover.

3.6 Uniformity and Exterior Format

3.6.1 General

A flat-size mailpiece prepared and claimed at automation prices must be uniformly thick (see 1.4). Each flat-size mailpiece must have a smooth and regular shape and be free of creases, folds, tears, or other irregularities not compatible with automation equipment. The exterior surface must not have protuberances caused by prohibited closures; attachments (except as provided below); irregularly shaped or distributed contents; or untrimmed excess material from the envelope, wrapper, or sleeve.

3.6.2 Outside Attachment

An attachment to a flat-size mailpiece must be a single sheet, the same size as the cover. The attachment must be permanently, securely, and uniformly affixed to the front or back cover along a bound, folded, or otherwise closed edge. Pieces claimed at a Periodicals price may bear attachments only if permitted by the applicable standards.

3.6.3 Booklet-Type Piece or Magazine

The contents of flat-size mailpieces prepared in sleeves or other wrappers must be sufficiently secure in the sleeve or wrapper to stay in place during processing. If material bearing the delivery address or barcode for the mailpiece is enclosed in a partial wrapper, that wrapper must be sufficiently secure to prevent the contents from shifting and obscuring the delivery address or barcode.

3.7 Outside Labels and Stickers

3.7.1 Use

Permanent labels and stickers (those designed not to be removed or relocated) must be affixed directly to the outside of the mailpiece with permanent adhesive. A mailer may provide recipients with relocatable labels to place on the outside of response pieces sent back to the mailer. On pieces mailed at Periodicals prices, labels and stickers may be used only if permitted by the applicable standards.

3.7.2 Pressure-Sensitive Label

Any pressure-sensitive label or sticker affixed directly to a mailpiece before mailing must have a minimum peel adhesion to stainless steel of 8 ounces/inch. This standard does not apply to pressure-sensitive labels provided by the USPS to label bundles to sortation levels.

3.7.3 “Sandwich” Label

A face stock/liner label (“sandwich” label) is a two-part unit with a face stock (top label) attached to a liner (bottom label) affixed to the mailpiece. The face stock must have a peel adhesion value of at least 2 ounces/inch with respect to the liner label and at least 8 ounces/inch when reapplied to stainless steel.

302 Elements on the Face of a Mailpiece

Overview

- [1.0 All Mailpieces](#)
- [2.0 Placement and Content of Mail Markings](#)
- [3.0 Placement and Physical Standards for Endorsements](#)
- [4.0 Barcode Placement](#)

1.0 All Mailpieces

1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements.

1.2 Delivery and Return Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. Except for mail prepared with detached address labels under [602.4.0](#), the piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage. A return address is required in specific circumstances (see [3.2](#) and [602.1.5](#) for more information about return addresses). See [602](#) for additional information regarding addressing.)

1.3 Postage Payment

The mailer is responsible for proper payment of postage. Standards for postage payment are specified for each shape and class of mail.

2.0 Placement and Content of Mail Markings

2.1 First-Class Mail and Standard Mail Markings

2.1.1 Placement

[8-14-08] Mailpieces must be marked under the corresponding standards to show the class of service and/or price paid:

- a. Basic Marking. The basic required marking that indicates the class or subclass which must be printed or produced as part of; directly below; or to the left of the permit imprint, meter imprint, or stamp as follows:
 1. "First-Class"
 2. "Standard" or "STD"
 3. "Presorted Standard" or "PRSRT STD"
 4. "Nonprofit Organization," "Nonprofit Org.," or "Nonprofit"
- b. Other Markings. Mailers may place price-specific markings as follows:
 1. In the location specified in [2.1.1a](#).

2. In the address area on the line directly above or two lines above the address if the marking appears alone or if no other information appears on the line with the marking except optional endorsement line information under [708.7.0](#) or carrier route information under [708.8.0](#).
 3. If preceded by two asterisks (**), the “AUTO,” “PRESORTED” (or “PRSRT”), “CUSTOMIZED MARKETMAIL” (or “CUST MKTMAIL” or “CMM”), or “Single-Piece” (or “SNGLP”) markings also may be placed on the line directly above or two lines above the address in a mailer keyline or a manifest keyline, or it may be placed above the address and below the postage in an MLOCR ink-jet printed date correction/meter drop shipment line.
- c. Additional Requirements for Carrier Route. “ECRLOT,” “ECRWSH,” and “ECRWSS” (Standard Mail only) must appear in their entirety wherever placed, except “ECR” may be placed in the postage area if “LOT,” “WSH,” or “WSS,” as applicable, is placed in the line above or two lines above the address. Pieces not mailed at ECR prices must not bear these markings.

2.1.2 Exceptions to Markings

[8-14-08] Exceptions are as follows:

- a. Automation Flats. First-Class Mail and Standard Mail flats do not require an “AUTO” marking. First-Class Mail flats not marked “AUTO” must bear both the “Presorted” or “PRSRT” and “First-Class” markings. Standard Mail flats not marked “AUTO” must bear the appropriate basic marking in [2.1.1a](#).
- b. Manifest Mailings. The basic marking must appear in the postage area on each piece. The two-letter price category code, printed in the keyline on manifest mailing system pieces using batch processing under [705.2.0, Manifest Mailing System](#), meets the requirement for other price markings when those pieces are part of a manifest mailing or another automation mailing. If a single-piece marking (“SP”) has been applied to pieces that subsequently become part of a presorted or automation mailing, the “SP” marking must be marked out and replaced with a “Presorted” or “PRSRT” marking.
- c. MLOCR Prepared Automation Mailings. The basic marking must appear in the postage area on each piece. The other “AUTO” marking must be replaced by the appropriate identifier/price code marking described in [705.5.3.2, Price and Postage Marking](#), on those pieces that have the marking applied by an MLOCR. This seven-character marking provides a description of the Product Month Designator, MASS/FASTforward System Identifier, postage payment method, and the price of postage affixed for metered and precanceled stamp mail or other postage information for permit imprint mail.

2.2 Bound Printed Matter, Media Mail, and Library Mail Markings

2.2.1 Basic Markings

The basic required Package Services subclass marking—“Bound Printed Matter” or “BPM,” “Media Mail,” or “Library Mail”—must be printed on each piece claimed at the respective price. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking

may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 2.2.1, Package Services Indicator Examples](#)):

- a. The service icon that will identify all Package Services subclasses will be a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.
- b. The service banner must appear directly below the postage payment area and the service icon, and it must extend across the shipping label. If the service banner is used, the appropriate subclass marking (e.g., “BOUND PRINTED MATTER,” “MEDIA MAIL”) must be preceded by the text “USPS” and must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text.

Exhibit 2.2.1 Package Services Indicator Examples

2.2.2 Bound Printed Matter Markings

In addition to the basic marking “Bound Printed Matter” or “BPM,” each piece of Bound Printed Matter mailed at a presorted or carrier route price must bear additional price markings. The additional markings may be placed in the postage area as specified in [2.2.1, Basic Markings](#). Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under [708.7.0](#) or postal carrier route bundle information under [708.6.0](#). The additional price markings are:

302.2.2.3

- a. For Presorted price mail, the additional required marking is “Presorted” (or “PRSRT”). For presorted flats claiming the barcode discount prepared under [365.7.0](#), the optional marking “AUTO” may be used in place of “Presorted” (or “PRSRT”). If the “AUTO” marking is not used, the automation price flats must bear the “Presorted” (or “PRSRT”) price marking.
- b. For carrier route price mail, the additional required marking is “Carrier Route Presort” (or “CAR-RT SORT”).

2.2.3 Media Mail Markings

Each piece of Media Mail mailed at a presorted price must bear the required marking “Presorted” or “PRSRT” in addition to the basic marking “Media Mail.” This additional marking may be placed in the postage area as specified in [2.2.1, Basic Markings](#). Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under [708.7.0](#).

2.2.4 Library Mail Markings

Each piece of Library Mail mailed at a presorted price must bear the required marking “Presorted” or “PRSRT” in addition to the basic marking “Library Mail.” This additional marking may be placed in the postage area as specified in [2.2.1, Basic Markings](#). Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under [708.7.0](#).

2.3 Enclosures

Enclosures, attachments, and mixed price mailpieces must be marked under the applicable standards in [703.9.0, Mixed Classes](#), and [705.16.0, Express Mail Open and Distribute and Priority Mail Open and Distribute](#).

2.4 Printing and Designs

Required markings may be printed by a postage meter or other means that ensures a legible marking. A marking may not include or be part of a decorative design or advertisement.

2.5 Marking Hazardous Materials

All mailable hazardous materials must be labeled and/or marked as required in [601.10.0, Hazardous Materials](#).

3.0 Placement and Physical Standards for Endorsements

3.1 Endorsements for Delivery Instructions and Ancillary Services

The mailer must place the correct endorsement on each mailpiece to provide delivery instructions (retention period under [507.4.4.4](#), or carrier release under [508.1.2](#)) or to request an ancillary service (forwarding, return, or address correction under [507.1.0](#)), subject to the corresponding standards for use and availability.

3.2 Return Address

When an ancillary service endorsement is used, a domestic return address must be placed in the upper left corner of the address side of the mailpiece or the upper left corner of the addressing area. If the return address is a multiple delivery address, it must show a unit designator (e.g., an apartment number).

3.3 Placement of Endorsements

Placement of the endorsement on the mailpiece is determined as follows:

- a. The carrier release endorsement must be placed directly below the return address. If any other endorsement is used, the carrier release endorsement must be separated by the equivalent of one blank line of the type size used.
- b. A retention period specified by the mailer must be placed directly above the return address.
- c. Any ancillary service endorsement (e.g., Address Service Requested, Forwarding Service Requested, Return Service Requested, Change Service Requested) must be placed in one of these four positions:
 1. Directly below the return address.
 2. Directly above the delivery address area (which includes the delivery address block and any related nonaddress elements such as a barcode, keyline, or optional endorsement line).
 3. Directly to the left of the postage area and below or to the left of any price marking.
 4. Directly below the postage area and below any price marking.

3.4 Physical Standards for Endorsements

The endorsement, or, if combined, endorsements, must meet these physical standards:

- a. The type size of the endorsement must be at least 8 points.
- b. The read direction of the endorsement and return address must be the same as the read direction of the delivery address.
- c. The color contrast between the endorsement and the mailpiece background must be kept at a reasonable degree. A brilliant colored background or reverse printing is not permitted.
- d. A clear space of at least 1/4 inch around (above, below, and both sides) the total area containing the endorsement(s) is required. This 1/4-inch clear space is not required for an endorsement that is applied with a multiline optical character reader (MLOCR) inkjet and placed in the location directly below the postage area and any price marking if the endorsement is clear and legible.

4.0 Barcode Placement

4.1 General Barcode Placement for Flats

On any flat-size piece claimed at automation prices, the piece may bear one POSTNET barcode or Intelligent Mail barcode under [4.2](#) or it may bear two POSTNET barcodes under [4.3](#). Other non-USPS barcodes may appear on the address side of the piece if the barcode format is not discernable to automated postal equipment.

4.2 Applying One Barcode

On any flat-size mailpiece claimed at an automation price, the barcode may be anywhere on the address side as long as it is at least 1/8 inch from any edge of the piece. The portion of the surface of the piece on which the barcode is printed must meet the barcode dimensions and spacing requirements in [708.4.2.5](#), and the reflectance standards in [708.4.4](#). Intelligent Mail barcodes are subject to standards in [708.4.3.2](#).

4.3 Applying Second Barcode

At the mailer's option, a second POSTNET barcode may be applied to the piece only if the first POSTNET barcode on the piece is an address block barcode prepared under [4.2](#), that is not CASS-certified. In addition, the second barcode must meet the following requirements:

- a. It must be a delivery point barcode (DPBC).
- b. The preferred placement is the lower right corner of the mailpiece parallel to and in the same direction as the delivery address.
- c. It must be placed at least 1 inch below the return address.
- d. The space between the two POSTNET barcodes must be greater than 1 inch.

4.4 5-Digit and ZIP+4 Barcode Permissibility

The ZIP+4 barcode may appear in the address block when printed on an insert that appears through a window or on an address label affixed directly to the piece; or it may appear in the lower right corner either printed directly on the mailpiece or on an insert that appears through a window. An automation price flat-size piece must not bear a 5-digit barcode.

4.5 DPBC Numeric Equivalent

In delivery point barcoded automation price mailings only, the numbers corresponding to the POSTNET bars in a correct delivery point barcode (DPBC) may appear in the delivery address. If read from left to right, a correct DPBC numeric equivalent consists of five digits, a hyphen, and seven digits.

4.6 Barcode in Address Block

When the barcode is included as part of the address block:

- a. The barcode must be placed in one of these positions:
 1. Above the address line containing the recipient's name.
 2. Below the city, state, and ZIP Code line.
 3. Above or below the keyline information.

4. Above or below the optional endorsement line.
- b. The printing of the barcode is prohibited anywhere between the address line containing the recipient's name and the city, state, and ZIP Code line.
- c. The minimum clearance between the barcode and any information line above or below it within the address block must be at least 0.040 (1/25) inch for POSTNET barcodes or 0.028 inch for Intelligent Mail barcodes, and the separation between the barcode and top line or bottom line of the address block must not exceed 0.625 (5/8) inch. The clearance between the leftmost and rightmost bars and any adjacent printing must be at least 0.125 (1/8) inch.
- d. If a window envelope is used, the clearance between the leftmost and rightmost bars and any printing or window edge must be at least 0.125 (1/8) inch, and the clearance between the barcode and the top and bottom window edges must be at least 0.040 (1/25) inch for POSTNET barcodes or 0.028 inch for Intelligent Mail barcodes. These clearances must be maintained during the insert's range of movement in the envelope. Covers for address block windows are subject to [4.7](#).
- e. If an address label is used, a clear space of at least 0.125 (1/8) inch must be left between the barcode and the left and right edges of the address label, and the clearance between the barcode and the top and bottom edges of the address label must be at least 0.040 (1/25) inch for POSTNET barcodes or 0.028 inch for Intelligent Mail barcodes.

4.7 Window Cover

The window cover must be of a nontinted clear or transparent material (e.g., cellophane or polystyrene) that permits the barcode and its background, as viewed through the window material, to meet the reflectance standards in [708.4.4](#). The edges of the window cover must be securely glued to the envelope.

330 Commercial Flats First-Class Mail

333 Prices and Eligibility

334 Postage Payment and Documentation

335 Mail Preparation

336 Enter and Deposit

333 Prices and Eligibility

Overview

- 1.0 Prices and Fees for First-Class Mail
- 2.0 Content Standards for First-Class Mail Flats
- 3.0 Eligibility Standards for First-Class Mail Flats
- 4.0 Additional Eligibility Standards for Nonautomation First-Class Mail Flats
- 5.0 Additional Eligibility Standards for Automation Price First-Class Mail Flats

1.0 Prices and Fees for First-Class Mail

1.1 Price Application

Postage is based on the flat-size price that applies to the weight of each addressed piece.

1.2 Price Computation for First-Class Mail Flats

First-Class Mail prices are charged per ounce or fraction thereof; any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 1.2 ounces, the weight (postage) increment is 2 ounces.

1.3 Presorted and Automation Prices for Flats

Weight Not Over (ounces) ¹	Automation				Nonautomation
	5-Digit	3-Digit	ADC	Mixed ADC	Presorted
1	\$0.364	\$0.479	\$0.570	\$0.702	\$0.727
2	0.534	0.649	0.740	0.872	0.897
3	0.704	0.819	0.910	1.042	1.067
4	0.874	0.989	1.080	1.212	1.237
5	1.044	1.159	1.250	1.382	1.407
6	1.214	1.329	1.420	1.552	1.577
7	1.384	1.499	1.590	1.722	1.747
8	1.554	1.669	1.760	1.892	1.917
9	1.724	1.839	1.930	2.062	2.087
10	1.894	2.009	2.100	2.232	2.257
11	2.064	2.179	2.270	2.402	2.427
12	2.234	2.349	2.440	2.572	2.597
13	2.404	2.519	2.610	2.742	2.767

1. Flat-size pieces with certain characteristics (see 301.1.3 and 301.1.4) are subject to parcel prices.

1.4 Presort Mailing Fee

Presort mailing fee, per 12-month period, per office of mailing: \$180.00.

1.5 Computing Postage for First-Class Mail

Determine single-piece weight and weight (postage) increment for each addressed piece as prescribed in 1.6 and 1.2, *Price Computation for First-Class Mail Flats*. For First-Class Mail, affix postage to each piece under 334.2.2, *Affixed Postage for*

333.1.6

Presorted First-Class Mail, or, for permit imprint mailings, multiply the number of addressed pieces at each price increment (and in each price category, if applicable) by the corresponding postage price, add the *unrounded* products, and round off the total postage to the nearest whole cent.

1.6 **Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

2.0 Content Standards for First-Class Mail Flats

2.1 **General**

With the exception of restricted material as described in [601.8.0](#), any mailable item may be mailed as First-Class Mail.

2.2 **Bills and Statements of Account**

Bills and statements of account must be mailed as First-Class Mail (or Express Mail) and are defined as follows:

- a. Bills and statements of account assert a debt in a definite amount owed by the addressee to the sender or a third party. In addition, bills include a demand for payment; statements of account do not include a demand for payment. The debt does not have to be due immediately but may become due at a later time or on demand. The debt asserted need not be legally collectible or owed.
- b. Bills and statements of account do not need to state the precise amount due if they contain information that would enable the debtor to determine that amount.

2.3 **Personal Information**

Mail containing personal information must be mailed as First-Class Mail (or Express Mail). Personal information is any information specific to the addressee.

2.4 **Handwritten and Typewritten Material**

Mail containing handwritten or typewritten material must be mailed as First-Class Mail or Express Mail.

2.5 **Matter Not Required to be Mailed as First-Class Mail**

Matter eligible for Standard Mail or Package Services prices or authorized as Periodicals is not required to be mailed as First-Class Mail or Express Mail.

2.6 **Prohibited Air Transportation**

All First-Class Mail is subject to limitations for air transportation. Generally, all mailable matter may be transported by aircraft, unless restricted in [601.10.0](#), *Hazardous Materials*.

3.0 Eligibility Standards for First-Class Mail Flats

3.1 Description of Service

3.1.1 Service Objectives

First-Class Mail receives expeditious handling and transportation. Service objectives for delivery are 1 to 3 days; however, delivery time is not guaranteed.

3.1.2 Price Options

First-Class Mail offers the flexibility of single-piece prices ([133.1.0](#)), and commercial prices ([1.0](#)) for presorted mailings of 500 or more pieces that weigh 13 ounces or less.

3.2 Defining Characteristics

3.2.1 Inspection of Contents

First-Class Mail is closed against postal inspection. Federal law and USPS regulations restrict both opening and reviewing the contents of First-Class Mail by anyone other than the addressee.

3.2.2 Forwarding Service

The price of First-Class Mail includes forwarding service to a new address for up to 12 months.

3.2.3 Return Service

The price of First-Class Mail includes return service if the mailpiece is undeliverable.

3.2.4 Extra Services Exclusive to First-Class Mail

First-Class Mail is the only class of mail eligible to receive the following extra services: Registered Mail service and Certified Mail service.

3.2.5 Additional Extra Services

Additional extra services available with First-Class Mail are certificate of mailing service, COD service, Delivery Confirmation service (parcels only), insured mail service (merchandise only), return receipt service, restricted delivery service, Signature Confirmation service (parcels only), and special handling. See information regarding extra services in [503](#).

3.3 Additional Basic Standards for First-Class Mail

All pieces of presorted First-Class Mail must:

- a. Meet the basic content standards for First-Class Mail in [2.0](#).
- b. Weigh 13 ounces or less.
- c. Meet the applicable standards in [333, Prices and Eligibility](#), [334, Postage Payment and Documentation](#), and [604.7.0, Computing Postage](#).
- d. Be part of a single mailing of at least 500 pieces of Presorted First-Class Mail.
- e. Meet the applicable physical standards in [301.2.0](#).
- f. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
 1. The Move Update standard in [3.5](#).

333.3.4

2. The ZIP Code accuracy standard in [3.6](#).
3. If an alternative addressing format is used, the additional standards in [602.3.0](#).

3.4 Presort Mailing Fee

A First-Class Mail presort mailing fee must be paid once each 12-month period at each office of mailing by any person or organization entering mailings at automation or Presorted First-Class Mail prices. Payment of one fee allows a mailer to enter mail at all those prices. Persons or organizations paying this fee may enter mail of their clients as well as their own mail. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

3.5 Move Update Standards

3.5.1 Basic Standards

The Move Update standard is a means of reducing the number of mailpieces in a mailing that require forwarding or return by the periodic matching of a mailer's address records with customer-filed change-of-address orders received and maintained by the USPS. For the purposes of this standard, *address* means a specific address associated with a specific occupant name. Addresses subject to the Move Update standard must meet these requirements:

- a. Each address and associated occupant name used on the mailpieces in a mailing must be updated within 185 days before the mailing date, with one of the USPS-approved methods in [3.5.2](#).
- b. Each individual address in the mailing is subject to the Move Update standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is updated with an approved method (e.g., Address Change Service), the same address may be used during the following 185 days and meets the Move Update standard.
- d. Except for mail bearing an alternative address format, addresses used on pieces claiming First-Class Mail Presorted prices, regardless of any required surcharge, must meet the Move Update standard.

3.5.2 USPS-Approved Methods

The following methods are authorized for meeting the Move Update standard:

- a. Address Change Service (ACS).
- b. National Change of Address Linkage System (NCOA^{Link}).
- c. *FASTforward* MLOCR processes (letter-size and flat-size mail only) if used each time before mail entry. If a mailpiece that initially uses *FASTforward* MLOCR processing is rejected and then entered into a Direct View Encoding Desk (DVED) operation (or similar system), the piece does not meet the Move Update standard. The name and address information on the piece must then be processed through a *FASTforward* RVE system to meet the Move Update standard. *FASTforward* RVE processes also meet the Move Update standard if used each time before mail entry.

- d. Mailer Move Update Process Certification and USPS-approved alternative methods for mailers with legitimate restrictions on incorporating USPS-supplied change-of-address information into their mailing lists. The National Customer Support Center (see [608.8.1](#) through [608.8.3](#) in *USPS Contact Information* for address) administers and approves both Mailer Move Update Process Certification and alternative methods.
- e. Ancillary service endorsements under [507.1.5.1](#), *First-Class Mail and Priority Mail*, except “Forwarding Service Requested.”

3.5.3 Mailer Certification

The mailer’s signature on the postage statement certifies that the Move Update standard has been met for each address in the corresponding mailing presented to the USPS.

3.6 ZIP Code Accuracy

3.6.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain prices under [3.6.1d3](#), *Basic Standards* that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.6.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming First-Class Mail prices, regardless of any required surcharges, must meet the ZIP Code accuracy standard.

3.6.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer’s computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
 - 1. Surveys of addressees on mailer’s address list inquiring about the accuracy of ZIP Code information.
 - 2. Any mailing list service in [507.7.0](#), *Mailing List Services*.

333.3.6.3

3. An authorized service provider.
4. CASS-certified matching software.
5. USPS Web site www.usps.com.

3.6.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

4.0 Additional Eligibility Standards for Nonautomation First-Class Mail Flats

4.1 Basic Standards for Nonautomation First-Class Mail

In addition to the standards in [3.0, Eligibility Standards for First-Class Mail Flats](#), all pieces in a First-Class Mail Presorted price mailing must be marked, sorted, and documented as specified in [334.4.0, Mailing Documentation](#), and [335.5.0, Preparation of Nonautomation Flats](#), or, alternatively under [705.9.0, Combining Bundles of Automation and Nonautomation Flats in Trays and Sacks](#).

4.2 Barcodes on Nonautomation First-Class Mail

Any POSTNET barcode on a mailpiece in a nonautomation First-Class mailing must be correct for the delivery address and meet the standards in [708.3.0, Coding Accuracy Support System \(CASS\)](#), and [708.4.0, Standards for POSTNET and Intelligent Mail Barcodes](#).

4.3 Nonmachinable Flat-Size Pieces

Flat-size pieces that do not meet the standards in [301.1.3](#) through [301.1.4](#) must be prepared as parcels and pay the applicable parcel-size prices.

5.0 Additional Eligibility Standards for Automation Price First-Class Mail Flats

5.1 Basic Standards for Automation First-Class Mail

All pieces in a First-Class Mail automation price mailing must:

- a. Meet the basic standards for First-Class Mail in [3.0](#).
- b. Be part of a single mailing of at least 500 pieces of automation price First-Class Mail.
- c. Meet the physical standards in [301.3.0](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
 1. The address matching and coding standards in [5.4, Address Standards for Barcoded Pieces](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).

2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Bear an accurate barcode meeting the standards in [708.4.0](#), a ZIP+4 barcode, a delivery point barcode (DPBC), or an Intelligent Mail barcode with a ZIP+4 or delivery point routing code, either on the piece or on an insert showing through a barcode window.
- f. Be marked, sorted, and documented as specified in [335.6.0](#), *Preparation of Automation Price Flats*, or [705.9.0](#), *Combining Bundles of Automation and Nonautomation Flats in Trays and Sacks*.

5.2 Price Application—Bundle-Based Flats

Automation prices apply to each piece that is sorted under [335.6.0](#) or [705](#), *Advanced Preparation and Special Postage Payment Systems*:

- a. Pieces in 5-digit bundles of 10 or more pieces qualify for the 5-digit price. Preparation to qualify for the 5-digit price is optional and need not be done for all 5-digit destinations.
- b. Pieces in 3-digit bundles of 10 or more pieces qualify for the 3-digit price.
- c. Pieces in ADC bundles of 10 or more pieces qualify for the ADC price.
- d. Pieces in mixed ADC bundles qualify for the mixed ADC price.

5.3 Price Application—Tray-Based Flats

Automation prices apply to each piece that is sorted under [335.6.6](#), *First-Class Mail Optional Tray-Based Preparation*, into the corresponding qualifying groups:

- a. Groups of 90 or more pieces in 5-digit trays qualify for the 5-digit price. Preparation to qualify for the 5-digit price is optional and need not be done for all 5-digit destinations.
- b. Groups of 90 or more pieces in 3-digit trays qualify for the 3-digit price.
- c. Groups of fewer than 90 pieces in origin 3-digit trays and all pieces in ADC trays qualify for the ADC price.
- d. All pieces in mixed ADC trays qualify for the mixed ADC price.

5.4 Address Standards for Barcoded Pieces

5.4.1 Basic Address Standards for Barcodes

To qualify for automation prices, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode that appears on a mailpiece claimed at an automation price must be the correct barcode for the corresponding delivery address on the piece.

5.4.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits.

5.4.3 Numeric Delivery Point Barcode (DPBC)

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [708.4.2.4, Delivery Point Barcode](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code.

5.4.4 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product.

5.4.5 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used.

5.4.6 Secondary Designator

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used.

5.4.7 Rural and Highway Contract Routes

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line.

5.4.8 Post Office Box

A Post Office box address must contain a Post Office box number that can be exactly matched with the USPS ZIP+4 Product in effect.

5.5 Reply Cards and Envelopes Enclosed in Automation Price First-Class Mail

All letter-size reply cards and envelopes provided as enclosures in automation First-Class Mail and addressed for return to a domestic delivery address must meet the standards in [201.3.0, *Physical Standards for Automation Letters and Cards*](#), for enclosed reply cards and envelopes. The mailer must certify that this standard has been met when the corresponding mail is presented to the USPS.

334 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Postage Payment for Presorted Flats](#)
- [3.0 Postage Payment for Automation Flats](#)
- [4.0 Mailing Documentation](#)

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

Postage for commercial (presorted or automation) price First-Class Mail must be paid with affixed postage ([604.1.0](#) for stamps, [604.3.0](#) for precanceled stamps, or [604.4.0](#) for metered postage) or permit imprint ([604.5.0](#)) as specified in [2.0, Postage Payment for Presorted Flats](#), and [3.0, Postage Payment for Automation Flats](#). A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

2.0 Postage Payment for Presorted Flats

2.1 Payment Methods for Presorted Prices

Presorted First-Class Mail price postage must be paid with meter stamps under [604.4.0](#), permit imprints under [604.5.0](#), or precanceled postage under [604.3.0](#), subject to the corresponding standards for these methods. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization.

2.2 Affixed Postage for Presorted First-Class Mail

Unless permitted by other standards or by Business Mailer Support, USPS Headquarters, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. The full postage at the First-Class Mail price for which it qualifies (no postage documentation is required).
- b. A precanceled stamp or the full postage at the lowest First-Class Mail 1-ounce price applicable to the mailing job, and full postage on metered pieces for additional ounce(s) or extra services.
- c. Postage in an amount not less than the lowest available First-Class Mail first-ounce letter or card price (as applicable) in the mailing job if authorized by Business Mailer Support, plus full postage on metered pieces for any extra ounce(s); postage documentation may be required by standard.

2.3 Additional Postage

Additional postage for pieces not bearing sufficient postage when presented to the USPS must be paid before acceptance either using an advance deposit account or with a meter stamp affixed to the postage statement accompanying the mail. When the amount of postage affixed is subject to Business Mailer Support authorization under [2.2c, Affixed Postage for Presorted First-Class Mail](#), credit is not given for postage affixed in excess of the authorized amount.

3.0 Postage Payment for Automation Flats

3.1 Payment Methods

First-Class Mail automation price postage must be paid with meter stamps, permit imprints, or precanceled stamps. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization. Permit imprints may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support.

3.2 Affixing Postage for Automation Price First-Class Mail

Unless permitted by other standards or Business Mailer Support authorization, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. Each metered piece weighing more than 1 ounce must bear the correct additional postage to pay for the additional ounce(s).
- b. Each piece must bear a precanceled stamp or meter postage in the exact amount or at the lowest price applicable to pieces in the mailing job. If exact postage is not affixed, all additional postage must be paid at the time of mailing with an advance deposit account or with a meter stamp affixed to the required postage statement.
- c. Documentation meeting the standards in [4.0](#) must be presented with the postage statement to show the number of pieces at each price and the computation of the additional postage due for pieces not bearing full postage at the applicable price (i.e., the difference between what the pieces bear and the correct postage at the price for which each qualifies).

3.3 Nondenominated Precanceled Stamps

A mailer may use available nondenominated precanceled stamps if:

- a. Stamps are affixed to every piece in the mailing.
- b. Additional postage is paid at the time of mailing either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.
- c. Documentation is presented with the postage statement showing, by 5-digit and 3-digit ZIP Code, the number of pieces at each price and the computation of the additional postage due at the applicable price (i.e., the difference between the value of the nondenominated stamp affixed and the correct postage at the price for which each piece qualifies).

3.4 Lower Denomination Precanceled Stamps

A mailer may use precanceled stamps of a denomination less than the postage for the first ounce at the lowest price in the mailing if:

- a. The stamps do not bear an improper price marking.
- b. The same denomination of stamp is affixed to every piece in the mailing.
- c. Additional postage is paid at the time of mailing either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.
- d. Documentation is presented with the postage statement showing, by 5-digit and 3-digit ZIP Code, the number of pieces at each price and the computation of the additional postage due at the applicable price (i.e., the difference between the value of the stamps affixed and the correct postage at the price for which each piece qualifies).

3.5 Postage Affixed at Lowest Price to All Pieces

Where it is not practicable for the mailer to affix the exact postage to each piece or to affix the lowest postage price to all pieces in the mailing, the mailer may compute postage for the mailing as if the lowest price affixed to any piece in the mailing were affixed to all pieces. Additional postage is computed based on the difference between the lowest price affixed to any piece in the mailing and the price for each price level in the mailing. This computation must be documented to meet the basic standards in [4.0, Mailing Documentation](#). No refund is paid for any piece where postage is affixed at a price higher than the lowest price claimed for or affixed to any piece. The total additional postage must be paid either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.

4.0 Mailing Documentation

4.1 Completing Postage Statements

Any mailing claiming a commercial price, and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

4.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the preparation, price levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

**4.3 Documentation Standards for Automation Mailings**

A complete postage statement must accompany each mailing, supported by documentation produced by PAVE-certified (or MAC-certified) software or standardized documentation. Mailers may use a single postage statement and a single documentation report for all price levels in a single mailing. Documentation of postage is not required if the correct price is affixed to each piece or if each piece is of identical weight and the pieces are separated by price when presented for acceptance.

4.4 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

4.5 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

4.6 Standard Format for Documentation

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and price claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation.

4.7 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0, *Rulings on Mailing Standards*](#).

4.8 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

4.9 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include

all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

335 Mail Preparation

Overview

- [1.0 General Definition of Terms](#)
- [2.0 Bundles](#)
- [3.0 Flat Trays](#)
- [4.0 Tray Labels](#)
- [5.0 Preparation of Nonautomation Flats](#)
- [6.0 Preparation of Automation Price Flats](#)

1.0 General Definition of Terms

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations.

1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation and nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. The types of First-Class Mail listed below must not be part of the same mailing despite being in the same processing category (see [705.9.0, *Combining Bundles of Automation and Nonautomation Flats in Trays and Sacks*](#), and [705.10.0, *Merging Bundles of Flats in Sacks and Pallets Using the City State Product*](#), for advanced preparation options for flat-size mail):
 1. Automation price and any other type of mail.
 2. Presorted price and any other type of mail.
 3. Single-piece price and any other type of mail.
 4. Machinable and nonmachinable pieces.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).

- c. *Origin/optional entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- d. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- e. *Mixed ADC*: the pieces are for delivery in the service area of more than one ADC.

1.4 Preparation Definitions and Instructions

[\[8-14-08\]](#) [\[7-3-08\]](#) For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full flat tray* is one that is physically full. Although a specific minimum volume is required (at least a single stack of mail lying flat on the bottom of the tray and filling the tray to the bottom of the handholds) before a tray may or must be prepared to the corresponding presort destination, trays must be filled with additional available pieces (up to the reasonable capacity of the tray) when standards require preparation of *full* trays.
- c. A *less-than-full flat tray* is one that contains First-Class Mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full flat trays may be prepared only if permitted by the standards for the price claimed.
- d. An *overflow flat tray* is a less-than-full First-Class Mail tray that contains all pieces remaining after preparation of one or more full trays for the same destination. Overflow flat trays may be prepared only if permitted by the standards for the price claimed.
- e. A *5-digit scheme sort for automation flats* yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#). Presorting must be performed using [L007](#). Pieces prepared in scheme bundles must meet the automation-compatibility criteria in [301.3.0, Physical Standards for Automation Flats](#). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is optional. Bundles must be labeled using an optional endorsement line (OEL) under [708.7.0](#) or with a red “5 SCH” bundle label. Bundles are placed in appropriate containers using the OEL “label to” 5-digit ZIP Code or using [L007](#) column B.

- f. An *origin 3-digit* (or *origin 3-digit scheme*) tray contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray must be prepared for each.
- g. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- h. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- i. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry SCF”) that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer’s location the Post Office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs.
- j. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- k. A *bundle* is a group of addressed pieces secured together as a unit. Bundle preparation is described in [2.0, Bundles](#).
- l. A “*logical*” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a First-Class Mail “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles.
- m. *Cobundling* is an alternate preparation method available under [705.11.0](#) for First-Class Mail that allows the combining of flat-size automation price and Presorted price pieces within the same bundle under the single minimum bundle size requirement. Regardless of the class of mail, pieces may not be combined in more than one physical bundle for each logical presort destination unless presented using an approved manifest mailing system under [705.2.0](#).

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit. The term *bundle* does not apply to pieces grouped or prepared loose in trays.

2.2 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

2.4 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment.

Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 1. Do not place any bands closer than 1 inch from any bundle edge.
 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 3. Do not use wire or metal banding.
 4. Do not use any loose banding.

- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

2.5 Exception to Bundle Preparation— Full Single-Sort-Level Trays

Mailers need not prepare bundles when placing mail in a full tray if none of the mail in that tray would have been more finely sorted if bundled. For example, the content of a full ADC tray need not be bundled if it would have all been prepared in ADC bundles to the same destination.

2.6 Pieces With Simplified Address

For mail prepared with a simplified address, all pieces for the same Post Office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, Post Office boxholder).

2.7 Bundles With Fewer Than the Minimum Number of Pieces Required

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the price claimed without loss of price eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

2.8 Labeling Bundles

[7-3-08] Unless excepted by standard, the presort level of each bundle must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. On flat-size mail, the label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit scheme presort level, red Label 5 SCH.
- b. Five-digit presort level, red Label 5.
- c. Three-digit presort level, green Label 3.
- d. ADC presort level, pink Label A.
- e. Mixed ADC presort level, tan Label X.

3.0 Flat Trays

3.1 Presort

Presort, presort levels, and standard preparation terms are defined in [1.0, General Definition of Terms](#).

3.2 Standard Containers

Mailings must be prepared in flat trays with green lids under 3.4, unless prepared in extended managed mail (EMM) trays under [3.5](#). A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing.

3.3 Flat Tray and Letter Tray Sizes

These approximate measurements define the USPS-provided tray sizes that apply to mail preparation standards in [3.4](#) and [3.5](#):

- a. Flat tray. Inside bottom dimensions: 14-3/4 inches long by 10-3/4 inches wide. Height: 8 inches to bottom of handhold, 11-1/4 inches to top of tray.
- b. Letter tray. 2-foot extended MM (EMM) trays: 21-3/4 inches long by 11-1/2 inches wide (inside bottom dimensions) by 6-1/8 inches high.

3.4 Preparation for Flats in Flat Trays

All flat tray preparation is subject to these standards:

- a. Addresses on all pieces must face upward in the same direction.
- b. Pieces must be placed in trays to maintain their orientation. Once the required minimum volume is reached to allow or require preparation of a tray, additional pieces must be placed in the same tray up to its capacity to minimize the number of trays used. When possible, pieces must be placed in two or more stacks to optimize tray use, but mail must not overflow the tray to inhibit adequate closure or covering of the content.
- c. The weight of a tray and its content must not exceed 70 pounds.
- d. Each tray must bear the correct tray label.
- e. Each tray must be covered (with the green side of the lid facing up) and strapped under [3.4i, Preparation for Flats in Flat Trays](#).
- f. For automation price mailings prepared under the optional tray-based preparation rules in [6.0](#), one less-than-full overflow tray may be prepared for a presort destination when the total number of pieces for that destination meets the minimum for preparation of the tray level, and when one or more full trays for that destination are also prepared.
- g. For automation price mailings prepared under the optional tray-based preparation rules, if the total number of pieces for a presort destination meets or exceeds the minimum number of pieces required to prepare a tray for that destination, but the total volume does not physically fill a single tray, then the mail for that presort destination may be prepared in a less-than-full tray.

- h. Pieces prepared as automation flats under the tray-based preparation option do not have to be grouped by 3-digit ZIP Code prefix in ADC trays or by ADC in mixed ADC trays if the mailing is prepared using an MLOCR/barcode sorter and standardized documentation is submitted.
- i. Each flat tray must be covered with a lid. Each covered flat tray must then be secured with two straps placed tightly around the width of the tray (the shorter dimension).

3.5 Preparation for Flats in EMM Letter Trays

Mailers may prepare First-Class Mail flat-size pieces in EMM letter trays instead of flat trays if the following standards are met:

- a. The pieces must fit completely within the dimensions for height, length, and width specified in [3.3b](#) for an extended managed mail (EMM) letter tray. All pieces must be upright, faced toward the end of the tray (the short dimension), and perpendicular to the length of the tray.
- b. Trays must bear tray-size labels that meet all applicable physical and barcode standards under [4.9](#), with Line 1 and Line 2 information as required for flat-size mail in flat trays. Each label must contain a barcode as specified in [708.6.2.3](#) and the content identifier number required in [Exhibit 708.6.1.1](#) for the same type of flat-size mail prepared in flat trays.
- c. All mail must be prepared under [6.6, First-Class Mail Optional Tray-Based Preparation](#), and must not be prepared in bundles, except pieces in less-than-full trays must be bundled. Mailers using this option are not eligible to prepare their mail under [705.9.0](#).
- d. All other applicable standards in [6.0, Preparation of Automation Price Flats](#), must be met, including required preparation sequence and use of tray minimums.

3.6 Origin/Entry 3-Digit/Scheme Trays

After all finer sort levels are prepared, an origin/entry 3-digit tray (or, if applicable, origin/entry 3-digit scheme tray) must be prepared to contain any remaining mail for each 3-digit (or 3-digit scheme) area serviced by the SCF serving the Post Office where the mail is verified (origin), and may be prepared for each 3-digit (or 3-digit scheme) area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the Post Office where the mail is verified). In all cases, only one less-than-full tray may be prepared for each 3-digit (or 3-digit scheme) area.

4.0 Tray Labels

4.1 Basic Standards

Only tray labels may be used for trays; only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. Container labels for automation price mailings are subject to [4.9](#) and [708.6.0, Barcoding Standards for Container Labels](#).

4.2 Physical Characteristics of a Tray Label

A tray label must meet these specifications:

- a. Color: white or manila.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- e. Thickness: 0.005 inch minimum.

4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., "ADC"). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit trays for overseas military destinations, Line 1 shows, from left to right, "APO" or "FPO," followed by "AE" (for ZIP Codes within the ZIP Code prefix range 090-098), "AA" (for ZIP Codes within the 3-digit ZIP Code prefix 340), or "AP" (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the tray.

4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the tray and other information as specified by standards.
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of tray labels.

CONTENT TYPE	CODE
Barcoded	BC
Barcoded and Nonbarcoded	BC/NBC
Digit	D
First-Class Mail	FCM
Flats	FLTS
General Delivery Unit	G
Highway Contract Route	H
Mixed	MXD
Nonbarcoded	NON BC
Post Office Box Section	B
Rural Route	R
Working	WKG

4.5 **Line 3 (Office of Mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

4.6 **Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.7 **Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

4.8 **Placement of a Tray Label**

A tray label must be securely placed in an adhesive-backed label holder that is affixed to the specific location designated on the tray. Where no specific location is indicated the label must be securely placed in an adhesive-backed label holder that

is affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert labels completely into the label holder to ensure that they do not fall out during processing. Do not insert labels upside down.

4.9 Barcoded Tray Labels

4.9.1 Basic Standards for Barcoded Tray Labels

[Exhibit 4.9.1](#) shows the types of mail requiring barcoded tray labels. Barcoded labels must meet these general standards:

- a. Use 2-inch labels.
- b. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- c. Barcoded labels must be inserted completely into the label holder on the tray to prevent their loss during transport and processing.
- d. Mailer-produced barcoded labels must meet the standards in [708.6.0](#), [Barcoding Standards for Container Labels](#).

Exhibit 4.9.1 Required Barcoded Container Labels

PRICE OR TYPE	PROCESSING CATEGORY
First-Class Mail	
Automation price	Flat-size
Cobundled and cotrayed under 705.9.0 through 705.13.0	Flat-size

5.0 Preparation of Nonautomation Flats

5.1 Basic Standards

Each Presorted First-Class Mail mailing must be prepared under [5.0](#) and [333.3.0](#), [Eligibility Standards for First-Class Mail Flats](#). All pieces must be in the flat-size processing category. Flat-size pieces must be prepared in flat trays. All pieces must be marked “Presorted” and “First-Class.”

5.2 Single-Piece Price Pieces Presented With Presort Mailings

Regardless of the method of postage payment, pieces of single-piece price First-Class Mail may be presented with and reported on the same postage statement as pieces claimed at automation or presort prices if the single-piece price pieces are physically separated from other pieces; bear no price marking, or are marked only “First-Class,” or (if not affixed with full single-piece price postage) are marked “Single-Piece” or “SNGLP” under [202.3.0](#), [Placement and Content of Mail Markings](#), in addition to any other marking; and either have additional postage affixed to yield the correct amount on each piece or (if prepared with a corrective price marking) have all additional postage paid at the time of mailing.

5.3 Nonautomation Pieces

Nonautomation flats must use the preparation sequence and tray labeling in [5.4](#) and [5.5](#).

5.4 Bundling and Labeling

Except under [2.7b](#), bundling is required before traying. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Preparation sequence, bundle size, and labeling:

- a. 5-digit (required); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL.

5.5 Traying and Labeling

Preparation sequence, tray size, and labeling:

- a. 5-digit (required); full trays (no overflow); labeling:
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.3c](#) for overseas military mail).
 2. Line 2: "FCM FLTS 5D NON BC."
- b. 3-digit (required); full trays (no overflow), except for one less-than-full tray for each origin 3-digit(s); labeling:
 1. Line 1: [L002](#), Column A.
 2. Line 2: "FCM FLTS 3D NON BC."
- c. ADC (required); full trays (no overflow); labeling:
 1. Line 1: [L004](#), Column B.
 2. Line 2: "FCM FLTS ADC NON BC."
- d. Mixed ADC (required); no minimum; labeling:
 1. Line 1: Use [L201](#); for mail originating in ZIP Code areas in Column A, use "MXD" followed by city, state, and 3-digit ZIP Code prefix in Column C (use "MXD" instead of "OMX" in the destination line and ignore Column B).
 2. Line 2: "FCM FLTS NON BC WKG."

5.6 Cotraying and Cobundling With Automation Price Mail

Except for automation price mailings prepared under the tray-based preparation option in [6.6](#), if a single mailing job contains an automation price mailing and a Presorted price mailing and both mailings are reported on the same postage statement, then the mailing job must be presorted under the cotraying standards in [705.9.0](#). Flat-size Presorted price pieces may be cobundled with flat-size automation price pieces under the standards in [705.11.0](#).

6.0 Preparation of Automation Price Flats

6.1 Basic Standards

Automation price First-Class Mail must be prepared under [6.0](#) and meet the eligibility standards for the price claimed; trays must bear the appropriate barcoded container labels under [708.6.0, *Barcoding Standards for Container Labels*](#). Flat-size pieces must be prepared in flat trays.

6.2 Mailings

6.2.1 Automation Price Pieces

All pieces in a mailing must be sorted together to the finest extent required. First-Class Mail mailings may include pieces prepared at automation 5-digit, 3-digit, ADC, and mixed ADC prices. The definitions of a mailing and permissible combinations are in [1.2](#).

6.2.2 Single-Piece Price Pieces

Regardless of the method of postage payment, pieces of single-piece price First-Class Mail may be presented with and reported on the same postage price statement as pieces claimed at automation or presort prices if the single-piece price pieces are physically separated from other pieces; bear no price marking, or are marked only "First-Class," or (if not affixed with full single-piece price postage) are marked "Single-Piece" or "SNGLP" under [202.3.0, *Placement and Content of Mail Markings*](#), in addition to any other marking; and either have additional postage affixed to yield the correct amount on each piece or (if prepared with a corrective price marking) have all additional postage paid at the time of mailing.

6.3 Marking

All automation price pieces must be marked under [302](#). Pieces claimed at an automation price must bear the appropriate class marking. Pieces not claimed at an automation price must not bear "AUTO" unless single-piece price postage is affixed or a corrective single-piece price marking ("single-piece" or "SNGLP") is applied.

6.4 General Preparation

Except for First-Class Mail prepared under [6.6, *First-Class Mail Optional Tray-Based Preparation*](#), all pieces must be prepared in bundles. Bundles may contain fewer pieces than the bundle minimum, depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Price eligibility is not affected when a physical bundle contains fewer pieces than the minimum bundle size for the above reasons.

6.5 First-Class Mail Required Bundle-Based Preparation

6.5.1 Bundling and Labeling

[7-3-08] Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (optional, as described in [6.7](#)); 10-piece minimum; red Label 5 SCH or optional endorsement line (OEL).
- b. 5-digit (optional, but required for 5-digit price eligibility); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- c. 3-digit (required); 10-piece minimum; green Label 3 or OEL.

- d. ADC (required); 10-piece minimum; pink Label A or OEL.
- e. Mixed ADC (required); no minimum; tan Label X or OEL.

6.5.2 Traying and Labeling

Preparation sequence, tray size, and labeling:

- a. 5-digit (optional, but required for 5-digit price eligibility); full trays (no overflow); labeling:
 - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [708.6.0, *Barcoding Standards for Container Labels*](#), for overseas military mail).
 - 2. Line 2: "FCM FLTS 5D BC."
- b. 3-digit (required); full trays (no overflow); labeling:
 - 1. Line 1: [L002](#), Column A.
 - 2. Line 2: "FCM FLTS 3D BC."
- c. Origin 3-digit(s) (required); no minimum; labeling:
 - 1. Line 1: [L002](#), Column A.
 - 2. Line 2: "FCM FLTS 3D BC."
- d. ADC (required); full trays (no overflow); labeling:
 - 1. Line 1: [L004](#), Column B.
 - 2. Line 2: "FCM FLTS ADC BC."
- e. Mixed ADC (required); no minimum; labeling:
 - 1. Line 1: Use [L201](#); for mail originating in ZIP Code areas in Column A, use "MXD" followed by city, state, and 3-digit ZIP Code prefix in Column C. (Use "MXD" instead of "OMX" in the destination line and ignore Column B).
 - 2. Line 2: "FCM FLTS BC WKG."

6.6 First-Class Mail Optional Tray-Based Preparation

Tray size, preparation sequence, and Line 1 labeling:

- a. 5-digit: optional, but 5-digit trays required for price eligibility (90-piece minimum); one less-than-full or overflow tray allowed; for Line 1, use city, state, and 5-digit ZIP Code destination of pieces (for military mail see [4.3c](#)). (Preparation to qualify for 5-digit price is optional and need not be done for all 5-digit destinations.)
- b. 3-digit: required (90-piece minimum); one less-than-full or overflow tray allowed; for Line 1, use [L002](#), Column A for 3-digit destinations.
- c. Origin 3-digit: required for each 3-digit ZIP Code served by the SCF of the origin (verification) office; no minimum; for Line 1, use [L002](#), Column A for 3-digit destinations.
- d. ADC: required (90-piece minimum); one less-than-full or overflow tray allowed; group pieces by 3-digit ZIP Code prefix; for Line 1, use [L004](#) (ZIP Code prefixes in Column A must be combined and labeled to the corresponding ADC

335.6.7

destination shown in Column B). As an exception, pieces do *not* have to be grouped by 3-digit ZIP Code prefix in ADC trays if the mailing is prepared using a MLOCR/barcode sorter and standardized documentation is submitted.

- e. Mixed ADC (required); no minimum for price eligibility. Group pieces by ADC. For Line 1 use [L201](#); for mail originating in ZIP Code areas in Column A, use “MXD” followed by city, state, and 3-digit ZIP Code prefix in Column C (use “MXD” instead of “OMX” in the destination line and ignore Column B). Mailers using a MLOCR/barcode sorter and submitting standardized documentation need not group pieces by ADC.

6.7 5-Digit Scheme Bundle Preparation

Pieces meeting the automation-compatibility criteria in [301.3.0, *Physical Standards for Automation Flats*](#), may be prepared in 5-digit scheme bundles for those 5-digit ZIP Code combinations identified in [L007](#). These bundles must meet the additional standards in [1.4e, *Preparation Definitions and Instructions*](#).

6.8 Cotraying and Cobundling With Presorted Price Mail

Except for mailings prepared under the tray-based preparation option in [6.6](#), if the mailing job contains an automation price mailing and a Presorted price mailing and both mailings are reported on the same postage statement, then the mailing job must be prepared under the cotraying standards in [705.9.0](#). Automation price pieces may be cobundled with Presorted price pieces under the standards in [705.11.0](#).

336 Enter and Deposit

Overview

- [1.0 Deposit](#)
- [2.0 Verification](#)

1.0 Deposit

1.1 Service Objectives

All First-Class Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information.

1.2 Time and Location of Deposit

First-Class Mail paid at the Presorted price or at any automation price must be deposited at locations and times designated by the postmaster. Metered mail must be deposited in locations under the jurisdiction of the licensing Post Office except as permitted in [604.4.5.3](#). Permit imprint mail must be deposited under [604.5.0](#) and [705, *Advanced Preparation and Special Postage Payment Systems*](#).

1.3 Approved Collections

The USPS may collect Presorted First-Class Mail and automation price First-Class Mail at a mailer's facility if part of an approved collection service for other classes of mail; space is available on the transportation required for those classes; and:

- a. Acceptance and verification are done at the customer's facility; or
- b. Postage is paid with permit imprint under an optional procedure; or
- c. Postage is paid with meter or precanceled stamps.

1.4 Permit Imprint Collection

The USPS does not collect presort mailings from a customer's facility if paid with a permit imprint and not covered by optional procedures.

2.0 Verification

2.1 USPS Verification and Mailer Correction

Mailings are subject to USPS procedures to verify correct preparation and postage payment. The mailer is responsible for correcting irregularities found in the mailing. If, at the acceptance unit, a mailing is found not to qualify for a Presorted First-Class Mail price or an automation First-Class Mail price, the mailer must either take corrective action or pay the full single-piece price. The return of such mailings to the mailer's facility for any reworking is the mailer's responsibility.

2.2 Timeframe for Corrective Action

If a mailer corrects the presort or preparation problems in a metered or precanceled stamped mailing that caused its disqualification when originally presented for acceptance, but cannot resubmit that mailing on the same day, the date shown in

336.2.3

the meter or mailer's precancel postmark must be corrected. The mailer may either re-envelope each piece and reapply postage and request a postage refund or apply a legible ".00" meter impression that includes the correct mailing date.

2.3 Payment at Single-Piece Price Rather than Correcting Errors

A mailer who pays the single-piece First-Class Mail price rather than correcting errors in a mailing paid with meter or precanceled stamps must pay the difference in cash at the window and present the copy of the cash receipt to the acceptance point before the mail may be released for processing. A mailer who makes the same choice for a mailing paid with a permit imprint must correct the postage statement presented with the mailing to show that postage is to be paid at the higher price.

343 Prices and Eligibility

Overview

- 1.0 Prices and Fees for Standard Mail
- 2.0 Content Standards for Standard Mail Flats
- 3.0 Basic Standards for Standard Mail Flats
- 4.0 Price Eligibility for Standard Mail
- 5.0 Additional Eligibility Standards for Nonautomation Standard Mail Flats
- 6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Flats
- 7.0 Additional Eligibility Standards for Automation Price Standard Mail Flats

1.0 Prices and Fees for Standard Mail

1.1 Price Application

Postage is based on the price that applies to the weight (postage) increment of each addressed piece.

1.2 Standard Mail Price Application

Standard Mail prices are based on the weight of the pieces as follows:

- a. The appropriate minimum per piece price applies to any Standard Mail piece that weighs 3.3 ounces (0.2063 pound) or less.
- b. A price determined by adding the per piece charge and the corresponding per pound charge applies to any Standard Mail piece that weighs more than 3.3 ounces.

343.1.3

1.3 Regular Standard Mail—Presorted, Enhanced Carrier Route, and Automation Prices

	Entry Discount	Enhanced Carrier Route (ECR) ¹			Automation ¹				Nonautomation ¹

2. For ECR flats with a detached address label, add \$0.017 per piece.
3. For pieces weighing more than 3.3 ounces, each piece is subject to both a per piece price and a per pound price. Multiply the number of pieces in the mailing by per piece price. Multiply the number of pounds of the mailing by per pound price. Add both totals.

1.5 Fees

1.5.1 Presort Mailing Fee

Mailing fee, per 12-month period: \$180.00.

1.5.2 Weighted Fee

For return of pieces bearing the ancillary service markings “Address Service Requested” and “Forwarding Service Requested.”

WEIGHTED FEE	
Single Piece Weight Not Over (ounces)	Weighted Fee per Piece¹
1	\$2.06
2	2.48
3	2.90
4	3.32
5	3.74
6	4.16
7	4.58
8	5.00
9	5.42
10	5.84
11	6.26
12	6.68
13	7.10
Over 13 but under 16	11.87

1. Weighted fee equals single-piece First-Class Mail or Priority Mail price multiplied by 2.472.

1.6 Computing Postage – Standard Mail

1.6.1 Weight

To compute the total weight of the addressed pieces in a mailing or mailing segment for:

- a. Identical-weight pieces, multiply the computed average weight of a single piece by the corresponding number of pieces; do not round the product.
- b. Nonidentical-weight pieces, add the actual weight of the individual pieces or weigh the entire mailing in bulk; do not round either result.

1.6.2 Determining Single-Piece Weight

To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. To determine single-piece weight in a mailing of nonidentical-weight pieces, weigh each piece individually. Express all single-piece weights in decimal pounds, rounded off to four decimal places.

1.6.3 Net Postage

Postage is computed at the applicable prices on the entire mailing to be mailed at one time. The net postage price is either the applicable minimum per piece price or the piece/pound price, as adjusted for any discounts and surcharges.

1.6.4 Per Piece and Per Pound Charges

The per piece charge is computed based on the total number of addressed pieces for each price category claimed. The minimum price may apply to each piece as detailed in [1.2, Standard Mail Price Application](#). Otherwise, the per piece charge must be added to the per pound charge to determine total postage. Where applicable, the per pound charge is computed based on the total weight of the addressed pieces for each price category claimed, and is added to the per piece charge to determine total postage. For example, a quantity of pieces weighing 100.25 pounds is charged 100.25 times the applicable price per pound, based on the price claimed, plus one unit of the applicable per piece charge for each addressed piece.

1.6.5 Computing Affixed Postage

To compute postage to be affixed to each piece, multiply the weight of the piece (in pounds) by the applicable price per pound; add the applicable per piece charge and any surcharge; and round the sum up to the next tenth of a cent. The applicable minimum per piece charge must be affixed if it is more than the total computed per piece postage.

1.6.6 Permit Imprint

In any permit imprint mailing:

- a. For each price or price category, multiply the number of addressed pieces by the corresponding price per piece and (if applicable) multiply the *unrounded* total weight of the pieces by the corresponding price per pound; round off each product to four decimal places.
- b. Add the per piece and per pound charges and round off the total postage to the nearest whole cent.

2.0 Content Standards for Standard Mail Flats

2.1 Definition and Weight

Standard Mail consists of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (unless permitted or required by standard) and that weighs less than 16 ounces. Standard Mail includes matter formerly classified as Standard Mail (A) and third-class mail.

2.2 Personal Information

Personal information may not be included in a Standard Mail mailpiece unless all of the following conditions are met:

- a. The mailpiece contains explicit advertising for a product or service for sale or lease or an explicit solicitation for a donation.
- b. All of the personal information is directly related to the advertising or solicitation.

- c. The exclusive reason for inclusion of all of the personal information is to support the advertising or solicitation in the mailpiece.

2.3 Bills and Statements of Account

Mail containing bills or statements of account as defined in [333.2.2](#) may not be entered as Standard Mail except under the conditions described in [2.5.2](#).

2.4 Handwritten and Typewritten Matter

Mail containing handwritten or typewritten matter may not be entered as Standard Mail except under the conditions described in [2.6](#).

2.5 Attachments and Enclosures

2.5.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Standard Mail piece or in an envelope marked “Invoice Enclosed” and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

2.5.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to Standard Mail merchandise (including books but excluding merchandise samples) without payment of First-Class Mail postage. Incidental First-Class Mail matter may not be enclosed in or attached to matter mailed as Customized MarketMail under [705.1.0](#). An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared not to encumber postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Standard Mail or Package Services price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

2.5.3 Nonincidental First-Class Mail Enclosures

Letters or other pieces of nonincidental First-Class Mail, subject to postage at First-Class Mail prices, may be enclosed with Standard Mail pieces (except matter mailed as Customized MarketMail under [705.1.0](#)). Postage for the First-Class Mail enclosure must be placed on the outside of the piece. It may be affixed separately or added to the postage for the host piece. The endorsement “First-Class Mail Enclosed” must be placed on the piece, below the postage and above the address.

2.5.4 Nonincidental First-Class Mail Attachments

Letters or other pieces of nonincidental First-Class Mail may be placed in an envelope and securely attached to the address side of a Standard Mail piece (except matter mailed as Customized MarketMail under [705.1.0](#)), or of the principal piece, as applicable. Combination envelopes or containers with separate parts for the two classes of mail may be used. The names and addresses of the sender and addressee must be placed on both the principal piece and the attachment. Alternatively, the sender's name and address must be placed on one part and the addressee's name and address on the other. If the piece is a combination container with inseparable parts or compartments, the names and addresses may appear on only one part. The applicable Standard Mail postage for the Standard Mail matter must be prepaid and placed in the upper right corner of the address space. Postage at the applicable First-Class Mail price must be paid for and affixed to the First-Class Mail attachment, unless other payment methods are permitted by standard.

2.5.5 Attachment of Other Standard Mail Matter

Standard Mail pieces may bear an attachment that is eligible as Standard Mail matter if these additional conditions are met:

- a. The piece bearing the attachment is claimed as Customized MarketMail (CMM) under [705.1.0](#) or as Enhanced Carrier Route Standard Mail under [6.0](#).
- b. The face of the attachment may bear only the price markings and endorsements permitted for the price claimed for the host piece.
- c. At the time of mailing, the piece shows only one complete delivery address. If the attachment is a reply card, the address for returning the piece is not visible.
- d. Enhanced Carrier Route host pieces are larger than 6 by 11 inches. CMM host pieces are any size permitted under [705.1.1.3, Physical Standards](#).
- e. The attachment is not larger than the host piece and does not extend beyond the host piece. An attachment affixed to a CMM piece may not be greater than 1/4 inch thick at its thickest point.
- f. Each piece in the mailing bears the attachment, and the attachment is of identical size, weight, and positioning on the host piece. Different wording or designs may be used.
- g. The attachment does not interfere with processing or delivery. Folded or multipage attachments must be secured to prevent opening during handling.

2.6 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."

- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

3.0 Basic Standards for Standard Mail Flats

3.1 Description of Service

3.1.1 Service Objectives

Standard Mail may receive deferred handling. Service objectives for delivery are 2 to 9 days; however, delivery time is not guaranteed.

3.1.2 Minimum Quantity

Standard Mail provides economical prices for mailings of 200 or more pieces or 50 or more pounds of mail.

3.2 Defining Characteristics

3.2.1 Weight, Shape, Flexibility, and Uniform Thickness

All Standard Mail pieces must weigh less than 16 ounces. Flat-size pieces that do not meet the standards in [301.1.3](#) through [301.1.4](#) must be prepared as parcels or Not Flat-Machinable pieces and pay parcel or Not Flat-Machinable prices (see [401](#)).

3.2.2 Preparation Requirements

Standard Mail is subject to specific volume, marking, and preparation requirements.

3.2.3 Inspection of Contents

Standard Mail is not sealed against postal inspection.

3.2.4 Forwarding Service

The price of Standard Mail typically does not include forwarding service. Forwarding service is available under [507.1.5](#).

3.2.5 Return Service

The price of Standard Mail does not include return service. Return service is available under [507.1.5](#) for an additional fee.

3.2.6 Extra Services

Extra services available with Standard Mail are insured mail service (bulk insurance only), certificate of mailing service (bulk certificate of mailing only), return receipt for merchandise service, and Delivery Confirmation service (parcels only). See information regarding extra services in [503](#).

3.2.7 Periodicals

Authorized Periodicals may not be entered as Standard Mail unless permitted by standard.

3.2.8 Identical Pieces

The contents of printed matter in a Standard Mail mailing must be identical to a piece sent to at least one other addressee. Standard Mail may include the addressee's name and address but may not transmit personal information except as permitted under [2.2](#).

3.3 Additional Basic Standards for Standard Mail

Each Standard Mail mailing is subject to these general standards:

- a. All pieces in a mailing must be of the same processing category.
- b. Each mailing must contain at least 200 pieces or 50 pounds of pieces. See [3.6](#), [Residual Volume Requirement](#), for volume requirement eligibility unique to Presorted Standard price mailings. Other volume standards also can apply, based on the price claimed.
- c. All pieces in an automation mailing must be eligible for an automation price. Separate automation and Presorted price mailings of flats that are reported on the same postage statement must be cosacked under [705.9.0](#), [Combining Bundles of Automation and Nonautomation Flats in Trays and Sacks](#). Separate automation, Presorted, and Enhanced Carrier Route mailings of flats may be co-containerized under [705](#).
- d. All pieces in a mailing must be sorted together and marked under the standards for the price claimed.
- e. Each piece must bear the addressee's name and delivery address, including the correct ZIP Code or ZIP+4 code, unless an alternative addressing format is used subject to [602.3.0](#), [Use of Alternative Addressing](#). Detached address labels may be used subject to [602.4.0](#), [Detached Address Labels \(DALs\)](#).
- f. Postage must be paid under [344.1.0](#) through [344.3.0](#) in [Postage Payment and Documentation](#) with precanceled stamps, meter stamps, or permit imprint.
- g. A postage statement, completed and signed by the mailer, using the correct USPS form or an approved facsimile, must be submitted with each mailing. In addition, mailings must be documented under [344.4.2](#) and the standards for the price claimed.
- h. Each piece must meet the standards for any other price or discount claimed.
- i. Any POSTNET barcode on a mailpiece must be correct for the delivery address and meet the standards in [302.4.0](#), [Barcode Placement](#), [708.4.0](#), [Standards for POSTNET and Intelligent Mail Barcodes](#), and [708.3.0](#), [Coding Accuracy Support System \(CASS\)](#).

- j. Mailings must be deposited at a business mail entry unit of the Post Office where the postage permit or license is held and the annual mailing fee paid, unless deposit elsewhere is permitted by standard.

3.4 Presort Mailing Fees

An annual mailing fee must be paid once each 12-month period at each Post Office of mailing. A mailer paying this fee may enter clients' mail as well as the mailer's own. The mailer whose permit imprint appears on pieces in a mailing paid with a permit imprint must show that permit number on the postage statement and must pay the annual mailing fee for that permit; this fee is in addition to the one-time fee for an application to use permit imprints. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

3.5 Merging Similar Standard Mailings

Mailings are subject to the general definitions and conditions in [345.1.0, General Information for Mail Preparation](#). Generally, mailers may merge similar Standard Mail matter into a single mailing. Differences in text, address labels, and address lists or list key numbers do not prohibit the mailer from merging and sorting pieces together. Pieces with different methods of postage payment may be combined in the same mailing only if authorized by Business Mailer Support (BMS). Pieces of nonidentical weight, if merged in the same mailing, must bear the correct postage when mailed, unless otherwise authorized by BMS.

3.6 Residual Volume Requirement

Pieces in an Enhanced Carrier Route price mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted price mailing, provided that the Enhanced Carrier Route price mailing and the Presorted price mailing are part of the same mailing job. Likewise, pieces in an automation price mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted price mailing, provided that the automation price mailing and the Presorted mailing are part of the same mailing job. Pieces mailed at Presorted Standard Mail prices must not be counted toward the minimum volume requirements for an Enhanced Carrier Route price or an automation price mailing.

3.7 Residual Mail Subject to First-Class Mail or Priority Mail Prices

Pieces prepared as Standard Mail (i.e., that bear Standard Mail price markings, ACS codes, etc.) that do not qualify for Enhanced Carrier Route, automation, or Presorted Standard Mail prices are subject to the single-piece First-Class Mail or Priority Mail prices as applicable for the weight of the mailpiece. Metered pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail prices and any pieces that do not qualify for Standard Mail prices for which First-Class Mail or Priority Mail service is desired must be re-enveloped or otherwise prepared so that they do not bear Standard Mail markings, endorsements, and ACS codes and must bear the proper First-Class Mail or Priority Mail price markings and ACS codes. Mailers who have pieces (other than metered pieces weighing over 13 ounces but less than 16 ounces) that do not qualify for Standard Mail prices but that are prepared as Standard Mail and who do not desire

to receive First-Class Mail or Priority Mail service for those pieces may enter their mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), provided the requirements in [344.1.0, *Basic Standards for Postage Payment*](#), are met.

3.8 ZIP Code Accuracy

3.8.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain prices under [3.8.1d, *Basic Standards*](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.8.2, *USPS-Approved Methods*](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Standard Mail prices, regardless of any required surcharges, must meet the ZIP Code accuracy standard.

3.8.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer’s computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
 1. Surveys of addressees on mailer’s address list inquiring about the accuracy of ZIP Code information.
 2. Any mailing list service in [507.7.0](#).
 3. An authorized service provider.
 4. CASS-certified matching software.
 5. USPS Web site www.usps.com.

3.8.3 Mailer Certification

The mailer’s signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

4.0 Price Eligibility for Standard Mail

4.1 General Information

All Standard Mail prices are presorted prices (including all nonprofit prices). These prices apply to mailings meeting the basic standards in 2.0 through 4.0 and the corresponding standards for Presorted prices under 3.0 and 5.0, Enhanced Carrier Route prices under 6.0, automation prices under 7.0, or Customized MarketMail prices under 705.1.0. Except for Customized MarketMail pieces, destination entry discount prices are available under 346.2.0 through 346.5.0. Nonprofit prices may be used only by organizations authorized by the USPS. Not all processing categories qualify for every price. Pieces are subject to either a single minimum per piece price or a combined piece/pound price, depending on the weight of the individual pieces in the mailing.

4.2 Minimum Per Piece Prices

The minimum per piece prices (the minimum postage that must be paid for each piece) apply as follows:

- a. Basic Requirement. Pieces mailed at Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route prices are subject to minimum per piece prices when they weigh no more than 3.3 ounces (0.2063 pound).
- b. In applying the minimum per piece prices, a mailpiece is categorized as a letter based on whether the piece meets the letter-size standard in 201.1.0, without regard to placement of the address on the piece, except under these conditions:
 1. If the piece meets both the definition of a letter in 201.1.1.1 and the definition of an automation flat in 301.3.0, the piece may be prepared and entered at an automation flat price.
 2. Pieces mailed as Customized *MarketMail* under 705.1.0 must pay Regular or Nonprofit Standard Mail 5-digit nonentry prices for Not Flat-Machinable pieces and must not exceed 3.3 ounces.
- c. Individual prices. There are separate minimum per piece prices for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing. Except for Customized MarketMail pieces, discounted per piece prices also may be claimed for destination entry mailings (destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU)) under 346. DDU prices are available only for mail entered at Enhanced Carrier Route or Nonprofit Enhanced Carrier Route prices. See 1.0 for individual per piece prices.

4.3 Piece/Pound Prices

Pieces that exceed 3.3 ounces (0.2063 pound) are subject to a two-part piece/pound price that includes a fixed charge per piece and a variable pound charge based on weight. Pieces exceeding 3.3 ounces may not be mailed as Customized MarketMail. There are separate per piece prices for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each

mailing. There are separate per pound prices for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route). Discounted per pound prices also may be claimed for destination entry mailings (destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU)) under [346](#).

4.4 **Shape, Flexibility, and Uniform Thickness**

Flat-size pieces that do not meet the standards in [301.1.3](#) through [301.1.4](#) must be prepared as parcels or Not Flat-Machinable pieces and pay parcel or Not Flat-Machinable prices (see [401](#)).

5.0 Additional Eligibility Standards for Nonautomation Standard Mail Flats

5.1 **Basic Standards**

All pieces in a Regular Standard Mail or Nonprofit Standard Mail Presorted price mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0](#) in *Prices and Eligibility*.
- b. Except as provided in [3.6](#), *Residual Volume Requirement*, be part of a single mailing of at least 200 addressed pieces or 50 pounds of pieces qualifying for Presorted Standard Mail. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
 1. The ZIP Code accuracy standard in [3.8](#).
 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- d. Be marked, sorted, and documented as specified in [345](#), *Mail Preparation*, or [705](#), *Advanced Preparation and Special Postage Payment Systems*.

5.2 **Price Application**

Presorted prices for Regular and Nonprofit Standard Mail apply to flats that meet the eligibility standards in [2.0](#) through [4.0](#) and the preparation standards in [705](#), *Advanced Preparation and Special Postage Payment Systems*.

5.3 **5-Digit Prices for Flats**

The 5-digit price applies to flat-size pieces:

- a. In a 5-digit/scheme bundle of 10 or more pieces, or 15 or more pieces, as applicable; properly placed in a 5-digit/scheme sack containing at least 125 pieces or 15 pounds of pieces.
- b. When palletized under [705.8.0](#) and [705.10.0](#) through [705.13.0](#), in a 5-digit/scheme bundle of 10 or more pieces, or 15 or more pieces, as applicable.

- c. In a 5-digit bundle of 10 or more pieces, or 15 or more pieces, as applicable; properly placed in a merged 5-digit/scheme or 5-digit sack under [705.10.0](#).

5.4 **3-Digit Prices for Flats**

The 3-digit price applies to flat-size pieces:

- a. In a 5-digit/scheme bundle of 10 or more pieces, or 15 or more pieces, as applicable, or in a 3-digit/scheme bundle of 10 or more pieces; properly placed in a 3-digit sack of at least 125 pieces or 15 pounds of pieces.
- b. When palletized under [705.8.0](#) and [705.10.0](#) through [705.13.0](#), in a 3-digit/scheme bundle of 10 or more pieces.

5.5 **ADC Prices for Flats**

ADC prices apply to flat-size pieces:

- a. In a 5-digit/scheme, 3-digit/scheme, or ADC bundle of 10 or more pieces properly placed in an ADC sack of at least 125 pieces or 15 pounds of pieces.
- b. In an optional 3-digit/scheme origin/entry sack.
- c. When palletized under [705.8.0](#) and [705.10.0](#) through [705.13.0](#), in an ADC bundle of 10 or more pieces; properly placed on an ADC pallet.

5.6 **Mixed ADC Prices for Flats**

Mixed ADC prices apply to flat-size pieces in bundles that do not qualify for 5-digit, 3-digit, or ADC prices; placed in mixed ADC sacks or on ASF, BMC, or mixed BMC pallets under [705.8.0](#).

6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Flats

6.1 **General Enhanced Carrier Route Standards**

6.1.1 **Optional Preparation**

Preparation to qualify for any Enhanced Carrier Route price is optional and need not be performed for all carrier routes in a 5-digit area. An Enhanced Carrier Route mailing may include pieces at basic, high density, and saturation Enhanced Carrier Route prices.

6.1.2 **Basic Eligibility Standards**

All pieces in an Enhanced Carrier Route or Nonprofit Enhanced Carrier Route Standard Mail mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0 in Prices and Eligibility](#).
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of Enhanced Carrier Route Standard Mail. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Be sorted to carrier routes, marked, and documented under [345.6.0, Preparing Enhanced Carrier Route Flats](#), or [705.8.0, Preparing Pallets](#).

- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
 1. The carrier route accuracy standard in [6.2](#).
 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
 3. If flat-size pieces are prepared with detached address labels, the additional standards in [602.4.0](#).
- e. Meet the applicable sequencing requirements in [6.3](#) through [6.5](#) in *Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Flats* and in [345.6.9](#), *Delivery Sequence Standards*, and [345.6.10](#), *Delivery Sequence Documentation*.
- f. Meet the applicable documentation and postage payment standards in [344](#), *Postage Payment and Documentation*, and [1.6](#), *Computing Postage — Standard Mail*.
- g. Enhanced Carrier Route price mail may not be more than 12 inches high, 15 inches long, or 3/4-inch thick. *Exception:* Merchandise samples with detached address labels (DALs) may exceed these dimensions if the labels meet the standards in [602.4.0](#).

6.2 Carrier Route Code Accuracy

6.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming certain prices under [6.2.1d](#) that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [6.2.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and price is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Standard Mail Enhanced Carrier Route prices, regardless of any required surcharge, must meet the carrier route accuracy standard.

6.2.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0](#), *Address Information*

System Products, and [708.3.0, Coding Accuracy Support System \(CASS\)](#). Printed Carrier Route Files (schemes) may be used for Standard Mail Enhanced Carrier Route flat-size mail at basic, high density, and saturation prices.

6.2.3 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

6.3 Basic Price Enhanced Carrier Route Standards

6.3.1 Sequencing

All pieces mailed at basic prices must be prepared in walk sequence or in line-of-travel (LOT) sequence according to LOT schemes prescribed by the USPS (see [345.6.9, Delivery Sequence Standards](#), and [345.6.10, Delivery Sequence Documentation](#)).

6.3.2 Basic Price Eligibility

Basic prices apply to each piece in a carrier route bundle of 10 or more pieces that is:

- a. Palletized under [705.8.0, Preparing Pallets](#), [705.10.0, Merging Bundles of Flats in Sacks and Pallets Using the City State Product](#), [705.12.0, Merging Bundles of Flats on Pallets Using a 5% Threshold](#), or [705.13.0, Merging Bundles of Flats on Pallets Using the City State Product and a 5% Threshold](#).
- b. Placed in a carrier route sack containing at least 125 pieces or 15 pounds of pieces.
- c. Placed in a merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, or 5-digit carrier routes sack.
- d. Entered at a destination delivery unit as unsacked bundles, according to preparation standards in [345.2.0](#) and entry standards in [346.5.0](#).

6.4 High Density Enhanced Carrier Route Standards

6.4.1 Basic Eligibility Standards for High Density Prices

All pieces mailed at high density prices must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [345.6.9](#)).
- b. Meet the density requirement of at least 125 pieces for each carrier route. Multiple pieces per delivery address can count toward this density standard.

6.4.2 High Density Prices for Flats

High density prices apply to each piece in a carrier route bundle of 10 or more pieces that is:

- a. Palletized under [705.8.0, Preparing Pallets](#), [705.10.0, Merging Bundles of Flats in Sacks and Pallets Using the City State Product](#), [705.12.0, Merging Bundles of Flats on Pallets Using a 5% Threshold](#), or [705.13.0, Merging Bundles of Flats on Pallets Using the City State Product and a 5% Threshold](#).

343.6.5

- b. Placed in a carrier route sack containing at least 125 pieces or 15 pounds of pieces.
- c. Placed in a merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, or 5-digit carrier routes sack.

6.5 Saturation Enhanced Carrier Route Standards

6.5.1 Basic Eligibility Standards for Saturation Prices

All pieces mailed at saturation prices must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [345.6.9](#)).
- b. Meet the density requirement of at least 90% or more of the active residential addresses or 75% or more of the total number of active possible delivery addresses on each carrier route receiving this mail. Pieces bearing a simplified address must meet the coverage standards in [602.3.0, Use of Alternative Addressing](#). Multiple pieces per delivery address do not count toward this density standard.

6.5.2 Saturation Prices for Flats

Saturation prices apply to each piece in a carrier route bundle of 10 or more pieces that is:

- a. Palletized under [705.8.0, Preparing Pallets](#), [705.10.0, Merging Bundles of Flats in Sacks and Pallets Using the City State Product](#), [705.12.0, Merging Bundles of Flats on Pallets Using a 5% Threshold](#), or [705.13.0, Merging Bundles of Flats on Pallets Using the City State Product and a 5% Threshold](#).
- b. Placed in a carrier route sack containing at least 125 pieces or 15 pounds of pieces.
- c. Placed in a merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, or 5-digit carrier routes sack.

7.0 Additional Eligibility Standards for Automation Price Standard Mail Flats

7.1 Basic Eligibility Standards for Automation Price Standard Mail

All pieces in a Regular Standard Mail or Nonprofit Standard Mail automation price mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0 in Prices and Eligibility](#).
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of automation price Standard Mail (Regular and Nonprofit mailings must meet separate minimum volumes).
- c. Be in the same processing category and meet the physical standards in [301.3.0](#).

- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
 1. The address matching and coding standards in [7.3, Address Standards for Barcoded Pieces](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).
 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Bear an accurate ZIP+4 or delivery point barcode, or Intelligent Mail barcode with a ZIP+4 or delivery point routing code, meeting the standards in [302.4.0, Barcode Placement](#), and [708.4.0, Standards for POSTNET and Intelligent Mail Barcodes](#), either on the piece or on an insert showing through a window.
- f. Be marked, sorted and documented as specified in [345.7.0](#), and [705.8.0](#) through [705.13.0](#).
- g. Meet the applicable documentation and postage payment standards in [344](#).

7.2 Price Application

Automation prices apply to each piece properly sorted into qualifying groups:

- a. The 5-digit price applies to flat-size pieces in a 5-digit/scheme bundle of 10 or more pieces, or 15 or more pieces, as applicable.
- b. The 3-digit price applies to flat-size pieces in a 3-digit/scheme bundle of 10 or more pieces.
- c. The ADC price applies to flat-size pieces in an ADC bundle of 10 or more pieces.
- d. The mixed ADC price applies to flat-size pieces in mixed ADC bundles (no minimum).

7.3 Address Standards for Barcoded Pieces

7.3.1 Basic Address Standards for Barcodes

To qualify for automation prices, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode that appears on a mailpiece claimed at an automation price must be the correct barcode for the corresponding delivery address on the piece.

7.3.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits.

7.3.3 Numeric Delivery Point Barcode (DPBC)

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [708.4.2](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code.

7.3.4 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product.

7.3.5 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used.

7.3.6 Secondary Designator

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used.

7.3.7 Rural and Highway Contract Routes

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line.

7.3.8 Post Office Box

A Post Office box address must contain a Post Office box number that can be exactly matched with the USPS ZIP+4 Product in effect.

7.4 Enclosed Reply Cards and Envelopes

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures in automation Regular or Nonprofit Standard Mail, and addressed for return to a domestic delivery address, must meet the standards in [201.3.0, Physical Standards for Automation Letters and Cards](#), for enclosed reply cards and envelopes. The mailer's signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS.

344 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Postage Payment for Presorted and Enhanced Carrier Route Flats](#)
- [3.0 Postage Payment for Automation Flats](#)
- [4.0 Mailing Documentation](#)
- [5.0 Residual Pieces](#)

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Postage for Standard Mail must be paid with meter (604.4.0), permit imprint (604.5.0), or precanceled stamps (604.3.0). Postage-affixed pieces must bear the correct postage unless excepted by standard. A permit imprint may be used for mailings that contain nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

2.0 Postage Payment for Presorted and Enhanced Carrier Route Flats

2.1 Identical-Weight Pieces

Mailings of identical-weight pieces may have postage affixed to each piece at the exact price for which the piece qualifies, or each piece in the mailing may have postage affixed at the lowest price applicable to pieces in the mailing or mailing job. Alternatively, a nondenominated precanceled stamp may be affixed to every piece in the mailing or mailing job, or each piece may bear a permit imprint. If exact postage is not affixed, all additional postage and surcharges must be paid at the time of mailing with an advance deposit account or with a meter strip affixed to the required postage statement. If exact postage is not affixed, documentation meeting the standards in 4.0 must be submitted to substantiate the additional postage unless the pieces are identical weight and separated by price when presented for acceptance.

2.2 Nonidentical-Weight Pieces

Postage for nonidentical-weight pieces subject to the minimum per piece prices may be paid by meter stamps, precanceled stamps, or precanceled stamped envelopes. Mailings of nonidentical-weight pieces subject to the piece/pound prices may have postage paid by permit imprint (if the mailer is authorized by Business Mailer Support) or by meter or precanceled stamps (if each piece has the full postage affixed). Alternatively, except for heavy automation and Enhanced Carrier Route letters, the mailer may affix the per piece price to each piece and pay the pound price for the mailing through an advance deposit account. Under this alternative, the mailer must provide a postage statement for each payment method and mark each piece "Pound Rate Pd via Permit," in the postage meter indicium or ad plate or other means that ensures a legible endorsement. For mailings of

nonidentical-weight pieces, “nonidentical” must be shown as the weight of a single piece on the applicable postage statement; other entries must be completed as directed.

2.3 Combined Price

Meter postage may be used for combined price mailings containing both pieces subject to pound prices and pieces subject to minimum per piece charges. Postage for such mailings may be paid with permit imprint only if authorized by Business Mailer Support.

3.0 Postage Payment for Automation Flats

3.1 All Pieces

Unless authorized by the USPS under [705.2.0](#) through [705.5.0](#) in *Advanced Preparation and Special Postage Payment Systems* and [705.15.0](#), *Plant-Verified Drop Shipment*, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing, and each piece must bear the correct postage at the price claimed based on its eligibility. For mailings of nonidentical-weight pieces subject to the piece/pound prices, the mailer may affix the applicable per piece price to each piece and pay the pound price for the mailing by a permit imprint advance deposit account. All pieces prepared this way in the same mailing must be subject to the same pound price. A postage statement must be submitted for each payment method and each piece must be marked “Pound Price Pd via Permit” in the postage meter indicium or ad plate or other means that ensures a legible endorsement. “Nonidentical” must be shown as the weight of a single piece on the postage statement.

3.2 Adding Additional Postage

In a metered or precanceled stamp mailing:

- a. Each piece must bear a precanceled stamp or meter postage in the exact postage or at the lowest price applicable to pieces in the mailing job. If exact postage is not affixed, all additional postage must be paid at the time of mailing through an advance deposit account or with a meter stamp affixed to the required postage statement.
- b. Documentation presented with the postage statement must show the computation of the additional postage due for pieces not bearing full postage at the applicable price (i.e., the difference between what the pieces bear and the correct postage at the price for which each qualifies).

3.3 Nondenominated Precanceled Stamps

A mailer may use nondenominated precanceled stamps if:

- a. Stamps are affixed to every piece in the mailing.
- b. Additional postage is paid at the time of mailing by advance deposit account or meter stamp affixed to the back of the accompanying postage statement.
- c. Documentation is presented with the postage statement as described in [3.2b](#).

3.4 Precanceled Stamps at Lower Denominations

A mailer may use precanceled stamps of a denomination less than the postage for the lowest price in the mailing if:

- a. The stamps do not bear an improper price marking.
- b. The same denomination of stamp is affixed to every piece in the mailing.
- c. Additional postage is paid at the time of mailing by advance deposit account or meter stamp affixed to the back of the accompanying postage statement.
- d. Documentation is presented with the postage statement as described in [3.2b](#).

3.5 Mixed Price Mailing Documentation

Where it is not practicable for the mailer to affix the exact postage to each piece or to affix the lowest postage price to all pieces in the mailing, the mailer may compute postage for the mailing as if the lowest price affixed to any piece in the mailing were affixed to all pieces. Additional postage is computed based on the difference between the lowest price affixed to any piece in the mailing and the price for each price level in the mailing. This computation must be documented to meet the basic standards in [4.0](#). No refund is paid for any piece where postage is affixed at a price higher than the lowest price claimed for or affixed to any piece. The total additional postage must be paid either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.

4.0 Mailing Documentation**4.1 Completing Postage Statements**

Any mailing claiming a commercial price, and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

4.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the preparation, price levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

4.3 Documentation Standards for Automation Mailings

A complete postage statement must accompany each mailing, supported by documentation produced by PAVE-certified (or MAC-certified) software or standardized documentation. Mailers may use a single postage statement and a single documentation report for all price levels in a single mailing. Documentation of postage is not required if the correct price is affixed to each piece or if each piece is of identical weight and the pieces are separated by price when presented for acceptance.

4.4 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

4.5 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

4.6 Standard Format for Documentation

Standard Mail documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and price claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation.

4.7 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#).

4.8 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

4.9 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. For example: Part A, lines A5, A6, and total – Part A from Form 3602-R, and Part F, lines F1, F2, and total – Part F from Form 3602-R, can be consolidated onto a single Form 3602 (Facsimile). Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage

statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

5.0 Residual Pieces

5.1 Residual Standard Mail Subject to First-Class Mail Prices

Mailers who have pieces weighing 13 ounces or less that do not qualify for Standard Mail prices but that are prepared as Standard Mail must pay single-piece First-Class Mail postage for such pieces. If mailers do not desire to receive First-Class Mail service for such pieces they may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.
- b. Mail bearing metered or precanceled stamp postage must pay the difference between the postage affixed at the Standard Mail prices and the single-piece First-Class Mail prices by means of an advance deposit account or by affixing a meter stamp for the appropriate amount to Form 3600-R. These pieces are reported in Part C on Form 3600-R under the heading “From Standard Mail mailing.”
- c. Mail bearing permit imprints must pay the appropriate single-piece First-Class Mail prices by completing Form 3600-R. These pieces are reported in Part C on Form 3600-R under the heading “From Standard Mail mailing.” For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job.

5.2 Residual Standard Mail Subject to Priority Mail Prices

Mailers who have permit imprint pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail prices but that are prepared as Standard Mail must pay Priority Mail postage for such pieces. Mailpieces paid with meters or permit imprints must re-envelope or otherwise prepare the pieces so that when mailed they bear only the appropriate Priority Mail markings, ancillary service endorsements, and ACS codes and do not bear Standard Mail markings, endorsements, or ACS codes. Mailpieces paid with permit imprints for which mailers do not desire to receive Priority Mail service may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.
- b. The appropriate Priority Mail prices must be paid by completing Part E of Form 3600-R on the line titled “Pieces From Standard Mail mailing” in the postage calculation section. For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job.

345 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks and Trays](#)
- [4.0 Sack and Tray Labels](#)
- [5.0 Preparing Nonautomation Flats](#)
- [6.0 Preparing Enhanced Carrier Route Flats](#)
- [7.0 Preparing Automation Price Flats](#)

1.0 General Information for Mail Preparation

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Under standards for bundle reallocation for Standard Mail flats on pallets (see [705.8.0](#)), mail will not necessarily be placed on the lowest (finest) level pallets (bundle reallocation is optional, but, if performed, must be done for the complete mailing job). Not all presort levels are applicable in all situations.

1.2 Definition of Mailings

Mailings are defined as:

- a. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Except as provided in [343.3.6, Residual Volume Requirement](#), the types of Standard Mail listed below may not be part of the same mailing.
 1. Automation Enhanced Carrier Route and any other type of mail.
 2. Automation price and any other type of mail.
 3. Enhanced Carrier Route and any other type of mail.
 4. Enhanced Carrier Route letter price pieces and Enhanced Carrier Route nonletter price pieces.
 5. Presorted price mail and any other type of mail.
 6. Machinable and nonmachinable pieces.

7. Except as provided by standard, Regular mail may not be in the same mailing as Nonprofit mail, and Enhanced Carrier Route mail may not be in the same mailing as Nonprofit Enhanced Carrier Route mail.
8. Customized MarketMail and any other type of mail.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, Post Office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *5-digit scheme (bundles and sacks) for flats meeting the automation-compatibility standards in 301.3.0*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in [L007](#).
- d. *5-digit scheme carrier routes (pallets and sacks) for Standard Mail flats*: the ZIP Code in the delivery address on all pieces in carrier route bundles is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in [L001](#).
- e. *Merged 5-digit sacks*: the carrier route bundles and/or automation price 5-digit bundles and/or Presorted price 5-digit bundles in a sack are all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route price bundles with automation price 5-digit bundles and Presorted price 5-digit bundles in the same 5-digit container.
- f. *Merged 5-digit pallet*: contains carrier route bundles and noncarrier route 5-digit bundles (automation price 5-digit bundles and/or presorted price 5-digit bundles).
- g. *Merged 5-digit scheme sack*: the 5-digit ZIP Codes on pieces in carrier route bundles and/or automation price 5-digit bundles and/or Presorted price 5-digit bundles in a sack are all for 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#), and the automation price 5-digit bundles and/or the Presorted price 5-digit bundles also are for 5-digit ZIP Codes that have an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route bundles with automation price 5-digit bundles and Presorted price 5-digit bundles in the same 5-digit container.
- h. *Merged 5-digit scheme pallet*: contains carrier route bundles and noncarrier route 5-digit bundles (automation price 5-digit bundles and/or presorted price 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#).
- i. *5-digit metro pallets for Standard Mail flats*: the 5-digit ZIP Codes on pieces in carrier route, automation price, and presorted price bundles are all destined for the same mail processing facility listed in [L006](#).
- j. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).

- k. *3-digit scheme bundles for flats meeting the automation-compatibility standards in 301.3.0*: the ZIP Code in the delivery address begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L008](#).
- l. *Origin/entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Separation is optional for each such 3-digit area.
- m. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- n. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- o. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- p. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- q. *Mixed ADC*: the pieces are for delivery in the service area of more than one ADC.
- r. *Residual pieces/bundles/sacks*: contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow preparation to a particular destination, and usually does not qualify for a presort price.

1.4 Preparation Definitions and Instructions

[7-3-08] For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces.
- b. A *full* letter tray is one in which faced, upright pieces fill the length of the tray between 85% and 100% full.
- c. A *less-than-full* letter tray is one that contains mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full trays may be prepared only if permitted by the standards for the price claimed.
- d. An *overflow* letter tray is a less-than-full tray that contains all pieces remaining after preparation of full trays for the same destination. Overflow trays may be prepared only if permitted by the standards for the price claimed.
- e. A *full* sack is defined in the standards for the class and price claimed.

- f. *A 5-digit scheme sort for flats meeting the automation-compatibility standards in 301.3.0 yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in L007 and 5-digit bundles for other ZIP Codes. When standards require 5-digit/scheme sort, mailers must prepare all possible 5-digit scheme bundles and sacks of flats, then prepare all possible 5-digit bundles and sacks. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. Bundles must be labeled using an optional endorsement line (OEL) under 708.7.0 or with a red “5 SCH” bundle label. Bundles are placed in appropriate containers using the OEL “label to” 5-digit ZIP Code or using L007 column B.*
- g. *A 5-digit scheme carrier routes sort for Enhanced Carrier Route price Standard Mail flats prepared in sacks or as bundles on pallets yields a 5-digit scheme carrier routes sack or pallet for those 5-digit ZIP Codes listed in L001 and 5-digit carrier routes sacks or pallets for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum sack or pallet volume, with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme carrier routes destination that contain carrier route bundles for only one of the schemed 5-digit areas are still considered to be sorted to 5-digit scheme carrier routes and are labeled accordingly. The 5-digit scheme carrier routes sort is required for carrier route bundles of Enhanced Carrier Route Standard Mail flats. Preparation of 5-digit scheme carrier routes sacks or pallets must be done for all 5-digit scheme destinations.*
- h. *A 5-digit scheme sort for Standard Mail flats prepared as bundles on pallets yields 5-digit scheme pallets containing automation price and nonautomation price 5-digit bundles for those 5-digit ZIP Codes listed in L001 and yields 5-digit pallets containing automation price and nonautomation price 5-digit bundles for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum pallet volume, with no further separation by 5-digit ZIP Code required. Pallets prepared for a 5-digit scheme destination that contain 5-digit bundles for only one of the schemed 5-digit areas are still considered to be sorted to the 5-digit scheme and are labeled accordingly. The 5-digit scheme sort is required for Standard Mail flats. The 5-digit scheme sort may not be used for other mail prepared on pallets, except for 5-digit bundles of Standard Mail irregular parcels that are part of a mailing job that is prepared in part as palletized flats at automation prices. Preparation of 5-digit scheme pallets must be done for all 5-digit scheme destinations.*
- i. *A merged 5-digit sort for Standard Mail flats prepared in sacks yields merged 5-digit sacks that contain carrier route bundles and/or automation price 5-digit bundles, and/or Presorted price 5-digit bundles that are all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route bundles, automation price 5-digit bundles, and Presorted price 5-digit bundles in the same 5-digit*

sack or pallet. The merged 5-digit sort is optional for Standard Mail flats prepared in sacks. Sacks prepared for a merged 5-digit destination that contain only a single price level of bundle(s) (only carrier route bundle(s) or only automation price 5-digit bundle(s) or only Presorted price 5-digit bundle(s)) or that contain only two price levels of bundle(s) are still considered to be merged 5-digit sorted and are labeled accordingly. If preparation of merged 5-digit sacks is performed, it must be done for all 5-digit ZIP Code destinations with an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route bundles, automation price 5-digit bundles, and Presorted price 5-digit bundles in the same 5-digit container.

- j. *A merged 5-digit sort for Standard Mail flats prepared as bundles on pallets yields merged 5-digit pallets that contain carrier route bundles and noncarrier route 5-digit bundles (automation price 5-digit bundles and/or Presorted price 5-digit bundles). The merged 5-digit sort is optional for Standard Mail flats prepared in sacks under 705.10.0. Sacks or pallets prepared for a merged 5-digit destination that contain only a single price level of bundle(s) (only carrier route bundle(s) or only automation price 5-digit bundle(s) or only Presorted price 5-digit bundle(s)) or only two price levels of bundle(s) are still considered to be merged 5-digit sorted and must be labeled accordingly.*
- k. *A merged 5-digit scheme sort for Standard Mail flats prepared in sacks under 705.10.0 yields merged 5-digit scheme sacks that contain carrier route bundles and noncarrier route 5-digit bundles (automation price 5-digit bundles and/or Presorted price 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in L001. Sacks prepared for a merged 5-digit scheme destination that contain only a single price level of bundle(s) (only carrier route bundle(s) or only automation price 5-digit bundle(s) or only presorted price 5-digit bundle(s)), or only two price levels of bundle(s), or bundles for only one of the schemed 5-digit ZIP Codes are still considered to be merged 5-digit scheme sorted and must be labeled accordingly. If preparation of merged 5-digit scheme sacks is performed, it must be done for all 5-digit scheme destinations in L001.*
- l. *A merged 5-digit scheme sort for Standard Mail flats prepared as bundles on pallets under 705.8.0, 705.10.0, 705.12.0, or 705.13.0 yields merged 5-digit scheme pallets that contain carrier route bundles and noncarrier route 5-digit bundles (automation price and/or Presorted price 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in L001. Pallets prepared for a merged 5-digit scheme destination that contain only a single price level of bundle(s) (only carrier route bundle(s) or only automation price 5-digit bundle(s) or only Presorted price 5-digit bundle(s)), or only two price levels of bundle(s), or bundles for only one of the schemed 5-digit ZIP Codes are still considered to be merged 5-digit scheme sorted and must be labeled accordingly. If preparation of merged 5-digit scheme pallets is performed, it must be done for all 5-digit scheme destinations in L001.*
- m. *A 5-digit metro sort for Standard Mail flats prepared as bundles on pallets yields 5-digit metro pallets that contain carrier route and/or noncarrier route 5-digit and 3-digit bundles (automation price and/or presorted bundles) for the 5-digit ZIP Codes listed in L006. The ZIP Codes in L006 are treated as a single presort*

destination, with no further separation by 5-digit ZIP Code required. The 5-digit metro sort is optional and need not be done for all possible destinations in [L006](#).

- n. A 3-digit scheme sort for flats meeting the automation-compatibility standards in [301.3.0](#) yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). When standards require 3-digit/scheme sort, mailers must prepare all possible 3-digit scheme bundles of flats, then prepare all possible 3-digit bundles. The 3-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 3-digit ZIP Code required. Bundles prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit ZIP Codes are still considered 3-digit scheme sorted and are labeled accordingly. Bundles must be labeled using an optional endorsement line (OEL) under [708.7.0](#) or with a green “3 SCH” bundle label. Bundles are placed in appropriate containers using the OEL “label to” 3-digit ZIP Code or using [L008](#) column B.
- o. An *origin 3-digit* (or *origin 3-digit scheme*) tray contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. A separate tray may be prepared for each 3-digit ZIP Code (or 3-digit scheme) area.
- p. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- q. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- r. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the Post Office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- s. A *bundle* is a group of addressed pieces secured together as a unit. Bundle preparation is described in [2.0](#).

- t. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Standard Mail “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement.
- u. *Cobundling* is an alternate preparation method available under [705.11.0](#) for Standard Mail that allows the combining of flat-size automation price and Presorted price pieces within the same bundle under the single minimum bundle size requirement. Regardless of the class of mail, pieces may not be combined in more than one physical bundle for each logical presort destination unless presented using an approved manifest mailing system under [705.2.0](#).

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit.

2.2 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye. This standard does not apply to the following:

- a. Customized MarketMail.
- b. Bundles placed in or on 5-digit or 5-digit scheme ([L001](#)) sacks or pallets.
- c. Bundles placed in carrier route and 5-digit carrier routes sacks.
- d. Bundles of mailpieces at carrier route prices entered at a destination delivery unit (DDU).
- e. Bundles of Standard Mail flat-size pieces prepared in letter trays under [3.4](#).

2.3 Arranging Pieces in a Bundle (“Facing”)

Except as noted in [2.4](#), all pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.4 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

2.5 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment.

Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 1. Do not place any bands closer than 1 inch from any bundle edge.
 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 3. Do not use wire or metal banding.
 4. Do not use any loose banding.
- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

2.6 Preparing Bundles in Sacks

In addition to the standards in 2.5, mailers must prepare and secure bundles placed in sacks as follows:

- a. The maximum weight for all bundles is 20 pounds.
- b. Measure bundles at the lowest (thinnest) point to determine the bundle height.
- c. Except under 6.5 for multi-carrier routes bundles, a bundle that exceeds the maximum prescribed height by less than the thickness of a single piece meets the standard (for example, if a piece is 0.75 (3/4) of an inch thick, 11 pieces may be secured in a bundle 8.25 inches high, even though the maximum bundle height is 8 inches).
- d. Bundles of pieces with covers of “coated stock” (for example, magazines or catalogs with glossy covers) that are not individually enclosed in an envelope or mailing wrapper are subject to these conditions:
 1. Bundles secured with rubber bands, twine, string, or only shrinkwrap must not exceed 3 inches in height.
 2. Bundles secured with shrinkwrap plus one or two plastic straps, or with at least two plastic straps, one around the length and one around the girth, must not exceed 6 inches in height.
- e. Bundles of pieces with outer surfaces of “uncoated stock” are subject to these conditions:
 1. Bundles must not exceed 8 inches in height (recommended maximum height is 6 inches).
 2. “Uncoated stock” refers to pieces with outer surfaces composed of material other than paper (such as plastic, cloth, or fiberboard) and also refers to pieces with coated covers that are individually enclosed in a cover or mailing wrapper of uncoated stock, such as an envelope or polybag.

2.7 Additional Standards for Unsacked Bundles Entered at DDU Facilities

Mailers may enter unsacked, nonpalletized bundles of flat-size pieces at destination delivery units (DDUs) if all the following conditions are met:

- a. The maximum weight for a single bundle is 40 pounds; the maximum number of bundles per carrier route is one bundle for each 10 pounds (or increment) of mail for that route, as follows:
 1. Mailers must make the fewest number of bundles possible, up to the 40-pound maximum, while maintaining bundle integrity. To determine the maximum number of bundles allowable for a route, divide the total weight of mail for that route by 10 and round up to the next whole number. For example, if there are 34 pounds of mail for a carrier route, the maximum number of bundles for that route is four ($34 \div 10 = 3.4 = 4$ bundles).
 2. Mailers may balance the weight of the bundles across the maximum number of allowable bundles for a route. For example, if there are 36 pounds of mail for a carrier route, the maximum number of bundles for that route is four ($36 \div 10 = 3.6 = 4$ bundles), which may be in four 9-pound bundles.

345.2.8

- b. Mailers must prepare bundles to comply with standards in [2.1](#) through [2.5](#) and [2.8](#) through [2.13](#).
- c. Mailers must enter bundles at DDUs according to standards in [346.5.0](#).

2.8 Exception to Bundle Preparation—Full Single-Sort-Level Trays

When mailers prepare flats in letter trays under [3.4](#), mailers need not prepare bundles when placing mail in a full tray if none of the mail in that tray would have been more finely sorted if bundled. For example, the content of a full ADC tray need not be bundled if it would have all been prepared in ADC bundles to the same destination.

2.9 Pieces With Simplified Address

For mail prepared with a simplified address, all pieces for the same Post Office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, Post Office boxholder). Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets, and specific weight and height limits in [2.6](#) if placed in sacks.

2.10 Bundles With Fewer Than the Minimum Number of Pieces Required

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the price claimed without loss of price eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

2.11 Labeling Bundles

[7-3-08] Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. On flat-size mail, the label may be placed anywhere on the address side of the top piece in the bundle. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Five-digit scheme presort level, red Label 5 SCH.
- b. Five-digit presort level, red Label 5.
- c. Three-digit scheme presort level, green Label 3 SCH.
- d. Three-digit presort level, green Label 3.
- e. ADC presort level, pink Label A.
- f. Mixed ADC presort level, tan Label X.

2.12 Use of Carrier Route Information Lines

Bundles for individual carrier routes, rural routes, highway contract routes, Post Office box sections, or general delivery units must be prepared with facing slips under [2.0](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Enhanced Carrier Route Standard mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level.

2.13 Facing Slips—All Carrier Route Mail

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “STD FLTS CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin Post Office.

3.0 Sacks and Trays**3.1 Standard Containers**

Mailings must be prepared in sacks except when permitted to be prepared in letter trays under [3.4](#) and under other applicable standards in this section. Containers for Customized MarketMail are specified in [705.1.0](#). The following additional standards apply:

- a. Palletized mail is also subject to [705.8.0](#).
- b. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing.

3.2 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds.

3.3 Tray Sizes

These approximate measurements define the letter tray sizes that apply to all Standard Mail preparation standards:

- a. 2-foot managed mail (MM) trays: 21 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- b. 1-foot MM trays: 10-1/4 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- c. 2-foot extended MM (EMM) trays: 21-3/4 inches long by 11-1/2 inches wide (inside bottom dimensions) by 6-1/8 inches high.

3.4 Preparing Flats in Letter Trays

Standard Mail flat-size pieces may be prepared in letter trays instead of sacks only if the following standards are met:

- a. At least 90% of the mailing job must be claimed at automation prices or Enhanced Carrier Route prices. No more than 10% of the mailing job may be claimed at Presorted prices. The following minimum volumes for Standard Mail must be met:
 1. For the portion claimed at automation nonletter prices, a separate 200-piece minimum must be met. For any portion of the job claimed at Presorted prices, no separate minimum is required.
 2. For any portion claimed at Enhanced Carrier Route nonletter prices, a separate 200-piece minimum must be met.
- b. Automation price pieces must meet the applicable flat-size dimensions in [301.3.0](#). Presorted and Enhanced Carrier Route pieces must meet the flat-size dimensions in [301.1.0](#).
- c. The pieces must fit completely within the dimensions for height and the bottom (floor) dimensions for length and width specified in [3.3, Tray Sizes](#), for a managed mail (MM) letter tray or an extended managed mail (EMM) letter tray. If a single row of pieces is placed in a tray, all pieces must be upright, faced toward the end of the tray (the short dimension), and perpendicular to the length of the tray. If two rows of pieces are placed in a tray, the rows must be parallel to each other and to the length of the tray and all pieces must be upright, faced toward the end of the tray, and perpendicular to the length of the tray. Other applicable standards in [245.3.3, Letter Tray Preparation](#), must also be met.
- d. Trays must bear tray-size labels that meet all applicable physical and barcode standards under [4.8](#), with Line 1 and Line 2 information as required for flat-size mail in sacks. Each label must contain a barcode as specified in [708.6.2.3](#) and the content identifier number required in [Exhibit 708.6.1](#) for the same type of flat-size mail prepared in sacks.
- e. All mail prepared under [5.0, Preparing Nonautomation Flats](#), [6.0, Preparing Enhanced Carrier Route Flats](#), or [7.0, Preparing Automation Price Flats](#), must be bundled except for full 5-digit trays and full carrier route trays. The exception to bundling in [2.8, Exception to Bundle Preparation—Full Single-Sort-Level Trays](#), may be used for other sort levels. All mail prepared under [705.9.0, Combining Bundles of Automation and Nonautomation Flats in Trays and Sacks](#), must be bundled.
- f. All mail in the mailing job must be trayed. Sacking is not permitted except when the required minimum pallet load in [705.8.5.3](#) cannot be met.
- g. All trays must be palletized under [705.8.10.2](#), except for mail prepared in trays for Priority Mail or Express Mail drop shipment or for mail prepared and claimed at Enhanced Carrier Route destination delivery unit prices. Trays of letter-size pieces must not be placed onto pallets with trays of flat-size pieces. Pallet labels must identify the mail as flat-size pieces.

- h. All other applicable standards in [5.0, Preparing Nonautomation Flats](#), [6.0, Preparing Enhanced Carrier Route Flats](#), [7.0, Preparing Automation Price Flats](#), or [705.9.0](#) must be met, including required preparation sequence and use of sack minimums as tray minimums.

3.5 Tray Sleevng and Strapping

Each letter tray must be sleeved using USPS-provided sleeves. Except under [3.6](#), each sleeved letter tray must then be secured with one plastic strap placed tightly around the length of the tray without crushing the tray or sleeve.

3.6 Strapping Exception

Strapping is not required for any letter tray placed on a 5-digit, 3-digit, or SCF pallet secured with stretchwrap. In addition, if the processing and distribution manager gives a written waiver, strapping is not required for any mixed ADC letter tray or for any letter tray that originates and destines in the same SCF (mail processing plant) service area.

3.7 Origin/Entry 3-Digit Sacks

After all finer sort levels are prepared, an origin/entry 3-digit sacks must be prepared to contain any remaining mail for each 3-digit area serviced by the SCF serving the Post Office where the mail is verified (origin), and may be prepared for each 3-digit area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the Post Office where the mail is verified—e.g., a PVDS deposit site). In all cases, only one less-than-full sack may be prepared for each 3-digit area.

4.0 Sack and Tray Labels

4.1 Basic Standards

Sack and tray labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.
- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Use 2-inch labels for trays.
- e. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.
- f. Container labels for automation price mailings are subject to [4.8](#) and [708.6.0](#).Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- g. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.

- h. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- i. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

4.2 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards.
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack and tray labels.

CONTENT TYPE	CODE
Barcoded	BC
Barcoded and Nonbarcoded	BC/NBC
Carrier Route	C (type of route)
Carrier Routes	CR-RT or CR-RTS
Digit	D
Flats	FLTS
General Delivery Unit	G
Highway Contract Route	H
Mixed	MXD
Nonbarcoded	NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0)
Post Office Box Section	B
Rural Route	R
Scheme	SCH
Standard Mail	STD
Working	WKG

4.3 Line 3 (Office of Mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry Post Office or the mailer’s name and the city and state of the mailer’s location. It is recommended that the mailer’s name also appear with the city and state of the entry Post Office.

4.4 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.5 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

4.6 Sack Label**4.6.1 Physical Characteristics of a Sack Label**

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock (required for mailings of automation-compatible flats, optional for others).
- c. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- d. Height (perpendicular to printing):
 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.
 2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

4.6.2 Additional Standards for Barcoded Sack Labels

In addition to 4.7.1, barcoded sack labels must meet the standards in [4.8](#) and [708.6.2](#) (for 2-inch labels) or [345.6.3](#) (for 1-inch labels).

4.7 Tray Labels**4.7.1 Physical Characteristics of a Tray Label**

A tray label must meet these specifications:

- a. Color: white or manila.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- e. Thickness: 0.005 inch minimum.

4.7.2 Additional Standards for Barcoded Tray Labels

In addition to [4.7.1](#), barcoded tray labels must meet the standards in [708.6.0](#).

4.7.3 Placement of a Tray Label

A tray label must be securely placed in an adhesive-backed label holder that is affixed to the specific location designated on the tray. Where no specific location is indicated the label must be securely placed in an adhesive-backed label holder that is affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert labels completely into the label holder to ensure that they do not fall out during processing. Do not insert labels upside down.

4.8 Use of Barcoded Sack and Tray Labels

[Exhibit 4.8](#) shows the types of mail requiring barcoded sack or tray labels. Barcoded labels must meet these general standards:

- a. Mailers must use the appropriate size label as described in [4.1](#).
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Do not make alterations (such as handwritten changes) to preprinted barcoded labels.
- d. Mailers must insert a barcoded label completely into the label holder on the sack or tray to prevent its loss during transport and processing.

Exhibit 4.8 Required Barcoded Container Labels

PRICE OR TYPE	PROCESSING CATEGORY
Standard Mail	
Automation price	Flat-size
Cobundled and cosacked under 705.9.0 through 705.13.0	Flat-size
Automation, Presorted, and Enhanced Carrier Route in letter trays under 345.3.0	Flat-size
Automation and Presorted in letter trays cotrayed under 705.9.0 using 345.3.0 option	Flat-size

5.0 Preparing Nonautomation Flats

5.1 Basic Standards

[8-14-08] All mailings and all pieces in each mailing at Regular Standard Mail and Nonprofit Standard Mail nonautomation prices are subject to specific preparation standards in [5.2](#) through [5.9](#) and to these general standards (automation price mailings must be prepared under [7.0](#)):

- a. All pieces must be in the flat-size processing category.
- b. All pieces must meet the applicable general preparation standards in [1.0](#) through [4.0](#) and the following:

1. All regular and Nonprofit Standard Mail pieces must be marked under [302.2.0, Placement and Content of Mail Markings](#). Regular and Nonprofit Standard Mail pieces must not be marked “ECRLOT,” “ECRWSH,” “ECRWSS,” “AUTO,” or “Single-Piece” (or “SNGLP”).
2. Unless excepted by standard, all pieces must be in the flat-size processing category and must be prepared in sacks or on pallets. Certain flat-size pieces may be prepared in letter trays under [3.0, Sacks and Trays](#).
- c. All pieces in the mailing must meet the specific sortation and preparation standards in [5.0](#) or the palletization standards in [705.8.0](#). Flat-size pieces may be prepared under [705.9.0](#) through [705.13.0](#) in [Advanced Preparation and Special Postage Payment Systems](#).
- d. Sortation determines price eligibility as specified in [343.5.0](#).

5.2 Required Bundling

Except as provided in [5.4, Loose Packing](#), bundling is required before sacking. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches the required minimum bundle size in [5.3, Bundling and Labeling](#). Smaller volumes are not permitted except for mixed ADC bundles.

5.3 Bundling and Labeling

[7-3-08] Mailings consisting entirely of pieces meeting the automation-compatibility criteria in [301.3.0](#) must be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (required for flats meeting the automation-compatibility standards in [301.3.0](#)), see definition in [1.4f](#):
 1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less: 15-piece minimum; red Label 5 SCH, or OEL.
 2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound): 10-piece minimum; red Label 5 SCH, or OEL.
- b. 5-digit (required), see definition in [1.4f](#):
 1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less: 15-piece minimum; red Label 5 or OEL.
 2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound): 10-piece minimum; red Label 5 or OEL.
- c. 3-digit scheme (required for flats meeting the automation-compatibility standards in [301.3.0](#)), see definition in [1.4n](#); 10-piece minimum; green Label 3 SCH, or OEL.
- d. 3-digit (required), see definition in [1.4n](#); 10-piece minimum; green Label 3 or OEL.
- e. ADC (required); 10-piece minimum; pink Label A or OEL.
- f. Mixed ADC (required); no minimum; tan Label X or OEL.

5.4 Loose Packing

District managers may authorize loose packing of unbundled pieces to fill Number 3 sacks if no pieces in a sack would be more finely sorted if bundled. Pieces must be faced and packed to remain oriented in transit. The total weight of sacks containing such pieces may not exceed 70 pounds. Requests for loose packing must be made in advance through the Post Office of mailing.

5.5 Required Sacking or Traying

Except as provided in 5.6, a sack, or a letter tray under 3.0, must be prepared when the quantity of mail for a required presort destination reaches either 125 pieces or 15 pounds of pieces, whichever occurs first, subject to these conditions:

- a. For identical-weight pieces, mailers must apply these methods:
 1. Pieces weighing 1.92 ounces (0.12 pound) or less must be prepared using the 125-piece minimum.
 2. Pieces weighing more than 1.92 ounces must be prepared using the 15-pound minimum.
- b. For nonidentical-weight pieces, mailers must apply either one of these methods:
 1. The minimum that applies to the average piece weight for the entire mailing is used. The net weight of the mailing is divided by the number of pieces, and the resulting average single-piece weight is used to determine whether the 125-piece or 15-pound minimum applies.
 2. The actual piece count or mail weight for each sack is used, if documentation can be provided with the mailing that shows for each sack the number of pieces and the total weight.
- c. The accompanying postage statement must indicate whether the 125-piece minimum, the 15-pound minimum, or both minimums are applied.

5.6 Drop Shipment

A mailer using Priority Mail or Express Mail to drop ship Standard Mail flat-size pieces may prepare sacks containing fewer than 125 pieces or less than 15 pounds of mail.

5.7 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit/scheme (required); scheme sort required, only for pieces meeting the automation-compatibility criteria in 301.3.0, see definition in 1.4f; 125-piece or 15-pound minimum; labeling:
 1. Line 1: For 5-digit scheme sacks use L007, Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code destination on pieces. (See 4.2 for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, "STD FLT 5D SCH NON BC." For 5-digit sacks, "STD FLTS 5D NON BC."
- b. 3-digit (required); 125-piece or 15-pound minimum; labeling:
 1. Line 1: L002, Column A.

2. Line 2: "STD FLTS 3D NON BC."
- c. Origin/entry 3-digits(s) (optional); one-bundle minimum; labeling:
 1. Line 1: [L002](#), Column A.
 2. Line 2: "STD FLTS 3D NON BC."
- d. ADC (required); 125-piece or 15-pound minimum; labeling:
 1. Line 1: [L004](#), Column B.
 2. Line 2: "STD FLTS ADC NON BC."
- e. Mixed ADC (required); no minimum; labeling:
 1. Line 1: Use [L009](#), Column B.
 2. Line 2: "STD FLTS NON BC WKG."

5.8 Cotraying and Cobundling Flats With Automation Price Mail

The following standards apply:

- a. If the mailing job contains a carrier route mailing, an automation price mailing, and a nonautomation price mailing, then it must be prepared under one of the following options: 1) the carrier route mailing must be prepared under [6.0](#) and the automation price and nonautomation price mailings must be prepared under [705.9.0, Combining Bundles of Automation and Nonautomation Flats in Trays and Sacks](#); or 2) all three mailings in the mailing job must be prepared under [705.10.0, Merging Bundles of Flats in Sacks and Pallets Using the City State Product](#).
- b. If the mailing job contains an automation price mailing and a nonautomation price mailing, then it must be prepared under the cosacking standards in [705.9.0](#).
- c. If the mailing job contains a carrier route mailing and a nonautomation price mailing, then it must be separately sacked under [5.0](#) and [6.0](#) or prepared using the merged sacking option in [705.10.0](#).
- d. If the mailing job contains a carrier route mailing and an automation price mailing, then it must be separately sacked under [6.0](#) and [7.0](#) or prepared using the merged sacking option in [705.10.0](#).
- e. Nonautomation price pieces may be cobundled with automation price pieces under the standards in [705.11.0](#).

5.9 Merged Containerization of Carrier Route, Automation, and nonautomation Flats

Under the optional preparation in [705.10.0](#), nonautomation price 5-digit bundles prepared under [5.2](#) through [5.8](#) are cosacked with carrier route price bundles prepared under [6.0](#) and with automation price 5-digit bundles prepared under [7.0](#) in merged 5-digit scheme sacks and merged 5-digit sacks. Under the optional preparation in [705.10.0](#), [705.12.0](#), or [705.13.0](#), nonautomation price 5-digit bundles are copalletized with carrier route price bundles prepared under [6.0](#) and with automation price 5-digit bundles prepared under [7.0](#) on merged 5-digit scheme pallets and merged 5-digit pallets. See [5.8a](#) for information on when preparation under [705.10.0](#) may be required.

6.0 Preparing Enhanced Carrier Route Flats

6.1 Basic Standards

[8-14-08] All mailings and all pieces in each mailing at Enhanced Carrier Route Standard Mail and Nonprofit Enhanced Carrier Route Standard Mail nonautomation prices are subject to specific preparation standards in 6.2 through 6.7 and to these general standards:

- a. All pieces must meet the standards for basic eligibility in 343.2.0 through 343.4.0 and specific eligibility in 343.6.0. Nonprofit Enhanced Carrier Route Standard Mail must meet the additional eligibility standards in 703.1.0.
- b. All pieces must be in the flat-size processing category.
- c. All pieces must meet the applicable general preparation standards in 2.0 through 4.0 and 302, and the following:
 1. All regular and Nonprofit Standard Mail Enhanced Carrier Route pieces must be marked under 302.2.0, *Placement and Content of Mail Markings*. All pieces must also be marked “ECRL0T” for basic price, “ECRWSH” for high density price, or “ECRWSS” for saturation price.
 2. Generally, flat-size pieces must be in sacks or in bundles on pallets. Certain flat-size pieces may be in letter trays under 3.4. When entering flat-size pieces at DDUs, mailers may prepare and transport unsacked, nonpalletized bundles according to standards in 2.7.
 3. Pieces must be sequenced according to 6.9.
 4. Pieces with a simplified address format must meet the standards in 602.3.0, *Use of Alternative Addressing*.
- d. All pieces in the mailing must meet the specific sortation and preparation standards in 6.0 or the palletization standards in 705.8.0. Flat-size pieces may be prepared under 705.9.0 through 705.13.0 in *Advanced Preparation and Special Postage Payment Systems*.
- e. Sortation determines price eligibility as specified in 343.5.0.

6.2 Residual Pieces

Pieces not sorted as a carrier route mailing must be prepared as a separate mailing at Standard Mail automation or Presorted prices or at single-piece First-Class Mail or Priority Mail prices.

6.3 Carrier Route Bundle Preparation

Prepare carrier route bundles of flat-size mail as follows:

- a. Mailers must prepare only carrier route bundles. Carrier route bundles are not required in full carrier route trays.
- b. Except under 6.4, carrier route bundles must contain at least 10 pieces.
- c. The method of labeling a carrier route bundle is based on the following sack or tray levels:
 1. Carrier route tray or sack: No bundle labeling is required.

2. 5-digit scheme or 5-digit carrier routes tray or sacks: Bundles must have a facing slip unless the pieces in the bundle have a carrier information line or an optional endorsement line (OEL).

6.4 Bundles, Trays, and Sacks With Fewer Than the Minimum Number of Pieces Required

As a general exception to 6.2 through 6.7, a mailer may prepare a bundle, tray, or sack with fewer than the minimum number of pieces required for a carrier route when they are claiming the saturation price for the contents and meet the applicable density standard.

6.5 Multi Carrier Routes Bundle

A mailer may combine individual eligible bundles of Standard Mail Enhanced Carrier Route basic price mail into a multi carrier routes bundle of the same 5-digit ZIP Code under these conditions:

- a. Individual carrier route bundles cannot exceed 1 inch (except for a multi carrier routes bundle under 6.5b) and must be secured with two bands, one around the length and one around the girth.
- b. A multi carrier routes bundle can contain one individual bundle that exceeds 1 inch to serve as an anchor.
- c. The multi carrier routes bundle must meet the standards in 2.3 through 2.6.
- d. The multi carrier routes bundle must be secured with at least two bands, one around the length and one around the girth; or with shrinkwrap; or with shrinkwrap plus one or more bands.
- e. The multi carrier routes bundle must be labeled with an optional endorsement line (OEL). The top bundle must contain the carrier route information for the individual bundle preceded by the endorsement "Multi" and two asterisks (e.g., *****Multi**C-001).
- f. A multi carrier routes bundle that exceeds the maximum heights in 2.6 by less than the thickness of an individual carrier route bundle (e.g., 1 inch or less) meets the standards.

6.6 Required Sack Minimums

When sacking is required, mailers must prepare a sack when the quantity of mail for a required presort destination reaches either 125 pieces or 15 pounds of pieces, whichever occurs first. The following conditions apply:

- a. For identical-weight pieces, a single-piece weight of 1.92 ounces (0.12 pound) results in 125 pieces weighing 15 pounds. Identical-weight pieces weighing 1.92 ounces (0.12 pound) or less must be prepared using the 125-piece minimum; those that weigh more must be prepared using the 15-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 125-piece or 15-pound minimum applies) or

sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.

- c. Mailers must note on the accompanying postage statement whether they applied the 125-piece (“PCS”) or 15-pound (“WT”) threshold or the method in [6.6b, Required Sack Minimums](#) (“BOTH”).
- d. Sacks with fewer than 125 pieces or less than 15 pounds of pieces may be prepared to a carrier route when the saturation price is claimed for the contents and the applicable density standard is met.

6.7 Sack Preparation

Preparation sequence, sack size, and labeling:

- a. Carrier route: required (minimum of 125 pieces/15 pounds).
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [f](#). for overseas military mail).
 2. Line 2: “STD FLTS ECRWSS” or “STD FLTS ECRWSH” or “STD FLTS ECRLOT” as applicable, followed by the route type and number.
- b. 5-digit scheme carrier routes: required (no minimum).
 1. Line 1: use [L001](#), column B.
 2. Line 2: “STD FLTS CR-RTS SCH.”
- c. 5-digit carrier routes: required (no minimum).
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [f](#). for overseas military mail).
 2. Line 2: “STD FLTS CR-RTS.”

6.8 Merged Containerization of Carrier Route, Automation, and Presorted Price Flats

Under the optional preparation in [705.10.0](#), carrier route price bundles are cosacked with Presorted price 5-digit bundles prepared under [5.0](#) and with automation price 5-digit bundles prepared under [7.0](#) in merged 5-digit scheme sacks and merged 5-digit sacks. Under the optional preparation in [705.10.0](#), [705.12.0](#), or [705.13.0](#), carrier route price bundles prepared under [6.3](#) and [6.3](#) are copalletized with Presorted price 5-digit bundles prepared under [5.0](#) and with automation price 5-digit bundles prepared under [7.0](#) on merged 5-digit scheme pallets and merged 5-digit pallets. Presorted price pieces may be cobundled with automation price pieces under [705.11.0](#).

6.9 Delivery Sequence Standards

6.9.1 Basic Standards

Mailpieces for which a walk-sequence discount is claimed must be organized in the delivery sequence determined by the USPS and prepared as a carrier route mailing under [6.0](#) and the standards below. Pieces prepared with a simplified address must also meet the corresponding standards.

6.9.2 Missing Addresses

Some mailpieces cannot be sequenced because an exact match for a name or address cannot be obtained. These pieces may be included in a sequenced mailing only if they are placed behind or after the sequenced mail. Arrange these pieces:

- a. Alphabetically by complete street name, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.
- b. Numerically for numbered streets, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.

6.9.3 Updating Walk Sequence Information—General

Walk-sequence price pieces prepared with other than a simplified address format under 6.9.4 must be sequenced using USPS data from one of the following sources, issued within 90 days before the mailing date:

- a. The Computerized Delivery Sequence (CDS) file.
- b. The Delivery Sequence File, Second Generation (DSF²).
- c. Delivery sequence information from USPS address sequencing services, as requested by the customer.

6.9.4 Updating Walk Sequence Information for Simplified Addressing

Walk-sequence price pieces prepared with a simplified address must be based on delivery stop information obtained within 90 days before the mailing date, either from the Delivery Statistics File or from the postmaster of the destination office.

6.9.5 Out-of-Date Walk Sequence Information

Mailings prepared with out-of-date walk-sequencing information are not eligible for walk-sequence prices.

6.9.6 Updating Line-of-Travel Sequence Information

Unless the mail is prepared in carrier walk sequence, line-of-travel (LOT) sequence is required for mailings at Standard Mail Enhanced Carrier Route basic prices. LOT sequence is not an exact walk sequence but a sequence of ZIP+4 codes arranged in the order that the route is served by a carrier. (First the ZIP+4 groups are sequenced, then the addresses within each are identified as being in ascending or descending order.) The USPS eLOT product provides a list of the ZIP+4 codes each carrier route serves, identifies the order in which they are delivered, and provides an indicator specifying whether the addresses that share the same ZIP+4 code must be sorted in ascending or descending order. When a range of ZIP+4 codes on the same carrier route are assigned the same sequence number, the addresses bearing those ZIP+4 codes must be arranged in ascending ZIP+4 code order before the sequence number is assigned. LOT information must be updated within 90 days before the date of mailing.

6.10 Delivery Sequence Documentation

6.10.1 Basic Standards

The postage statement must be annotated in the “Carrier Route Sequencing Date” block on page 1. The mailer must annotate the postage statement to show the earliest (oldest) date of the method used to obtain sequencing information for the

mailing. The mailer's signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The mailer must maintain documentation to substantiate compliance with the standards for carrier route sequencing. Unless submitted with each corresponding mailing, the mailer must be able to provide the USPS with documentation (if requested) of accurate sequencing or delivery statistics for each carrier route to which pieces are mailed. Acceptable forms of documentation are:

- a. The invoice showing that the addresses came from CDS.
- b. DSF² invoice or documentation.
- c. Copies of the delivery unit summaries that served as the mailer's bills for address sequencing service charges.
- d. Evidence of receipt of information from postmasters for simplified address mailings (see [509.1.0, Address Information System Products](#)).
- e. Form 3553 showing the date of the eLOT product used, or the date from the USPS Qualification report produced by presort software.

6.10.2 High Density

For each carrier route to which high density price mail is addressed, the mailer must document the total number of addressed pieces to the route.

6.10.3 Saturation Density—Simplified Address Mail

For each carrier route to which mail with a simplified address is sent at the saturation price, the mailer must be able to document that the mailing meets the applicable density standard. This documentation must show the total number of active possible deliveries and the total number to which mailpieces in the mailing are being addressed, by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing.

6.10.4 Saturation Density—Other Mail

For each carrier route to which mail without a simplified address is sent at the saturation price, the mailer must be able to document that the mailing meets the applicable density standards. This documentation must show either the total number of active possible *residential* deliveries and the number and percentage to which mailpieces are addressed, or the total number of *all* active possible deliveries and the number and percentage to which mailpieces are addressed, depending on whether qualification is based on the 90% or 75% criterion, respectively. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing.

6.10.5 Both Prices

If a mailing contains pieces qualifying for both walk-sequence prices, the documentation required by [6.10.2, High Density](#), and either [6.10.3, Saturation Density—Simplified Address Mail](#), or [6.10.4, Saturation Density—Other Mail](#), may be combined. Entries for pieces at the high density price must be so annotated on the documentation. For the entire mailing, a summary of the total number of pieces at each price must be provided. This documentation must be submitted with each applicable mailing.

6.10.6 Carrier Route Price

If a mailing includes high density and saturation price and basic carrier route price pieces, in addition to the applicable information required by 6.10.2 through 6.10.5 in *Delivery Sequence Documentation*, the documentation for the basic carrier route price mail must show, by 5-digit ZIP Code and, within each, by carrier route, the total number of addressed pieces at each price for each carrier route to which pieces are addressed. Pieces qualifying for the basic carrier route price must be so annotated. For the entire mailing, a summary by 5-digit ZIP Code of the total number of pieces at each price must be provided. This documentation must be submitted with each applicable mailing to meet the documentation standard for the carrier route price.

7.0 Preparing Automation Price Flats

7.1 Basic Standards

Flat-size automation price Standard Mail must be prepared under 7.0 and the eligibility standards for the price claimed. Trays and sacks must bear the appropriate barcoded container labels under 4.8.

7.2 Mailings

All pieces in a mailing must meet the standards in 301.3.0, *Physical Standards for Automation Flats*, and be sorted together to the finest extent required. Standard Mail mailings may include pieces prepared at automation 3/5 and basic prices. The definitions of a mailing and permissible combinations are in 1.2.

7.3 Marking

All Standard Mail automation price pieces must be marked under 302. Pieces claimed at an automation price must bear the appropriate class marking and, except as provided in 302.2.0, "AUTO." Pieces not claimed at an automation price must not bear "AUTO" unless single-piece price postage is affixed or the corrective single-piece price marking "Single-Piece" or "SNGLP" is applied.

7.4 Standard Mail Bundle Preparation

7.4.1 Bundling and Labeling

[7-3-08] Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (required); see definition in 1.4f:
 1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less: 15-piece minimum; red Label 5 SCH or OEL.
 2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound): 10-piece minimum; red Label 5 SCH or OEL.
- b. 5-digit presort (required); see definition in 1.4f:
 1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less: 15-piece minimum; red Label 5 or OEL.
 2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound): 10-piece minimum; red Label 5 or OEL.

- c. 3-digit scheme (required); see definition in [1.4n](#); 10-piece minimum; green Label 3 SCH or OEL.
- d. 3-digit presort (required); see definition in [1.4n](#); 10-piece minimum; green Label 3 or OEL.
- e. ADC (required); 10-piece minimum; pink Label A or OEL.
- f. Mixed ADC (required); no minimum; tan Label X or OEL.

7.4.2 Required Sacking

A sack, or a letter tray under [3.0](#), must be prepared when the quantity of mail for a required presort destination reaches either 125 pieces or 15 pounds of pieces, whichever occurs first, subject to these conditions:

- a. For identical-weight pieces, a single-piece weight of 1.92 ounces (0.12 pound) results in 125 pieces weighing 15 pounds. Identical-weight pieces weighing 1.92 ounces (0.12 pound) or less must be prepared using the 125-piece minimum; those that weigh more must be prepared using the 15-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 125-piece or 15-pound minimum applies) or sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the 125-piece (“PCS”) or 15-pound (“WT”) threshold or the method in [7.4.2b](#) (“BOTH”).

7.4.3 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit/scheme (required); see definition in [1.4f](#); 125-piece or 15-pound minimum, labeling:
 - 1. Line 1: For 5-digit scheme sacks use [L007](#), Column B. For 5-digit sacks use city, state, and 5-digit ZIP Code on mail (see [4.2](#) for overseas military mail).
 - 2. Line 2: For 5-digit scheme sacks, “STD FLTS 5D SCH BC.” For 5-digit sacks, “STD FLTS 5D BC.”
- b. 3-digit (required); 125-piece/15-pound minimum; labeling:
 - 1. Line 1: [L002](#), Column A.
 - 2. Line 2: “STD FLTS 3D BC.”
- c. Origin 3-digit(s) (required) and entry 3-digit(s) (optional); one-bundle minimum (for origin and entry); labeling:
 - 1. Line 1: [L002](#), Column A.
 - 2. Line 2: “STD FLTS 3D BC.”

- d. ADC (required); 125-piece/15-pound minimum; labeling:
 - 1. Line 1: L004, Column B.
 - 2. Line 2: "STD FLTS ADC BC."
- e. Mixed ADC (required); no minimum; labeling:
 - 1. Line 1: Use L009, Column B.
 - 2. Line 2: "STD FLTS BC WKG."

7.5 Scheme Bundle Preparation

Pieces meeting the automation compatibility criteria in 301.3.0 may be prepared in 5-digit scheme bundles for those 5-digit ZIP Code combinations identified in L007 and in 3-digit scheme bundles for those 3-digit ZIP Code combinations identified in L008. These bundles must meet the additional standards in 1.4f.

7.6 Merged Containerization With Presorted and Carrier Route Flats

When the conditions and preparation standards in 705.10.0, 705.12.0, or 705.13.0 are met, 5-digit bundles of Presorted, automation, and carrier route price mail that are part of the same mailing job may be combined on merged 5-digit scheme sacks or pallets and merged 5-digit sacks or pallets. Bundles that are cosacked or copalletized must be part of the same mailing job and mail class. Automation price pieces may be cobundled with nonautomation price pieces under 705.11.0.

7.7 Exception—Automation and Nonautomation Pieces on Pallets

When the physical dimensions of mailpieces in a Standard Mail mailing meet the definition of both a letter-size piece under 201.1.1.1 and an automation flat-size piece under 301.3.0, the entire job may be prepared, merged, and palletized under 705.9.0 through 705.11.0, 705.12.0, and 705.13.0 if the applicable standards are met. The nonautomation portion is all paid at nonautomation flat-size prices for Standard Mail. Mailing jobs prepared entirely in sacks and claiming this exception must be cobundled under 705.11.0. As an alternative to 705.9.0 through 705.11.0, 705.12.0, and 705.13.0, if a portion of the job is prepared as palletized automation flats, the nonautomation portion may be prepared as palletized flats at nonautomation flat-size prices and at Enhanced Carrier Route flat-size prices. The nonautomation price pieces that cannot be placed on BMC or finer level pallets may be prepared as flats in sacks and paid at the appropriate nonautomation flat-size prices. As provided in 343.5.0, the following minimum volumes for Standard Mail must be met for this alternative to 705.9.0 through 705.11.0, 705.12.0, and 705.13.0:

- a. For the portion claimed at automation flat-size prices, a separate 200-piece minimum must be met. For any portion of the job claimed at nonautomation prices, no separate minimum is required.
- b. For any portion claimed at Enhanced Carrier Route flat-size prices, a separate 200-piece minimum must be met.

346 Enter and Deposit

Overview

- [1.0 Presenting a Mailing](#)
- [2.0 Destination Entry](#)
- [3.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [4.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [5.0 Destination Delivery Unit \(DDU\) Entry](#)

1.0 Presenting a Mailing

1.1 Basic Standards for Standard Mail Deposit

All Standard Mail must be presented at the Post Office where the permit or license is held and the presort mailing fee is paid, at the locations and times specified by the postmaster, except as follows:

- a. Plant-verified drop shipment (PVDS) mailings must be presented under [705.15.0](#).
- b. Plant-loaded mailings must be presented as specified by the plant load agreement.
- c. Metered mailings may be deposited at other than the licensing Post Office only as permitted under [705.18.0](#).
- d. Nonprofit Standard Mail must be presented only at Post Offices where the organization producing the mailing has an approved nonprofit authorization ([703.1.0](#)).

1.2 Separation of Mailing

Pieces at different prices may be combined in the same mailing as provided in [345.1.0](#). Separate mailings may be reported on the same postage statement if the pieces in the mailings are in the same flat-size processing category, are part of the same mailing job, and are presented for verification at the same time.

2.0 Destination Entry

2.1 General

Except for Customized MarketMail pieces defined in [705.1.0](#), all Standard Mail pieces meeting the basic standards in [343.2.0](#) through [343.4.0](#) may qualify for destination entry prices, if deposited at the correct destination postal facility, subject to the standards below and in [3.0](#), [4.0](#), and [5.0](#). Only one destination entry price may be claimed for each piece. A pallet may contain mail claimed at different destination entry prices.

2.2 Minimum Volume

A destination entry price Standard Mail mailing is subject to these minimum volume requirements:

346.2.3

- a. Each mailing must contain at least 200 addressed pieces or 50 pounds of addressed pieces.
- b. Except as provided in [2.2d](#), each group of pieces prepared for deposit at different destination entry facilities must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by a postage statement.
- c. If a facility is authorized to accept mail at more than one entry level, all pieces claimed at the different entry prices may be in one mailing and may be recorded on the same postage statement.
- d. When pieces from different price Standard Mail mailings are presented together under plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from one presort file (i.e., mailing job) reported on one Form 3602 and accompanied by Form 3602-C (or a postage statement register) to meet the minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 200 pieces or 50 pounds at a single destination entry facility if there is at least 200 pieces or 50 pounds of Presorted price mail, 200 pieces or 50 pounds of automation price mail, and/or 200 pieces or 50 pounds of Enhanced Carrier Route mail for all entry points combined for the single presort file.

2.3 Postage Payment and Documentation

Postage payment for destination entry mailings is subject to the same standards that apply generally to Standard Mail. No documentation for destination entry discounts is required.

2.4 Plant Loads

Plant load mailings are not eligible for destination entry discounts.

2.5 Verification

2.5.1 Mail Separation and Presentation

Destination entry price mail must be verified under a PVDS system ([705.15.0](#)) or be presented for verification and acceptance at a BMEU located at a destination postal facility. Only PVDS mailings may be deposited at a destination facility not co-located with a postal facility having a business mail entry unit. Destination entry mailings must meet the following requirements:

- a. The mailer must present each mailing separately for verification. For PVDS, each mailing for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow reconciliation with each required accompanying Form 8125, 8125-C, or 8125-CD.
- b. Mail must be separated from freight transported on the same vehicle.
- c. If Periodicals mail is on the same vehicle as Standard Mail, the mailer should load the Periodicals mail toward the tail of the vehicle so that Periodicals mail can be offloaded first.

2.5.2 Form 8125

When mailings are verified and paid for at a postal facility different from the one at which they are accepted and deposited as mail, the mailer must ensure that they are accompanied by a completed Form 8125 (or 8125-C or 8125-CD).

2.5.3 At BMC

For a mailing verified at a BMC, the Post Office where the mailer's account or license is held must be within the service area of that BMC. The Post Office must authorize the BMC to act as its agent by sending Form 4410 to the BMC.

2.5.4 Mailer Transport

The mailer must transport the PVDS mailing from the place where it was verified to the appropriate destination postal facility.

2.5.5 Volume Standards

Except as permitted for a local mailer under [2.6.13](#), destination entry mailings are subject to these volume standards:

- a. The pieces for which a destination price is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, *mailer* is the party presenting the mail to the USPS.
- b. The same mailer (or agent) may not in a 24-hour period present for verification and acceptance more than four destination price mailings at the same destination postal facility, unless the mailer or agent has received a waiver when scheduling the deposit of the mailings. There is no maximum for PVDS mailings.

2.6 Deposit**2.6.1 Time and Location of Deposit**

Each mailing claimed at a destination price must be deposited at the time and location specified by the USPS.

2.6.2 Freight

Drop shipments are freight until deposited and accepted as mail at the destination facility.

2.6.3 Appointments

Appointments must be made for destination entry price mail as follows:

- a. Except for a local mailer under [2.6.13](#) and mailings of perishable commodities, appointments for deposit of destination entry price mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.

346.2.6.4

- b. Electronic appointments may be made by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancellations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.
- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often.
- d. When Periodicals are transported together with Standard Mail or Package Services as a mixed load ([707.29.0, Destination Entry](#)), an appointment must be obtained for deposit at a destination entry facility.

2.6.4 Advance Scheduling

Mailers must schedule appointments for deposit of destination entry price mail under [2.6.3](#) and the conditions below. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type.

2.6.5 Adherence to Schedule

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units.

2.6.6 Redirection by USPS

A mailer may be directed to transport destination entry price mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints.

2.6.7 Redirection at Mailer's Request

For service reasons, a mailer may ask to transport destination SCF price mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF price in this situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF.

2.6.8 Recurring Appointments

Recurring refers to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule.

2.6.9 Vehicle Unloading

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. At BMCs, ASFs, and SCFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At destination delivery units (DDUs), drivers must unload all mail within 1 hour of arrival. Unloading procedures are as follows:
 1. If pallets or pallet boxes are stacked, drivers must unload, unstrap, and unstack them.
 2. When drivers unload containerized mail, delivery unit employees may require drivers to place the containers together by 5-digit ZIP Codes or 5-digit schemes.

346.2.6.10

3. When mail is not containerized or on pallets, drivers must place the mail into containers as delivery unit employees specify. Delivery unit employees may require drivers to place mail into containers to separate mail by 5-digit ZIP Codes or 5-digit schemes.
 4. At DDUs that cannot handle pallets, drivers must unload any mail from pallets and place it into containers as delivery unit employees specify.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
 - e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area.

2.6.10 Drop and Pick

Drop and pick service is not available for destination entry Standard Mail.

2.6.11 Demurrage

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry price mailings.

2.6.12 Appeals

Mailers who believe they are denied equitable treatment may appeal to the manager, customer service (district), responsible for the destination postal facility.

2.6.13 Exception for Local Mailer

The restrictions in [2.5.5, Volume Standards](#), and [2.6.4, Advance Scheduling](#), do not apply when a mailer deposits mailings for verification and acceptance at the local Post Office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment authorization. Under this exception, the mailer may claim the destination entry prices for mailings or portions of mailings deposited at the local Post Office that meet the standards in [3.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), and [5.0, Destination Delivery Unit \(DDU\) Entry](#).

3.0 Destination Bulk Mail Center (DBMC) Entry

3.1 Definition

For this standard, *destination bulk mail center (DBMC)* includes all bulk mail centers (BMCs) and auxiliary service facilities (ASFs) as shown in [Exhibit 3.1, BMC/ASF—DMBC Price Eligibility](#).

Exhibit 3.1 BMC/ASF – DMBC Price Eligibility

3.2 Eligibility

Pieces in a mailing that meet the standards in [2.0](#) and [3.0](#) are eligible for the DBMC price when they meet all of the following conditions: 1) are deposited at a BMC or ASF; 2) are addressed for delivery to one of the 3-digit ZIP Codes served by the BMC or ASF where deposited that are listed in [Exhibit 3.1](#); and 3) are placed in a

tray, sack, or pallet (subject to the standards for the price claimed) that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within the service area of that BMC or ASF (see [Exhibit 3.1](#)). If bundles of flats on pallets are reallocated from an ASF pallet to a BMC pallet under [705.8.14](#), mail for the ASF ZIP Codes placed on the BMC pallet is not eligible for the DBMC prices. DBMC price mail also must be eligible for Presorted, automation, or Enhanced Carrier Route prices, subject to the corresponding standards for those prices.

3.3 Eligibility for ADC Mailpieces

All pieces in an ADC sack or tray are eligible for the DBMC discount if the ADC facility ZIP Code (as shown on Line 1 of the corresponding container label) is within the service area of the BMC or ASF at which the sack or tray is deposited as shown in [Exhibit 3.1](#). All pieces in a palletized ADC bundle are eligible for the DBMC discount if the ADC facility that is the destination of the bundle (determined by using the "Label To" ZIP Code in Column B of [L004](#)) is within the service area of the BMC or ASF at which it is deposited as shown in [Exhibit 3.1](#).

3.4 Eligibility for Mixed ADC Bundles, Sacks or Trays

Mailpieces either in a mixed ADC bundle, sack, or tray can qualify for the DBMC prices if the following standards are met:

- a. All pieces in the bundle, sack, or tray must destinate within the ASF or BMC service area shown in [Exhibit 3.1](#).
- b. Use labeling list [L009](#) when labeling bundles, sacks, or trays containing such pieces.
- c. Pieces claiming DBMC prices and any mixed ADC pieces not claiming DBMC prices must be prepared in separate mixed ADC bundles, sacks, or trays.
- d. Otherwise applicable restrictions (e.g., minimum volume, number of less-than-full trays) are excepted when necessary to meet the standards in [3.4](#).

3.5 Vehicles

Mailings deposited at a DBMC must be presented in vehicles compatible with BMC dock and yard operations.

3.6 Form 4410

Mailings may be deposited at the DBMC only if that facility is authorized (by Form 4410) to act as acceptance agent for the entry Post Office (where the meter license, precanceled stamp permit, or permit imprint authorization is held). Form 4410 is not required for plant-verified drop shipments.

4.0 Destination Sectional Center Facility (DSCF) Entry

4.1 Definition

For this standard, *destination sectional center facility (DSCF)* refers to the facilities listed in [L002](#), Column C, and [L006](#), Column C.

4.2 Eligibility

Pieces in a mailing that meets the standards in [2.0](#) and [4.0](#) are eligible for the DSCF price, as follows:

- a. When deposited at a DSCF (or USPS-designated facility), addressed for delivery within that facility's service area, and placed in or on a sack or pallet that is labeled to that DSCF or to a postal facility within its service area.
- b. When prepared in 5-digit bundles and placed in or on a merged 5-digit scheme or merged 5-digit sack or pallet that is deposited at the destination delivery unit as defined in [5.1](#).

4.3 Vehicles

Mailings deposited at a DSCF must be presented in vehicles that are compatible with SCF dock and yard operations.

5.0 Destination Delivery Unit (DDU) Entry

5.1 Definition

For this standard, *destination delivery unit (DDU)* refers to the facility designated by the USPS district drop shipment coordinator (for automation price Standard Mail) or the facility (Post Office, branch, station, etc.) where the carrier cases mail for delivery to the addresses on pieces in the mailing (for other Standard Mail).

5.2 Eligibility

Properly prepared Enhanced Carrier Route (ECR) flat-size pieces entered according to standards in [2.0](#) and [5.0](#) are eligible for the DDU price when deposited at a DDU and addressed for delivery within that facility's service area. Mailers must unload mail at DDUs according to standards in [2.6.9](#). Only pieces eligible for and claimed at ECR prices are eligible for the DDU discount. No other prices or discounts are available for pieces receiving the DDU discount. When mailings contain pieces claimed at more than one destination entry price, mailers must separate mail according to standards in [2.5.1](#).

363 Prices and Eligibility

364 Postage Payment and Documentation

365 Mail Preparation

366 Enter and Deposit

363 Prices and Eligibility

Overview

- 1.0 Prices and Fees for Bound Printed Matter
- 2.0 Basic Eligibility Standards for Bound Printed Matter
- 3.0 Content Standards for Bound Printed Matter Flats
- 4.0 Price Eligibility for Bound Printed Matter Flats
- 5.0 Additional Eligibility Standards for Presorted and Carrier Route Bound Printed Matter Flats
- 6.0 Additional Eligibility Standards for Barcoded Bound Printed Matter Flats

1.0 Prices and Fees for Bound Printed Matter

1.1 Nonpresorted Bound Printed Matter

Apply the prices and discounts for nonpresorted Bound Printed Matter as follows:

1.1.1 Prices

Bound Printed Matter (BPM) prices are based on the weight of a single addressed piece or 1 pound, whichever is higher, and the zone to which the piece is addressed. The nonpresorted price applies to BPM not mailed at the Presorted or carrier route prices.

1.1.2 Rigid Flat-Size Pieces

Rigid flat-size pieces (see [301.1.3](#)) must pay the applicable postage for a parcel size piece based on weight and zone.

1.1.3 Price Application

The nonpresorted BPM price is charged per half-pound from 1 through 5 pounds, and per pound from more than 5 through 15 pounds. For pieces weighing 5 pounds or under, any fraction of a half-pound is considered a whole half-pound. For pieces weighing more than 5 but not more than 15 pounds, any fraction of a pound is considered a whole pound. For example, if a BPM item weighs 4.325 pounds, the weight (postage) increment is 4.5 pounds; if an item weighs 6.25 pounds, the weight (postage) increment is 7 pounds. The minimum postage price per piece is the 1-pound price.

1.1.4 Barcoded Discount—Flats

The barcoded discount applies only to BPM flat-size pieces that bear a correct, readable ZIP+4 or delivery point barcode (DPBC) under [708.4.0, Standards for POSTNET and Intelligent Mail Barcodes](#), for the ZIP+4 code or numeric DPBC of the delivery address. The pieces must be part of a nonpresorted price mailing of 50 or more flat-size pieces. To qualify for the barcoded discount, the flat-size piece must meet the automation requirements under [301.3.0](#).

1.1.5 Bound Printed Matter—Nonpresorted

For barcoded discount, deduct \$0.03 per piece (automatable flats only, 50-piece minimum).

Exhibit 1.1.5 Bound Printed Matter Nonpresorted Prices

Weight Not Over (pounds) ¹	Zone						
	1 & 2	3	4	5	6	7	8
1.0	\$1.89	\$1.93	\$1.99	\$2.08	\$2.19	\$2.25	\$2.44
1.5	1.89	1.93	1.99	2.08	2.19	2.25	2.44

3.0	2.17	2.26	2.38	2.56	2.77	2.89	3.28
3.5	2.27	2.37	2.51	2.72	2.97	3.11	3.56
4.0	2.36	2.48	2.64	2.88	3.16	3.32	3.84
4.5	2.46	2.59	2.77	3.04	3.36	3.54	4.12
5.0	2.55	2.70	2.90	3.20	3.55	3.75	4.40
6.0	2.74	2.92	3.16	3.52	3.94	4.18	4.96
7.0	2.93	3.14	3.42	3.84	4.33	4.61	5.52
8.0	3.12	3.36	3.68	4.16	4.72	5.04	6.08
9.0	3.31	3.58	3.94	4.48	5.11	5.47	6.64
10.0	3.50	3.80	4.20	4.80	5.50	5.90	7.20
11.0	3.69	4.02	4.46	5.12	5.89	6.33	7.76
12.0	3.88	4.24	4.72	5.44	6.28	6.76	8.32
13.0	4.07	4.46	4.98	5.76	6.67	7.19	8.88
14.0	4.26	4.68	5.24	6.08	7.06	7.62	9.44
15.0	4.45	4.90	5.50	6.40	7.45	8.05	10.00

1. For barcode discount, deduct \$0.03 per piece (automation-compatible parcels only, 50-piece minimum).

1.1.6 Computing Postage—Bound Printed Matter With Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable price per piece.

1.2 Commercial Bound Printed Matter

Apply the prices, fees and discounts for discounted Bound Printed Matter as follows:

1.2.1 Prices

Postage is based on the price that applies to the weight (postage) increment of each addressed piece.

1.2.2 Rigid Flat-Size Pieces

Rigid flat-size pieces (see 301.1.3) must pay the applicable postage for a parcel size piece based on weight and zone.

1.2.3 Price Application

The presorted Bound Printed Matter price has a per piece charge and a per pound charge. Postage is based on the price that applies to the weight (postage) increment of each addressed piece and on the zone to which the piece is addressed. The minimum postage price for an addressed piece is one unit of the per piece charge plus the per pound charge for an addressed piece weighing 1 pound.

1.2.4 Bound Printed Matter Presorted and Carrier Route Prices

Each piece is subject to both a piece price and a pound price. For the barcode discount on Presorted flats, deduct \$0.03 per piece (automatable flats only). The barcode discount is not available for flats mailed at carrier route prices.

1.2.5 Bound Printed Matter Destination Entry Prices

Each piece is subject to both a piece price and a pound price. For the barcode discount on Presorted flats, deduct \$0.03 per piece (automatable flats only). The barcode discount is not available for flats mailed at Presorted DDU prices. Presorted DDU prices are not available for flats that weigh 1 pound or less.

Exhibit 1.2.5 Bound Printed Matter Presorted, Carrier Route, and Destination Entry Prices

Each piece is subject to both a piece rate and a pound rate. ¹		Carrier Route			Presorted ²		
		Price per piece	+	Price per pound	Price per piece	+	Price per pound
Zone	Local, 1 & 2	\$1.146	+	\$0.136	\$1.253	+	\$0.136
	3	1.146	+	0.169	1.253	+	0.169
	4	1.146	+	0.209	1.253	+	0.209
	5	1.146	+	0.268	1.253	+	0.268
	6	1.146	+	0.337	1.253	+	0.337
	7	1.146	+	0.380	1.253	+	0.380
	8	1.146	+	0.507	1.253	+	0.507
	<i>Destination Entry</i>						
DBMC	1 & 2	0.876	+	0.098	0.983	+	0.098
	3	0.876	+	0.126	0.983	+	0.126
	4	0.876	+	0.174	0.983	+	0.174
	5	0.876	+	0.233	0.983	+	0.233
DSCF		0.486	+	0.082	0.593	+	0.082
DDU		0.402	+	0.039	0.509 ³	+	0.039

1. Multiply the number of pounds in the mailing by price per pound. Multiply the number of pieces in the mailing by price per piece. Add both totals.
2. For barcode discount, deduct \$0.03 per piece (automation-compatible flats only). Barcode discount not available for pieces mailed at presorted DDU prices.
3. Each flat must weigh more than 1 pound to be eligible for presorted DDU price.

1.2.6 Destination Entry Mailing Fee

Destination entry mailing fees for Bound Printed Matter, per 12-month period: \$180.00.

1.2.7 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

363.1.2.8

1.2.8 Computing Postage for Permit Imprint

Presorted and Carrier Route Bound Printed Matter mailings paid with permit imprint are charged a per pound price and a per piece price as follows:

- a. Per pound price:
 1. *For pieces weighing 1 pound or less*, compute the per pound price by multiplying the total number of addressed pieces by the 1-pound price for the price category and zone. Do not round this result.
 2. *For pieces weighing more than 1 pound*, compute the per pound price by multiplying the unrounded total weight of the addressed pieces by the pound price for the category and zone. Do not round this result.
- b. Per piece price. Multiply the total number of addressed pieces by the applicable piece price.
- c. Total Postage. Calculate total postage by adding the total per piece calculation to the total per pound calculation. Round off the total postage to the nearest whole cent.

2.0 Basic Eligibility Standards for Bound Printed Matter

2.1 Service Objectives

The USPS does not guarantee the delivery of BPM within a specified time. BPM might receive deferred service. The local Post Office can provide more information concerning delivery times within its area.

2.2 Postal Inspection

BPM is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at BPM prices constitutes consent by the mailer to postal inspection of the contents.

2.3 Delivery and Return Addresses

All BPM mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Except for unendorsed BPM, each piece must bear the sender's return address.

3.0 Content Standards for Bound Printed Matter Flats

3.1 Basic Content Standards

Bound Printed Matter (BPM) is a subclass of Package Services and must:

- a. Meet the basic standards in [2.0](#).
- b. Weigh no more than 15 pounds. Pieces might be subject to other minimum weights or dimensions based on the standards for specific prices.
- c. Consist of advertising, promotional, directory, or editorial material (or any combination of such material).

- d. Be securely bound by permanent fastenings such as staples, spiral binding, glue, or stitching. Loose-leaf binders and similar fastenings are not considered permanent.
- e. Consist of sheets of which at least 90% are imprinted by any process other than handwriting or typewriting with words, letters, characters, figures, or images (or any combination of them).
- f. Not have the nature of personal correspondence.
- g. Not be stationery, such as pads of blank printed forms.
- h. Consist of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (except as permitted under 3.2 or permitted or required under 707.7.9).

3.2 Attachments or Enclosures of Periodicals Sample Copies

Sample copies of authorized and pending Periodicals publications may be enclosed or attached with merchandise sent at BPM prices. Postage at BPM prices is based on the combined weight of the host piece and the sample copies enclosed.

3.3 Attachments and Enclosures

3.3.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Bound Printed Matter piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

3.3.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Bound Printed Matter piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Bound Printed Matter price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

3.3.3 Additional Enclosures

Bound Printed Matter may have the following additions and enclosures:

- a. Any printed matter mailable as Standard Mail.

363.3.4

- b. Nonprint attachments and enclosures. The combined weight of all nonprint attachments and enclosures in the mailpiece must be less than or equal to 25% of the weight of the BPM in the mailpiece. The individual cost of each nonprint attachment or enclosure must be less than or equal to the cost of a “low cost” item as defined in [703.1.6.11, *Products Mailable at Nonprofit Standard Mail Prices*](#). In addition, the combined cost of all nonprint attachments and enclosures must not exceed two times the cost of a “low cost” item as defined in [703.1.6.11](#).

3.4 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by “From” or “To,” and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as “Do Not Open Until Christmas” and “Happy Birthday, Mother.”
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

4.0 Price Eligibility for Bound Printed Matter Flats

4.1 Price Eligibility

BPM prices are based on the weight of a single addressed piece or 1 pound, whichever is higher, and the zone (where applicable) to which the piece is addressed. Price categories are as follows:

- a. Nonpresorted Price. The nonpresorted price applies to mailings of fewer than 300 pieces and to BPM not mailed at the Presorted or carrier route prices.
- b. Presorted Price. The Presorted price applies to BPM prepared in a mailing of at least 300 pieces, prepared and presorted as specified in [705.8.0, *Preparing Pallets*](#), or [365.5.0, *Preparing Presorted Flats*](#).

- c. Carrier Route Price. The Carrier Route price applies to BPM prepared in a mailing of at least 300 pieces presorted to carrier routes, prepared and presorted as specified in [705.8.0, *Preparing Pallets*](#), or [365.5.0, *Preparing Presorted Flats*](#).
- d. Barcoded Discount—Flats. The barcoded discount applies only to BPM flat-size pieces that bear a correct, readable ZIP+4 or delivery point barcode (DPBC) under [Exhibit 708.4.0](#) for the ZIP+4 Code or numeric DPBC of the delivery address. The pieces must be part of a nonpresorted price mailing of 50 or more flat-size pieces or part of a presort price mailing of at least 300 BPM flat-size pieces prepared under [705.8.0, *Preparing Pallets*](#), and [365.7.0, *Preparing Barcoded Flats*](#). The barcoded discount is not available for flat-size pieces mailed at Presorted DDU prices or carrier route prices. To qualify for the barcoded discount, the flat-size piece must meet the requirements under [301.3.0](#).

4.2 Nonidentical Weight Pieces

[9-11-08] Mailings may contain nonidentical-weight pieces only if Business Mailer Support (BMS) has authorized payment of postage by permit imprint under [705.2.0, *Manifest Mailing System*](#), [705.3.0, *Optional Procedure Mailing System*](#), or [705.4.0, *Alternate Mailing System*](#).

4.3 ZIP Code Accuracy

4.3.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, address means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain prices under [4.3.1d](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [4.3.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Bound Printed Matter Presorted and Carrier Route prices, regardless of any required surcharges, must meet the ZIP Code accuracy standard.

4.3.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.

363.4.3.3

- b. For manually maintained lists or small computerized lists, options include the following:
 1. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
 2. Any mailing list service in [507.7.0](#).
 3. An authorized service provider.
 4. CASS-certified matching software.
 5. USPS Web site, www.usps.com.

4.3.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

5.0 Additional Eligibility Standards for Presorted and Carrier Route Bound Printed Matter Flats

5.1 Basic Standards

In addition to the standards in [2.0](#) and [3.0](#), all pieces in a Bound Printed Matter mailing must:

- a. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
 1. The ZIP Code accuracy standard in [3.3](#).
 2. If the barcode discount for flat-size pieces is claimed (see [3.1](#)), the additional address matching and coding standards in [6.3, Address Standards for Barcode Discount](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).
 3. If the carrier route discount is claimed, the carrier route accuracy standard in [5.3](#).
 4. If an alternative addressing format is used, the additional standards in [602.3.0](#).
 5. If pieces are prepared with detached address labels, the additional standards in [602.4.0](#).
- b. Meet the applicable preparation standards under [365.5.0, Preparing Presorted Flats](#), or [365.6.0, Preparing Carrier Route Flats](#), [365.7.0, Preparing Barcoded Flats](#), or [705.8.0, Preparing Pallets](#).

5.2 Additional Standards for Carrier Route Bound Printed Matter

In addition to the basic standards in [2.0, Basic Eligibility Standards for Bound Printed Matter](#), and [3.2, Attachments or Enclosures of Periodicals Sample Copies](#), all pieces in a Bound Printed Matter carrier route price mailing must:

- a. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:

1. The carrier route accuracy standard in [5.3](#).
 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
 3. If pieces are prepared with detached address labels, the additional standards in [602.4.0](#).
- b. Meet the preparation standards in [365.6.0, *Preparing Carrier Route Flats*](#), or [705.8.0, *Preparing Pallets*](#).

5.3 Carrier Route Accuracy

5.3.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming carrier route prices that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [5.3.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and price is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Bound Printed Matter Carrier Route prices must meet the ZIP Code accuracy standards.

5.3.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, *Address Information System Products*](#), and [708.3.0, *Coding Accuracy Support System \(CASS\)*](#).

5.3.3 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

6.0 Additional Eligibility Standards for Barcoded Bound Printed Matter Flats

6.1 Basic Eligibility Standards for Barcoded Bound Printed Matter

The barcode discount applies only to BPM flat-size pieces that bear a correct, readable ZIP+4 or delivery point barcode (DPBC) under [708.4.0, Standards for POSTNET and Intelligent Mail Barcodes](#), for the ZIP+4 code or numeric DPBC of the delivery address. Instead of ZIP+4 codes or DPBCs, pieces may bear Intelligent Mail barcodes (under [708.4.0](#)) containing a ZIP+4 or delivery point routing code for the delivery address. The pieces must be part of a nonpresorted price mailing of 50 or more flat-size pieces or part of a presort price mailing of at least 300 BPM flat-size pieces prepared under [705.8.0, Preparing Pallets](#), and [365.7.0, Preparing Barcoded Flats](#). The barcode discount is not available for flat-size pieces mailed at Presorted DDU prices or carrier route prices. To qualify for the barcode discount, the flat-size piece must meet the flat sorting machine requirements under [301.3.2, Additional Criteria for Automation Flats](#).

6.2 Weight Standard

Maximum weight limit for barcoded Bound Printed Matter is 20 ounces.

6.3 Address Standards for Barcode Discount

6.3.1 Basic Address Standards

To qualify for barcode discounts, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode as defined in [708.2.0](#) that appears on a mailpiece claimed at an automation price must be the correct barcode for the corresponding delivery address on the piece.

6.3.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits.

6.3.3 Numeric DPBC

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [708.4.0](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code.

6.3.4 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product.

6.3.5 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has

a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used.

6.3.6 Secondary Designator

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used.

6.3.7 Rural and Highway Contract Routes

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line.

6.3.8 Post Office Box

A Post Office box address must contain a Post Office box number that can be exactly matched with the USPS ZIP+4 Product in effect.

363

Commercial Flats: Bound Printed Matter Prices and Eligibility

363.6.3.8

364 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

1.0 Basic Standards for Postage Payment

1.1 Nonpresorted Bound Printed Matter

1.1.1 Payment Method

[9-11-08] The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage and fees for Bound Printed Matter must be paid by permit imprint, as defined in [604.5.0](#). Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Identical-weight pieces must be separated at acceptance into groups that contain pieces all subject to the same zone and same combination of prices (e.g., all are zone 4), unless mailed under [705.2.0](#) through [705.4.0](#) in Advanced Preparation and Special Postage Payment Systems.

1.1.2 Postage Paid with Permit Imprint

[9-11-08] The following standards apply for postage paid with permit imprint:

- Advance Deposit Account. A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees and must not be used to pay postage on any mailpiece that is designed for reply purposes.
- Minimum Quantity. Nonpresorted, non-discounted mailings are not subject to a minimum volume requirement.
- Postage Statement. A complete postage statement must accompany each mailing paid with permit imprint.

1.2 Commercial Bound Printed Matter

1.2.1 Postage Payment Options

[9-11-08] The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Bound Printed Matter may be paid by permit imprint only (see [604.5.0](#)). Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Identical-weight pieces must be separated at acceptance into groups that contain pieces all subject to the same zone and same combination of prices (e.g., all are zone 4), unless mailed under [705.2.0](#) through [705.4.0](#) in Advanced Preparation and Special Postage Payment Systems.

2.0 Mailing Documentation

2.1 Completing Postage Statements

[9-11-08] All mailings must be accompanied by a completed postage statement signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer to correct the postage statement accordingly and document the correction.

2.2 Basic Documentation Standards

[9-11-08] Generally, documentation is required from a mailer when a mailing is presented to the USPS, and supporting documentation of postage is required. Documentation describes the preparation, price levels, content of the mailing and it details the volume and postage data. By comparison with the actual mailing, it describes and supports the claims contained on the postage statement, which accompanies the mailing. It allows the USPS to validate the accuracy of the mailing. Documentation must be submitted when specified for the price claimed.

2.3 Documentation for Mail Claiming the Barcode Discount

[9-11-08] A complete postage statement must accompany each mailing, and it must be supported by documentation produced by PAVE-certified or MAC-certified software or standardized documentation. Mailers may use a single postage statement and a single documentation report for all price levels in a mailing. Documentation of postage is not required if each piece is of identical weight and the pieces are separated by zone and price when presented for acceptance.

2.4 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

2.5 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

2.6 Standard Format for Documentation

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and price claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation.

2.7 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#).

2.8 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

2.9 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

365 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparing Presorted Flats](#)
- [6.0 Preparing Carrier Route Flats](#)
- [7.0 Preparing Barcoded Flats](#)

1.0 General Information for Mail Preparation

1.1 **Basic Preparation—Nonpresorted**

There are no presort, sacking, or labeling standards for nonpresorted price Bound Printed Matter.

1.2 **Definition of Presort Process**

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared.

1.3 **Definition of Mailings**

A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.

1.4 **Terms for Presort Levels**

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, Post Office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *5-digit scheme (bundles and sacks) for flats meeting the automation-compatibility standards in 301.3.0*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in [L007](#).

- d. *5-digit scheme carrier routes (sacks only) for Bound Printed Matter flats*: the ZIP Code in the delivery address on all pieces in carrier route bundles is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in [L001](#).
- e. *5-digit scheme (pallets) for Bound Printed Matter flats*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in [L001](#).
- f. *5-digit metro pallets for Bound Printed Matter flats*: the 5-digit ZIP Codes on pieces in carrier route, automation price, and presorted price bundles are all destined for the same mail processing facility listed in [L006](#).
- g. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- h. *3-digit scheme bundles for flats meeting the automation-compatibility standards in 301.3.0*: the ZIP Code in the delivery address begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L008](#).
- i. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- j. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- k. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- l. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.

1.5 Preparation Definitions and Instructions

[\[8-14-05\]](#) [\[7-3-08\]](#) For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. A *5-digit scheme sort for flats meeting the automation-compatibility standards in 301.3.0* yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and 5-digit bundles for other ZIP Codes. When standards require 5-digit/scheme sort, mailers must prepare all possible 5-digit scheme bundles and sacks of flats before preparing 5-digit bundles and sacks. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are

labeled accordingly. Bundles may be labeled using an optional endorsement line (OEL) under [708.7.0](#) or with a red “5 SCH” bundle label. Bundles are placed in appropriate containers using the OEL “label to” 5-digit ZIP Code or using [L007](#) column B.

- d. *A 5-digit scheme carrier routes sort for Carrier Route Bound Printed Matter flats prepared in sacks or as bundles on pallets yields a 5-digit scheme carrier routes sack or pallet for those 5-digit ZIP Codes listed in [L001](#) and 5-digit carrier routes sacks or pallets for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum sack or pallet volume, with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme carrier routes destination that contain carrier route bundles for only one of the schemed 5-digit areas are still considered to be sorted to 5-digit scheme carrier routes and are labeled accordingly. The 5-digit scheme carrier routes sort is required for Carrier Route Bound Printed Matter flats. Preparation of 5-digit scheme carrier routes sacks or pallets must be done for all 5-digit scheme destinations.*
- e. *A 5-digit scheme sort for Presorted Bound Printed Matter flats prepared as bundles on pallets yields 5-digit scheme pallets containing Presorted price 5-digit bundles for those 5-digit ZIP Codes listed in [L001](#) and yields 5-digit pallets containing Presorted price 5-digit bundles for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum pallet volume, with no further separation by 5-digit ZIP Code required. Pallets prepared for a 5-digit scheme destination that contain 5-digit bundles for only one of the schemed 5-digit areas are still considered to be sorted to the 5-digit scheme and are labeled accordingly. The 5-digit scheme sort is required for Presorted Bound Printed Matter flats. The 5-digit scheme sort may not be used for other mail prepared on pallets. Preparation of 5-digit scheme pallets must be done for all 5-digit scheme destinations.*
- f. *A 5-digit metro sort for Bound Printed Matter flats prepared as bundles on pallets yields 5-digit metro pallets that contain carrier route and/or noncarrier route 5-digit and 3-digit bundles (automation price and/or presorted bundles) for the 5-digit ZIP Codes listed in [L006](#). The ZIP Codes in [L006](#) are treated as a single presort destination, with no further separation by 5-digit ZIP Code required. The 5-digit metro sort is optional and need not be done for all possible destinations in [L006](#).*
- g. *A 3-digit scheme sort for flats meeting the automation-compatibility standards in [301.3.0](#) yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). When standards require 3-digit/scheme sort, mailers must prepare all possible 3-digit scheme bundles of flats before preparing 3-digit bundles. The 3-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 3-digit ZIP Code required. Bundles prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit ZIP Codes are still considered 3-digit scheme sorted and are labeled accordingly. Bundles must be labeled using an optional endorsement line (OEL) under [708.7.0](#) or with a green “3 SCH” bundle*

label. Three-digit scheme bundles are placed in 3-digit through mixed ADC containers, as applicable, using the OEL “label to” 3-digit ZIP Code or using [L008](#) column B.

- h. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- i. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- j. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the Post Office of entry determines the *entry* facility. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- k. A *bundle* is a group of addressed pieces secured together as a unit. Bundle preparation is described in [2.0](#).
- l. A “*logical*” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Bound Printed Matter “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement.
- m. *Cobundling* is available for combining within the same bundle flat-size Bound Printed Matter Presorted price pieces qualifying for and claiming the barcode discount and Presorted price pieces not qualifying for the barcode discount. Pieces may not be combined in more than one physical bundle for each logical presort destination unless presented using an approved manifest mailing system under [705.2.0](#).

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit.

2.2 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye. This standard does not apply to the following:

- a. Bundles placed in or on 5-digit or 5-digit scheme (L001) sacks or pallets.
- b. Bundles placed in carrier route and 5-digit carrier routes sacks.
- c. Bundles of mailpieces at carrier route prices entered at a destination delivery unit (DDU).

2.3 Arranging Pieces in a Bundle (“Facing”)

Except as noted in [2.4, Preparing Bundles of Pieces of Nonuniform Thickness \(“Counterstacking”\)](#), all pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.4 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

2.5 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment.

Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 1. Do not place any bands closer than 1 inch from any bundle edge.
 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 3. Do not use wire or metal banding.
 4. Do not use any loose banding.
- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

2.6 Preparing Bundles

Bundles of flat-size pieces must be secure and stable subject to the following:

- a. If placed on pallets, the specific weight limits in [705.8.0](#).
- b. If placed in sacks, the specific weight limits in [5.0](#), [Preparing Presorted Flats](#), and [6.0](#), [Preparing Carrier Route Flats](#).
- c. If bundles are prepared for entry as unsacked bundles under [366.6.2](#) or [366.6.3](#), the weight limits and other standards in [2.7](#).

2.7 Additional Standards for Unsacked Bundles Entered at DDU Facilities

Mailers may enter unsacked, nonpalletized bundles of flat-size pieces at destination delivery units (DDUs) if all of the following conditions are met:

- a. The maximum weight for a single bundle is 40 pounds; the maximum number of bundles per carrier route is one bundle for each 10 pounds (or increment) of mail for that route, as follows:
 1. Mailers must make the fewest number of bundles possible, up to the 40-pound maximum, while maintaining bundle integrity. To determine the maximum number of bundles allowable for a route, divide the total weight of mail for that route by 10 and round up to the next whole number. For example, if there are 34 pounds of mail for a carrier route, the maximum number of bundles for that route is four ($34 \div 10 = 3.4 = 4$ bundles).

2. Mailers may balance the weight of the bundles across the maximum number of allowable bundles for a route. For example, if there are 36 pounds of mail for a carrier route, the maximum number of bundles for that route is four ($36 \div 10 = 3.6 = 4$ bundles), which may be in four 9-pound bundles.
- b. Mailers must prepare 5-digit bundles for entry at DDUs according to standards in [5.2.1](#). Only presorted flats that weigh more than 1 pound are eligible for the DDU price.
- c. Mailers must prepare bundles to comply with standards in [2.1](#) through [2.6](#) and [2.9](#) through [2.12](#).
- d. Mailers must enter bundles at DDUs according to standards in [366.6.0](#).

2.8 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Bound Printed Matter must meet the applicable minimum and maximum bundle size standards in [705.8.0, Preparing Pallets](#), [5.0, Preparing Presorted Flats](#), or [7.0, Preparing Barcoded Flats](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Except for mixed ADC bundles and for carrier route bundles prepared in sacks, each physical bundle of Bound Printed Matter must contain at least two pieces. For carrier route price Bound Printed Matter prepared in sacks, the last physical bundle to an individual carrier route may consist of a single addressed piece, provided that all other bundles to that carrier route destination contain at least two addressed pieces, and that the total group of pieces to that carrier route (the logical bundle) meets the carrier route price eligibility minimum in [363](#). Bundles prepared on pallets must meet the additional bundling requirements under [705.8.0, Preparing Pallets](#), and each physical bundle, including carrier route price mail, must always contain at least two pieces.

2.9 Pieces With Simplified Addresses

For mail prepared with a simplified address, all pieces for the same Post Office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, Post Office boxholder). Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets and, for Bound Printed Matter in sacks, specific weight limits in [5.0, Preparing Presorted Flats](#), and [6.0, Preparing Carrier Route Flats](#).

2.10 Labeling Bundles

[7-3-08] Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. The label may be

placed anywhere on the address side of the top piece in the bundle. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Five-digit scheme presort level, red Label 5 SCH.
- b. Five-digit presort level, red Label 5.
- c. Three-digit scheme presort level, green Label 3 SCH.
- d. Three-digit presort level, green Label 3.
- e. ADC presort level, pink Label A.
- f. Mixed ADC presort level, tan Label X.

2.11 Use of Carrier Route Information Lines

Bundles for individual carrier routes, rural routes, highway contract routes, Post Office box sections, or general delivery units must be prepared with facing slips under [2.12](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Carrier Route Bound Printed Matter mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level.

2.12 Facing Slips—All Carrier Route Mail

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “BPM FLTS CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin Post Office.

3.0 Sacks

3.1 Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds.

4.0 Sack Labels

4.1 Basic Standards

Sack labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.
- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.

- d. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.
- e. Container labels for automation price mailings are subject to [4.9](#) and [708.6.0](#).

4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock (required for mailings of automation-compatible flats, optional for others).
- c. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- d. Height (perpendicular to printing):
 - 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.
 - 2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

4.3 Additional Standards for Barcoded Sack Labels

In addition to [4.2](#), barcoded sack labels must meet the standards in [4.9](#) and [708.6.2](#) (for 2-inch labels) or [708.6.3](#) (for 1-inch labels).

4.4 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

4.5 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards.

365.4.6

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

CONTENT TYPE	CODE
Barcoded	BC
Barcoded and Nonbarcoded	BC/NBC
Carrier Route	C (type of route)
Carrier Routes	CR-RT or CR-RTS
Digit	D
Flats	FLTS
General Delivery Unit	G
Highway Contract Route	H
Mixed	MXD
Nonbarcoded	NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0)
Package Services	PSVC
Post Office Box Section	B
Rural Route	R
Scheme	SCH
Working	WKG

4.6 **Line 3 (Office of Mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

4.7 **Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.8 **Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.

- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

4.9 Basic Standards for Barcoded Sack Labels

Mailers must use barcoded sack labels for barcoded flat-size mailings. Barcoded labels must meet these general standards:

- a. Mailers must use the appropriate size label as described in [4.2](#).
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Do not make alterations (such as handwritten changes) to preprinted barcoded labels.
- d. Mailers must insert a barcoded label completely into the label holder on the sack to prevent its loss during transport and processing.

5.0 Preparing Presorted Flats

5.1 Basic Standards

All mailings of Presorted Bound Printed Matter (BPM) are subject to the standards in [5.2, Bundling](#), and [5.3, Sacking](#), and to these general standards:

- a. Each mailing must meet the applicable standards in [302.2.0, Placement and Content of Mail Markings](#), [363, Prices and Eligibility](#), [365, Mail Preparation](#), and [366, Enter and Deposit](#).
- b. All pieces must be sorted to the finest extent possible under [5.2, Bundling](#), and [5.3, Sacking](#), or palletized under [705.8.0](#).
- c. Subject to [302.2.2](#), pieces must be marked “Bound Printed Matter” (or “BPM”) and “Presorted” (or “PRSRT”).

5.2 Bundling

5.2.1 Required Bundling

Mailers must bundle pieces before putting them in sacks. Mailers must prepare a bundle when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces or 10 pounds, whichever occurs first. Only mixed ADC bundles may contain smaller volumes. Five-digit bundles placed in 5-digit sacks and unsacked 5-digit bundles prepared for DDU entry may weigh a maximum of 40 pounds. For all other bundles, the maximum weight for each bundle is 20 pounds.

5.2.2 Bundling and Labeling

[7-3-08] For mailings consisting entirely of pieces meeting the automation-compatibility criteria in [301.3.0](#), pieces must be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). Preparation sequence and labeling:

- a. 5-digit scheme (required); red Label 5 SCH or OEL. See definition in [1.5e](#).
- b. 5-digit (required); red Label 5 or OEL. See definition in [1.5e](#).
- c. 3-digit scheme (required); green Label 3 SCH or OEL. See definition in [1.5g](#).

- d. 3-digit (required); green Label 3 or OEL. See definition [1.5g](#).
- e. ADC (required); pink Label A or OEL.
- f. Mixed ADC (required); tan Label X or OEL.

5.3 Sacking

5.3.1 Required Sacking

Mailers may prepare flats as unsacked bundles under [2.7](#) or in bundles on pallets. Otherwise, mailers must prepare a sack when the quantity of mail for a required presort destination reaches either 20 addressed pieces or 20 pounds, whichever occurs first. Only mixed ADC sacks may contain smaller volumes. Optional SCF sacks are subject to the same minimum piece or pound provision as required sacks. Sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 20-piece minimum; those that weigh more than 1 pound must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 20-piece or 20-pound minimum applies), or sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight.

5.3.2 Separation by Zone

[9-11-08] Pieces for each zone must be sacked separately. When presented for verification, sacks must be separated by zone. Exception: Pieces for different zones may be sacked together, and the sacks do not have to be separated by zone for verification if the mailing is prepared under [705.2.0, Manifest Mailing System](#), [705.3.0, Optional Procedure Mailing System](#), [705.4.0, Alternate Mailing System](#), or [5.3.3, Commingling Zones](#).

5.3.3 Commingling Zones

[9-11-08] Subject to this section, when zoned BPM is presented as individual pieces, the mailing must be separated by zone. Nonidentical-weight pieces may not be commingled unless authorized by the Business Mailer Support manager. The mail must be prepared and documented:

- a. Under [705.2.0, Manifest Mailing System](#), or [705.4.0, Alternate Mailing System](#);
or
- b. Under all these conditions:
 - 1. A unique number is assigned to each pallet in the mailing and printed on a separate line at the top of the pallet label (above the Line 1 information).

2. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to the pallets in the mailing, that shows the Post Office where the mail is to be entered (entry Post Office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement, the name and address of the mailer, the permit number, the date of mailing, individual line entries for each pallet, and the total number of pieces to each zone in the entire mailing or mailing segment. Line entries for pallets containing mail for only one zone must show the pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the pallet. Entries for pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the pallet. Mailings are not accepted if there are discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage.

5.3.4 Cosacking Presorted Mail With Barcoded Mail

The following standards apply:

- a. If the mailing job contains a carrier route mailing, a Presorted price mailing qualifying for and claiming the barcode discount under [363](#), and a Presorted price mailing (not claiming the barcode discount), then the carrier route mailing must be prepared under [6.0](#), and the Presorted price mailing qualifying for and claiming the barcode discount and the Presorted price mailing (not claiming the barcode discount) must be cosacked under [705.9.0](#). As an option, the Presorted price pieces qualifying for and claiming the barcode discount may be cobundled with Presorted price pieces (not claiming the barcode discount) under [705.11.0](#). Cobundled pieces must be cosacked under [705.9.0](#).
- b. If the mailing job contains only a Presorted price mailing qualifying for and claiming the barcode discount and a Presorted price mailing (not claiming the barcode discount), both mailings must be cosacked under [705.9.0](#). As an option, the Presorted price pieces qualifying for and claiming the barcode discount may be cobundled with Presorted price pieces (not claiming the barcode discount) under [705.11.0](#). Cobundled pieces must be cosacked under [705.9.0](#).

5.3.5 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit/scheme (required); see [1.4e](#); scheme sort required, only for pieces meeting the automation-compatibility criteria in [301.3.0](#); minimum 20 addressed pieces; labeling:
 1. Line 1: For 5-digit scheme sacks, use [L007](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.5](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, "PSVC FLT 5D SCH NBC." For 5-digit sacks, "PSVC FLTS 5D NON BC."
- b. 3-digit (required); labeling:

365.6.1

1. Line 1: [L002](#), Column A.
2. Line 2: "PSVC FLTS 3D NON BC."
- c. SCF (optional); labeling:
 1. Line 1: [L005](#), Column B.
 2. Line 2: "PSVC FLTS SCF NON BC."
- d. ADC (required); labeling:
 1. Line 1: [L004](#), Column B.
 2. Line 2: "PSVC FLTS ADC NON BC."
- e. Mixed ADC (required); labeling:
 1. Line 1: Use [L009](#), Column B.
 2. Line 2: "PSVC FLTS NON BC WKG."

6.0 Preparing Carrier Route Flats

6.1 Basic Standards

All mailings of Carrier Route Bound Printed Matter (BPM) are subject to the standards in [6.2](#) and [6.3](#) and to these general standards:

- a. Each mailing must meet the applicable standards in [363](#), [Prices and Eligibility](#), [365](#), [Mail Preparation](#), [366](#), [Enter and Deposit](#). The mailer is responsible for proper payment of postage. (Information regarding postage payment methods is specified by standards according to each shape and class of mail, e.g. [364](#) for Bound Printed Matter Flats.
- b. All pieces must be sorted to the finest extent possible under [6.2](#) and [6.3](#), [Sacking](#), or palletized under [705.8.0](#).
- c. Subject to [302.2.2](#), pieces must be marked "Bound Printed Matter" (or "BPM") and "Carrier Route Presort" (or "CAR-RT SORT").

6.2 Required Bundling

A carrier route bundle (or bundles) must be prepared when there are 10 or more addressed pieces or 10 or more pounds, whichever occurs first, for an individual carrier route. Smaller volumes are not permitted. The maximum weight of each physical bundle is 40 pounds. Each bundle must contain at least two addressed pieces except for the last bundle for each carrier route destination under [2.0](#). Bundles must be labeled with a facing slip unless the bundle is labeled using a carrier route information line ([708.7.0](#)) or an optional endorsement line ([708.6.0](#)). Bundling also is subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 10-piece minimum; those that weigh more than 1 pound must be prepared using the 10-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece

weight determines whether the 10-piece or 10-pound minimum applies), or bundle by the actual piece count or mail weight for each bundle, if documentation can be provided with the mailing that shows the number of pieces and their total weight.

- c. Mailers must note on the accompanying postage statement whether they applied the piece count, weight, or both.

6.3 Sacking

6.3.1 Required Sacking

Mailers may prepare flats as unsacked bundles under [2.7](#) or in bundles on pallets. Otherwise, mailers must prepare a direct carrier route sack when the quantity of mail for an individual carrier route reaches either 20 addressed pieces or 20 pounds, whichever occurs first; smaller volumes are not permitted. Mailers then must place remaining bundles in 5-digit scheme carrier routes sacks or 5-digit carrier routes sacks, which have no minimum sack size. Carrier route sacks also are subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 20-piece minimum; those that weigh more than 1 pound must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 20-piece or 20-pound minimum applies), or sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight.

6.3.2 Separation by Zone

[9-11-08] Pieces for each zone must be sacked separately. When presented for verification, sacks must be separated by zone. Exception: Pieces for different zones may be sacked together, and the sacks do not have to be separated by zone for verification if the mailing is prepared under [705.2.0, Manifest Mailing System](#), [705.3.0, Optional Procedure Mailing System](#), [705.4.0, Alternate Mailing System](#), or [6.3.3, Commingling Zones](#).

6.3.3 Commingling Zones

[9-11-08] Subject to this section, when zoned BPM is presented as individual pieces, the mailing must be separated by zone. Nonidentical-weight pieces may not be commingled unless authorized by the Business Mailer Support manager. The mail must be prepared and documented:

- a. Under [705.2.0, Manifest Mailing System](#), or [705.4.0, Alternate Mailing System](#).
- b. Under all these conditions:
 1. A unique number is assigned to each pallet in the mailing and printed on a separate line at the top of the pallet label (above the Line 1 information).

2. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to the pallets in the mailing, that shows the Post Office where the mail is to be entered (entry Post Office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement, the name and address of the mailer, the permit number (if applicable), the date of mailing, individual line entries for each pallet, and the total number of pieces to each zone and in the entire mailing or mailing segment. Line entries for pallets containing mail for only one zone must show the pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the pallet. Entries for pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the pallet. Mailings are not accepted if there are discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage.

6.3.4 Residual Pieces

Residual pieces not sorted under 6.0 may be prepared as a Presorted Bound Printed Matter mailing under 5.0 provided that they are part of the same mailing job and reported on the same postage statement. Residual pieces paid at the Presorted price do not need to meet a separate 300 piece minimum. These pieces must be separated from the Carrier Route portion when presented to the USPS for verification. Presorted flats weighing 1 pound or less are not eligible for DDU prices.

6.3.5 Sack Preparation

Preparation sequence and Line 1 sack labeling:

- a. Carrier route: required; for Line 1, use city, state, and 5-digit ZIP Code on mail (see 4.4 for overseas military mail).
- b. 5-digit scheme carrier routes: required (no minimum); for Line 1, use L001, Column B.
- c. 5-digit carrier routes: required (no minimum); for Line 1, use city, state, and 5-digit ZIP Code destination of bundles (see 4.4 for overseas military mail).

6.3.6 Sack Label Line 2

Line 2 information:

- a. Carrier route: "PSVC FLTS CR," followed by the route type and number.
- b. 5-digit scheme carrier routes: "PSVC FLTS CR-RTS SCH."
- c. 5-digit carrier routes: "PSVC FLTS CR-RTS."

6.3.7 Exception to Sacking

Sacking is not required for bundles that are prepared for and entered at DDU prices; such bundles may be bedloaded and may weigh up to 40 pounds each.

7.0 Preparing Barcoded Flats

7.1 Basic Standards

Flat-size Bound Printed Matter pieces claiming the barcode discount must be prepared under 7.0 and the eligibility standards for the price claimed. Bundle and sack preparation are subject to 365. Sacks must bear the appropriate barcoded container labels under 4.9.

7.2 Mailings

All pieces in a mailing must meet the standards in 7.0 and be sorted together to the finest extent required. Bound Printed Matter mailings may include presorted pieces claiming the barcode discount.

7.3 Bundling

7.3.1 Bundle Standards

All pieces must be prepared in bundles and meet the following requirements:

- a. Meet both the size dimensions and the turning ability and deflection standards under 301.3.2, *Additional Criteria for Automation Flats*.
- b. The physical size of each bundle for each specific presort destination may contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum, depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Price eligibility is not affected when a physical bundle contains fewer pieces than the minimum bundle size for the above reasons.

7.3.2 Bundle Preparation

[7-3-08] Bundles must be prepared and labeled in the following sequence:

- a. 5-digit scheme: (required); see definition in 1.5e; minimum 10 pieces or 10 pounds, maximum weight 20 pounds; Red Label 5 SCH or OEL.
- b. 5-digit: (required); see definition in 1.5e; minimum 10 pieces or 10 pounds, maximum weight 20 pounds; Red Label 5 or OEL.
- c. 3-digit scheme (required); see definition in 1.5g; minimum 10 pieces or 10 pounds, maximum weight 20 pounds; Green Label 3 SCH or OEL.
- d. 3-digit (required); see definition in 1.5g; minimum 10 pieces or 10 pounds, maximum weight 20 pounds; Green Label 3 or OEL.
- e. ADC: (minimum 10 pieces or 10 pounds, maximum weight 20 pounds); pink Label A or OEL.
- f. Mixed ADC: (no minimum, maximum weight 20 pounds); tan Label X or OEL.

7.3.3 Scheme Bundle Preparation

See 1.5c and 1.5g for additional standards for pieces prepared in scheme bundles.

7.4 Sacking

7.4.1 Sack Preparation and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit/scheme (see 1.5e) (required), minimum 20 addressed pieces; labeling:

365.7.5

1. Line 1: For 5-digit scheme sacks, use [L007](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.2](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, “PSVC FLTS 5D SCH BC.” For 5-digit sacks, “PSVC FLTS 5D BC.”
- b. 3-digit (required, except for optional bundles with 3-digit ZIP Code prefixes indicated by an “N” in [L002](#), when optional SCF sacks are prepared); minimum 20 addressed pieces; labeling:
1. Line 1: [L002](#), Column A.
 2. Line 2: “PSVC FLTS 3D BC.”
- c. SCF (optional); minimum 20 addressed pieces; labeling:
1. Line 1: [L005](#), Column B.
 2. Line 2: “PSVC FLTS SCF BC.”
- d. ADC (required); minimum 20 addressed pieces; labeling:
1. Line 1: [L004](#), Column B.
 2. Line 2: “PSVC FLTS ADC BC.”
- e. Mixed ADC (required); no minimum; labeling:
1. Line 1: [L009](#), Column B.
 2. Line 2: “PSVC FLTS BC WKG.”

7.5 Mixed Price Preparation

7.5.1 Cobundling and Cosacking Mixed Price Mail

The following standards apply to Bound Printed Matter:

- a. If the mailing job contains a carrier route mailing, a Presorted price mailing qualifying for and claiming the barcode discount under [363.6.1](#), and a Presorted price mailing (not claiming the barcode discount), then the carrier route mailing must be prepared under [6.0](#), and the Presorted price mailing qualifying for and claiming the barcode discount and the Presorted price mailing (not claiming the barcode discount) must be cosacked under [705.9.0](#). As an option, the Presorted price pieces qualifying for and claiming the barcode discount may be cobundled with Presorted price pieces (not claiming the barcode discount) under [705.11.0](#). Cobundled pieces must be cosacked under [705.9.0](#).
- b. If the mailing job contains only a Presorted price mailing qualifying for and claiming the barcode discount and a Presorted price mailing (not claiming the barcode discount), both mailings must be cosacked under [705.9.0](#). As an option, the Presorted price pieces qualifying for and claiming the barcode discount may be cobundled with Presorted price pieces (not claiming the barcode discount) under [705.11.0](#). Cobundled pieces must be cosacked under [705.9.0](#).

- c. If the mailing job contains only a carrier route mailing and a Presorted price mailing qualifying for and claiming the barcode discount, each mailing must be prepared separately under the applicable standards in [6.0](#) and [7.0](#).

7.5.2 Merged Containerization

When the conditions and preparation standards in [705.10.0](#), [705.12.0](#), or [705.13.0](#) are met, 5-digit bundles of Presorted (barcoded and nonbarcoded pieces) and carrier route price mail that are part of the same mailing job may be combined on merged 5-digit scheme sacks or pallets and merged 5-digit sacks or pallets. Bundles that are cosacked or copalletized must be part of the same mailing job and mail class. Barcode discount price pieces may be cobundled with presorted price pieces under [705.11.0](#)

366 Enter and Deposit

Overview

- [1.0 Deposit of Nonpresorted Bound Printed Matter](#)
- [2.0 Presenting a Mailing](#)
- [3.0 Destination Entry](#)
- [4.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [5.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [6.0 Destination Delivery Unit \(DDU\) Entry](#)

1.0 Deposit of Nonpresorted Bound Printed Matter

1.1 Nonpresorted Mailings

[9-11-08] Nonpresorted Bound Printed Matter postage must be paid via permit imprint and be deposited and accepted at the Post Office that issued the permit, at a time and place designated by the postmaster, except as otherwise provided for plant-verified drop shipments under [604.5.0](#).

2.0 Presenting a Mailing

2.1 Verification and Entry—Presorted, Carrier Route, Destination Entry, and Barcoded Mailings

[9-11-08] All presorted, carrier route, destination entry, and barcoded commercial mailings must be presented for verification and acceptance at the Post Office where the permit is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-verified drop shipment (PVDS) mailings must be presented for verification, acceptance, and entry under [705.15.0](#). Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement.

2.2 Verification and Entry—Nonpresorted Mailings

[9-11-08] Nonpresorted Bound Printed Matter is not accepted at retail counters, in collection boxes, or by carriers. Mailers must deposit nonpresorted Bound Printed Matter only at the Post Office where the permit is held at the time and place specified by the postmaster at the office of mailing (see [604.5.0](#)).

2.3 Office of Mailing

Bound Printed Matter must be mailed at the Post Office from which the zone price postage was computed, except under [2.4, Redirected Mailings](#), and [2.5, BMC Acceptance](#).

2.4 Redirected Mailings

A mailer who presents large mailings of zoned Package Services mail may be authorized or directed to deposit such mailings at another postal facility when processing or logistics make such an alternative desirable for the USPS, subject to these conditions:

366.2.5

- a. Zoned postage need not be recomputed if both the original Post Office of mailing and the alternative facility use the same zone chart for computing zoned postage, based on the 3-digit prefix of their ZIP Codes.
- b. Postage *must* be recomputed on pieces in mailings redirected to a postal facility that uses a different zone chart for computing zoned postage.

2.5 **BMC Acceptance**

[9-11-08] A mailer may present Bound Printed Matter at a BMC for acceptance if:

- a. Permit imprint postage is paid through an advance deposit account at the BMC parent Post Office or another Post Office in the BMC service area, unless otherwise permitted by standard.
- b. Zoned postage is computed from the BMC parent Post Office.
- c. The BMC is authorized by Form 4410 to act as acceptance agent for the entry Post Office.

2.6 **Drop Shipment Information**

Essential information for entering drop shipment Bound Printed Matter mailings at specific postal facilities can be found in the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1, Postal Service](#)).

3.0 Destination Entry

3.1 **General**

Destination entry prices apply to Presorted and carrier route Bound Printed Matter (BPM) that is deposited at a destination bulk mail center (DBMC), destination sectional center facility (DSCF), or destination delivery unit (DDU) as specified below. Eligibility for a destination entry price is determined by the sort level, processing category of the mail, and the type of container the mail is in (sack or pallet). Each piece can claim only one destination entry price; an individual pallet may contain pieces claimed at different destination entry prices.

3.2 **Minimum Volume**

A destination entry price BPM mailing is subject to these minimum volume requirements:

- a. Each mailing must contain at least 300 presorted addressed pieces or 300 Carrier Route addressed pieces.
- b. Except as provided in [3.2e](#), each group of pieces prepared for deposit at different destination entry Post Offices must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by the appropriate Form 3605 postage statement.
- c. Separate presorted and Carrier Route mailings may be copalletized under [705.8.0](#).

- d. Pieces deposited at the same destination entry Post Office but claimed at different destination entry prices may be included in a single mailing and reported on the same postage statement (subject to one minimum volume requirement) if the destination entry Post Office is the proper facility for claiming each of the destination entry discounts.
- e. When Presorted or Carrier Route mailings are presented together under the plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from a single presort file (i.e., mailing job) for all line items to all destinations reported on a single Form 3605 and accompanied by a postage statement register to meet the separate 300-piece minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 300 pieces for a presorted or Carrier Route mailing entered at a single destination entry Post Office if there is a total of at least 300 Presorted price pieces and/or 300 Carrier Route pieces for all entry points combined for the single presort file listed on Form 3605 and the postage statement register.

3.3 Postage Payment

Postage payment for destination entry mailings is subject to the same standards that apply generally to BPM. Postage and fees are paid to the Post Office that verifies the mailings.

3.4 Mailing Fee

A destination entry mailing fee ([363.1.2.5](#)) must be paid once each 12-month period at each postal facility where the mailing(s) are verified. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment.

3.5 Documentation

Each mailing must be accompanied by the appropriate Form 3605 and, if applicable, Form 8125. No additional documentation is required for destination entry prices.

3.6 Plant Loads

Plant load mailings, including expedited plant load shipments, are not eligible for destination entry discounts.

3.7 Mailings of Unsacked Bundles

Mailers may present unsacked, nonpalletized bundles of BPM flats that are properly prepared for and entered at DDU prices and unloaded according to standards in [3.9.9](#). Pieces in these bundles are not eligible for barcode discounts.

3.8 Verification

3.8.1 Place

As directed by the postmaster, the mailer must present destination entry mailings to USPS employees for verification either:

- a. At the origin mailer's plant or the origin Post Office serving the mailer's plant under an authorized plant-verified drop shipment system.
- b. At the destination Post Office or business mail entry unit.

3.8.2 Mail Separation and Presentation

Destination entry price mail must be verified under a PVDS system ([705.15.0](#)) or be presented for verification and acceptance at a BMEU located at a destination BMC, destination SCF, or other designated destination postal facility. Only plant-verified drop shipments may be deposited at a destination delivery unit not co-located with a Post Office or other postal facility having a business mail entry unit. When presented to the USPS, destination entry mailings must meet the following requirements:

- a. Each mailing must be separated from other mailings for verification. For PVDS, destination entry price mailings for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow for reconciliation with each accompanying Form 8125, 8125-C, or 8125-CD.
- b. Mail must be separated from freight transported on the same vehicle.
- c. If Periodicals mail is on the same vehicle as BPM, then the Periodicals mail should be loaded toward the tail of the vehicle so that, for each destination entry, Periodicals mail can be offloaded first.
- d. Form 8125, 8125-C, or 8125-CD must accompany all PVDS mailings.

3.8.3 Form 8125

When mailings are verified and paid for at a postal facility different from the one at which they are accepted as mail and deposited into the mailstream, the mailer must ensure that they are accompanied by a Form 8125 completed by the mailer and the verifying Post Office.

3.8.4 At BMC

For a mailing to be verified at a BMC, the Post Office where the mailer's account or license is held must be within the service area of that BMC. The Post Office must authorize the BMC to act as its agent by sending Form 4410 to the BMC.

3.8.5 PVDS Seal

The mailer may ask that a PVDS band seal secure the vehicle containing verified mailings before dispatch to the destination facility.

3.8.6 Mailer Transport

The mailer must transport the PVDS mailing from the place where it was verified to the destination postal facility.

3.8.7 Volume Standards

Except as permitted for a local mailer under [3.9.12](#), destination entry mailings are subject to these volume standards:

- a. Regardless of total volume, the pieces for which a destination price is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, mailer is the party presenting the material to the USPS (or for whom a transportation company has presented the material to the USPS).

- b. The same mailer may not in a 24-hour period present for verification and acceptance more than four destination price mailings at the same destination postal facility (or at another acting as its agent). The mailer may ask for a waiver of this limit when scheduling the deposit of the mailings. There is no maximum for plant-verified drop shipments.

3.9 Deposit

3.9.1 Time and Location of Deposit

Each mailing claimed at a destination price must be deposited at the time and location specified by the USPS. Mailings must be presented in vehicles that are compatible with dock, yard, and DDU operations, as applicable.

3.9.2 Freight

Drop shipments are freight until deposited and accepted as mail at the destination facility.

3.9.3 Appointments

Appointments must be made for destination entry price mail as follows:

- a. Except for a local mailer under [3.9.12](#) and mailings of perishable commodities, appointments for deposit of destination entry price mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.
- b. Electronic appointments may be made through the Dropship Appointment System (DSAS) by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancellations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.
- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often.
- d. When Periodicals are transported together with BPM as a mixed load ([707.29.0](#)), an appointment must be obtained for deposit at a destination entry facility.

3.9.4 Advance Scheduling

Mailers must schedule appointments for deposit of destination entry price mail under 3.9.3 and the conditions below. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type.

3.9.5 Adherence to Schedule

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units.

3.9.6 Redirection by USPS

A mailer may be directed to transport destination entry price mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints.

3.9.7 Redirection at Mailer's Request

For service reasons, a mailer may ask to transport destination SCF price mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF price in this situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF.

3.9.8 Recurring Appointments

Recurring appointments refer to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current

arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule.

3.9.9 Vehicle Unloading

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. At BMCs and ASFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At destination delivery units (DDUs), drivers must unload all mail within 1 hour of arrival. Unloading procedures are as follows:
 1. If pallets or pallet boxes are stacked, drivers must unload, unstrap, and unstack them.
 2. At DDUs that cannot handle pallets, drivers must unload any mail from pallets and place it into containers as delivery unit employees specify.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area.

3.9.10 Demurrage

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry price mailings.

3.9.11 Appeals

Mailers who believe they are denied equitable treatment may appeal to the manager, Customer Service (district), responsible for the destination postal facility.

3.9.12 Exception for Local Mailer

The restrictions in [3.8.7, Volume Standards](#), and [3.9.3, Appointments](#), do not apply when a mailer deposits mailings for verification and acceptance at the local Post Office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment

366.4.1

authorization. Under this exception, the mailer may claim the destination entry prices for mailings or portions of mailings deposited at the local Post Office that meet the standards in [4.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [5.0, Destination Sectional Center Facility \(DSCF\) Entry](#), or [6.0, Destination Delivery Unit \(DDU\) Entry](#).

4.0 Destination Bulk Mail Center (DBMC) Entry

4.1 Eligibility

Pieces in a mailing meeting the standards in [3.0, Destination Entry](#), and [4.0](#) are eligible for the DBMC price when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route prices, subject to the corresponding standards for those prices.
- b. Are deposited at a BMC or ASF.
- c. Are addressed for delivery to one of the 3-digit ZIP Codes served by the BMC or ASF where deposited that are listed in [Exhibit 4.1, BMC/ASF—DBMC Price Eligibility](#).
- d. Are placed in a sack or pallet that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within that BMC's or ASF's service area (see [Exhibit 4.1](#)).

4.2 Presorted Flats

Presorted flats in sacks or on pallets at all sort levels may claim DBMC prices. Separate mixed ADC sacks must be prepared for flats eligible for and claimed at the DBMC price and for flats not claimed at the DBMC price. Use the “label to” ZIP Code of the ADC to assign ADC bundles to the respective mixed ADC sack. Use the

366.4.3

address on the mailpieces to assign pieces to the respective mixed ADC bundle. All pieces in an ADC sack or in a palletized ADC bundle are eligible for the DBMC discount if the ADC facility ZIP Code (as shown in Line 1 of the corresponding sack label or the ADC facility that is the destination of the palletized ADC bundle as would be shown on an ADC sack label for that facility using [L004](#), Column B) is within the service area of the BMC or ASF at which the sack is deposited. Mail must be entered at the appropriate facility under [4.1, Eligibility](#).

4.3 **Carrier Route Flats**

Carrier Route flats in sacks or on pallets at all sort levels may claim DBMC prices. Mail must be entered at the appropriate facility under [4.1, Eligibility](#).

5.0 Destination Sectional Center Facility (DSCF) Entry

5.1 **Eligibility**

Pieces in a mailing meeting the standards in [3.0, Destination Entry](#), and [5.0](#) are eligible for the DSCF price when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route prices, subject to the corresponding standards for those prices.
- b. Are deposited at an SCF listed in [L005](#) or [L006](#), except that machinable parcels prepared on pallets for the 5-digit ZIP Codes listed in [Exhibit 5.1, BMC Deposit of DSCF Price Pallets](#), must be entered at the corresponding BMC facility shown in that exhibit (not at the SCF) unless an exception is requested and granted. An exception to [Exhibit 5.1](#), must be requested at least 15 days in advance of the mailing in writing from the area manager, Operations Support, who has jurisdiction over the BMC and SCF. Exceptions, if granted, are for a limited time.
- c. Are addressed for delivery to one of the 3-digit ZIP Codes served by the facility, or are part of a 3-digit scheme combination in [L008](#).
- d. Are placed in a sack or pallet that is labeled to the facility where deposited or labeled to a postal facility within that facility's service area.

5.2 Presorted Flats

Presorted flats and automation flats in sacks for the 5-digit, 3-digit, and SCF sort levels or on pallets at the 5-digit scheme, 5-digit, 3-digit, SCF, and ASF sort levels may claim DSCF prices. Mail must be entered at the appropriate facility under [5.1](#).

5.3 Carrier Route Flats

Carrier route flats in sacks at all sort levels or on pallets at the 5-digit scheme carrier routes, 5-digit carrier routes, 5-digit metro, 3-digit, SCF, and ASF sort levels may claim DSCF prices. Mail must be entered at the appropriate facility under [5.1](#).

6.0 Destination Delivery Unit (DDU) Entry

6.1 Eligibility

Pieces in a mailing meeting the standards in [3.0](#), [Destination Entry](#), and [6.0](#) are eligible for the DDU price when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route prices, subject to the corresponding standards for those prices.
- b. Are addressed for delivery within the ZIP Code(s) served by the destination delivery unit.

- c. Are deposited:
 - 1. For Carrier Route flats, at the DDU where the carrier cases the mail, as shown in the Drop Shipment Product.
 - 2. For Presorted flats, the Drop Shipment Product must be used to determine the correct destination entry facility for the 5-digit sorted flats entered at Presorted prices. If the Drop Shipment Product lists multiple facilities for a single 5-digit ZIP Code, then the mailer must inquire about the correct drop site when contacting the DDU to schedule an appointment.

6.2 Presorted Flats

Presorted flats that weigh more than 1 pound in 5-digit sacks, on 5-digit scheme or 5-digit pallets, or prepared as unsacked 5-digit bundles may claim DDU prices. Mailers must enter mail at the appropriate facility under [6.1](#). Presorted flats weighing 1 pound or less are not eligible for DDU prices.

6.3 Carrier Route Flats

Carrier route flats in sacks, on 5-digit carrier routes scheme and 5-digit carrier routes pallets, or prepared as unsacked carrier route bundles may claim DDU prices. Mailers must enter mail at the appropriate facility under [6.1](#).

373 Prices and Eligibility

374 Postage Payment and Documentation

375 Mail Preparation

376 Enter and Deposit

373 Prices and Eligibility

Overview

- [1.0 Prices and Fees for Media Mail](#)
- [2.0 Content Standards for Media Mail Flats](#)
- [3.0 Price Eligibility for Media Mail Flats](#)

1.0 Prices and Fees for Media Mail

1.1 Price Application

Postage is based on the price that applies to the weight (postage) increment of each addressed piece.

1.2 Media Mail Price Application

The Media Mail price is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. (Price application is identical for the single-piece and presort prices.) For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage price per piece is that for a piece weighing 1 pound.

1.3 Shape, Flexibility, and Thickness

Flat-size pieces that do not meet the standards in [301.1.3](#) through [301.1.4](#) must be prepared as parcels.

1.4 Media Mail Presorted Prices

Weight Not Over (pounds)	5-Digit	Basic
1	\$1.42	\$1.90
2	1.77	2.25
3	2.12	2.60
4	2.47	2.95
5	2.82	3.30

1.5 Mailing Fee

A mailing fee must be paid once each 12-month period at each Post Office of mailing by or for any person who mails at the Presorted Media Mail prices. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment. Presort mailing fees for Media Mail, per 12-month period: \$180.00.

1.6 Computing Postage for Media Mail

1.6.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected

pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.6.2 Computing Postage for Affixed Postage

For each piece, affix the postage for the weight increment (including any surcharges or discounts). To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece.

1.6.3 Computing Postage for Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable price per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent.

2.0 Content Standards for Media Mail Flats

2.1 General

Mailable matter meeting one of the specific eligibility standards in [2.2](#), and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Media Mail.

2.2 Content Standards

Only these items may be mailed at the Media Mail prices:

- a. Books, including books issued to supplement other books, of at least eight printed pages, consisting wholly of reading matter or scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising matter other than incidental announcements of books. Advertising includes paid advertising and the publishers' own advertising in display, classified, or editorial style.
- b. 16-millimeter or narrower width films, which must be positive prints in final form for viewing, and catalogs of such films of 24 pages or more (at least 22 of which are printed). Films and film catalogs sent to or from commercial theaters do not qualify for the Media Mail price.
- c. Printed music, whether in bound or sheet form.
- d. Printed objective test materials and their accessories used by or on behalf of educational institutions to test ability, aptitude, achievement, interests, and other mental and personal qualities with or without answers, test scores, or identifying information recorded thereon in writing or by mark.
- e. Sound recordings, including incidental announcements of recordings and guides or scripts prepared solely for use with such recordings. Video recordings and player piano rolls are classified as sound recordings.
- f. Playscripts and manuscripts for books, periodicals, and music.
- g. Printed educational reference charts designed to instruct or train individuals for improving or developing their capabilities. Each chart must be a single printed sheet of information designed for educational reference. The information on the

chart, which may be printed on one or both sides of the sheet, must be conveyed primarily by graphs, diagrams, tables, or other nonnarrative matter. An educational reference chart is normally but not necessarily devoted to one subject. A chart on which the information is conveyed primarily by textual matter in a narrative form does not qualify as a printed educational reference chart for mailing at the Media Mail prices even if it includes graphs, diagrams, or tables. Examples of qualifying charts include maps produced primarily for educational reference, tables of mathematical or scientific equations, noun declensions or verb conjugations used in the study of languages, periodic table of elements, botanical or zoological tables, and other tables used in the study of science.

- h. Loose-leaf pages and their binders consisting of medical information for distribution to doctors, hospitals, medical schools, and medical students.
- i. Computer-readable media containing prerecorded information and guides or scripts prepared solely for use with such media.

2.3 Postal Inspection

Media Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Media Mail prices constitutes consent by the mailer to postal inspection of the contents.

2.4 Attachments and Enclosures

2.4.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Media Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

2.4.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Media Mail piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Media Mail price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

2.4.3 Loose Enclosures

In addition to the enclosures and additions listed in [343.2.5, *Attachments and Enclosures*](#), any printed matter that is mailable as Standard Mail may be included loose with any qualifying material mailed at the Media Mail prices.

2.4.4 Enclosures in Books

Enclosures in books mailed at Media Mail prices are subject to these additional standards:

- a. Either one envelope or one addressed postcard may be bound into the pages of a book. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [2.4.4b](#).
- b. One order form may be bound into the pages of a book. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [2.4.4a](#).
- c. Announcements of books may appear as book pages. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related or other materials or services. Announcements may fully describe the conditions and methods of ordering books and may contain ordering instructions for use with a separate order form. Up to three of these announcements may contain as part of their format a single order form, which may also serve as a postcard. The order forms permitted with these announcements are in addition to, and not in place of, order forms that may be enclosed under [2.4.4a](#) or [2.4.4b](#).

2.5 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

3.0 Price Eligibility for Media Mail Flats

3.1 Basic Weight Standards

There is no minimum weight for Media Mail. A single piece of Media Mail can weigh no more than 70 pounds.

3.2 Price Eligibility Standards

A Presorted Media Mail mailing must contain a minimum of 300 pieces claimed at any combination of 5-digit and basic prices. Those pieces in the mailing that meet the 5-digit presort requirements are eligible for the 5-digit presort price and those pieces that meet the basic presort requirements are eligible for the basic prices, subject to the preparation standards in [375.5.0, *Preparing Presorted Flats*](#), or [705.8.0, *Preparing Pallets*](#). Pieces in a mailing do not need to be identical in size and content. Such nonidentical pieces may be merged, sorted together, and presented as a single mailing either with the correct postage affixed to each piece in the mailing or with postage paid with a permit imprint if authorized by Business Mailer Support (BMS), USPS headquarters.

3.3 Delivery and Return Addresses

All Media Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) or detached address labels under [602.4.0](#) may be used. Each piece must bear the sender's return address.

3.4 Price Categories for Media Mail

Media Mail prices are based on the weight of the piece without regard to zone. The price categories and discounts are as follows:

- a. 5-Digit Presort Price. To qualify for the 5-digit price, a piece must be prepared and sorted to 5-digit sacks under [375.5.0, *Preparing Presorted Flats*](#), or 5-digit pallets under [705.8.0, *Preparing Pallets*](#). All logical 5-digit bundles on pallets must contain at least 10 pieces.
- b. Basic Presort Price. All pieces prepared and sorted under [375.5.0, *Preparing Presorted Flats*](#), or [705.8.0, *Preparing Pallets*](#), that are not eligible for the 5-digit price qualify for the basic price.

374 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Media Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support.

2.0 Mailing Documentation

2.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). The mailer may submit a computer-generated facsimile (see [2.7, Facsimile Postage Statements](#)). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

2.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the preparation, price levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

2.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

2.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

2.5 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607, Mailer Compliance and Appeals of Classification Decisions](#).

2.6 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

2.7 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

375 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparing Presorted Flats](#)

1.0 General Information for Mail Preparation

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations.

1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Media Mail and any other type of mail may not be part of the same mailing even if in the same processing category.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *5-digit scheme (bundles and sacks) for flats meeting the automation-compatibility standards in 301.3.0*: the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code ranges processed by the USPS as a single scheme, as shown in [L007](#).
- c. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- d. *3-digit scheme bundles for flats meeting the automation-compatibility standards in 301.3.0*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit ZIP Code ranges processed by the USPS as a single scheme, as shown in [L008](#).

- e. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- f. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.

1.4 Preparation Definitions and Instructions

[7-3-08] For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. A *5-digit scheme sort* for flats weighing up to 20 ounces and meeting the automation-compatibility standards in [301.3.0](#) yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and 5-digit bundles for other ZIP Codes. When standards require 5-digit/scheme sort, mailers must prepare all possible 5-digit scheme bundles and sacks of flats before preparing 5-digit bundles and sacks. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. Bundles must be labeled using an optional endorsement line (OEL) under [708.7.0](#) or with a red “5 SCH” bundle label. Bundles are placed in appropriate containers using the OEL “label to” 5-digit ZIP Code or using [L007](#) column B.
- d. A *3-digit scheme sort* for flats weighing up to 20 ounces and meeting the automation-compatibility standards in [301.3.0](#) yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). When standards require 3-digit/scheme sort, mailers must prepare all possible 3-digit scheme bundles of flats before preparing 3-digit bundles. The 3-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 3-digit ZIP Code required. Bundles prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit ZIP Codes are still considered 3-digit scheme sorted and are labeled accordingly. Bundles must be labeled using an optional endorsement line (OEL) under [708.7.0](#) or with a green “3 SCH” bundle label. Three-digit scheme bundles are placed in 3-digit through mixed ADC containers, as applicable, using the OEL “label to” 3-digit ZIP Code or using [L008](#) column B.
- e. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.

- f. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- g. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the price claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in 2.0.
- h. A “*logical*” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces.

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit.

2.2 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye.

2.3 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.4 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.

- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

2.5 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment.

Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 - 1. Do not place any bands closer than 1 inch from any bundle edge.
 - 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 - 3. Do not use wire or metal banding.
 - 4. Do not use any loose banding.
- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 - 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 - 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

2.6 Preparing Bundles

Bundles of flat-size pieces must be secure and stable subject to the following:

- a. If placed on pallets, the specific weight limits in [705.8.0, *Preparing Pallets*](#).
- b. If placed in sacks, Media Mail must meet the specific weight limits in [5.2](#).

2.7 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Media Mail must meet the applicable minimum and maximum bundle size standards in [5.2](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle

minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum, depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Bundles prepared on pallets must meet the additional bundling requirements under 705.8.0, and each physical bundle, including carrier route price mail, must always contain at least two pieces.

2.8 Other Bundle Sizes

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the price claimed without loss of price eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

2.9 Labeling Bundles

[7-3-08] The presort level of each bundle must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Five-digit scheme presort level, red Label 5 SCH.
- b. Five-digit presort level, red Label 5.
- c. Three-digit scheme presort level, green Label 3 SCH.
- d. Three-digit presort level, green Label 3.
- e. ADC presort level, pink Label A.
- f. Mixed ADC presort level, tan Label X.

3.0 Sacks

3.1 Maximum Weight

The maximum weight of any sack (mail plus sack tare) must not exceed 70 pounds.

4.0 Sack Labels

4.1 Basic Standards

Sack labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.

375.4.2

- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.

4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock (required for mailings of automation-compatible flats, optional for others).
- c. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- d. Height (perpendicular to printing):
 - 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.
 - 2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., "ADC"). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, "APO" or "FPO," followed by "AE" (for ZIP Codes within the ZIP Code prefix range 090-098), "AA" (for ZIP Codes within the 3-digit ZIP Code prefix 340), or "AP" (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards.

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

CONTENT TYPE	CODE
Barcoded	BC
Digit	D
Flats	FLTS
General Delivery Unit	G
Highway Contract Route	H
Mixed	MXD
Nonbarcoded	NON BC (sacks)
Package Services	PSVC
Post Office Box Section	B
Rural Route	R
Working	WKG

4.5 **Line 3 (Office of Mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

4.6 **Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.7 **Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It may appear below Line 3.
- A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

5.0 Preparing Presorted Flats

5.1 Basic Standards

All mailings of Presorted Media Mail are subject to the standards in [5.2, Bundling](#), and [5.3, Sacking](#), and to these general requirements:

- a. Each mailing must meet the applicable standards in [5.0](#).
- b. All pieces must be sorted to the finest extent possible under [5.2, Bundling](#), or palletized under [705.8.0, Preparing Pallets](#).
- c. Each piece claimed at Media Mail rates must be marked “Media Mail” under [302.2.0, Placement and Content of Mail Markings](#). Each piece claimed at Presorted Media Mail rates also must be marked “Presorted” or “PRSRT”.

5.2 Bundling

5.2.1 Required Bundling

A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles placed in 5-digit sacks may weigh a maximum of 40 pounds. Each physical bundle must contain at least two addressed pieces.

5.2.2 Bundling and Labeling

[7-3-08] For mailings consisting entirely of pieces meeting the automation-compatibility criteria in [301.3.0](#), pieces must be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (optional, but required for 5-digit rate); red Label 5 SCH or OEL. See definition in [1.4c](#).
- b. 5-digit (optional, but required for 5-digit rate); red Label 5 or OEL. See definition in [1.4c](#).
- c. 3-digit scheme (required); green Label 3 SCH or OEL. See definition in [1.4d](#).
- d. 3-digit; green (required) Label 3 or OEL. See definition [1.4d](#).
- e. ADC (required); pink Label A or OEL.
- f. Mixed ADC (required); tan Label X or OEL.

5.3 Sacking

5.3.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches the minimums specified in [5.3.2](#) or 1,000 cubic inches. Smaller volumes are not permitted (except in mixed ADC sacks).

5.3.2 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit/scheme (optional, but required for 5-digit price); see [1.4c](#); scheme sort required, only for pieces meeting the automation-compatibility criteria in [301.3.0](#); minimum 10 addressed pieces; labeling:
 1. Line 1: For 5-digit scheme sacks, use [L007](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.5](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, "PSVC FLT 5D SCH NBC." For 5-digit sacks, "PSVC FLT 5D NBC."
- b. 3-digit: required (20-piece minimum).
 1. Line 1: use [L002](#), Column A.
 2. Line 2: "PSVC FLTS 3D NON BC."
- c. ADC: required (20-piece minimum).
 1. Line 1: use [L004](#), Column B.
 2. Line 2: "PSVC FLTS ADC NON BC."
- d. Mixed ADC: required (no minimum).
 1. Line 1: Use [L009](#), Column B.
 2. Line 2: "PSVC FLTS NON BC WKG."

376 Enter and Deposit

Overview

[1.0 Verification and Deposit](#)

1.0 Verification and Deposit

1.1 **Verification and Entry**

All presorted mailings must be presented for verification and acceptance at the Post Office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing Post Office only as permitted under [705.18.0](#).

380 Commercial Flats Library Mail

383 Prices and Eligibility

384 Postage Payment and Documentation

385 Mail Preparation

386 Enter and Deposit

383 Prices and Eligibility

Overview

- [1.0 Prices and Fees for Library Mail](#)
- [2.0 Content Standards for Library Mail Flats](#)
- [3.0 Price Eligibility for Library Mail Flats](#)

1.0 Prices and Fees for Library Mail

1.1 Price Application

Postage is based on the price that applies to the weight (postage) increment of each addressed piece.

1.2 Library Mail Price Application

The Library Mail price is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage price per addressed piece is that for an addressed piece weighing 1 pound.

1.3 Shape, Flexibility, and Thickness

Flat-size pieces that do not meet the standards in [301.1.3](#) through [301.1.4](#) must be prepared as parcels.

1.4 Library Mail Presorted Prices

Weight Not Over (pounds)	5-Digit	Basic
1	\$1.35	\$1.81
2	1.68	2.14
3	2.01	2.47
4	2.34	2.80
5	2.67	3.13

1.5 Mailing Fee

A mailing fee must be paid once each 12-month period at each Post Office of mailing by or for any person who mails at the Presorted Library Mail prices. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment. Presort mailing fees for Library Mail, per 12-month period: \$180.00.

1.6 Computing Postage for Library Mail

1.6.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected

pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.6.2 Computing Postage for Affixed Postage

For each piece, affix the postage for the weight increment (including any surcharges or discounts). To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece.

1.6.3 Computing Postage for Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable price per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent.

2.0 Content Standards for Library Mail Flats

2.1 General

Mailable matter meeting one of the specific eligibility standards in [2.3](#) or [2.4](#), as applicable, and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Library Mail.

2.2 Sender and Recipient Qualifications

Each piece must show in the address or return address the name of a school, college, university, public library, museum, or herbarium or the name of a nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organization or association. For Library Mail standards, these nonprofit organizations are defined in [703.1.0](#).

2.3 Content Standards for Mailings Between Entities

The items described in this section may be mailed at the Library Mail price when sent between: (1) schools, colleges, universities, public libraries, museums, and herbariums and nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, and fraternal organizations or associations; (2) any such institution, organization, or association and an individual who has no financial interest in the sale, promotion, or distribution of the materials; or (3) any such institution, organization, or association and a publisher, if such institution, organization, or association has placed an order to buy such materials for delivery to itself:

- a. Books, consisting wholly of reading matter, scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising, except for incidental announcements of books.
- b. Printed music, whether in bound or sheet form.
- c. Bound volumes of academic theses, whether in typewritten or duplicated form.
- d. Periodicals, whether bound or unbound.
- e. Sound recordings.

- f. Other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts.
- g. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials for informing and furthering the educational work and interests of museums and herbariums.

2.4 Qualified Mailings “To” or “From”

The following specific items may be mailed at the Library Mail price when sent to or from schools, colleges, universities, public libraries, museums, and herbariums and to or from nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organizations:

- a. 16-millimeter or narrower width films, filmstrips, transparencies, slides, and microfilms. All must be positive prints in final form for viewing.
- b. Sound recordings.
- c. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials intended for informing and furthering the educational work and interests of museums and herbariums.
- d. Scientific or mathematical kits, instruments, or other devices.
- e. Catalogs of the materials in [2.4a.](#) through [d.](#) in [Content Standards for Library Mail Flats](#) and guides or scripts prepared solely for use with such materials.

2.5 Postal Inspection

Library Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Library Mail prices constitutes consent by the mailer to postal inspection of the contents.

2.6 Attachments and Enclosures

2.6.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Library Mail piece or in an envelope marked “Invoice Enclosed” and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

2.6.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Library Mail piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or

greeting included with a product, publication, or parcel. Postage at the Library Mail price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

2.6.3 Enclosures in Books and Sound Recordings

Books and sound recordings mailed at the Library Mail price may contain these enclosures as well as the additions and enclosures permitted under [2.6.1](#), [2.6.2](#) and [2.7](#):

- a. Either one envelope or one addressed postcard. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [2.6.3b](#).
- b. One order form. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [2.6.3a](#).
- c. With books, announcements of books in book pages or as loose enclosures. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related materials or services. Announcements may fully describe the conditions and methods of ordering books (such as by membership in book clubs) and may contain ordering instructions for use with the single order form.
- d. With sound recordings, announcements of sound recordings on title labels, on protective sleeves, on the carton or wrapper, or on loose enclosures. These announcements of sound recordings must be incidental and exclusively devoted to sound recordings. They may not contain extraneous advertising of recording-related materials or services. Announcements may fully describe the conditions and methods of ordering sound recordings (such as by membership in sound recording clubs) and may contain ordering instructions for use with the single order form.

2.6.4 Other Enclosures

Material mailed at the Library Mail price other than books and sound recordings may contain only those additions and enclosures permitted under [2.6.1](#), [2.6.2](#) and [2.7](#).

2.7 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.

- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

3.0 Price Eligibility for Library Mail Flats

3.1 Basic Weight Standards

There is no minimum weight for Library Mail. A single piece of Library Mail can weigh no more than 70 pounds.

3.2 Price Eligibility Standards

A Presorted Library Mail mailing must contain a minimum of 300 pieces claimed at any combination of 5-digit and basic prices. Those pieces in the mailing that meet the 5-digit presort requirements are eligible for the 5-digit presort price, and those pieces that meet the basic presort requirements are eligible for the basic price, subject to the preparation standards in [385.5.0, *Preparing Presorted Flats*](#), or [705.8.0, *Preparing Pallets*](#). Pieces in a mailing do not need to be identical in size and content. Such nonidentical pieces may be merged, sorted together, and presented as a single mailing either with the correct postage affixed to each piece in the mailing or with postage paid with a permit imprint if authorized by Business Mailer Support (BMS), USPS headquarters.

3.3 Delivery and Return Addresses

All Library Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address.

3.4 Price Categories for Library Mail

Library Mail prices are based on the weight of the piece without regard to zone. The price categories and discounts are as follows:

- a. 5-Digit Presort Price. To qualify for the 5-digit price, a piece must be prepared and sorted to 5-digit sacks under [385.5.0, *Preparing Presorted Flats*](#), or to 5-digit pallets under [705.8.0](#). All logical 5-digit bundles on pallets must contain at least 10 pieces.
- b. Basic Presort Price. All pieces prepared and sorted under [385.5.0, *Preparing Presorted Flats*](#), or [705.8.0, *Preparing Pallets*](#), that are not eligible for the 5-digit price qualify for the basic price.

384 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Library Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces.

2.0 Mailing Documentation

2.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). The mailer may submit a computer-generated facsimile (see [2.7, Facsimile Postage Statements](#)). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

2.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the preparation, price levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

2.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

384.2.4

2.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

2.5 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607, Mailer Compliance and Appeals of Classification Decisions](#).

2.6 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

2.7 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

385 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparing Presorted Flats](#)

1.0 General Information for Mail Preparation

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations.

1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Library Mail and any other type of mail may not be part of the same mailing even if in the same processing category.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *5-digit scheme (bundles and sacks) for flats meeting the automation-compatibility standards in 301.3.0*: the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code ranges processed by the USPS as a single scheme, as shown in [L007](#).
- c. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- d. *3-digit scheme bundles for flats meeting the automation-compatibility standards in 301.3.0*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit ZIP Code ranges processed by the USPS as a single scheme, as shown in [L008](#).

- e. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- f. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.

1.4 Preparation Definitions and Instructions

[7-3-08] For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. A *5-digit scheme sort* for flats weighing up to 20 ounces and meeting the automation-compatibility standards in [301.3.0](#) yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and 5-digit bundles for other ZIP Codes. When standards require 5-digit/scheme sort, mailers must prepare all possible 5-digit scheme bundles and sacks of flats before preparing 5-digit bundles and sacks. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. Bundles must be labeled using an optional endorsement line (OEL) under [708.7.0](#) or with a red “5 SCH” bundle label. Bundles are placed in appropriate containers using the OEL “label to” 5-digit ZIP Code or using [L007](#) column B.
- d. A *3-digit scheme sort* for flats weighing up to 20 ounces and meeting the automation-compatibility standards in [301.3.0](#) yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). When standards require 3-digit/scheme sort, mailers must prepare all possible 3-digit scheme bundles of flats before preparing 3-digit bundles. The 3-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 3-digit ZIP Code required. Bundles prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit ZIP Codes are still considered 3-digit scheme sorted and are labeled accordingly. Bundles must be labeled using an optional endorsement line (OEL) under [708.7.0](#) or with a green “3 SCH” bundle label. Three-digit scheme bundles are placed in 3-digit through mixed ADC containers, as applicable, using the OEL “label to” 3-digit ZIP Code or using [L008](#) column B.
- e. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.

- f. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- g. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the price claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in [2.0, Bundles](#).
- h. A *“logical” presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces.

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit.

2.2 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye.

2.3 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.4 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.

- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

2.5 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment.

Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 - 1. Do not place any bands closer than 1 inch from any bundle edge.
 - 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 - 3. Do not use wire or metal banding.
 - 4. Do not use any loose banding.
- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 - 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 - 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

2.6 Preparing Bundles

Bundles of flat-size pieces must be secure and stable subject to the following:

- a. If placed on pallets, the specific weight limits in [705.8.0, *Preparing Pallets*](#).
- b. If placed in sacks, Library Mail must meet the specific weight limits in [5.2](#).

2.7 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Library Mail must meet the applicable minimum and maximum bundle size standards in [5.2](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle

minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Bundles prepared on pallets must meet the additional bundling requirements under 705.8.0 and each physical bundle, including carrier route price mail, must always contain at least two pieces.

2.8 Other Bundle Sizes

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the price claimed without loss of price eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

2.9 Labeling Bundles

[7-3-08] The presort level of each bundle must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Five-digit scheme presort level, red Label 5 SCH.
- b. Five-digit presort level, red Label 5.
- c. Three-digit scheme presort level, green Label 3 SCH.
- d. Three-digit presort level, green Label 3.
- e. ADC presort level, pink Label A.
- f. Mixed ADC presort level, tan Label X.

3.0 Sacks

3.1 Maximum Weight

The maximum weight of any sack (mail plus sack tare) must not exceed 70 pounds.

4.0 Sack Labels

4.1 Basic Standards

Sack labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.

385.4.2

- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.

4.2 **Physical Characteristics of a Sack Label**

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock (required for mailings of automation-compatible flats, optional for others).
- c. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- d. Height (perpendicular to printing):
 - 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.
 - 2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

4.3 **Line 1 (Destination Line)**

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., "ADC"). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, "APO" or "FPO," followed by "AE" (for ZIP Codes within the ZIP Code prefix range 090-098), "AA" (for ZIP Codes within the 3-digit ZIP Code prefix 340), or "AP" (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

4.4 **Line 2 (Content Line)**

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards.

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

CONTENT TYPE	CODE
Barcoded	BC
Digit	D
Flats	FLTS
General Delivery Unit	G
Highway Contract Route	H
Mixed	MXD
Nonbarcoded	NON BC (sacks)
Package Services	PSVC
Post Office Box Section	B
Rural Route	R
Working	WKG

4.5 Line 3 (Office of mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry Post Office or the mailer’s name and the city and state of the mailer’s location. It is recommended that the mailer’s name also appear with the city and state of the entry Post Office.

4.6 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.7 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

5.0 Preparing Presorted Flats

5.1 Basic Standards

All mailings of Presorted Library Mail are subject to the standards in [5.2](#) and [5.3](#) and to these general standards:

- a. Each mailing must meet the applicable standards in [5.0](#).
- b. All pieces must be sorted to the finest extent possible under [5.2](#) and [5.3](#) or palletized under [705.8.0](#).
- c. Each piece claimed at Library Mail prices must be marked “Library Mail” under [302.2.0, Placement and Content of Mail Markings](#). Each piece claimed at Presorted Library Mail prices also must be marked “Presorted” or “PRSRT” under [302.2.0](#).

5.2 Bundling

5.2.1 Required Bundling

A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles, placed in 5-digit sacks may weigh a maximum of 40 pounds. Each physical bundle must contain at least two addressed pieces.

5.2.2 Bundling and Labeling

[7-3-08] For mailings consisting entirely of pieces meeting the automation-compatibility criteria in [301.3.0](#), pieces must be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (optional, but required for 5-digit rate); red Label 5 SCH or OEL. See definition in [1.4c](#).
- b. 5-digit; (optional, but required for 5-digit rate); red Label 5 or OEL. See definition in [1.4c](#).
- c. 3-digit scheme (required); green Label 3 SCH or OEL. See definition in [1.4d](#).
- d. 3-digit green (required); Label 3 or OEL. See definition [1.4d](#).
- e. ADC (required); pink Label A or OEL.
- f. Mixed ADC (required); tan Label X or OEL.

5.3 Sacking

5.3.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches the minimums specified in [5.3.2](#) or 1,000 cubic inches. Smaller volumes are not permitted (except in mixed ADC sacks).

5.3.2 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit/scheme (optional, but required for 5-digit price); see [1.4c](#); scheme sort required, only for pieces meeting the automation-compatibility criteria in [301.3.0](#); minimum 10 addressed pieces; labeling:
 1. Line 1: For 5-digit scheme sacks, use [L007](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.5](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, "PSVC FLT 5D SCH NBC." For 5-digit sacks, "PSVC FLT 5D NBC."
- b. 3-digit: required (20-piece minimum).
 1. Line 1: use [L002](#), Column A.
 2. Line 2: "PSVC FLTS 3D NON BC."
- c. ADC: required (20-piece minimum).
 1. Line 1: use [L004](#), Column B.
 2. Line 2: "PSVC FLTS ADC NON BC."
- d. Mixed ADC: required (no minimum).
 1. Line 1: Use [L009](#), Column B.
 2. Line 2: "PSVC FLTS NON BC WKG."

386 Enter and Deposit

Overview

[1.0 Verification and Deposit](#)

1.0 Verification and Deposit

1.1 **Verification and Entry**

All presorted mailings must be presented for verification and acceptance at the Post Office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing Post Office only as permitted under [705.18.0](#).

Commercial Parcels Design Standards

401 Physical Standards

402 Elements on the Face of a Mailpiece

401 Physical Standards

Overview

- [1.0 Physical Standards for Parcels](#)
- [2.0 Additional Physical Standards by Class of Mail](#)

1.0 Physical Standards for Parcels

1.1 Processing Categories

USPS categorizes parcels into one of three mail processing categories: machinable, irregular, or outside parcel. These categories are based on the physical dimensions of the piece, regardless of the placement (orientation) of the delivery address on the piece.

1.2 Minimum Size

Pieces are subject to the minimum standards in [601.1.0, General Standards](#), and may be subject to other minimum dimensions, based on the standards for specific prices.

1.3 Maximum Weight and Size

No mailpiece may weigh more than 70 pounds. Lower weight limits apply to First-Class Mail, Standard Mail, and Bound Printed Matter. Pieces may not measure more than 108 inches in length and girth combined, except Parcel Select, which may not measure more than 130 inches in length and girth combined. For parcels, length is the distance of the longest dimension and girth is the distance around the thickest part. Lower size or weight standards apply to mail addressed to some APOs and FPOs subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#).

1.4 Two or More Packages

Two or more packages may be mailed as a single parcel if they are about the same size or shape, are securely wrapped or fastened together, and do not exceed the weight or size limits.

1.5 Machinable Parcels

1.5.1 Criteria

A machinable parcel is any piece that is (see [Exhibit 1.5.1, Machinable Parcel Dimensions](#)):

- Not less than 6 inches long, 3 inches high, 1/4 inch thick, and 6 ounces in weight, except under [1.5.2](#). A mailpiece exactly 1/4 inch thick is subject to the 3 1/2-inch height minimum under [601.1.0](#).
- Not more than 34 inches long, or 17 inches high, or 17 inches thick, or 35 pounds in weight. For books or other printed matter, the maximum weight is 25 pounds.

Exhibit 1.5.1 Machinable Parcel Dimensions

Maximum weight = 35 pounds
Books and printed matter may not weigh more than 25 pounds.

Minimum weight = 6 oz.
(for details, see machinable parcel criteria in 401.1.5.1)

1.5.2 Criteria for Lightweight Parcels

A machinable parcel may weigh less than 6 ounces (but not less than 3.5 ounces) if it meets all of the following conditions:

- a. The mailpiece is rectangular and able to maintain its integrity during mail processing (see 601.3.0).
- b. The mailpiece bears a parcel barcode, printed and placed according to 708.5.0.
- c. Mailpieces weighing at least 3.5 ounces but less than 5 ounces must be a paperboard or fiberboard box within the following dimensions:
 1. At least 1.5 inches thick and no more than 3 inches thick.
 2. At least 6 inches long and no more than 7 inches long.
 3. At least 3.5 inches high and no more than 5 inches high.
- d. Mailpieces weighing at least 5 ounces but less than 6 ounces must be within the following dimensions:
 1. More than 3/4 inch thick and no more than 6 inches thick.
 2. At least 6 inches long and no more than 12 inches long.
 3. At least 3-1/2 inches high and no more than 9 inches high.

1.5.3 Soft Goods and Enveloped Printed Matter

Soft goods wrapped in paper or plastic bags and enveloped printed matter are machinable only if all packaging standards in 601 are met.

1.5.4 Exception

Some parcels may be successfully processed on BMC parcel sorters even though they do not conform to the general machinability criteria in 1.5.1. The manager, Network Distribution Center Operations, USPS Headquarters (see 608.8.1 for address) may authorize a mailer to enter such parcels as machinable parcels rather than irregular parcels if the parcels are tested on BMC parcel sorters and prove to be machinable. Mailers who wish to have parcels tested for machinability on USPS parcel sorting machines must:

- a. Submit a written request to Network Distribution Center Operations. The request must list mailpiece characteristics for every shape, weight, construction, and size to be considered. If the letter requesting testing describes a mailpiece that falls within the specifications of pieces that were tested previously, the mailpiece will not be acknowledged for testing.
- b. Define estimated number of parcels to be mailed in the coming year, and preparation level (e.g., destination BMC pallets).
- c. Upon acknowledgement from the manager, Network Distribution Center Operations, send 100 mailpiece samples to the designated test facility at least 6 weeks prior to the first mailing date. The manager, Network Distribution Center Operations will recommend changes to ensure machinability of parcels that do not qualify.

1.6 Irregular Parcel

An irregular parcel is a parcel not meeting the dimensional criteria in 1.5.1 or 1.5.2. This processing category also includes parcels that cannot be processed by BMC parcel sorters, including rolls and tubes up to 26 inches long; merchandise samples that are not individually addressed and are not letter-size or flat-size; unwrapped, paper-wrapped, or sleeve-wrapped articles that are not letter-size or flat-size; and articles enclosed in envelopes that are not letter-size, flat-size, or machinable parcels.

1.7 Outside Parcel

An outside parcel is a parcel that exceeds any of the maximum dimensions for a machinable parcel. This processing category also includes high-density parcels (other than books and printed matter) weighing more than 15 pounds and exerting more than 60 pounds per square foot (0.4167 pound per square inch) pressure on their smallest side; cartons containing more than 24 ounces of liquid in one or more glass containers; cartons containing 1 gallon or more of liquid in metal or plastic containers; cans, paints; rolls and tubes longer than 26 inches; metal-band strapped boxes, metal boxes, and wood boxes; articles not mailed in boxes or other containers; harmful matter; hazardous materials except ORM-D materials; and containers with all dimensions exceeding the minimum dimensions for a machinable (regular) parcel, if their coefficient of friction or ability to slide on a smooth, hard surface is not similar to that of a domestic-class fiberboard box of the same approximate size and weight.

401.2.1

2.0 Additional Physical Standards by Class of Mail

2.1 First-Class Mail Parcels

2.1.1 Weight

Matter at First-Class Mail prices cannot exceed 13 ounces. First-Class Mail weighing more than 13 ounces is Priority Mail.

2.1.2 Surcharge

Unless prepared in 5-digit/scheme containers or paid at a single-piece price, presorted parcels are subject to a \$0.05 surcharge if any of the following characteristics apply:

- a. The parcels weigh less than 2 ounces.
- b. The parcels do not bear a UCC/EAN Code 128 or POSTNET barcode.
- c. The parcels are irregularly shaped, such as rolls, tubes, and triangles.

2.2 Standard Mail Parcels and Not Flat-Machinable Pieces

2.2.1 Additional Physical Standards

Each piece must weigh less than 16 ounces.

2.2.2 Not Flat-Machinable Pieces

Categorize Standard Mail with the following characteristics as Not Flat-Machinable pieces (unless mailed as parcels):

- a. Not Flat-Machinable pieces are rigid or are not uniformly thick, with the following dimensions:
 1. At least 4 inches high, but not more than 12 inches high.
 2. At least 4 inches long, but not more than 15-3/4 inches long.
 3. At least 0.009 thick, but not more than 1-1/4 inches thick. (Pieces less than 5 inches long must be over 1/4 inch thick.)
- b. Flexible pieces that are at least 4 inches high, but not more than 12 inches high, with either of the following dimensions:
 1. Over 15 inches long, but not more than 15-3/4 inches long.
 2. Over 3/4 inches thick, but not more than 1-1/4 inches thick.

2.2.3 Surcharge

Unless prepared in carrier route or 5-digit/scheme containers, Standard Mail parcels and Not Flat-Machinable pieces are subject to a \$0.05 surcharge if:

- a. The machinable parcels do not bear a UCC/EAN Code 128 barcode (see [708.5.0](#)) or the irregular parcels do not bear a UCC/EAN Code 128 barcode (see [708.5.0](#)) or POSTNET barcode (see [708.4.0](#)).
- b. The Not Flat-Machinable pieces weigh 6 ounces or more and do not bear a UCC/EAN Code 128 barcode (see [708.5.0](#)).
- c. The Not Flat-Machinable pieces weigh less than 6 ounces and do not bear a UCC/EAN Code 128 barcode (see [708.5.0](#)) or POSTNET barcode (see [708.4.0](#)).

2.3 Parcel Select

2.3.1 General Standards

These standards apply to Parcel Select:

- a. Parcel Select pieces measuring over 108 inches in combined length and girth, but not more than 130 inches in combined length and girth, are mailable at the applicable oversized price.
- b. An item weighing less than 20 pounds but measuring more than 84 inches (but not more than 108 inches) in combined length and girth is charged the price for a 20-pound parcel for the zone to which it is addressed (balloon price).

2.3.2 Nonmachinable Parcel Select

Mailpieces described in this section that are mailed at Parcel Select prices are subject to the applicable nonmachinable surcharge in [453.1.0](#) unless the applicable special handling fee is paid. An oversized parcel as described in [2.3.1a](#) is not subject to the nonmachinable surcharge. Mailpieces are nonmachinable if they meet any of the following criteria:

- a. A parcel more than 34 inches long, 17 inches wide, or 17 inches high.
- b. A parcel less than 6 inches long, 1/4 inch thick, or 3 inches high.
- c. A parcel that weighs less than 6 ounces or more than 35 pounds, except under [1.5.2](#) for lightweight parcels.
- d. A parcel containing more than 24 ounces of liquid in glass containers, or 1 gallon or more of liquid in metal or plastic containers.
- e. An insecurely wrapped or metal-banded parcel.
- f. A can, roll, or tube, or wooden or metal box.
- g. Books, printed matter, or business forms weighing more than 25 pounds.
- h. A high-density parcel weighing more than 15 pounds and exerting more than 60 pounds per-square-foot pressure on its smallest side.
- i. A film case weighing more than 5 pounds or with strap-type closures, except any film case the USPS authorizes to be entered as a machinable parcel under [1.0](#) and to be identified by the words "Machinable in United States Postal Service Equipment" permanently attached as a nontransferable decal in the lower right corner of the case.
- j. Parcels with characteristics (such as inadequate packaging) that could result in damage to the contents of the mailpiece, other parcels, or postal machinery if mechanical sortation is used.

2.4 Bound Printed Matter Parcels

2.4.1 General Standards

Pieces mailed at Bound Printed Matter prices may not weigh more than 15 pounds.

402 Elements on the Face of a Mailpiece

Overview

- [1.0 All Mailpieces](#)
- [2.0 Placement and Content of Markings](#)
- [3.0 Placement and Physical Standards for Endorsements](#)
- [4.0 General Barcode Placement for Parcels](#)

1.0 All Mailpieces

1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements.

1.2 Delivery and Return Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. Except for mail prepared with detached address labels under [602.4.0](#), the piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage. A return address is required in specific circumstances (see [3.2](#) and [602.1.5](#) for more information about return addresses). See [602](#) for additional information regarding addressing.)

1.3 Postage Payment

The mailer is responsible for proper payment of postage. Standards for postage payment are specified for each shape and class of mail.

2.0 Placement and Content of Markings

2.1 First-Class Mail and Standard Mail Markings

2.1.1 Placement

[8-14-08] Markings must be placed as follows:

- a. Basic Marking. The basic required marking that indicates the class or subclass which must be printed or produced as part of; directly below; or to the left of the permit imprint, meter imprint, or stamp as follows:
 1. "First-Class"
 2. "Standard" or "STD"
 3. "Presorted Standard" or "PRSRT STD"
 4. "Nonprofit Organization," "Nonprofit Org.," or "Nonprofit"
- b. Other Markings. The price-specific markings "ECRLLOT," "ECRWSH," "ECRWSS," and "Customized MarketMail" (or "CUST MKTMAIL" or "CMM") (Standard Mail only) may be placed as follows:
 1. In the location specified in [2.1.1a](#).

402.2.1.2

2. In the address area on the line directly above or two lines above the address if the marking appears alone or if no other information appears on the line with the marking except optional endorsement line information under [708.7.0](#) or carrier route bundle information under [708.6.0](#).
 3. If preceded by two asterisks (**), the “PRESORTED” (or “PRSRT”) or “CUSTOMIZED MARKETMAIL” (or “CUST MKTMAIL” or “CMM”) marking also may be placed on the line directly above or two lines above the address in a mailer keyline or a manifest keyline, or it may be placed above the address and below the postage in an MLOCR ink-jet printed date correction/meter drop shipment line.
- c. Mark each Not Flat-Machinable piece “Not Flat-Machinable” or “NFM,” either by including the marking in the optional endorsement line or by placing the marking immediately to the left of or below the postage area.
 - d. Additional Requirements for Carrier Route. “ECRLOT,” “ECRWSH,” and “ECRWSS” (Standard Mail only) must appear in their entirety wherever placed, except “ECR” may be placed in the postage area if “LOT,” “WSH,” or “WSS,” as applicable, is placed in the line above or two lines above the address. Pieces not mailed at ECR prices must not bear these markings.

2.1.2 Exceptions to Markings

The following exceptions apply to manifest mailings:

- a. The basic marking must appear in the postage area on each piece. The two-letter price category code required in the keyline on manifest mailing pieces prepared under [705.2.0](#) meets the requirement for other price markings.
- b. Mail manifested using the Electronic Verification System (eVS) under [705.2.9](#) must bear the basic marking and the additional marking “eVS” (or the alternative “e-VS” or “EVS”) in two places:
 1. In the required permit imprint as described in [604.5.0](#).
 2. In the human-readable text above the required barcode described in [705.2.9](#) and [708.5.0](#).

2.2 Parcel Select, Bound Printed Matter, Media Mail, and Library Mail Markings

2.2.1 Basic Markings

The basic required Package Services subclass marking—“Parcel Post” or “PP,” “Bound Printed Matter” or “BPM,” “Media Mail,” or “Library Mail”—must be printed on each piece claimed at the respective price. For Parcel Post destination entry price mail, the marking “Parcel Select” may be used as the basic required marking instead of “Parcel Post.” The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 2.2.1](#)):

- a. The service icon that will identify all Package Services subclasses will be a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.

- b. The service banner must appear directly below the postage payment area and the service icon, and it must extend across the shipping label. If the service banner is used, the appropriate subclass marking (e.g., “PARCEL POST,” “MEDIA MAIL”) must be preceded by the text “USPS” and must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text.

Exhibit 2.2.1 Package Services Indicator Examples

2.2.2 Parcel Select Markings

Marking requirements for Parcel Post are as follows:

- a. *Destination Entry Price Mail.* Each piece mailed at a DBMC, DSCF, or DDU Parcel Select price must bear the marking “Parcel Post” (or “PP”) or “Parcel Select” in the postage area as described in 2.2.1. If “Parcel Select” is shown in the postage area, then no other marking is required. If “Parcel Post” (or “PP”) is shown in the postage area, then the additional marking “Drop Ship” (or “D/S”) or “Parcel Select,” or both, must be placed on each piece in either the postage area or the address area (as described under 2.0) to indicate that the piece was entered at a destination entry price.
- b. *Other Parcel Select Mail.* Pieces must bear the marking “Parcel Post” (or “PP”) in the postage area as described under 2.2.1.

2.2.3 Parcel Select Destination Markings

Each piece in a Parcel Select destination entry mailing must bear a marking to indicate it was mailed at a destination entry price. If the “Parcel Select” marking is used as the basic marking in the postage area on such pieces under 2.2.1, no additional marking is required because the “Parcel Select” marking identifies the mail as destination entry price mail. If the “Parcel Post” (or “PP”) marking is used as the

402.2.2.4

basic marking in the postage area under [2.2.1](#), one or both of the following markings also must appear on each piece in the mailing to identify it as destination entry price mail: (1) “Drop Ship” (or “D/S”); (2) “Parcel Select.” These additional destination entry price markings must appear in either the postage area described in [2.2.1](#) or in the address area on the line directly above or two lines above the address if the marking appears alone (i.e., if no other information appears on that line). The “Parcel Select” and “Drop Ship” (or “D/S”) markings must not appear on Parcel Post mail that is entered at prices other than DBMC, DSCF, or DDU destination entry prices.

2.2.4 Bound Printed Matter Markings

In addition to the basic marking “Bound Printed Matter” or “BPM,” each piece of Bound Printed Matter mailed at a presorted or carrier route price must bear additional price markings. The additional markings may be placed in the postage area as specified in [2.2.1](#). Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under [708.7.0](#) or postal carrier route bundle information under [708.6.0](#). The additional price markings are:

- a. For Presorted price mail, the additional required marking is “Presorted” (or “PRSRT”).
- b. For carrier route price mail, the additional required marking is “Carrier Route Presort” (or “CAR-RT SORT”).

2.2.5 Address and Firm Designation on Bound Printed Matter Machinable Parcels

When a Bound Printed Matter machinable parcel consists of multiple pieces for a single address secured with transparent shrinkwrap, the delivery address information and barcoded pressure-sensitive Label F or firm optional endorsement line must be visible and readable by the naked eye. Mailers must label the parcel using one of the following options:

- a. A firm optional endorsement line under [708.7.0](#), followed by the 5-digit destination ZIP Code of the parcel.
- b. A blue, pressure-sensitive, barcoded Label F on the address side of the parcel.

2.2.6 Media Mail Markings

Each piece of Media Mail mailed at a presorted price must bear the required marking “Presorted” or “PRSRT” in addition to the basic marking “Media Mail.” This additional marking may be placed in the postage area as specified in [2.2.1](#). Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under [708.7.0](#).

2.2.7 Exception to Markings

Mail manifested using eVS under [705.2.9](#) must bear the basic marking and the additional marking “eVS” (or the alternative “e-VS” or “EVS”) in two places:

- a. In the required permit imprint as described in [604.5.0](#).

- b. In the human-readable text above the required barcode described in [705.2.9](#) and [708.5.0](#).

2.3 Enclosures

Enclosures, attachments, and mixed price mailpieces must be marked under the applicable standards in [703.9.0](#), *Mixed Classes*.

2.4 Printing and Designs

Required markings may be printed by a postage meter or other means that ensures a legible marking. A marking may not include or be part of a decorative design or advertisement.

2.5 Marking Hazardous Materials

All mailable hazardous materials must be labeled and/or marked as required in [601.10.0](#).

3.0 Placement and Physical Standards for Endorsements

3.1 Endorsements for Delivery Instructions and Ancillary Services

The mailer must place the correct endorsement on each mailpiece to provide delivery instructions (retention period under [507.4.4.4](#) or carrier release under [508.1.2](#)) or to request an ancillary service (forwarding, return, or address correction under [507.1.0](#), *Treatment of Mail*), subject to the corresponding standards for use and availability.

3.2 Return Address

When an ancillary service endorsement is used, a domestic return address must be placed in the upper left corner of the address side of the mailpiece or the upper left corner of the addressing area. If the return address is a multiple delivery address, it must show a unit designator (e.g., an apartment number).

3.3 Placement of Endorsements

Placement of the endorsement on the mailpiece is determined as follows:

- a. The carrier release endorsement must be placed directly below the return address. If any other endorsement is used, the carrier release endorsement must be separated by the equivalent of one blank line of the type size used.
- b. A retention period specified by the mailer must be placed directly above the return address.
- c. Any ancillary service endorsement (e.g., Address Service Requested, Forwarding Service Requested, Return Service Requested, Change Service Requested) must be placed in one of these four positions:
 - 1. Directly below the return address.
 - 2. Directly above the delivery address area (which includes the delivery address block and any related nonaddress elements such as a barcode, keyline, or optional endorsement line).
 - 3. Directly to the left of the postage area and below or to the left of any price marking.

4. Directly below the postage area and below any price marking.

3.4 Physical Standards for Endorsements

Endorsements must meet these physical standards:

- a. The type size of the endorsement must be at least 8 points.
- b. The read direction of the endorsement and return address must be the same as the read direction of the delivery address.
- c. The color contrast between the endorsement and the mailpiece background must be kept at a reasonable degree. A brilliant colored background or reverse printing is not permitted.
- d. A clear space of at least 1/4 inch around (above, below, and both sides) the total area containing the endorsement(s) is required.

4.0 General Barcode Placement for Parcels

4.1 UCC/EAN Code 128 Barcode Location

The address and barcode (see [708.5.0](#)) must be placed squarely onto the largest surface area of the parcel, except when its shape and contents requires specific orientation for stability during processing; then the address and barcode(s) must be placed on the top. The address and barcode label(s) must not overlap any side of the parcel or other label. The barcode should be placed immediately adjacent to the delivery address and at least 1 inch from the edge of the parcel. The delivery address and barcode may be printed on an attachment or enclosure in a window envelope affixed to the parcel, subject to the reflectance standards in [708.5.8](#). The barcode may be placed on a separate label or in an alternate location on the address label, subject to the clearance standards in [4.2](#). Barcodes that are not placed immediately adjacent to the delivery address must not encroach the return address, postage, applicable markings, endorsements, and extra service labels.

4.2 Clear Zone for UCC/EAN Code 128 Barcode

The barcode must be located as specified in [4.1](#). No printing may appear in an area 1/8 inch above and below the barcode. A minimum clear (quiet) zone equal to 10 times the average measured narrow element (bars or space) width must be maintained to the left and right of the barcode.

4.3 POSTNET Barcodes

First-Class Mail parcels, Standard Mail irregular parcels, and Not Flat-Machinable pieces less than 6 ounces may bear POSTNET barcodes or UCC/EAN Code 128 barcodes. First-Class Mail parcels, Standard Mail irregular parcels, and Not Flat-Machinable parcels less than 6 ounces bearing POSTNET barcodes representing only the postal routing barcode (destination ZIP Code) are eligible to be mailed using eVS. POSTNET barcodes may not be used on eVS parcels bearing concatenated UCC/EAN Code 128 barcodes. Place POSTNET barcodes on First-Class Mail parcels, Standard Mail irregular parcels, or Not Flat-Machinable pieces as described under [4.3.1](#) through [4.3.3](#).

4.3.1 General Placement of POSTNET Barcodes

On any First-Class Mail parcel, any Standard Mail irregular parcel, or Standard Mail Not Flat-Machinable piece under 6 ounces, the POSTNET barcode may be anywhere on the address side as long as it is at least 1/8 inch from any edge of the piece. POSTNET barcodes must be printed according to 708.4.0. Address block barcodes are subject to the standards in 4.3.2.

4.3.2 POSTNET Barcode in Address Block

When the POSTNET barcode is included as part of the address block:

- a. Place the barcode in one of these positions:
 1. Above the address line containing the recipient's name.
 2. Below the city, state, and ZIP Code line.
 3. Above or below the keyline information.
 4. Above or below the optional endorsement line.
- b. Do not print the barcode anywhere between the address line containing the recipient's name and the city, state, and ZIP Code line.
- c. Allow at least 1/25 inch clearance between the barcode and any information line above or below it. Do not separate the barcode more than 5/8 inch from the top or bottom line of the address block. Allow at least 1/8 inch clearance between the leftmost and rightmost bars and any adjacent printing.
- d. If a window envelope is used, allow at least 1/8 inch clearance between the leftmost and rightmost bars and any printing or window edge, and at least 1/25 inch between the barcode and the top and bottom window edges. These clearances must be maintained during the insert's range of movement in the envelope. Covers for address block windows are subject to 4.3.3.
- e. If an address label is used, allow a clear space of at least 1/8 inch between the barcode and the left and right edges of the address label, and at least 1/25 inch between the barcode and the top and bottom edges of the address label.

4.3.3 Window Cover

A window cover over the address block must be a nontinted clear or transparent material (e.g., cellophane or polystyrene) that permits the barcode and its background, as viewed through the window material, to meet the reflectance standards in 708.4.4. The edges of the window cover must be securely glued to the envelope.

410 Commercial Parcels Express Mail

413 Prices and Eligibility

414 Postage Payment and Documentation

415 Mail Preparation

416 Enter and Deposit

413 Prices and Eligibility

Overview

- [1.0 Express Mail Commercial Base Prices and Fees](#)
- [2.0 Content Standards for Express Mail](#)
- [3.0 Basic Standards for Express Mail](#)
- [4.0 Service Features of Express Mail](#)

1.0 Express Mail Commercial Base Prices and Fees

1.1 Prices Charged Per Piece

Express Mail postage is charged for each addressed piece according to its weight and zone. For shipments presented in Express Mail pouches under an Express Mail Custom Designed agreement, each pouch is considered an addressed piece.

1.2 Price Application

Except under [1.4, Flat-Rate Envelope](#), Express Mail items are charged the 0.5-pound price for items up to 0.5 pound. Items over 0.5 pound are rounded up to the next whole pound. For example, if a piece weighs 0.25 pound, the weight (postage) increment is 0.5 pound; if a piece weighs 0.75 pound, the weight (postage) increment is 1 pound; if a piece weighs 1.2 pounds, the weight (postage) increment is 2 pounds. Except for the Express Mail flat-rate envelope, Express Mail prices are based on weight and zone.

1.3 Commercial Base Prices

Express Mail commercial base prices are 3 percent below retail Express Mail prices (see [Exhibit 113.1.3](#)). These prices apply to:

- a. Customers who use an Express Mail Corporate Account (EMCA), including Federal Agency Accounts.
- b. Click-N-Ship customers.
- c. Registered end-users of PC Postage products when using a shipping label (e.g. Stamps.com, indicia, Pitney Bowes).

1.4 Flat-Rate Envelope

[7-3-08] Material mailed in the USPS-provided Express Mail flat-rate envelope is charged \$16.00, regardless of the actual weight of the piece or its destination. Only USPS-produced flat-rate envelopes are eligible for the flat-rate envelope price. Custom Designed items are not eligible for flat-rate pricing.

1.5 Commercial Volume Rebates

Quarterly rebates will be provided to customers whose account volume exceeds a minimum threshold and who either use an Express Mail Corporate Account (EMCA), including Federal Agency Accounts, or are registered end-users of PC Postage products when using a shipping label (e.g. Stamps.com, indicia, Pitney Bowes). These rebates are intended for end users; third-party consolidators and postage resellers are not eligible. Rebates are available for Express Mail volume mailed

beginning July 1, 2008. Rebates are calculated based on volume of Express Mail mailed in a postal quarter. The quarterly rebate is credited to each qualifying mail owner's account. See [Exhibit 1.5, Commercial Volume Rebates](#).

Exhibit 1.5 Commercial Volume Rebates

MINIMUM QUARTERLY VOLUME	ADDITIONAL PERCENTAGE OFF RETAIL PRICES (REBATE)
125	2.0%
438	4.5%
938	7.0%

If the rebate expected is not received within 90 days after the close of the next postal quarter, an appeal may be made to manager, Mailing Standards. (See [608.8.0](#)).

1.6 Sunday and Holiday Premium

When delivery is guaranteed for a Sunday or holiday, there is a premium of \$12.50, unless paying via an Express Mail Manifesting Agreement. Customers not desiring delivery on a Sunday or a holiday may avoid the premium by opting for guaranteed delivery on the subsequent delivery day.

1.7 Pickup on Demand

1.7.1 Pickup on Demand Fee

Per occurrence: \$14.75.

May be combined with Priority Mail and Package Services pickups (see [507.6.0](#)).

1.7.2 Pickup on Demand Service

The Pickup on Demand fee is charged every time pickup service is provided, regardless of the number of pieces picked up, as described in [507.6.0](#).

1.8 Delivery Stop

1.8.1 Additional Fee

Express Mail Custom Designed items are subject to an additional fee for each delivery stop for items presented for delivery to addressee.

1.8.2 Fee for Delivery Stops

Custom Designed only, each: \$14.75.

1.9 Computing Postage

Determine single-piece weight and weight (postage) increment for each addressed piece then identify the appropriate retail price and multiply the retail price by 3 percent. Subtract the discount amount (without rounding off) from the retail price and round off the result (see [604.7.1.3](#)). For commercial Express Mail, pay for postage on each piece using an Express Mail Corporate Account ([705.2.6](#)), including Federal Agency Accounts, Click-N-Ship, or PC-Postage.

2.0 Content Standards for Express Mail

2.1 General

All mailable matter may be sent as Express Mail, except matter prohibited by standards (e.g., certain hazardous materials).

2.2 Matter Required to be Mailed as First-Class Mail

Mailers have the option to use Express Mail or Priority Mail for mailpieces required to be mailed as First-Class Mail. Complete descriptions of matter requiring the use of First-Class Mail are provided in [133.3.0](#).

3.0 Basic Standards for Express Mail

3.1 Definition

Express Mail is an expedited service for shipping any mailable matter, with guaranteed delivery, subject to the standards below. Express Mail International is available between the United States and most foreign countries (see the *International Mail Manual*).

3.2 Matter Closed Against Postal Inspection

Matter closed against postal inspection includes First-Class Mail, Priority Mail, and Express Mail. The USPS may open mail other than First-Class Mail, Priority Mail or Express Mail to determine whether the proper price is paid. Material wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail, Priority Mail or Express Mail price.

4.0 Service Features of Express Mail

4.1 General

[9-11-08] The service features are as follows:

- a. Customers may access delivery information on the Internet by visiting www.usps.com or calling 1-800-222-1811 toll-free and providing the article number. A delivery record, including the recipient's signature, will be faxed or mailed upon request.
- b. When waiver of signature is authorized by the mailer, the delivery employee signs upon delivery. The item is delivered to the addressee's mail receptacle or other secure location. Customers who waive the signature requirement will be provided only the delivery date and will not receive an image of the signature when accessing the delivery record on the Internet or when calling the toll-free number. Restrictions for waiver of signature are defined in [503.1.1.6, Insurance and Indemnity](#), and [503.1.1.7, Additional Insurance](#).

4.2 Express Mail Next Day Delivery

4.2.1 Availability

Express Mail Next Day Delivery is available at designated USPS facilities, designated Express Mail collection boxes, or through Carrier Pickup or Pickup on Demand service, for overnight service to designated destination 3-digit ZIP Code delivery areas, facilities, or locations (Post Office to Addressee Service). Items are delivered to an addressee within the designated delivery area of the destination facility by noon or 3 p.m. on the next day. If delivery is not made, the addressee is notified, a second notice is left on the third day, and a second delivery is attempted upon customer request. For additional options, see [4.2.4, Hold for Pickup](#), and [4.4, Express Mail Custom Designed](#).

4.2.2 Where Not Available

Next Day Delivery may not be available at or between all Post Offices or at all times of deposit. An Express Mail Next Day Delivery directory, showing detailed local information about Express Mail Next Day Delivery, is available at Post Offices.

4.2.3 Acceptance Times

Express Mail Next Day Delivery mail must be presented by the times authorized by the postmaster. Express Mail Next Day Delivery items mailed after the time authorized by the postmaster are accepted for delivery on the second day after mailing, subject to the standards for this service.

4.2.4 Hold for Pickup

Under Hold for Pickup service, items presented under [4.2.1](#) are available for claim by the addressee at the destination facility by 10 a.m., 12 p.m., or 3 p.m. of the next day the destination office is open for retail business.

4.2.5 Refunds

For Express Mail Next Day Delivery, the USPS refunds the postage for an item not available for customer pickup at destination or for which delivery to the addressee was not attempted, subject to the standards for this service, unless the delay was caused by one of the situations in [414.3.0, Postage Refunds](#).

4.3 Express Mail Second Day Delivery

4.3.1 Availability

Express Mail Second Day Delivery is available to any 3-digit or 5-digit ZIP Code destination not listed in the Next Day Delivery directory mentioned in [4.2.2](#) (Post Office to Addressee Service). Items are delivered to an addressee within the designated delivery area of the destination facility by noon or 3 p.m. on the second delivery day. If delivery is not made, the addressee is notified, a second notice is left on the third day, and a second delivery is attempted upon customer request. For additional options, see [4.3.4, Hold for Pickup](#) and [4.4, Express Mail Custom Designed](#).

4.3.2 Acceptance

Express Mail Second Day Delivery is accepted at designated USPS facilities, at Express Mail collection boxes, and through Pickup on Demand service.

4.3.3 Acceptance Times

Express Mail Second Day Delivery shipments must be presented by 5 p.m., or such later time authorized by the postmaster.

4.3.4 Hold for Pickup

Under Hold for Pickup service, items presented under 4.3.3 are available to pick up by the addressee at the destination facility by 10 a.m., 12 p.m., or 3 p.m. of the second delivery day that the destination office is open for retail business.

4.3.5 Refunds

For Express Mail Second Day Delivery, the USPS refunds the postage for an item not available for customer pickup at destination or for which delivery to the addressee was not attempted, subject to the standards for this service, unless the delay was caused by one of the situations in 414.3.0, *Postage Refunds*.

4.4 Express Mail Custom Designed**4.4.1 Availability**

[7-3-08] A service agreement is required for Custom Designed mailings. Custom Designed items are not eligible for flat-rate pricing.

4.4.2 Scheduled Basis

Express Mail Custom Designed is available only on a scheduled basis between designated USPS facilities or other designated locations for mailable matter presented under the service agreement between the USPS and the mailer.

4.4.3 Additional Fee

Express Mail Custom Designed items are subject to an additional fee for each delivery stop for items presented for delivery to addressee.

4.4.4 Service Agreement Information

Each Express Mail Custom Designed Agreement must specify the scheduled:

- a. Place and day or date of origin for each shipment presented for service to each specific destination.
- b. Place and day or date for claim or delivery at destination for each scheduled shipment.
- c. Times of day for presenting at origin and for claim or delivery at destination.

4.4.5 Service Commencement

Service provided under a service agreement must begin not more than 10 days after the signed service agreement is presented to the USPS.

4.4.6 Changes in Destination Address

At least 30 days' advance notice is required to change the Express Mail destination address for origin caller service mail (accelerated reply mail).

4.4.7 Termination by USPS

Express Mail Custom Designed provided under a service agreement may be terminated by the USPS on 10 days' written notice to the mailer, if service cannot be provided for reasons beyond the control of the USPS or because of changes in USPS facilities or operations, or if the mailer fails to adhere to the terms of the service agreement or these standards.

413.4.4.8

4.4.8 Termination by Mailer

A service agreement may be terminated by the mailer for any reason by notice to the USPS.

4.4.9 Refunds

For Express Mail Custom Designed, the USPS refunds the postage for an item not available for customer pickup at destination or not delivered to the addressee within 24 hours of mailing, unless the item was mailed under a service agreement that provides for delivery more than 24 hours after scheduled presentation at the point of origin or if the delay was caused by one of the situations in [414.3.0, Postage Refunds](#).

4.5 Express Mail Military Service (EMMS)

4.5.1 Objectives

For Express Mail Military Service (EMMS), items presented at APO/FPO facilities before the published cut-off time are delivered the second day after acceptance. Items presented after the published cut-off time are delivered the third day after acceptance. For EMMS, the USPS refunds postage for an item not available for customer pickup at the APO/FPO of address or for which delivery to the addressee was not attempted domestically within the times specified by the standards for this service, unless the item was delayed by Customs; the item was destined for an APO/FPO that was closed on the intended day of delivery (delivery is attempted the next business day); or the delay was caused by one of the situations in [414.3.0, Postage Refunds](#).

4.5.2 Availability

EMMS (under [2.6, Express Mail Military Service \(EMMS\)](#)) is available between the United States and designated APOs and FPOs to provide Department of Defense personnel stationed overseas, and others entitled to APO and FPO mailing privileges, an expedited delivery service to or from the United States. EMMS Custom Designed Service and EMMS drop shipment service are available to authorized APO/FPO destinations.

4.6 Drop Shipment

Express Mail Custom Designed, Express Mail Next Day Delivery, and Express Mail Second Day Delivery may be used to expedite movement of any other class of mail from one domestic USPS facility to another by Express Mail drop shipment, subject to the corresponding standards. For more information, see [705.17.0](#).

414 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Corporate Accounts](#)
- [3.0 Postage Refunds](#)

1.0 Basic Standards for Postage Payment

Commercial Express Mail postage may be paid with an Express Mail corporate account (see [2.0](#)), including Federal Agency accounts, through Click-N-Ship, or through PC Postage by registered end-users. Federal agency and USPS official Express Mail may use the appropriate indicia, subject to [703.7.0, Official Mail \(Penalty\)](#). The mailer is responsible for proper payment of postage. Customers wishing to manifest Express Mail items may request authorization to use an Express Mail Manifesting System according to the procedures in [705.2.6](#).

2.0 Corporate Accounts

2.1 Availability

An Express Mail corporate account is available to any mailer, subject to [2.3](#) through [2.6](#) in Corporate Accounts and the terms on Form 5639. The address provided by the mailer on Form 5639 must be valid as a condition of an account being opened.

2.2 Account

Written application is required to mail with an Express Mail corporate account. Mailers must pay postage through an Express Mail corporate account for all Express Mail items accepted under the terms of an Express Mail Manifesting agreement in [705.2.6](#).

2.3 Postage Liability

The mailer must pay all postage and fees resulting from shipments presented bearing the assigned account number while the account is active and up to 30 days after the account is closed. After that, any shipment bearing the account number is refused and returned to the mailer.

2.4 Minimum Balance

To open and maintain an account, the mailer must do one of the following:

- a. Participate in the Centralized Account Processing System (CAPS), which requires no initial deposit and no maintenance of a minimum balance.
- b. Use a personal or business credit card, which requires no initial deposit and no maintenance of a minimum balance.
- c. Make an initial deposit with cash or by check of \$250, or the total postage and fees expected during the first 4 weeks of account usage, whichever is higher. After that, the minimum balance in the account must equal an average week's postage and fees, or \$100, whichever is higher.

414.2.5

2.5 USPS Report

By the 10th of the month, the account holder receives a mailing activity statement for the previous month. This statement includes beginning and ending balances; deposits made; and postage and fees deducted. Accounts with activity have an itemized page included in the statement. This itemization lists each piece mailed, the mailing date, label number, origin and destination ZIP Codes, and postage and fees. Deposits, withdrawals, and adjustments also are itemized.

2.6 Closing Account

The USPS may close an account with 10 days' written advance notice to the account holder if the ending balance on the mailing activity statement is below the minimum balance required for two consecutive months. The USPS may also close an account with 10 days' written advance notice if the account remains inactive for three consecutive months, unless circumstances warrant otherwise (e.g., a seasonal mailer, positive balance, etc.). The mailer may close the account at any time. The USPS reserves the right to refer closed corporate accounts with negative balances to a collection agency.

3.0 Postage Refunds

Postage refunds may not be available if delivery was attempted within the times required for the specific service, or if the delay of the item was caused by any of the following reasons:

- a. Properly detained for law enforcement purpose; strike or work stoppage; delayed because of an incorrect ZIP Code or address; forwarding or return service was provided after the item was made available for claim; delay or cancellation of flights. Attempted delivery occurs under any of these situations when the delivery is physically attempted, but cannot be made; the shipment is available for delivery, but the addressee made a written request that the shipment be held for a specific day or days; the delivery employee discovers that the shipment is undeliverable as addressed before leaving on the delivery route.
- b. As authorized by USPS Headquarters, when the delay was caused by governmental action beyond the control of the USPS or air carriers; war, insurrection, or civil disturbance; breakdown of a substantial portion of the USPS transportation network resulting from events or factors outside the control of the USPS; or acts of God.

415 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Express Mail Next Day and Second Day](#)
- [3.0 Express Mail Custom Designed](#)
- [4.0 Firm Mailing Book](#)

1.0 General Information for Mail Preparation

Express Mail packaging provided by the USPS must be used only for Express Mail. Regardless of how the packaging is reconfigured or how markings may be obliterated, any matter mailed in USPS-provided Express Mail packaging is charged the appropriate Express Mail price.

2.0 Express Mail Next Day and Second Day

2.1 Mailing Label

For each Express Mail item, the mailer must complete a mailing label – either Label 11-A or Label 11-E for Hold for Pickup service, or Label 11-B or Label 11-F for Post Office to Addressee Service. Mailers authorized to present Next Day or Second Day Express Mail items using an Express Mail Manifesting System are required to follow label preparation procedures in Publication 97, *Express Mail Manifesting Technical Guide*.

2.2 Waiver of Signature

[9-11-08] A mailer sending an Express Mail item may instruct the USPS to deliver an Express Mail Next Day Delivery or Express Mail Second Day Delivery item without obtaining the signature of the addressee or the addressee's agent by checking and signing the waiver of signature on Label 11-B or Label 11-F, Express Mail Post Office to Addressee, or indicating waiver of signature is requested on single-ply commercial label. Completion of the waiver of signature authorizes the delivery employee to sign upon delivery. The item is delivered to the addressee's mail receptacle or other secure location. Mailers who request waiver of signature are provided only the delivery date and time, and not an image of the signature when accessing delivery information on the Internet or when calling the toll-free number.

2.3 ZIP Code Determination

For Express Mail Next Day Delivery, the mailer must determine whether the item is destined to a 3-digit ZIP Code area to which Express Mail Next Day Delivery is offered from the point of origin. An Express Mail Next Day Delivery directory, showing detailed local information about Express Mail Next Day Delivery, is available at Post Offices. If the destination is not listed, the mailer must use Express Mail Second Day Delivery.

415.3.1

3.0 Express Mail Custom Designed

3.1 Forms

The mailer must complete Form 5625 and, when appropriate, Form 3877. The completed form is placed in an EP-13 envelope that is affixed to the Express Mail pouch.

3.2 Waiver of Signature

Waiver of signature is not available for Express Mail Custom Designed.

3.3 Pouches

Except under [416, Enter and Deposit](#), all Express Mail Custom Designed items must be presented in sealed Express Mail pouches.

4.0 Firm Mailing Book

Form 3877 is available at no cost to any mailer who mails an average of three or more Express Mail items at one time, following these instructions:

- a. The mailer must prepare Express Mail Custom Designed and Express Mail Next Day Delivery or Second Day Delivery items as described above.
- b. Form 3877 must be presented with the items to be mailed.
- c. The mailer must enter on Form 3877 the full number of each Express Mail item and the addressee's name and address.
- d. All entries must be made in duplicate by typewriter, ink, or ballpoint pen. One copy is kept by the accepting employee. The other is receipted and returned to the mailer.
- e. All unused parts of the address column in Form 3877 must be obliterated by drawing a diagonal line through the unused part. Any alteration must be initialed by the mailer and accepting employee.
- f. For Express Mail Manifesting, a special manifest is used to present Express Mail items for acceptance as described in Publication 97, *Express Mail Manifesting Technical Guide*. Form 3877, *Firm Mailing Book for Accountable Mail*, may be used only to list items for which extra services have been requested. See [705.2.6, Express Mail Manifesting Agreements](#), for information.

Overview

- [1.0 Express Mail Next Day and Second Day Delivery](#)
- [2.0 Express Mail Custom Designed](#)
- [3.0 Express Mail Military Service](#)
- [4.0 Pickup on Demand Service](#)

1.0 Express Mail Next Day and Second Day Delivery

Commercial Express Mail Next Day and Second Day Delivery items:

- a. May be deposited in Express Mail collection boxes, handed to delivery and collection employees during their normal delivery and collection duties, or picked up by USPS Pickup on Demand service. The “time and date of mailing” for items deposited in these ways, is the time and date the items are brought to the Express Mail acceptance unit.
- b. If manifested, will be accepted at the locations specified in the Express Mail Manifesting agreement.

2.0 Express Mail Custom Designed

Express Mail Custom Designed items must be deposited on a scheduled basis under the service agreement.

3.0 Express Mail Military Service

Express Mail Military Service items must be presented by the times authorized by the local postmaster.

4.0 Pickup on Demand Service

4.1 Availability

Express Mail Pickup on Demand service is available from designated Post Offices.

4.2 Pickup on Demand Fee

The Pickup on Demand fee is assessed and paid as described in [507.6.0](#).

Overview

- [1.0 Priority Mail Commercial Base Prices and Fees](#)
- [2.0 Content Standards for Priority Mail](#)
- [3.0 Basic Standards for Priority Mail](#)

1.0 Priority Mail Commercial Base Prices and Fees

1.1 Price Application

Except under [1.2](#), [1.3](#), and [1.4](#), Priority Mail prices are charged per pound; any fraction of a pound is rounded up to the next whole pound. For example, if a piece weighs 1.2 pounds, the weight (postage) increment is 2 pounds. The minimum postage amount per addressed piece is the 1-pound price. The Priority Mail price up to 1 pound is based on weight only; prices for pieces weighing more than 1 pound are based on weight and zone. See [Exhibit 1.1, Priority Mail Commercial Prices](#).

1.1.1 Availability

[7-3-08] The commercial base prices are available for:

- a. Click-N-Ship customers.
- b. Registered end-users of PC Postage products when using a shipping label (e.g. Stamps.com, endicia, Pitney Bowes).
- c. Customers using permit imprint with electronic Confirmation Services.
- d. Priority Mail Open and Distribute customers using permit imprint with the Service barcode, see [705.16.0](#), containing a unique service type code 55.

70	30.34	30.50	46.21	58.71	66.66	75.74	99.49

1. Parcels addressed for delivery to zones 1-4 (including local) that weigh less than 20 pounds but measure more than 84 inches in combined length and girth (but not more than 108 inches) are charged the applicable price for a 20-pound parcel (balloon price).
2. Parcels addressed for delivery to zones 5-8 that exceed 1 cubic foot (1,728 cubic inches) are charged based on the actual weight or the dimensional weight, whichever is greater.
3. \$4.75 is charged for matter sent in a Priority Mail flat-rate envelope provided by the USPS, regardless of weight or destination.
4. \$9.30 is charged for material sent in a Priority Mail regular flat-rate box provided by the USPS, regardless of weight or destination.
5. \$12.50 is charged for material sent in a Priority Mail large flat-rate box provided by the USPS, regardless of weight to domestic addresses, and \$10.50 for material sent in a Priority Mail large flat-rate box provided by the USPS to APO/FPO destination addresses.
6. Commercial Base prices are available for postage paid through Click-N-Ship service at usps.com, authorized PC Postage vendors, and other authorized postage payment methods.

1.2 Balloon Price

Parcels addressed for delivery to Zones 1-4 (including Local) that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable zone price for a 20-pound parcel (balloon price).

1.3 Dimensional Weight Price for Low-Density Parcels to Zones 5-8

Postage for parcels addressed for delivery to Zones 5-8 and exceeding 1 cubic foot (1,728 cubic inches) is based on the actual weight or the dimensional weight (as calculated in 1.3.1 or 1.3.2), whichever is greater.

1.3.1 Determining Dimensional Weight for Rectangular Parcels

Follow these steps to determine the dimensional weight for a rectangular parcel:

- a. Measure the length, width, and height in inches. Round off (see 604.7.0) each measurement to the nearest whole inch.
- b. Multiply the length by the width by the height.
- c. If the result exceeds 1,728 cubic inches, divide the result by 194 and round up (see 604.7.0) to the next whole number to determine the dimensional weight in pounds.

1.3.2 Determining Dimensional Weight for Nonrectangular Parcels

Follow these steps to determine the dimensional weight for a nonrectangular parcel:

- a. Measure the length, width, and height in inches at their extreme dimensions. Round off (see 604.7.0) each measurement to the nearest whole inch.
- b. Multiply the length by the width by the height.
- c. Multiply the result by an adjustment factor of 0.785.
- d. If the final result exceeds 1,728 cubic inches, divide the result by 194 and round up (see 604.7.0) to the next whole number to determine the dimensional weight in pounds.
- e. If the dimensional weight exceeds 70 pounds, the customer pays the 70-pound price.

1.4 Flat-Rate Envelopes and Boxes

Any amount of material may be mailed in a USPS-produced Priority Mail flat-rate box or flat-rate envelope. When sealing a flat-rate box or flat-rate envelope, the container flaps must be able to close within the normal folds. Tape may be applied to the flaps and seams to reinforce the container; provided the design of the container is not enlarged by opening the sides and the container is not reconstructed in any way.

1.4.1 Flat-Rate Envelopes-Price and Eligibility

Each USPS-produced Priority Mail flat-rate envelope is charged \$4.75, regardless of the actual weight of the piece or its destination. Only USPS-produced flat-rate envelopes are eligible for the flat-rate envelope price.

1.4.2 Flat-Rate Boxes-Price and Eligibility

Items to an APO/FPO address may be shipped in the Priority Mail large flat-rate box or in a special version of the box identified with the additional logo:

"Americasupportsyoudmil." If the special version of the APO/FPO flat-rate box is used for non-APO/FPO addresses, the domestic or international large flat-rate box prices will apply. Only USPS-produced flat-rate boxes are eligible for the flat-rate box prices.

Each USPS-produced Priority Mail flat-rate box, regardless of the actual weight of the piece or its destination, is charged:

- a. \$9.30 for material sent in Priority Mail regular flat-rate boxes (FRB-1 or FRB-2) to domestic and APO/FPO addresses.
- b. \$10.50 for material sent in a Priority Mail large flat-rate box to APO/FPO destination addresses (see [703.2.0](#)).
- c. \$12.50 for material sent in a Priority Mail large flat-rate box to domestic destinations.

1.5 Pickup on Demand Fee

Priority Mail only, per occurrence: \$14.75. May be combined with Express Mail and Package Services pickups (see [507.6.0](#), [Pickup on Demand Service](#)).

1.6 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.7 Computing Postage

Determine single-piece weight increment for each piece and affix postage to each piece under [124.1.2, Affixing Postage—Single-Piece Mailings](#) (as applicable) or, for permit imprint mailings, multiply the number of addressed pieces at each weight increment by the corresponding postage price.

2.0 Content Standards for Priority Mail

2.1 General

All mailable matter may be sent as Priority Mail, except matter prohibited by standards (e.g., certain hazardous materials).

2.2 Matter Required to be Mailed as First-Class Mail

Unless Express Mail is used, Priority Mail prices are required for a mailpiece that weighs more than 13 ounces when the mailpiece contains matter that must be mailed as First-Class Mail. Complete descriptions of matter requiring the use of First-Class Mail are provided in [133.3.0](#).

3.0 Basic Standards for Priority Mail

3.1 Definition

Priority Mail is an expedited service and may contain any mailable matter weighing no more than 70 pounds except for APO and FPO mail subject to [703.2.0](#), [Overseas Military Mail](#), and [703.4.0](#), [Mail Sent by U.S. Armed Forces](#), and Department of State mail subject to [703.3.0](#). Priority Mail prices are based on zone and weight.

3.2 Service Objectives

All Priority Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information.

3.3 Matter Closed Against Postal Inspection

Matter closed against postal inspection includes First-Class Mail, Priority Mail, and Express Mail. The USPS may open mail other than First-Class Mail, Priority Mail or Express Mail to determine whether the proper postage is paid. Material wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail, Priority Mail, or Express Mail price.

424 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Postage Paid With Permit Imprint](#)

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

Commercial Priority Mail postage may be paid with: Click-N-Ship; PC Postage when registered end users use a shipping label (e.g. Stamps.com, endicia, Pitney Bowes); or permit imprint with electronic Confirmation Services and effective October 1, 2008, a barcode under [708.5.0](#) for the ZIP Code of the delivery address.

1.2 Affixing Postage—Single-Piece Mailings

In a postage-affixed Priority Mail mailing, the mailer must affix to each piece a value equal to at least the postage required (including any surcharges).

2.0 Postage Paid With Permit Imprint

2.1 Advance Deposit Account

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. A mailer must also use electronic Confirmation Services and effective October 1, 2008, a barcode under [708.5.0](#) for the ZIP Code of the delivery address. This payment method may be used for postage and extra service fees. This method must not be used to pay postage on any mailpiece that is designed for reply purposes.

2.2 Minimum Quantity

Permit imprint mailings must contain at least 200 pieces or 50 pounds submitted under the terms of an approved manifest mailing system agreement with exceptions allowed under a minimum volume reduction provision.

2.3 Postage Statement

A completed postage statement must accompany each mailing paid with a permit imprint.

425 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Marking](#)
- [3.0 Preparation for a Permit Imprint Mailing](#)

1.0 General Information for Mail Preparation

1.1 **Priority Mail Packaging Provided by the USPS**

Priority Mail packaging provided by the USPS must be used only for Priority Mail. Regardless of how the packaging is reconfigured or how markings may be obliterated, any matter mailed in USPS-provided Priority Mail packaging is charged the appropriate Priority Mail price.

1.2 **Required Use**

The sender's domestic return address must appear legibly on Priority Mail.

2.0 Marking

The marking "Priority" or "Priority Mail" must be placed prominently on the address side of each piece of Priority Mail.

3.0 Preparation for a Permit Imprint Mailing

3.1 **Preparing a Permit Imprint Mailing**

To use a permit imprint, the pieces must be of identical weight and, unless all the pieces are in a weight category for which the price does not vary by zone, the pieces must be separated by zone when presented to the Post Office. All permit imprint pieces must bear an electronic Confirmation Services barcode and effective October 1, 2008, a barcode under [708.5.0](#) for the ZIP Code of the delivery address.

3.2 **Payment Method**

A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

426 Enter and Deposit

Overview

- [1.0 Deposit](#)
- [2.0 Pickup on Demand Service](#)

1.0 Deposit

1.1 Pieces Weighing 13 Ounces or Less

Priority Mail weighing 13 ounces or less may be deposited into any collection box, mail chute, or mail receptacle or at any place where mail is accepted if the full required postage is paid. Permit imprint mail must be presented at a Post Office under [604.5.0, Permit Imprint \(Indicia\)](#), or [705, Advanced Preparation and Special Postage Payment Systems](#).

1.2 Pieces Weighing More than 13 Ounces

Priority Mail weighing more than 13 ounces must be presented at a Post Office retail counter if postage is paid with adhesive stamps. The sender may be required to provide identification before the mail is accepted by the USPS. Such mail may be presented by a sender known to the postal carrier at the sender's residence or place of business. Priority Mail weighing more than 13 ounces and not complying with the requirements of this section is returned to the sender for proper deposit.

2.0 Pickup on Demand Service

Priority Mail Pickup on Demand service is available from designated Post Offices.

435 Mail Preparation

436 Enter and Deposit

433 Prices and Eligibility

Overview

- 1.0 Prices and Fees for First-Class Mail
- 2.0 Content Standards for First-Class Mail Parcels
- 3.0 Basic Standards for First-Class Mail Parcels
- 4.0 Price Eligibility for Presorted First-Class Mail Parcels

1.0 Prices and Fees for First-Class Mail

1.1 Price Application

Postage is based on the price that applies to the weight (postage) increment of each addressed piece.

1.2 Price Computation for First-Class Mail Parcels

First-Class Mail prices are charged per ounce or fraction thereof; any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 1.2 ounces, the weight (postage) increment is 2 ounces. The minimum postage per addressed piece is that for a piece weighing 1 ounce.

1.3 Parcel Prices

Weight Not Over (ounces) ¹	5-Digit	3-Digit	ADC	Single-Piece ²
1	\$0.711	\$0.858	\$0.918	\$1.17
2	0.881	1.028	1.088	1.34
3	1.051	1.198	1.258	1.51
4	1.221	1.368	1.428	1.68
5	1.391	1.538	1.598	1.85
6	1.561	1.708	1.768	2.02
7	1.731	1.878	1.938	2.19
8	1.901	2.048	2.108	2.36
9	2.071	2.218	2.278	2.53
10	2.241	2.388	2.448	2.70
11	2.411	2.558	2.618	2.87
12	2.581	2.728	2.788	3.04
13	2.751	2.898	2.958	3.21

1. A \$0.05 surcharge applies to pieces in 3-digit and ADC sacks that:
 - Do not bear a correct POSTNET or UCC/EAN Code 128 barcode (708.5).
 - Weigh less than 2 ounces.
 - Are irregularly shaped, such as tubes, rolls, and triangles.
2. Use single-piece price for mixed ADC sortation.

433.1.4

1.4 Surcharge

Unless prepared in 5-digit/scheme sacks or paid at the single-piece prices, presorted parcels are subject to a \$0.05 surcharge if any of the following characteristics apply:

- a. The parcels weigh less than 2 ounces.
- b. The parcels do not bear a UCC/EAN Code 128 or POSTNET barcode, under [708.8.0](#), for the ZIP Code of the delivery address.
- c. The parcels are irregularly shaped, such as rolls, tubes, and triangles.

1.5 Presort Mailing Fee

Presort mailing fee, per 12-month period, per office of mailing: \$180.00.

1.6 Computing Postage for First-Class Mail

Determine single-piece weight and weight (postage) increment for each addressed piece as prescribed in [1.1](#) and [1.2](#). For First-Class Mail, affix postage to each piece or, for permit imprint mailings, multiply the number of addressed pieces at each price increment (and in each price category, if applicable) by the corresponding postage price, add the *unrounded* products, and round off the total postage to the nearest whole cent.

1.7 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

2.0 Content Standards for First-Class Mail Parcels

2.1 General

With the exception of restricted material as described in [601.8.0](#), any mailable item may be mailed as First-Class Mail.

2.2 Bills and Statements of Account

Bills and statements of account must be mailed as First-Class Mail (or Express Mail) and are defined as follows:

- a. Bills and statements of account assert a debt in a definite amount owed by the addressee to the sender or a third party. In addition, bills include a demand for payment; statements of account do not include a demand for payment. The debt does not have to be due immediately but may become due at a later time or on demand. The debt asserted need not be legally collectible or owed.
- b. Bills and statements of account do not need to state the precise amount due if they contain information that would enable the debtor to determine that amount.

2.3 Personal Information

Mail containing personal information must be mailed as First-Class Mail (or Express Mail). Personal information is any information specific to the addressee.

2.4 Handwritten and Typewritten Material

Mail containing handwritten or typewritten material must be mailed as First-Class Mail or Express Mail.

2.5 Matter Not Required to be Mailed as First-Class Mail

Matter eligible for Standard Mail or Package Services prices or authorized as Periodicals is not required to be mailed as First-Class Mail or Express Mail.

2.6 Prohibited Air Transportation

All First-Class Mail is subject to limitations for air transportation. Generally, all mailable matter may be transported by aircraft, unless restricted in [601.10.0, Hazardous Materials](#), Hazardous Materials.

3.0 Basic Standards for First-Class Mail Parcels**3.1 Description of Service****3.1.1 Service Objectives**

First-Class Mail receives expeditious handling and transportation. Service objectives for delivery are 1 to 3 days; however, delivery time is not guaranteed.

3.1.2 Price Options

First-Class Mail offers the flexibility of single-piece prices ([133.1.0](#)), and discounted prices ([1.0](#)) for presorted mailings of 500 or more pieces that weigh 13 ounces or less.

3.2 Defining Characteristics**3.2.1 Inspection of Contents**

First-Class Mail is closed against postal inspection. Federal law and USPS regulations restrict both opening and reviewing the contents of First-Class Mail by anyone other than the addressee.

3.2.2 Forwarding Service

The price of First-Class Mail includes forwarding service to a new address for up to 12 months.

3.2.3 Return Service

The price of First-Class Mail includes return service if the mailpiece is undeliverable.

3.2.4 Extra Services Exclusive to First-Class Mail

First-Class Mail is the only class of mail eligible to receive the following extra services: Registered Mail service and Certified Mail service.

3.2.5 Additional Extra Services

Additional extra services available with First-Class Mail are certificate of mailing service, COD service, Delivery Confirmation service (parcels only), insured mail service (merchandise only), return receipt service, restricted delivery service, Signature Confirmation service (parcels only), and special handling. See information regarding extra services in [503](#).

3.3 Additional Basic Standards for First-Class Mail

All pieces of presorted First-Class Mail must:

- a. Meet the basic content standards for First-Class Mail in [2.0](#).
- b. Weigh 13 ounces or less.
- c. Meet the applicable standards in [433, Prices and Eligibility](#), [434, Postage Payment and Documentation](#), and [604.7.0, Computing Postage](#).
- d. Be part of a single mailing of at least 500 pieces of Presorted First-Class Mail.
- e. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
 1. The Move Update standard in [3.5](#).
 2. The ZIP Code accuracy standard in [3.6](#).
 3. If an alternative addressing format is used, the additional standards in [602.3.0](#).

3.4 Presort Mailing Fee

A First-Class Mail presort mailing fee must be paid once each 12-month period at each office of mailing by any person or organization entering mailings at automation or Presorted First-Class Mail prices. Payment of one fee allows a mailer to enter mail at all those prices. Persons or organizations paying this fee may enter mail of their clients as well as their own mail. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

3.5 Move Update Standard

3.5.1 Basic Standards

The Move Update standard is a means of reducing the number of mailpieces in a mailing that require forwarding or return by the periodic matching of a mailer's address records with customer-filed change-of-address orders received and maintained by the USPS. For the purposes of this standard, *address* means a specific address associated with a specific occupant name. Addresses subject to the Move Update standard must meet these requirements:

- a. Each address and associated occupant name used on the mailpieces in a mailing must be updated within 185 days before the mailing date, with one of the USPS-approved methods in [3.5.2](#).
- b. Each individual address in the mailing is subject to the Move Update standard.

- c. If an address used on a mailpiece in a mailing at one class of mail and price is updated with an approved method (e.g., Address Change Service), the same address may be used during the following 185 days and meets the Move Update standard.
- d. Except for mail bearing an alternative address format, addresses used on pieces claiming First-Class Mail Presorted prices, regardless of any required surcharge, must meet the Move Update standard.

3.5.2 USPS-Approved Methods

The following methods are authorized for meeting the Move Update standard:

- a. Address Change Service (ACS).
- b. National Change of Address Linkage System (NCOA^{Link}).
- c. Mailer Move Update Process Certification and USPS-approved alternative methods for mailers with legitimate restrictions on incorporating USPS-supplied change-of-address information into their mailing lists. The National Customer Support Center (see [608.8.1](#) for address) administers and approves both Mailer Move Update Process Certification and alternative methods.
- d. Ancillary service endorsements except “Forwarding Service Requested.”

3.5.3 Mailer Certification

The mailer’s signature on the postage statement certifies that the Move Update standard has been met for each address in the corresponding mailing presented to the USPS.

3.6 ZIP Code Accuracy

3.6.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain prices that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.5.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming First-Class Mail Presorted prices, regardless of any required surcharge, must meet the ZIP Code accuracy standard.

3.6.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
 1. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
 2. Any mailing list service in [507.7.0](#).
 3. An authorized service provider.
 4. CASS-certified matching software.
 5. USPS Web site www.usps.com.

3.6.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

4.0 Price Eligibility for Presorted First-Class Mail Parcels

4.1 5-Digit Price

The 5-digit price applies to presorted parcels in a 5-digit/scheme sack containing at least 10 pounds of parcels.

4.2 3-Digit Price

The 3-digit price applies to presorted parcels in a 3-digit sack containing at least 10 pounds of parcels.

4.3 ADC Price

The ADC price applies to presorted parcels in a 3-digit origin sack (no minimum), and to parcels in an ADC sack containing at least 10 pounds of parcels.

4.4 Single-Piece Price

The single-piece price applies to presorted parcels in a mixed ADC sack, with no minimum volume requirement.

434 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Postage Payment for Presorted Parcels](#)
- [3.0 Mailing Documentation](#)

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

Postage for discount (presorted) price First-Class Mail must be paid with affixed postage ([604.1.0](#) for stamps, [604.3.0](#) for precanceled stamps, or [604.4.0](#) for metered postage) or permit imprint ([604.5.0](#)) as specified in [2.0](#). Mail manifested using the Electronic Verification System (eVS) under [705.2.9](#) must be paid with a permit imprint. A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

2.0 Postage Payment for Presorted Parcels

2.1 Payment Methods for Presorted Prices

Presorted First-Class Mail price postage must be paid with meter stamps under [604.4.0](#), permit imprints under [604.5.0](#), or precanceled postage under [604.3.0](#), subject to the corresponding standards for these methods. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization.

2.2 Affixed Postage for Presorted First-Class Mail

Unless permitted by other standards or by Business Mailer Support, USPS Headquarters, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. The full postage at the First-Class Mail price for which it qualifies (no postage documentation is required).
- b. A precanceled stamp or the full postage at the lowest First-Class Mail 1-ounce price applicable to the mailing job, and full postage on metered pieces for additional ounce(s), surcharge, or extra services.
- c. Postage in an amount not less than the lowest available First-Class Mail first-ounce letter or card price (as applicable) in the mailing job if authorized by Business Mailer Support, plus full postage on metered pieces for any extra ounce(s); postage documentation may be required by standard.

2.3 Additional Postage

Additional postage for pieces not bearing sufficient postage when presented to the USPS must be paid before acceptance either using an advance deposit account or with a meter stamp affixed to the postage statement accompanying the mail. When

the amount of postage affixed is subject to Business Mailer Support authorization under [2.2c](#), credit is not given for postage affixed in excess of the authorized amount.

3.0 Mailing Documentation

3.1 **Completing Postage Statements**

Unless manifested using eVS under [705.2.9](#), any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

3.2 **Basic Documentation Standards**

Unless manifested using eVS under [705.2.9](#), mailings presented to the USPS generally require paper documentation. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the preparation, price levels, and the content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

3.3 **Preparing Documentation**

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

3.4 **Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

3.5 **Standard Format for Documentation**

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the price claimed, or the documentation must be prepared as standardized documentation. Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation.

3.6 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#).

3.7 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

3.8 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

435 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Sacks](#)
- [3.0 Sack Labels](#)
- [4.0 Preparing Presorted Parcels](#)

1.0 General Information for Mail Preparation

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations.

1.2 Definition of Mailings

A “mailing” is defined as a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system must be prepared as a separate mailing.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *5-digit scheme for First-Class Mail parcels*: the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code ranges processed by the USPS as a single scheme, as shown in [L606](#).
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- d. *Origin/entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Separation is optional for each such 3-digit area regardless of the volume of mail.
- e. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- f. *Mixed [ADC]*: the pieces are for delivery in the service area of more than one ADC.

1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. An *origin/entry 3-digit sack* contains all mail (regardless of quantity) for a 3-digit ZIP Code area processed by the SCF in whose service area the mail is verified/entered.
- d. The *required quantity* (for example, “required at 10 pieces”) means that the unit must be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Smaller quantities may be prepared only if permitted by the standards for each price.
- e. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer’s location, the Post Office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs.
- f. A “*logical presort destination*” represents the total number of pieces in a mailing that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces.

2.0 Sacks

2.1 Presort

Presort, presort levels, and standard preparation terms are defined in [1.0](#).

2.2 Standard Containers

Mailings must be prepared in USPS-approved sacks. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing.

2.3 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds.

3.0 Sack Labels

3.1 Basic Standards

Sack labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.

- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- e. Color: white or manila.
- f. Weight: 70-pound or heavier stock.
- g. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- h. Height (perpendicular to printing):
 - 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.
 - 2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

3.2 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

3.3 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack and other information as specified by standards.

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

CONTENT TYPE	CODE
Digit	D
First-Class Mail	FCM
Mixed	MXD
Working	WKG

3.4 Line 3 (Origin Line)

Line 3 (origin line showing office of mailing or mailer information) must be the bottom line of required information unless the sack contains mail manifested using the Electronic Verification System (eVS) under [705.2.9](#). Line 3 must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office. As an alternative to adding a fourth line for eVS mailings as required by [3.5](#), "eVS" may appear as the first element on Line 3.

3.5 Electronic Verification System

All sacks containing parcels prepared and identified using the Electronic Verification System (eVS) under [705.2.9](#) must show "eVS" (or the alternatives "EVS" or "E-VS") directly below Line 3 using the same size and lettering used for Line 3. As an option, "eVS" may be placed as the first element on Line 3.

3.6 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

3.7 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It may appear below Line 3.
- A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

4.0 Preparing Presorted Parcels

4.1 Basic Standards

Each Presorted First-Class Mail mailing must be prepared in USPS-approved sacks and marked “Presorted” (or “PRSRT”) and “First-Class.” All pieces must be sorted together and prepared under [4.3](#) and [4.4](#).

4.2 Single-Piece Mail Presented With Presorted Mailings

Regardless of the method of postage payment, single-piece (nonpresorted) First-Class Mail may be presented with and reported on the same postage statement as pieces claimed at presort prices as follows:

- a. The single-piece mail must be physically separated from other pieces.
- b. The single-piece mail must bear no price marking, or must be marked only “First-Class” or (if not affixed with full postage) “Single-Piece” or “SNGLP” under [202.3.0](#).
- c. The mailer must affix full correct postage to each piece of single-piece mail, or pay the additional postage at the time of mailing.

4.3 Bundling

Bundling is not permitted.

4.4 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit/scheme optional, but required for 5-digit price (see definition in [1.3a](#)); 10-pound minimum, labeling:
 1. Line 1: For 5-digit scheme sacks use [L606](#), Column B. For 5-digit sacks use city, state, and 5-digit ZIP Code on mail (see [3.2c](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, “FCM PARCELS 5D SCH.” For 5-digit sacks, “FCM PARCELS 5D.”
- b. 3-digit optional, but required for 3-digit price; 10-pound minimum, except for optional origin/entry 3-digit(s); labeling:
 1. Line 1: [L002](#), Column A.
 2. Line 2: “FCM PARCELS 3D.”
- c. ADC (required); 10-pound minimum; labeling:
 1. Line 1: [L004](#), Column B.
 2. Line 2: “FCM PARCELS ADC.”
- d. Mixed ADC (required); no minimum; labeling:
 1. Line 1: Use [L201](#); for mail originating in ZIP Code areas in Column A, use “MXD” followed by city, state, and 3-digit ZIP Code prefix in Column C (use “MXD” instead of “OMX” in the destination line and ignore Column B).
 2. Line 2: “FCM PARCELS WKG.”

436 Enter and Deposit

Overview

- [1.0 Deposit](#)
- [2.0 Verification](#)

1.0 Deposit

1.1 Service Objective

All First-Class Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information.

1.2 Time and Location of Deposit

First-Class Mail paid at the Presorted price must be deposited at locations and times designated by the postmaster. Metered mail must be deposited in locations under the jurisdiction of the licensing Post Office except as permitted in [604.4.5.3](#). Permit imprint mail must be deposited under [604.5.0](#) and [705, *Advanced Preparation and Special Postage Payment Systems*](#).

1.3 Approved Collections

The USPS may collect Presorted First-Class Mail at a mailer's facility if part of an approved collection service for other classes of mail; space is available on the transportation required for those classes; and:

- a. Acceptance and verification are done at the customer's facility; or
- b. Postage is paid with permit imprint under an optional procedure; or
- c. Postage is paid with meter or precanceled stamps.

1.4 Permit Imprint Collection

The USPS does not collect presort mailings from a customer's facility if paid with a permit imprint and not covered by optional procedures.

2.0 Verification

2.1 USPS Verification and Mailer Correction

Mailings are subject to USPS procedures to verify correct preparation and postage payment. The mailer is responsible for correcting irregularities found in the mailing. If, at the acceptance unit, a mailing is found not to qualify for a Presorted First-Class Mail price or an automation First-Class Mail price, the mailer must either take corrective action or pay the full single-piece price. The return of such mailings to the mailer's facility for any reworking is the mailer's responsibility.

2.2 Timeframe for Corrective Action

If a mailer corrects the presort or preparation problems in a metered or precanceled stamped mailing that caused its disqualification when originally presented for acceptance, but cannot resubmit that mailing on the same day, the date shown in

436.2.3

the meter or mailer's precancel postmark must be corrected. The mailer may either re-envelope each piece and reapply postage and request a postage refund or apply a legible ".00" meter impression that includes the correct mailing date.

2.3 Payment at Single-Piece Price Rather than Correcting Errors

A mailer who pays the single-piece First-Class Mail price rather than correcting errors in a mailing paid with meter or precanceled stamps must pay the difference in cash at the window and present the copy of the cash receipt to the acceptance point before the mail may be released for processing. A mailer who makes the same choice for a mailing paid with a permit imprint must correct the postage statement presented with the mailing to show that postage is to be paid at the higher price.

440 Commercial Parcels Standard Mail

- 443 Prices and Eligibility
- 444 Postage Payment and Documentation
- 445 Mail Preparation

443 Prices and Eligibility

Overview

- [1.0 Prices and Fees for Standard Mail](#)
- [2.0 Content Standards for Standard Mail Parcels](#)
- [3.0 Basic Standards for Standard Mail Parcels](#)
- [4.0 Price Eligibility for Standard Mail](#)
- [5.0 Additional Eligibility Standards for Presorted Standard Mail Pieces](#)
- [6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Parcels](#)

1.0 Prices and Fees for Standard Mail

1.1 Standard Mail Price Application

Standard Mail prices are based on the weight of the pieces as follows:

- a. The appropriate minimum per piece price applies to any Standard Mail piece that weighs 3.3 ounces (0.2063 pound) or less.
- b. A price determined by adding the per piece charge and the corresponding per pound charge applies to any Standard Mail piece that weighs more than 3.3 ounces.

443

Commercial Parcels: Standard Mail Prices and Eligibility

443.1.2

1.2 Regular Standard Mail—Presorted and Enhanced Carrier Route Prices

	Entry Discount	Enhanced Carrier Route (ECR)			Machinable ¹			Irregular ¹			
		Saturation ²	High Density	Basic	5-Digit	BMC	Mixed BMC	5-Digit	3-Digit	ADC	Mixed ADC
Parcels weighing 3.3 oz. or less per piece price	None	\$0.389	\$0.405	\$0.519	---	---	---	\$0.708	\$0.761	\$1.080	\$1.330

10	6.68
11	7.10
12	7.52
13	7.94
Over 13 but under 16	11.87

1. Weighted fee equals single-piece First-Class Mail or Priority Mail price multiplied by 2.472.

1.7 Computing Postage for Standard Mail

1.7.1 Weight

To compute the total weight of the addressed pieces in a mailing or mailing segment for:

- a. Identical-weight pieces, multiply the computed average weight of a single piece by the corresponding number of pieces; do not round the product.
- b. Nonidentical-weight pieces, add the actual weight of the individual pieces or weigh the entire mailing in bulk; do not round either result.

1.7.2 Determining Single-Piece Weight

To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. To determine single-piece weight in a mailing of nonidentical-weight pieces, weigh each piece individually. Express all single-piece weights in decimal pounds, rounded off to four decimal places.

1.7.3 Net Postage

Postage is computed at the applicable prices on the entire mailing to be mailed at one time. The net postage price is either the applicable minimum per piece price or the piece/pound price, as adjusted for any discounts and surcharges.

1.7.4 Per Piece and Per Pound Charges

The per piece charge is computed based on the total number of addressed pieces for each price category claimed. The minimum price may apply to each piece as detailed in [1.1, Standard Mail Price Application](#). Otherwise, the per piece charge must be added to the per pound charge to determine total postage. Where applicable, the per pound charge is computed based on the total weight of the addressed pieces for each price category claimed, and is added to the per piece charge to determine total postage. For example, a quantity of pieces weighing 100.25 pounds is charged 100.25 times the applicable price per pound, based on the price claimed, plus one unit of the applicable per piece charge for each addressed piece.

1.7.5 Computing Affixed Postage

To compute postage to be affixed to each piece, multiply the weight of the piece (in pounds) by the applicable price per pound; add the applicable per piece charge and any surcharge; and round the sum up to the next tenth of a cent. The applicable minimum per piece charge must be affixed if it is more than the total computed per piece postage.

1.7.6 Permit Imprint

In any permit imprint mailing:

- a. For each price or price category, multiply the number of addressed pieces by the corresponding price per piece and (if applicable) multiply the *unrounded* total weight of the pieces by the corresponding price per pound; round off each product to four decimal places.
- b. Add the per piece and per pound charges and round off the total postage to the nearest whole cent.

2.0 Content Standards for Standard Mail Parcels**2.1 Definition and Weight**

Standard Mail consists of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (unless permitted or required by standard) and that weighs less than 16 ounces.

2.2 Personal Information

Personal information may not be included in a Standard Mail mailpiece unless all of the following conditions are met:

- a. The mailpiece contains explicit advertising for a product or service for sale or lease or an explicit solicitation for a donation.
- b. All of the personal information is directly related to the advertising or solicitation.
- c. The exclusive reason for inclusion of all of the personal information is to support the advertising or solicitation in the mailpiece.

2.3 Bills and Statements of Account

Mail containing bills or statements of account as defined in [433.2.2](#) may not be entered as Standard Mail except under the conditions described in [2.5.2](#).

443.2.4

2.4 Handwritten and Typewritten Matter

Mail containing handwritten or typewritten matter may not be entered as Standard Mail except under the conditions described in [2.6](#).

2.5 Attachments and Enclosures

2.5.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Standard Mail piece or in an envelope marked “Invoice Enclosed” and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

2.5.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to Standard Mail merchandise (including books but excluding merchandise samples) without payment of First-Class Mail postage. Incidental First-Class Mail matter may not be enclosed in or attached to matter mailed as Customized MarketMail under [705.1.0](#). An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared not to encumber postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Standard Mail or Package Services price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

2.5.3 Nonincidental First-Class Mail Enclosures

Letters or other pieces of nonincidental First-Class Mail, subject to postage at First-Class Mail prices, may be enclosed with Standard Mail pieces (except matter mailed as Customized MarketMail under [705.1.0](#)). Postage for the First-Class Mail enclosure must be placed on the outside of the piece. It may be affixed separately or added to the postage for the host piece. The endorsement “First-Class Mail Enclosed” must be placed on the piece, below the postage and above the address.

2.5.4 Nonincidental First-Class Mail Attachments

Letters or other pieces of nonincidental First-Class Mail may be placed in an envelope and securely attached to the address side of a Standard Mail piece (except matter mailed as Customized MarketMail under [705.1.0](#)), or of the principal piece, as applicable. Combination envelopes or containers with separate parts for the two classes of mail may be used. The names and addresses of the sender and addressee must be placed on both the principal piece and the attachment. Alternatively, the sender’s name and address must be placed on one part and the addressee’s name and address on the other. If the piece is a combination container

with inseparable parts or compartments, the names and addresses may appear on only one part. The applicable Standard Mail postage for the Standard Mail matter must be prepaid and placed in the upper right corner of the address space. Postage at the applicable First-Class Mail price must be paid for and affixed to the First-Class Mail attachment, unless other payment methods are permitted by standard.

2.5.5 Attachment of Other Standard Mail Matter

Standard Mail pieces may bear an attachment that is eligible as Standard Mail matter if these additional conditions are met:

- a. The piece bearing the attachment is claimed as Customized MarketMail (CMM) under [705.1.0](#) or as Enhanced Carrier Route Standard Mail under [6.0](#).
- b. The face of the attachment may bear only the price markings and endorsements permitted for the price claimed for the host piece.
- c. At the time of mailing, the piece shows only one complete delivery address. If the attachment is a reply card, the address for returning the piece is not visible.
- d. Enhanced Carrier Route host pieces are larger than 6 by 11 inches. CMM host pieces are any size permitted under [705.1.1.3, Physical Standards](#).
- e. The attachment is not larger than the host piece and does not extend beyond the host piece. An attachment affixed to a CMM piece may not be greater than 1/4 inch thick at its thickest point.
- f. Each piece in the mailing bears the attachment, and the attachment is of identical size, weight, and positioning on the host piece. Different wording or designs may be used.
- g. The attachment does not interfere with processing or delivery. Folded or multipage attachments must be secured to prevent opening during handling.

2.6 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.

443.3.1

- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

3.0 Basic Standards for Standard Mail Parcels

3.1 Description of Service

3.1.1 Service Objectives

Standard Mail may receive deferred handling. Service objectives for delivery are 2 to 9 days; however, delivery time is not guaranteed.

3.1.2 Minimum Quantity

Standard Mail provides economical prices for mailings of 200 or more pieces or 50 or more pounds of mail.

3.2 Defining Characteristics

3.2.1 Mailpiece Weight Limit

All Standard Mail pieces must weigh less than 16 ounces.

3.2.2 Preparation Requirements

Standard Mail is subject to specific volume, marking, and preparation requirements.

3.2.3 Inspection of Contents

Standard Mail is not sealed against postal inspection.

3.2.4 Forwarding Service

The price of Standard Mail typically does not include forwarding service. Forwarding service is available under [507.1.5](#).

3.2.5 Return Service

The price of Standard Mail does not include return service. Return service is available under [507.1.5](#) for an additional fee.

3.2.6 Extra Services

Extra services available with Standard Mail are insured mail service (bulk insurance only), certificate of mailing service (bulk certificate of mailing only), return receipt for merchandise service, and Delivery Confirmation service (parcels only). See information regarding extra services in [503](#).

3.2.7 Periodicals

Authorized Periodicals may not be entered as Standard Mail unless permitted by standard.

3.2.8 Identical Pieces

The contents of printed matter in a Standard Mail mailing must be identical to a piece sent to at least one other addressee. Standard Mail may include the addressee's name and address but may not transmit personal information except as permitted under [2.2](#).

3.3 Additional Basic Standards for Standard Mail

Each Standard Mail mailing is subject to these general standards:

- a. All pieces in a mailing must be of the same processing category, except that irregular and machinable parcels may be combined in 5-digit scheme and 5-digit sacks or on 5-digit scheme and 5-digit pallets.
- b. Each mailing must contain at least 200 pieces or 50 pounds of pieces. See [3.6, Residual Volume Requirement](#), for volume requirement eligibility unique to Presorted Standard price mailings. Other volume standards also can apply, based on the price claimed.
- c. All pieces in a mailing must be sorted together and marked under the standards for the price claimed.
- d. Each piece must bear the addressee's name and delivery address, including the correct ZIP Code or ZIP+4 code, unless an alternative addressing format is used subject to [602.3.0](#). Detached address labels may be used subject to [602.4.0](#).
- e. Postage must be paid under [444.1.0](#) through [444.3.0 in Postage Payment and Documentation](#) with precanceled stamps, meter stamps, or permit imprint.
- f. A postage statement, completed and signed by the mailer, using the correct USPS form or an approved facsimile, must be submitted with each mailing. In addition, mailings must be documented under [444.3.0](#).
- g. Any postal routing code barcode on a machinable parcel must be correct for the delivery address and must meet the standards in [708.5.0, Standards for Postal Routing Barcodes](#).
- h. Mailings must be deposited at a business mail entry unit of the Post Office where the postage permit or license is held and the annual mailing fee paid, unless deposit elsewhere is permitted by standard.

3.4 Presort Mailing Fees

An annual mailing fee must be paid once each 12-month period at each Post Office of mailing. For mail manifested using the Electronic Verification System (eVS) under [705.2.9](#), only one annual mailing fee, paid at the Post Office of account where the permit imprint account is held, is required regardless of the number of Post Offices of mailing. A mailer paying this fee may enter clients' mail as well as the mailer's own. The mailer whose permit imprint appears on pieces in a mailing paid with a permit imprint must show that permit number on the postage statement and must pay the annual mailing fee for that permit; this fee is in addition to the one-time fee for an application to use permit imprints. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

3.5 Merging Similar Standard Mailings

Mailings are subject to the general definitions and conditions in [445.1.0, *General Information for Mail Preparation*](#). Generally, mailers may merge similar Standard Mail matter into a single mailing. Differences in text, address labels, and address lists or list key numbers do not prohibit the mailer from merging and sorting pieces together. Pieces with different methods of postage payment may be combined in the same mailing only if authorized by Business Mailer Support (BMS). Pieces of nonidentical weight, if merged in the same mailing, must bear the correct postage when mailed, unless otherwise authorized by BMS.

3.6 Residual Volume Requirement

Pieces in an Enhanced Carrier Route price mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted price mailing, provided that the Enhanced Carrier Route price mailing and the Presorted price mailing are part of the same mailing job. Likewise, pieces in an automation price mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted price mailing, provided that the automation price mailing and the Presorted mailing are part of the same mailing job. Pieces mailed at Presorted Standard Mail prices must not be counted toward the minimum volume requirements for an Enhanced Carrier Route price or an automation price mailing.

3.7 Residual Mail Subject to First-Class Mail or Priority Mail Prices

Pieces prepared as Standard Mail (i.e., that bear Standard Mail price markings, ACS codes, etc.) that do not qualify for Enhanced Carrier Route, automation, or Presorted Standard Mail prices are subject to the single-piece First-Class Mail or Priority Mail prices as applicable for the weight of the mailpiece. Metered pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail prices and any pieces that do not qualify for Standard Mail prices for which First-Class Mail or Priority Mail service is desired must be re-enveloped or otherwise prepared so that they do not bear Standard Mail markings, endorsements, and ACS codes and must bear the proper First-Class Mail or Priority Mail price markings and ACS codes. Mailers who have pieces (other than metered pieces weighing over 13 ounces but less than 16 ounces) that do not qualify for Standard Mail prices but that are prepared as Standard Mail and who do not desire to receive First-Class Mail or Priority Mail service for those pieces may enter their mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), provided the requirements in [444.1.0, *Basic Standards for Postage Payment*](#), are met.

3.8 ZIP Code Accuracy

3.8.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain prices under [3.8.1d, *Basic Standards*](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.8.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming the Standard Mail prices must meet the ZIP Code accuracy standard, regardless of any required surcharges.

3.8.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
 1. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
 2. Any mailing list service in [507.7.0](#).
 3. An authorized service provider.
 4. CASS-certified matching software.
 5. USPS Web site www.usps.com.

3.8.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

4.0 Price Eligibility for Standard Mail

4.1 General Information

All Standard Mail prices are discounted prices. These prices apply to mailings meeting the basic standards in [2.0](#) through [4.0](#) and the corresponding standards for presorted prices under [5.0](#) or Enhanced Carrier Route prices under [6.0](#). Destination entry discount prices are available under [446.2.0](#) through [446.5.0](#). Pieces are subject to either a single minimum per piece price or a combined piece/pound price, depending on the weight of the individual pieces in the mailing under [4.2](#) or [4.3](#). Only organizations authorized by the USPS under [703.1.0](#) may mail at Nonprofit prices.

4.2 Minimum Per Piece Prices

The minimum per piece prices (i.e., the minimum postage that must be paid for each piece) apply as follows:

- a. **Basic Requirement.** Pieces mailed at Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route prices are subject to minimum per piece prices when they weigh no more than 3.3 ounces (0.2063 pound).
- b. In applying the minimum per piece prices, a mailpiece is categorized as a parcel based on the standards in [401, *Physical Standards*](#).
- c. **Individual Prices.** There are separate minimum per piece prices for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the level of presort within each mailing. Mailers may claim discounted prices for destination entry mailings under [446.2.0](#) through [446.5.0](#). DDU prices are available for parcels and Not Flat-Machinable pieces entered only at 5-digit, Enhanced Carrier Route, or Nonprofit Enhanced Carrier Route prices. See [1.0, *Prices and Fees for Standard Mail*](#), for individual per piece prices.

4.3 Piece/Pound Prices

Pieces that exceed 3.3 ounces (0.2063 pound) are subject to a two-part piece/pound price that includes a fixed charge per piece and a variable pound charge based on weight. Pieces exceeding 3.3 ounces may not be mailed as Customized MarketMail. There are separate per piece prices for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing. There are separate per pound prices for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route). Discounted per pound prices also may be claimed for destination entry mailings (destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU)) under [446.2.0](#) through [446.5.0](#) in [Enter and Deposit](#).

4.4 Surcharge

Unless prepared in carrier route (irregular parcels only) or 5-digit/scheme containers, Standard Mail parcels and Not Flat-Machinable pieces are subject to a \$0.05 surcharge if:

- a. The pieces placed in containers other than 5-digit/scheme containers do not contain the appropriate barcodes in [4.4b](#) through [4.4d](#).
- b. The machinable parcels do not bear a UCC/EAN Code 128 barcode, under [708.5.0](#), for the ZIP Code of the delivery address.
- c. The Not Flat-Machinable pieces weigh 6 ounces or more and do not bear a UCC/EAN Code 128 barcode, under [708.5.0](#), for the ZIP Code of the delivery address.

- d. The irregular parcels weigh less than 16 ounces, or the Not Flat-Machinable pieces weigh less than 6 ounces, and those pieces do not bear a UCC/EAN Code 128 or POSTNET barcode, under [708.5.0](#), for the ZIP Code of the delivery address.

4.5 Extra Services for Standard Mail

4.5.1 Available Services

Only the following extra services may be used with Standard Mail that is eligible under [4.5.2, Eligible Matter](#):

- a. Bulk insurance.
- b. Return receipt for merchandise.
- c. Delivery Confirmation (electronic option only).
- d. Certificate of mailing, as provided in [503.5.0](#).

4.5.2 Eligible Matter

Extra services may be used only with pieces mailed at Not Flat-Machinable (Delivery Confirmation only), machinable, or irregular parcel prices.

4.5.3 Ineligible Matter

Extra services (other than certificate of mailing service) may not be used for any of the following types of Standard Mail:

- a. Pieces entered as letters or flats.
- b. Machinable parcels mailed using Bulk Parcel Return Service.
- c. Pieces mailed with detached address labels under [602.4.0](#).
- d. Pieces mailed at Enhanced Carrier Route prices.
- e. Pieces mailed as Customized MarketMail.

4.5.4 Additional Preparation Requirements

Any eligible mailpiece with an extra service must bear a return address under [602.1.0, Elements of Addressing](#), and an ancillary service endorsement under [507.1.0](#) as follows:

- a. Pieces with bulk insurance or return receipt for merchandise must bear an endorsement that returns any undeliverable-as-addressed piece to the sender. Required endorsements are “Address Service Requested,” “Forwarding Service Requested,” or “Return Service Requested.”
- b. Pieces with Delivery Confirmation must bear one of the required endorsements in [4.5.4a](#) or “Change Service Requested.”

443.5.1

5.0 Additional Eligibility Standards for Presorted Standard Mail Pieces

5.1 Basic Standards

All pieces in a Regular Standard Mail or Nonprofit Standard Mail Presorted price mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0](#).
- b. Except as provided in [3.6, Residual Volume Requirement](#), be part of a single mailing of at least 200 addressed pieces or 50 pounds of pieces qualifying for Presorted Standard Mail. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
 1. The ZIP Code accuracy standard in [3.8](#).
 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
 3. If merchandise samples are prepared with detached address labels, the additional standards in [602.4.0](#).
- d. Be marked, sorted, and documented as specified in [445.5.0, Preparing Presorted Parcels](#), and [705.8.0, Preparing Pallets](#).

5.2 Price Application

Prices for Regular and Nonprofit Standard Mail apply separately to machinable parcels, irregular parcels, and Not Flat-Machinable pieces that meet the eligibility standards in [2.0](#) through [4.0](#) and the preparation standards in [445.5.0](#), [705.6.0](#), or [705.8.0, Preparing Pallets](#). When parcels and Not Flat-Machinable pieces are combined under [445.5.0](#) or [705.6.0](#), all pieces are eligible for the applicable prices when the combined total meets the eligibility standards. For example, when there are 10 pounds of combined machinable parcels, irregular parcels, and Not Flat-Machinable pieces in a 5-digit sack, all pieces are eligible for the 5-digit prices.

5.3 Prices for Machinable Parcels

5.3.1 5-Digit Price

The 5-digit price applies to qualifying machinable parcels presented:

- a. In a 5-digit/scheme ([L606](#)) sack containing at least 10 pounds of pieces.
- b. On a 5-digit/scheme ([L606](#)) pallet, according to standards in [705.8.10](#).
- c. As one or more parcels that mailers drop ship to a DDU under [446.5.2](#).
- d. In 5-digit/scheme containers prepared under [705.20.0](#).

5.3.2 BMC Price

The BMC price applies to qualifying machinable parcels presented:

- a. In an ASF or BMC sack containing at least 10 pounds of parcels.
- b. On an ASF or BMC pallet, according to standards in [705.8.10](#).
- c. In a BMC/ASF container prepared under [705.20.0](#).

5.3.3 Mixed BMC Price

The mixed BMC price applies to machinable parcels that are not eligible for 5-digit or BMC prices. Place machinable parcels at mixed BMC prices in mixed BMC sacks under [445.5.3.2](#) or on mixed BMC pallets under [705.8.10](#).

5.4 Prices for Irregular Parcels**5.4.1 5-Digit Price**

The 5-digit price applies to irregular parcels (see [401.1.6](#)) presented:

- a. In a 5-digit/scheme ([L606](#)) sack containing at least 10 pounds of pieces.
- b. On a 5-digit/scheme ([L606](#)) pallet, according to [705.8.10](#).
- c. As one or more parcels that mailers drop ship to a DDU under [446.5.2](#).
- d. In 5-digit/scheme containers prepared under [705.20.0](#).

5.4.2 3-Digit Price

The 3-digit price applies to irregular parcels (see [401.1.6](#)) presented:

- a. In a 3-digit sack containing at least 10 pounds of parcels.
- b. On a 3-digit pallet, according to [705.8.10](#).
- c. In 3-digit containers prepared under [705.20.0](#).

5.4.3 ADC Price

The ADC price applies to irregular parcels (see [401.1.6](#)) presented:

- a. In an ADC sack containing at least 10 pounds of parcels, or in an optional 3-digit origin/entry sack.
- b. On an ADC pallet, according to [705.8.10.4](#).
- c. In ADC containers prepared under [705.20.0](#).

5.4.4 Mixed ADC Price

The mixed ADC price applies to irregular parcels (see [401.1.6](#)) in mixed ADC containers.

5.5 Prices for Not Flat-Machinable (NFM) Pieces**5.5.1 5-Digit Price**

The 5-digit price applies to NFM pieces presented:

- a. In a 5-digit/scheme sack containing at least 10 pounds of pieces.
- b. In 5-digit bundles of five or more pieces on pallets or in pallet boxes under [705.8.0](#).
- c. Loose or in bundles on a 5-digit/scheme pallet under [705.8.10](#).
- d. As one or more pieces that mailers drop ship to a DDU under [446.5.0](#).
- e. In 5-digit/scheme containers prepared under [705.20.0](#).

5.5.2 3-Digit Prices

The 3-digit price applies to NFM pieces presented:

- a. In a 3-digit sack containing at least 10 pounds of pieces.

- b. On a 3-digit pallet under [705.8.10](#).
- c. In 3-digit containers prepared under [705.20.0](#).

5.5.3 ADC Price

The ADC price applies to NFM pieces presented:

- a. In an ADC or BMC/ASF sack containing at least 10 pounds of pieces or in an optional 3-digit origin/entry sack.
- b. On an ADC or BMC/ASF pallet under [705.8.10](#).
- c. In ADC containers prepared under [705.20.0](#).

5.5.4 Mixed ADC Price

The mixed ADC price applies to NFM pieces in mixed ADC or mixed BMC containers.

6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Parcels

6.1 General Enhanced Carrier Route Standards

6.1.1 Optional Preparation

Preparation to qualify for any Enhanced Carrier Route price is optional and need not be performed for all carrier routes in a 5-digit area. An Enhanced Carrier Route mailing may include pieces at basic, high density, and saturation Enhanced Carrier Route prices.

6.1.2 Basic Eligibility Standards

All pieces in an Enhanced Carrier Route or Nonprofit Enhanced Carrier Route Standard Mail mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0](#).
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of Enhanced Carrier Route Standard Mail. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Be sorted to carrier routes, marked, and documented under [445.7.0, *Preparing Enhanced Carrier Route Parcels*](#), or [705.8.0, *Preparing Pallets*](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
 - 1. The carrier route accuracy standard in [6.2](#).
 - 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Meet the applicable sequencing requirements in [6.3](#) through [6.5](#) and in [445.7.6, *Delivery Sequence Standards*](#).

- f. Enhanced Carrier Route price mail may not be more than 12 inches high, 15 inches long, or 3/4-inch thick. *Exception:* Merchandise samples with detached address labels (DALs) may exceed these dimensions if the labels meet the standards in [602.4.0, Detached Address Labels \(DALs\)](#).

6.2 Carrier Route Accuracy

6.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming certain prices that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [6.2.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and price is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Standard Mail Enhanced Carrier Route prices must meet the carrier route accuracy standard, regardless of any required surcharge.

6.2.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, Address Information System Products](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).

6.2.3 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

6.3 Basic Price Enhanced Carrier Route Standards

6.3.1 Sequencing

All pieces mailed at basic prices must be prepared in walk sequence or in line-of-travel (LOT) sequence according to LOT schemes prescribed by the USPS (see [445.7.6, Delivery Sequence Standards](#)).

6.3.2 Basic Price Discount for Irregular Parcels

Basic prices apply to each piece in a carrier route sack or carton containing at least 125 pieces or 15 pounds of pieces, or in a 5-digit carrier routes sack or carton. DALs must be in carrier route bundles of 10 or more pieces and prepared under [602.4.0](#).

443.6.4

6.4 High Density Enhanced Carrier Route Standards

6.4.1 Basic Eligibility Standards for High Density Prices

All pieces mailed at high density prices must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [445.7.6, Delivery Sequence Standards](#)).
- b. Meet the density requirement of at least 125 pieces for each carrier route. Multiple pieces per delivery address can count toward this density standard.

6.4.2 High Density Price Discount for Irregular Parcels

High density prices apply to each piece in a carrier route sack or carton containing at least 125 pieces or 15 pounds of pieces, or in a 5-digit carrier routes sack or carton. DALs must be in carrier route bundles of 10 or more pieces and prepared under [602.4.0](#).

6.5 Saturation Enhanced Carrier Route Standards

6.5.1 Basic Eligibility Standards for Saturation Prices

All pieces mailed at saturation prices must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [445.7.6, Delivery Sequence Standards](#)).
- b. Meet the density requirement of at least 90% or more of the active residential addresses or 75% or more of the total number of active possible delivery addresses on each carrier route receiving this mail. Pieces bearing a simplified address must meet the coverage standards in [602.3.0, Use of Alternative Addressing](#). Multiple pieces per delivery address do not count toward this density standard.

6.5.2 Saturation Price Discount for Irregular Parcels

Saturation prices apply to each piece in a carrier route sack or carton containing at least 125 pieces or 15 pounds of pieces, or in a 5-digit carrier routes sack or carton. DALs must be in carrier route bundles of 10 or more pieces and prepared under [602.4.0](#).

444 Postage Payment and Documentation

Overview

- 1.0 Basic Standards for Postage Payment
- 2.0 Postage Payment for Presorted and Enhanced Carrier Route Parcels
- 3.0 Mailing Documentation
- 4.0 Residual Pieces

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Postage for Standard Mail must be paid with meter (604.4.0), permit imprint (604.5.0), or precanceled stamps (604.3.0). Mail manifested using the Electronic Verification System (eVS) under 705.2.9 must be paid with a permit imprint. Postage-affixed pieces must bear the correct postage unless excepted by standard. A permit imprint may be used for mailings that contain nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

2.0 Postage Payment for Presorted and Enhanced Carrier Route Parcels

2.1 Identical-Weight Pieces

Mailings of identical-weight pieces may have postage affixed to each piece at the exact price for which the piece qualifies, or each piece in the mailing may have postage affixed at the lowest price applicable to pieces in the mailing or mailing job. Alternatively, a nondenominated precanceled stamp may be affixed to every piece in the mailing or mailing job, or each piece may bear a permit imprint. If exact postage is not affixed, all additional postage and surcharges must be paid at the time of mailing with an advance deposit account or with a meter strip affixed to the required postage statement. If exact postage is not affixed, documentation meeting the standards in 3.0 must be submitted to substantiate the additional postage unless the pieces are identical weight and separated by price when presented for acceptance.

2.2 Nonidentical-Weight Pieces

Postage for nonidentical-weight pieces subject to the minimum per piece prices may be paid by meter stamps, precanceled stamps, or precanceled stamped envelopes. Mailings of nonidentical-weight pieces subject to the piece/pound prices may have postage paid by permit imprint (if the mailer is authorized by Business Mailer Support) or by meter or precanceled stamps (if each piece has the full postage affixed). Alternatively, except for heavy automation and Enhanced Carrier Route letters, the mailer may affix the per piece price to each piece and pay the pound price for the mailing through an advance deposit account. Under this alternative, the mailer must provide a postage statement for each payment method and mark each piece "Pound Price Pd via Permit," in the postage meter indicium or

ad plate or other means that ensures a legible endorsement. For mailings of nonidentical-weight pieces, “nonidentical” must be shown as the weight of a single piece on the applicable postage statement; other entries must be completed as directed.

2.3 Combined Price

Meter postage may be used for combined price mailings containing both pieces subject to pound prices and pieces subject to minimum per piece charges. Postage for such mailings may be paid with permit imprint only if authorized by Business Mailer Support.

3.0 Mailing Documentation

3.1 Completing Postage Statements

Unless manifested using eVS under [705.2.9](#), any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

3.2 Basic Documentation Standards

Unless manifested using eVS under [705.2.9](#), mailings presented to the USPS generally require paper documentation. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the preparation, price levels, and content of the mailing; details the volume and postage data; reports the result of a process (i.e., presort or barcoding); and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

3.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

3.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

3.5 Standard Format for Documentation

Standard Mail documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and price claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the

elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation.

3.6 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#).

3.7 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

3.8 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple parts on a single facsimile. For example: Part A, lines A5, A6, and total – Part A from Form 3602-R, and Part F, lines F1, F2, and total – Part F from Form 3602-R, can be consolidated onto a single Form 3602 (Facsimile). Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

4.0 Residual Pieces

4.1 Postage Payment for Ineligible Standard Mail

4.1.1 13 Ounces or Less

Mailers who have pieces weighing 13 ounces or less that do not qualify for Standard Mail prices but that are prepared as Standard Mail must pay single-piece First-Class Mail postage for such pieces. If mailers do not desire to receive First-Class Mail service for such pieces they may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.

444.4.1.2

- b. Mail bearing metered or precanceled stamp postage must pay the difference between the postage affixed at the Standard Mail prices and the single-piece First-Class Mail prices by means of an advance deposit account or by affixing a meter stamp for the appropriate amount to Form 3600-R. These pieces are reported in Part C on Form 3600-R under the heading "From Standard Mail mailing."
- c. Mail bearing permit imprints must pay the appropriate single-piece First-Class Mail prices by completing Form 3600-R. These pieces are reported in Part C on Form 3600-R under the heading "From Standard Mail mailing." For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job.

4.1.2 Over 13 Ounces

Mailers who have permit imprint pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail prices but that are prepared as Standard Mail must pay Priority Mail postage for such pieces. Mailpieces paid with meters or permit imprints must re-envelope or otherwise prepare the pieces so that when mailed they bear only the appropriate Priority Mail markings, ancillary service endorsements, and ACS codes and do not bear Standard Mail markings, endorsements, or ACS codes. Mailpieces paid with permit imprints for which mailers do not desire to receive Priority Mail service may enter the mailpieces "as is" (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.
- b. The appropriate Priority Mail prices must be paid by completing Part E of Form 3600-R on the line titled "Pieces From Standard Mail mailing" in the postage calculation section. For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job.

4.2 Postage Payment for Barcoded Machinable Parcels

4.2.1 100% Eligible

If 100% of the pieces in a mailing are eligible for the machinable parcel prices under [443.5.0, Additional Eligibility Standards for Presorted Standard Mail Pieces](#), then the mailing may be paid with meter stamps, permit imprint, or precanceled postage.

4.2.2 Less Than 100% Eligibility

If less than 100% of the parcels in the mailing are eligible for the machinable prices, then the following standards apply:

- a. Payment with precanceled stamps is not permitted.
- b. Metered postage may be used only if exact postage is affixed to each piece in the mailing.
- c. Payment with permit imprint is permitted only under a manifest mailing system in [705.2.0](#).

445 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparing Presorted Parcels](#)
- [6.0 Preparing Not Flat-Machinable Pieces](#)
- [7.0 Preparing Enhanced Carrier Route Parcels](#)

1.0 General Information for Mail Preparation

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations.

1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and, except for certain parcel prices, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Standard Mail. Except as provided in [443.3.6, Residual Volume Requirement](#), the types of Standard Mail listed below may not be part of the same mailing.
 1. Enhanced Carrier Route and any other type of mail.
 2. Enhanced Carrier Route letter price pieces and Enhanced Carrier Route nonletter price pieces.
 3. Presorted price mail and any other type of mail.
 4. Machinable and nonmachinable pieces.
 5. Except as provided by standard, Regular mail may not be in the same mailing as Nonprofit mail, and Enhanced Carrier Route mail may not be in the same mailing as Nonprofit Enhanced Carrier Route mail.
 6. Customized MarketMail and any other type of mail.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, Post Office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *5-digit scheme (pallets and sacks) for Standard Mail parcels*: the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code zones processed by the USPS as a single scheme, as shown in [L606](#).
- d. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- e. *Origin/entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Separation is optional for each such 3-digit area.
- f. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- g. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- h. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- i. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- j. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.
- k. *Residual* pieces/bundles/sacks contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort price. Residual mail is also referred to as *nonqualifying* or *working* mail.

1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. A *5-digit/scheme sort for Standard Mail parcels* yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L006](#) and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single

presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly.

- d. An *origin 3-digit* (or *origin 3-digit scheme*) tray contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. A separate tray may be prepared for each 3-digit ZIP Code (or 3-digit scheme) area.
- e. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- f. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- g. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the Post Office of entry determines the *entry* facility. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- h. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- i. A *bundle* is a group of addressed pieces secured together as a unit. Bundle preparation is described in [2.0](#).
- j. A “*logical*” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Standard Mail “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF

destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement.

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces for different presort destinations into groups. A “bundle” is a group of addressed pieces secured together as a unit. The term “bundle” does not apply to unsecured groups of pieces. Bundling under 445 is allowed only for carrier route bundles of irregular parcels and 5-digit bundles of Not Flat-Machinable pieces placed on pallets or in pallet boxes (see 6.0).

2.2 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye. This standard does not apply to the following:

- a. Bundles placed in or on 5-digit or 5-digit scheme (L001) sacks or pallets.
- b. Bundles placed in carrier route and 5-digit carrier routes sacks.
- c. Bundles of mailpieces at carrier route prices entered at a destination delivery unit (DDU).

2.3 Arranging Pieces in a Bundle (“Facing”)

Except as noted in 2.4, all pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.4 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.

- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

2.5 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment.

Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 - 1. Do not place any bands closer than 1 inch from any bundle edge.
 - 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 - 3. Do not use wire or metal banding.
 - 4. Do not use any loose banding.
- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 - 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 - 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

2.6 Preparing Bundles in Sacks

In addition to the standards in 2.5, mailers must prepare and secure bundles placed in sacks as follows:

- a. The maximum weight for all bundles is 20 pounds.
- b. Measure bundles at the lowest (thinnest) point to determine the bundle height.
- c. A bundle that exceeds the maximum prescribed height by less than the thickness of a single piece meets the standard (for example, if a piece is 0.75 (3/4) of an inch thick, 11 pieces may be secured in a bundle 8.25 inches high, even though the maximum bundle height is 8 inches).
- d. Bundles of pieces with covers of “coated stock” (for example, magazines or catalogs with glossy covers) that are not individually enclosed in an envelope or mailing wrapper are subject to these conditions:
 - 1. Bundles secured with rubber bands, twine, string, or only shrinkwrap must not exceed 3 inches in height.
 - 2. Bundles secured with shrinkwrap plus one or two plastic straps, or with at least two plastic straps, one around the length and one around the girth, must not exceed 6 inches in height.

- e. Bundles of pieces with outer surfaces of “uncoated stock” are subject to these conditions:
 - 1. Bundles must not exceed 8 inches in height (recommended maximum height is 6 inches).
 - 2. “Uncoated stock” refers to pieces with outer surfaces composed of material other than paper (such as plastic, cloth, or fiberboard) and also refers to pieces with coated covers that are individually enclosed in a cover or mailing wrapper of uncoated stock, such as an envelope or polybag.

2.7 Pieces With Simplified Address

For mail prepared with a simplified address, all pieces for the same Post Office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, Post Office boxholder). Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets, and specific weight and height limits in [2.6](#) if placed in sacks.

2.8 Bundles With Fewer Than the Minimum Number of Pieces Required

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the price claimed without loss of price eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

2.9 Labeling Bundles

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X.

2.10 Use of Carrier Route Information Lines

Bundles for individual carrier routes, rural routes, highway contract routes, Post Office box sections, or general delivery units must be prepared with facing slips under [2.0](#), optional endorsement lines under [708.7.0](#), or carrier route information

lines under [708.6.0](#). These standards apply to Enhanced Carrier Route Standard Mail mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level.

2.11 Facing Slips—All Carrier Route Mail

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “STD IRREG LOT CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin Post Office.

3.0 Sacks

3.1 Standard Containers

Mailings must be prepared in sacks. Containers for Customized MarketMail are specified in [705.1.0](#). The following additional standards apply:

- a. Palletized mail is also subject to [705.8.0](#).
- b. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing.

3.2 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds.

4.0 Sack Labels

4.1 Basic Standards

Sack labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.
- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.

4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock (optional).

- c. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- d. Height (perpendicular to printing):
 - 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.
 - 2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack and other information as specified by standards.

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels:

CONTENT TYPE	CODE
Carrier Route	C (type of route)
Carrier Routes	CR-RT or CR-RTS
Digit	D
General Delivery Unit	G
Highway Contract Route	H
Irregular Parcels	IRREG
Machinable	MACH
Mixed	MXD
Mixed Machinable and Irregular Parcels	MACH & IRREG
Post Office Box Section	B
Rural Route	R
Standard Mail	STD
Working	WKG

4.5 Line 3 (Origin Line)

Line 3 (origin line showing office of mailing or mailer information) must be the bottom line of required information unless the sack contains mail manifested using the Electronic Verification System (eVS) under [705.2.9](#). Line 3 must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office. As an alternative to adding a fourth line for eVS mailings as required by [4.6](#), "eVS" may appear as the first element on Line 3.

4.6 Electronic Verification System

All sacks containing parcels prepared and identified using the Electronic Verification System (eVS) under [705.2.9](#) must show "eVS" (or the alternatives "EVS" or "E-VS") directly below Line 3 using the same size and lettering used for Line 3. As an option, "eVS" may be placed as the first element on Line 3.

4.7 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.8 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.

445.5.1

- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

5.0 Preparing Presorted Parcels

5.1 Basic Standards

All mailings and all pieces in each mailing at Regular Standard Mail and Nonprofit Standard Mail nonautomation prices are subject to specific preparation standards in [5.3, *Preparing Machinable Parcels*](#), and [5.4, *Preparing Irregular Parcels*](#), and to these general standards:

- a. All pieces must meet the standards for basic eligibility in [443.2.0](#) through [443.4.0 in *Prices and Eligibility*](#) and specific eligibility in [443.5.0](#). Nonprofit Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. Pieces in each mailing must be all machinable parcels or all irregular parcels as defined in [401.1.0](#), unless prepared under [5.3.1](#).
- c. All pieces must meet the applicable general preparation standards in [1.0](#) through [4.0](#); [708.7.0, *Optional Endorsement Lines \(OELs\)*](#); and [708.6.0, *Barcoding Standards for Container Labels*](#).
- d. All pieces in the mailing must meet the specific sortation and preparation standards in [5.0](#) or the palletization standards in [705.8.0](#).
- e. Sortation determines price eligibility as specified in [443.5.0, *Additional Eligibility Standards for Presorted Standard Mail Pieces*](#).

5.2 Markings

[8-14-08] All regular and Nonprofit Standard Mail pieces must be marked under [402.2.0, *Placement and Content of Markings*](#). Regular and Nonprofit Standard Mail pieces must not be marked “ECRLOT,” “ECRWSH,” “ECRWSS,” or “Single-Piece” (or “SNGLP”).

5.3 Preparing Machinable Parcels

5.3.1 5-Digit Sacks

There is no minimum for parcels prepared in 5-digit/scheme sacks entered at a DDU. Mailers choosing to combine the preparation of either irregular parcels or Not Flat-Machinable pieces (see [401.2.2.3](#)) with machinable parcels placed in 5-digit/scheme sacks must prepare those sacks under [5.3.2a](#). Mailers choosing to combine the preparation of Not Flat-Machinable pieces weighing 6 ounces or more with machinable parcels placed in ASF, BMC, or mixed BMC sacks must prepare the sacks under [5.3.2](#).

5.3.2 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit/scheme (optional, but required for 5-digit price), see definition in [1.4c](#); 10-pound minimum except under [5.3.1](#); labeling:
 1. Line 1: For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code destination on pieces (see [4.0](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, “STD MACH 5D SCH.” For 5-digit sacks, “STD MACH 5D.”
- b. ASF (optional), allowed only for mail deposited at an ASF to claim DBMC price; 10-pound minimum; labeling:
 1. Line 1: [L602](#), Column B. DBMC price eligibility determined by [Exhibit 446.3.1, BMC/ASF—DBMC Price Eligibility](#).
 2. Line 2: “STD MACH ASF.”
- c. BMC (required); 10-pound minimum; labeling:
 1. Line 1: [L601](#), Column B. DBMC price eligibility determined by [Exhibit 446.3.1, BMC/ASF—DBMC Price Eligibility](#).
 2. Line 2: “STD MACH BMC.”
- d. Mixed BMC (required); no minimum; labeling:
 1. Line 1: “MXD” followed by [L601](#), Column B information for BMC serving 3-digit ZIP Code prefix of entry Post Office.
 2. Line 2: “STD MACH WKG.”

5.4 Preparing Irregular Parcels

5.4.1 Bundling

Bundling is not permitted, except for bundles of carrier route irregular parcels under [7.0](#).

5.4.2 Required Sacking

Mailers must prepare a sack when the quantity of mail for a required presort destination reaches 10 pounds of pieces. There is no minimum for parcels prepared in 5-digit/scheme sacks entered at a DDU. Mailers choosing to combine irregular parcels with machinable parcels and NFMs in 5-digit/scheme sacks must prepare those sacks under [5.3.2](#). Mailers may not prepare sacks containing irregular and machinable parcels to other presort levels. Mailers may combine irregular parcels with Not Flat-Machinable pieces weighing less than 6 ounces in sacks under [5.4.4](#).

5.4.3 Drop Shipment

A mailer using Priority Mail or Express Mail to drop ship Standard Mail irregular parcels may prepare sacks containing fewer than 125 pieces or less than 15 pounds of mail.

5.4.4 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit/scheme (optional, but required for 5-digit price), 10-pound minimum, except when entered at a DDU; labeling:

445.6.1

1. For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
2. Line 2: For 5-digit scheme sacks, “STD IRREG 5D SCH.” For 5-digit sacks, “STD IRREG 5D.”
- b. 3-digit (required); 10-pound minimum; for irregular parcels only; labeling:
 1. For Line 1, [L002](#), Column A.
 2. For Line 2, “STD IRREG 3D.”
- c. Origin/entry 3-digit(s) (optional); no minimum; labeling:
 1. Line 1: Use [L002](#), Column A.
 2. Line 2: “STD IRREG 3D.”
- d. ADC (required); 10-pound minimum; labeling:
 1. Line 1: [L603](#), Column B. (Use [L004](#) for parcels that weigh at least 2 ounces and are not rolls or tubes. Do not mix pieces labeled to [L603](#) with pieces labeled to [L004](#).)
 2. Line 2: “STD IRREG ADC.”
- e. Mixed ADC (required); no minimum; labeling:
 1. Line 1: [L604](#), Column B. (Use [L009](#) for parcels that weigh at least 2 ounces and are not rolls or tubes. Do not mix pieces labeled to [L604](#) with pieces labeled to [L009](#).)
 2. Line 2: “STD IRREG WK

6.0 Preparing Not Flat-Machinable Pieces

6.1 Basic Standards

All mailings at Regular Standard Mail and Nonprofit Standard Mail NFM prices are subject to the general preparation standards in [1.0](#) through [4.0](#). Prepare NFM pieces according to the standards in [6.0](#) unless commingled with parcels under [5.0](#). Mark NFM pieces according to the standards in [402.2.1.1](#).

6.2 Bundling

Mailers may make 5-digit bundles of at least five pieces when placed on pallets or in pallet boxes under [705.8.0](#). No other NFM bundling is permitted. The height of a 5-digit bundle must be at least 1 inch less than the longest dimension of the individual mailpiece. For example, a mailpiece measuring 7 inches long, 5 inches high, and 1/2 inch thick must be placed in a bundle no higher than 6 inches.

6.3 Sacking and Labeling

6.3.1 General

Mailers may combine NFM pieces with parcels in 5-digit/scheme sacks under [5.3](#). See [6.3.2](#) for NFM pieces that weigh less than 6 ounces; see [6.3.3](#) for NFM pieces that weigh 6 ounces or more.

6.3.2 NFM Pieces Weighing Less Than 6 Ounces

Preparation sequence, sack size, and labeling for sacks of NFM pieces that weigh less than 6 ounces:

- a. 5-digit/scheme (optional, but required for 5-digit price); see definition in [1.4c](#); 10-pound minimum, except when drop shipped to a DDU (no minimum); labeling:
 1. Line 1: For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code destination on pieces (see [4.0](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, “STD NFM 5D SCH.” For 5-digit sacks, “STD NFM 5D.”
- b. 3-digit (required); 10-pound minimum; labeling:
 1. Line 1: Use [L002](#), Column A.
 2. Line 2: “STD NFM 3D.”
- c. Origin/entry 3-digit(s) (optional); no minimum; labeling:
 1. Line 1: Use [L002](#), Column A.
 2. Line 2: “STD NFM 3D.”
- d. ADC (required); 10-pound minimum; labeling:
 1. Line 1: Use [L004](#), Column B.
 2. Line 2: “STD NFM ADC.”
- e. Mixed ADC (required); no minimum; labeling:
 1. Line 1: Use [L009](#), Column B.
 2. Line 2: “STD NFM WKG.”

6.3.3 NFM Pieces Weighing 6 Ounces or More

Preparation sequence, sack size, and labeling for sacks of NFM pieces that weigh 6 ounces or more:

- a. 5-digit/scheme (optional but required for 5-digit price); see definition in [1.4c](#); 10-pound minimum, except when drop shipped to a DDU (no minimum); labeling:
 1. Line 1: For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code destination on pieces (see [4.0](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, use “STD NFM MACH 5D SCH.” For 5-digit sacks, use “STD NFM MACH 5D.”
- b. ASF (optional), permitted only for mail deposited at an ASF to claim DBMC price; 10-pound minimum; labeling:
 1. Line 1: [L602](#), Column B. DBMC price eligibility determined by [Exhibit 3.1, BMC/ASF—DBMC Price Eligibility](#).
 2. Line 2: “STD NFM MACH ASF.”

445.7.1

- c. BMC (required); 10-pound minimum; labeling:
 - 1. Line 1: L601, Column B. DBMC price eligibility determined by [Exhibit 3.1, BMC/ASF—DBMC Price Eligibility](#)
 - 2. Line 2: “STD NFM MACH BMC.”
- d. Mixed BMC (required); no minimum; labeling:
 - 1. Line 1: “MXD” followed by L601, Column B information for BMC serving 3-digit ZIP Code prefix of entry Post Office.
 - 2. Line 2: “STD NFM MACH WKG.”

7.0 Preparing Enhanced Carrier Route Parcels

7.1 Basic Standards

All mailings and all pieces in each mailing at Enhanced Carrier Route Standard Mail and Nonprofit Enhanced Carrier Route Standard Mail nonautomation prices are subject to specific preparation standards in [7.4, Bundling](#), and [7.5, Preparing Irregular Parcels](#), and to these general standards:

- a. All pieces must meet the standards for basic eligibility in [443.2.0](#) through [443.4.0 in Prices and Eligibility](#) and specific eligibility in [443.6.0, Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Parcels](#). Nonprofit Enhanced Carrier Route Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. All pieces in each mailing must be irregular parcels as defined in [401.1.0](#).
- c. All pieces must meet the applicable general preparation standards in [1.0](#) through [4.0](#), and the following:
 - 1. Pieces must be sequenced according to [7.6](#) and [7.7](#).
 - 2. Pieces with a simplified address format must meet the standards in [602.3.0, Use of Alternative Addressing](#).
- d. All pieces in the mailing must meet the specific sortation and preparation standards in [7.0](#) or the palletization standards in [705.8.0](#).
- e. Sortation determines price eligibility as specified in [443.6.0](#).

7.2 Marking

[8-14-08] All regular and Nonprofit Standard Mail Enhanced Carrier Route pieces must be marked under [402.2.0, Placement and Content of Markings](#). All pieces must also be marked “ECRLOT” for basic price, “ECRWSH” for high density price, or “ECRWSS” for saturation price.

7.3 Residual Pieces

Pieces not sorted as a carrier route mailing must be prepared as a separate mailing at Standard Mail automation or Presorted prices.

7.4 Bundling

7.4.1 Carrier Route Bundle Preparation

Prepare carrier route bundles of parcels as follows:

- a. Mailers must prepare only carrier route bundles.
- b. Except under [7.4.2](#), carrier route bundles must contain at least 10 pieces.
- c. The method of labeling a carrier route bundle is based on the following sack levels:
 1. Carrier route sack: No bundle labeling is required.
 2. 5-digit scheme or 5-digit carrier routes sacks: Bundles must have a facing slip unless the pieces in the bundle have a carrier information line or an optional endorsement line (OEL).

7.4.2 Bundles and Sacks With Fewer Than the Minimum Number of Pieces Required

As a general exception to [7.4.1](#), a mailer may prepare a bundle with fewer than 10 pieces and a less-than-full sack with fewer than 125 pieces and less than 15 pounds of pieces to a carrier route when they are claiming the saturation price for the contents and the applicable density standard is met.

7.5 Preparing Irregular Parcels

7.5.1 Sack Minimums

A sack must be prepared when the quantity of mail for a required presort destination reaches either 125 pieces or 15 pounds of pieces, whichever occurs first, subject to these conditions:

- a. For identical-weight pieces, a single-piece weight of 1.92 ounces (0.12 pound) results in 125 pieces weighing 15 pounds. Identical-weight pieces weighing 1.92 ounces (0.12 pound) or less must be prepared using the 125-piece minimum; those that weigh more must be prepared using the 15-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 125-piece or 15-pound minimum applies) or sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the 125-piece ("PCS") or 15-pound ("WT") threshold or the method in [7.5.1b](#) ("BOTH").

7.5.2 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. Carrier route: required (minimum of 125 pieces/15 pounds).
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).

2. Line 2: “STD IRREG WSS” or “STD IRREG WSH” or “STD IRREG LOT” as applicable, followed by the route type and number.
- b. 5-digit carrier routes: required (no minimum).
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see 4.3 for overseas military mail).
 2. Line 2: “STD IRREG CR-RTS.”

7.6 Delivery Sequence Standards

7.6.1 Basic Standards

Mailpieces for which a walk-sequence discount is claimed must be organized in the delivery sequence determined by the USPS and prepared as a carrier route mailing under 7.0 and the standards below. Pieces prepared with a simplified address must also meet the corresponding standards.

7.6.2 Missing Addresses

Some mailpieces cannot be sequenced because an exact match for a name or address cannot be obtained. These pieces may be included in a sequenced mailing only if they are placed behind or after the sequenced mail. Arrange these pieces:

- a. Alphabetically by complete street name, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.
- b. Numerically for numbered streets, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.

7.6.3 Updating Walk Sequence Information—General

Walk-sequence price pieces prepared with other than a simplified address format under 7.6.4 must be sequenced using USPS data from one of the following sources, issued within 90 days before the mailing date:

- a. The Computerized Delivery Sequence (CDS) file.
- b. The Delivery Sequence File, Second Generation (DSF²).
- c. Delivery sequence information from USPS address sequencing services, as requested by the customer.

7.6.4 Updating Walk Sequence Information for Simplified Addressing

Walk-sequence price pieces prepared with a simplified address must be based on delivery stop information obtained within 90 days before the mailing date, either from the Delivery Statistics File or from the postmaster of the destination office.

7.6.5 Out-of-Date Walk Sequence Information

Mailings prepared with out-of-date walk-sequencing information are not eligible for walk-sequence prices.

7.6.6 Updating Line-of-Travel Sequence Information

Unless the mail is prepared in carrier walk sequence, line-of-travel (LOT) sequence is required for mailings at Standard Mail Enhanced Carrier Route basic prices. LOT sequence is not an exact walk sequence but a sequence of ZIP+4 codes arranged in the order that the route is served by a carrier. (First the ZIP+4 groups are

sequenced, then the addresses within each are identified as being in ascending or descending order.) The USPS eLOT product provides a list of the ZIP+4 codes each carrier route serves, identifies the order in which they are delivered, and provides an indicator specifying whether the addresses that share the same ZIP+4 code must be sorted in ascending or descending order. When a range of ZIP+4 codes on the same carrier route are assigned the same sequence number, the addresses bearing those ZIP+4 codes must be arranged in ascending ZIP+4 code order before the sequence number is assigned. LOT information must be updated within 90 days before the date of mailing.

7.7 Delivery Sequence Documentation

7.7.1 General Standards

The postage statement must be annotated in the “Carrier Route Sequencing Date” block on page 1. The mailer must annotate the postage statement to show the earliest (oldest) date of the method used to obtain sequencing information for the mailing. The mailer’s signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The mailer must maintain documentation to substantiate compliance with the standards for carrier route sequencing. Unless submitted with each corresponding mailing, the mailer must be able to provide the USPS with documentation (if requested) of accurate sequencing or delivery statistics for each carrier route to which pieces are mailed. Acceptable forms of documentation are:

- a. The invoice showing that the addresses came from CDS.
- b. DSF² invoice or documentation.
- c. Copies of the delivery unit summaries that served as the mailer’s bills for address sequencing service charges.
- d. Evidence of receipt of information from postmasters for simplified address mailings (see [509.1.0, Address Information System Products](#)).
- e. Form 3553 showing the date of the eLOT product used, or the date from the USPS Qualification report produced by presort software.

7.7.2 High Density

For each Standard Mail carrier route to which high density price mail is addressed, the mailer must document the total number of addressed pieces to the route.

7.7.3 Saturation Density—Simplified Address Mail

For each carrier route to which mail with a simplified address is sent at the saturation price, the mailer must be able to document that the mailing meets the applicable density standard. This documentation must show the total number of active possible deliveries and the total number to which mailpieces in the mailing are being addressed, by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing.

7.7.4 Saturation Density—Other Mail

For each carrier route to which mail without a simplified address is sent at the saturation price, the mailer must be able to document that the mailing meets the applicable density standards. This documentation must show either the total number of active possible *residential* deliveries and the number and percentage to

445.7.7.5

which mailpieces are addressed, or the total number of *all* active possible deliveries and the number and percentage to which mailpieces are addressed, depending on whether qualification is based on the 90% or 75% criterion, respectively. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing.

7.7.5 Both Prices

If a mailing contains pieces qualifying for high density and saturation walk-sequence prices, the documentation required may be combined. Entries for pieces at the high density price must be so annotated on the documentation. For the entire mailing, a summary of the total number of pieces at each price must be provided. This documentation must be submitted with each applicable mailing.

7.7.6 Carrier Route Price

If a mailing includes high density and saturation price and basic carrier route price pieces, in addition to the applicable information required by 7.7.2 through 7.7.5, the documentation for the basic carrier route price mail must show, by 5-digit ZIP Code and, within each, by carrier route, the total number of addressed pieces at each price for each carrier route to which pieces are addressed. Pieces qualifying for the basic carrier route price must be so annotated. For the entire mailing, a summary by 5-digit ZIP Code of the total number of pieces at each price must be provided. This documentation must be submitted with each applicable mailing to meet the documentation standard for the carrier route price.

446 Enter and Deposit

Overview

- [1.0 Presenting a Mailing](#)
- [2.0 Destination Entry](#)
- [3.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [4.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [5.0 Destination Delivery Unit \(DDU\) Entry](#)

1.0 Presenting a Mailing

1.1 Basic Standards for Standard Mail Deposit

All Standard Mail must be presented at the Post Office where the permit or license is held and the presort mailing fee is paid, at the locations and times specified by the postmaster, except as follows:

- a. Plant-verified drop shipment (PVDS) mailings must be presented under [705.15.0](#).
- b. Plant-loaded mailings must be presented as specified by the plant load agreement.
- c. Metered mailings may be deposited at other than the licensing Post Office only as permitted under [705.18.0](#).
- d. Nonprofit Standard Mail must be presented only at Post Offices where the organization producing the mailing has an approved nonprofit authorization ([703.1.0](#)).

1.2 Separation of Mailings

Pieces at different prices may be combined in the same mailing as provided in [445.1.0](#), *General Information for Mail Preparation*. Separate mailings may be reported on the same postage statement if the pieces in the mailings are in the same processing category, are part of the same mailing job, and are presented for verification at the same time.

2.0 Destination Entry

2.1 General

Except for Customized MarketMail pieces defined in [705.1.0](#), all Standard Mail pieces meeting the basic standards in [443.2.0](#) through [443.4.0](#) may qualify for destination entry prices, if deposited at the correct destination postal facility, subject to the standards below and in [3.0](#), [4.0](#), and [5.0](#). Only one destination entry price may be claimed for each piece. A pallet may contain mail claimed at different destination entry prices.

2.2 Minimum Volume

A destination entry price Standard Mail mailing is subject to these minimum volume requirements:

446.2.3

- a. Each mailing must contain at least 200 addressed pieces or 50 pounds of addressed pieces.
- b. Except as provided in [2.2d](#), each group of pieces prepared for deposit at different destination entry facilities must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by a postage statement.
- c. If a facility is authorized to accept mail at more than one entry level, all pieces claimed at the different entry prices may be in one mailing and may be recorded on the same postage statement.
- d. When pieces from different price Standard Mail mailings are presented together under plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from one presort file (i.e., mailing job) reported on one Form 3602 and accompanied by Form 3602-C (or a postage statement register) to meet the minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 200 pieces or 50 pounds at a single destination entry facility if there is at least 200 pieces or 50 pounds of Presorted price mail, 200 pieces or 50 pounds of automation price mail, and/or 200 pieces or 50 pounds of Enhanced Carrier Route mail for all entry points combined for the single presort file.

2.3 Postage Payment and Documentation

Postage payment for destination entry mailings is subject to the same standards that apply generally to Standard Mail. No documentation for destination entry discounts is required.

2.4 Plant Loads

Plant load mailings are not eligible for destination entry discounts.

2.5 Verification

2.5.1 Mail Separation and Presentation

Destination entry price mail must be verified under a PVDS system ([705.15.0](#)) or be presented for verification and acceptance at a BMEU located at a destination postal facility. Only PVDS mailings may be deposited at a destination facility not co-located with a postal facility having a business mail entry unit. Destination entry mailings must meet the following requirements:

- a. The mailer must present each mailing separately for verification. For PVDS, each mailing for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow reconciliation with each required accompanying Form 8125, 8125-C, or 8125-CD.
- b. Mail must be separated from freight transported on the same vehicle.
- c. If Periodicals mail is on the same vehicle as Standard Mail, the mailer should load the Periodicals mail toward the tail of the vehicle so that Periodicals mail can be offloaded first.

2.5.2 Form 8125

When mailings are verified and paid for at a postal facility different from the one at which they are accepted and deposited as mail, the mailer must ensure that they are accompanied by a completed Form 8125 (or 8125-C or 8125-CD).

2.5.3 At BMC

For a mailing verified at a BMC, the Post Office where the mailer's account or license is held must be within the service area of that BMC. The Post Office must authorize the BMC to act as its agent by sending Form 4410 to the BMC.

2.5.4 Mailer Transport

The mailer must transport the PVDS mailing from the place where it was verified to the appropriate destination postal facility.

2.5.5 Volume Standards

Except as permitted for a local mailer under [2.6.13](#), destination entry mailings are subject to these volume standards:

- a. The pieces for which a destination price is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, *mailer* is the party presenting the mail to the USPS.
- b. The same mailer (or agent) may not in a 24-hour period present for verification and acceptance more than four destination price mailings at the same destination postal facility, unless the mailer or agent has received a waiver when scheduling the deposit of the mailings. There is no maximum for PVDS mailings.

2.6 Deposit**2.6.1 Time and Location of Deposit**

Each mailing claimed at a destination price must be deposited at the time and location specified by the USPS.

2.6.2 Freight

Drop shipments are freight until deposited and accepted as mail at the destination facility.

2.6.3 Appointments

Appointments must be made for destination entry price mail as follows:

- a. Except for a local mailer under [2.6.13](#) and mailings of perishable commodities, appointments for deposit of destination entry price mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.

446.2.6.4

- b. Electronic appointments may be made by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancellations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.
- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often.

2.6.4 Advance Scheduling

Mailers must schedule appointments for deposit of destination entry price mail under [2.6.3](#) and the conditions below. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type.

2.6.5 Adherence to Schedule

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units.

2.6.6 Redirection by USPS

A mailer may be directed to transport destination entry price mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints.

2.6.7 Redirection at Mailer's Request

For service reasons, a mailer may ask to transport destination SCF price mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF price in this situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF.

2.6.8 Recurring Appointments

Recurring refers to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule.

2.6.9 Vehicle Unloading

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. At BMCs, ASFs, and SCFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At destination delivery units (DDUs), drivers must unload all mail within 1 hour of arrival. Unloading procedures are as follows:
 1. If pallets or pallet boxes are stacked, drivers must unload, unstrap, and unstack them.
 2. At DDUs that cannot handle pallets, drivers must unload any mail from pallets and place it into containers as delivery unit employees specify.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area.

446.2.6.10

2.6.10 Drop and Pick

Drop and pick service is not available for destination entry Standard Mail.

2.6.11 Demurrage

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry price mailings.

2.6.12 Appeals

Mailers who believe they are denied equitable treatment may appeal to the manager, customer service (district), responsible for the destination postal facility.

2.6.13 Exception for Local Mailer

The restrictions in [2.5.5, Volume Standards](#), and [2.6.4, Advance Scheduling](#), do not apply when a mailer deposits mailings for verification and acceptance at the local Post Office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment authorization. Under this exception, the mailer may claim the destination entry prices for mailings or portions of mailings deposited at the local Post Office that meet the standards in [3.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), and [5.0, Destination Delivery Unit \(DDU\) Entry](#).

3.0 Destination Bulk Mail Center (DBMC) Entry

3.1 Definition

For this standard, *destination bulk mail center (DBMC)* includes all bulk mail centers (BMCs) and auxiliary service facilities (ASFs) as shown in [Exhibit 3.1](#).

835, 838, 970-978, 980-986, 988-994	BMC Seattle WA 98000

3.2 Eligibility

Pieces in a mailing that meet the standards in [2.0](#) and [3.0](#) are eligible for the DBMC price when they meet all of the following conditions: 1) are deposited at a BMC or ASF; 2) are addressed for delivery to one of the 3-digit ZIP Codes served by the BMC or ASF where deposited that are listed in [Exhibit 3.1](#); and 3) are placed in a sack or pallet (subject to the standards for the price claimed) that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within the service area of that BMC or ASF (see [Exhibit 3.1](#)). DBMC price mail also must be eligible for Presorted or Enhanced Carrier Route prices, subject to the corresponding standards for those prices.

3.3 Eligibility for ADC Mailpieces

All pieces in an ADC sack are eligible for the DBMC discount if the ADC facility ZIP Code (as shown on Line 1 of the corresponding container label) is within the service area of the BMC or ASF at which the sack or tray is deposited as shown in [Exhibit 3.1](#). All pieces in a palletized ADC bundle are eligible for the DBMC discount if the ADC facility that is the destination of the bundle (determined by using the "Label To" ZIP Code in Column B of [L004](#)) is within the service area of the BMC or ASF at which it is deposited as shown in [Exhibit 3.1](#).

446.3.4

3.4 Eligibility for Mixed ADC Bundles

Mailpieces in a mixed ADC bundle or sack can qualify for the DBMC prices if the following standards are met:

- a. All pieces in the bundle or sack must destinate within the ASF or BMC service area shown in [Exhibit 3.1](#).
- b. Use labeling list [L010](#) when labeling bundles or sacks containing such pieces. For irregular parcels of uniform thickness, use [L009](#).
- c. Pieces claiming DBMC prices and any mixed ADC not claiming DBMC prices must be prepared in separate mixed ADC bundles or sacks.
- d. Otherwise applicable restrictions (e.g., minimum volume) are excepted when necessary to meet the standards in [3.4](#).

3.5 Additional Standards for Machinable Parcels

Additional standards for machinable parcels are as follows:

- a. Destination BMC/ASF Containers. Machinable parcels palletized or sacked may be sorted to destination BMCs or to destination BMCs and ASFs. When machinable parcels are sorted to both destination BMCs and ASFs they qualify for DBMC prices. Except as provided in [Exhibit 3.1](#), sortation of machinable parcels to ASFs is optional but is required for the ASF mail to be eligible for DBMC prices. Mailers may opt to sort some or all machinable parcels for ASF service area ZIP Codes to ASFs *only* when the mail will be deposited at the respective ASFs where the DBMC price is claimed, under applicable volume standards, using [L602](#); otherwise, mailers must sort machinable parcels only to destination BMCs under [L601](#). If machinable parcels are sorted under [L601](#), only mail for 3-digit ZIP Codes served by a BMC as listed in [Exhibit 3.1](#) is eligible for DBMC prices (i.e., mail for 3-digit ZIP Codes served by an ASF in [Exhibit 3.1](#) is not eligible for DBMC prices, nor is mail for 3-digit ZIP Codes that do not appear on [Exhibit 3.1](#)).
- b. Mixed BMC Containers. Pieces in mixed BMC sacks or on mixed BMC pallets that are sorted to the origin BMC under [705.8.0](#), [Preparing Pallets](#), or [445.5.0](#), [Preparing Presorted Parcels](#), are eligible for the DBMC prices if both of the following conditions are met: 1) the mixed BMC sack or pallet is entered at the origin BMC facility to which it is labeled; and 2) the pieces are for 3-digit ZIP Codes listed as eligible destination ZIP Codes for that BMC in [Exhibit 3.1](#).

3.6 Vehicles

Mailings deposited at a DBMC must be presented in vehicles compatible with BMC dock and yard operations.

3.7 Form 4410

Mailings may be deposited at the DBMC only if that facility is authorized (by Form 4410) to act as acceptance agent for the entry Post Office (where the meter license, precanceled stamp permit, or permit imprint authorization is held). Form 4410 is not required for plant-verified drop shipments.

4.0 Destination Sectional Center Facility (DSCF) Entry

4.1 Definition

For this standard, *destination sectional center facility (DSCF)* refers to the facilities listed in [L002](#), Column C, and [L006](#), Column C.

4.2 Eligibility

Pieces in a mailing that meets the standards in [2.0](#) and [4.0](#) are eligible for the DSCF price, as follows:

- a. When deposited at a DSCF (or USPS-designated facility), addressed for delivery within that facility's service area, and placed in or on a sack or pallet that is labeled to that DSCF or to a postal facility within its service area.
- b. When prepared in 5-digit bundles and placed on a 5-digit pallet or in a 5-digit scheme or 5-digit sack that is deposited at the destination delivery unit as defined in [5.1](#).
- c. When prepared and deposited under 705.6.3.

4.3 Vehicles

Mailings deposited at a DSCF must be presented in vehicles that are compatible with SCF dock and yard operations.

5.0 Destination Delivery Unit (DDU) Entry

5.1 Definition

For this standard, *destination delivery unit (DDU)* refers to the facility designated by the USPS district drop shipment coordinator (for automation price Standard Mail) or the facility (Post Office, branch, station, etc.) where the carrier cases mail for delivery to the addresses on pieces in the mailing (for other Standard Mail).

5.2 Eligibility

Pieces in a mailing that meets the standards in [2.0](#) and [5.0](#) are eligible for the DDU price when deposited at a DDU, addressed for delivery within that facility's service area, and prepared as follows:

- a. Irregular parcels in carrier route bundles sorted to carrier route sacks, and otherwise eligible for and claimed at a carrier route price.
- b. One or more parcels or Not Flat-Machinable pieces in 5-digit containers.

456 Enter and Deposit

453 Prices and Eligibility

Overview

- [1.0 Prices and Fees for Parcel Select](#)
- [2.0 Content Standards](#)
- [3.0 Price Eligibility for Parcel Select](#)

1.0 Prices and Fees for Parcel Select

1.1 Price Application

Postage is based on the price that applies to the weight increment of each addressed piece, and on the zone to which the piece is addressed, except for DDU and DSCF entered pieces. The price is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. For example, if an item weighs 4.225 pounds, the weight increment is 5 pounds. The minimum price per piece is the 1-pound price. For DDU and DSCF pieces, postage is based on the price that applies to the weight increment of each addressed piece.

There are three price categories for Parcel Select:

- a. Destination entry including destination entry bulk mail center (DBMC), destination entry sectional center facility (DSCF), and destination entry delivery unit (DDU).
- b. BMC Presort and OBMC Presort (Inter-BMC).
- c. Barcoded Machinable Intra-BMC/ASF and Barcoded Machinable Inter-BMC/ASF.

1. Parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound prices (balloon price).
 - More than 108 inches but not more than 130 inches, use oversized prices (regardless of weight).
2. Regardless of weight, a parcel that meets any of the criteria in [401.2.3.2](#) must pay the nonmachinable prices.
3. Machinable parcels must be barcoded. Nonbarcoded machinable parcels are eligible only for retail Intra-BMC/ASF prices.
4. Prices include the \$0.91 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.
5. Prices include the \$2.03 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

1. Must be part of a mailing of 50 or more pieces and prepared as an OBMC Presort or BMC Presort mailing.

- For OBMC Presort, deduct \$1.42 per parcel.
- For BMC Presort, deduct \$0.32 per parcel.

2. For parcels that destinate to different BMC service areas see 453.3.1.

3. Parcels that measure in combined length and girth:

- More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound price (balloon price).
- More than 108 inches but not more than 130 inches, use oversized prices regardless of weight.

4. Machinable parcels may be eligible for a barcode discount of \$0.03 per parcel.

5. Regardless of weight, a parcel that meets any of the criteria in 401.2.3.2 must pay the nonmachinable price.

6. Prices include the \$3.70 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

1.3 Parcel Select BMC and OBMC Presort (Inter-BMC) Prices

Weight Not Over (pounds)	Machinable ^{1, 2, 3, 4, 5}								Nonmachinable ^{1, 2, 3, 5, 6}							
	Zone								Zone

35	9.50	12.07	14.81	15.48	16.24

- All Parcel Select Barcoded Intra-BMC pieces must be part of a mailing of 50 or more pieces.
- For parcels that originate and destinate in the same BMC service area (see 453.3.1).
- Parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound price (balloon price).
 - More than 108 inches but not more than 130 inches, use oversized prices regardless of weight.
- For nonbarcoded pieces, add \$0.03 per parcel.
- Regardless of weight, a parcel that meets any of the criteria in 401.2.3.2 must pay the retail Parcel Post Intra-BMC price.

1.5 Parcel Select Barcoded Inter-BMC Prices

35	12.96	16.77	21.77	25.55	27.30	29.36	33.23

1. All Parcel Select Barcoded Inter-BMC pieces must be part of a mailing of 50 or more pieces.
2. For parcels that destinate to a different BMC service area (see 453.3.1).
3. Parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound price (balloon price).
 - More than 108 inches but not more than 130 inches, use oversized prices regardless of weight.
4. For nonbarcoded pieces, add \$0.03 per parcel.
5. Regardless of weight, a parcel that meets any of the criteria in 401.2.3.2 must pay the retail Parcel Post Inter-BMC price.

453.1.6

1.6 Annual Mailing Fee

Destination entry mailing fee, per 12-month period: \$180.00.

An annual Parcel Select destination entry mailing fee must be paid once each 12-month period at each Post Office of mailing by or for any person or organization that mails at destination entry level. All destination entry prices are covered under the payment of a single annual fee. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment

1.7 Computing Postage

1.7.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.7.2 Computing Postage for Affixed Postage

For each piece, affix correct postage for the weight (including any surcharges or discounts) and, if applicable, the zone to which the piece is addressed, as shown in [1.2](#) through [1.5](#). To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece.

1.7.3 Computing Postage for Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable price per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent.

2.0 Content Standards

2.1 Definition of Parcel Select

Parcel Select is a Shipping Services ground product offered using permit imprint or metered postage when mailing 50 or more packages.

2.2 Basic Content Standards

Parcel Select consists of mailable matter that is neither mailed, or required to be mailed, as First-Class Mail, nor entered as Periodicals (except as permitted under [2.3](#) or permitted or required under [707.7.9](#)). Mailers (other than publishers or registered news agents) may mail copies of Periodicals publications at Parcel Select prices.

2.3 Attachments or Enclosures of Periodicals Sample Copies

Sample copies of authorized and pending Periodicals publications may be enclosed or attached with merchandise sent at Parcel Select prices. Postage at Parcel Select prices is based on the combined weight of the host piece and the sample copies enclosed.

2.4 Postal Inspection

Parcel Select packages are not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Parcel Select prices constitutes consent by the mailer to postal inspection of the contents.

2.5 Attachments and Enclosures**2.5.1 Invoice**

An invoice, whether it also serves as a bill, may be placed either inside a Parcel Select piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

2.5.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Parcel Select piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Parcel Select price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

2.5.3 Additional Enclosures

Parcel Select may contain any printed matter mailable as Standard Mail, in addition to the enclosures and additions listed in [2.5](#) and [2.6](#).

2.6 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.

- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

3.0 Price Eligibility for Parcel Select

3.1 Destination Price Eligibility

3.1.1 Definition

Parcel Select destination entry prices apply to Parcel Select mailings prepared as specified in [705.8.0, *Preparing Pallets*](#), and [455.4.0, *Preparing Destination Entry Parcel Select*](#), and addressed for delivery within the service area of a destination bulk mail center, sectional center facility, or delivery unit where they are deposited by the mailer. For this standard, the following destination facility definitions apply:

- a. A destination bulk mail center (DBMC) includes all bulk mail centers (BMCs) and auxiliary service facilities (ASFs) under [L601](#) and [L602](#), and designated sectional center facilities (SCFs) under [456.2.16, *Acceptance at Designated SCF-USPS Benefit*](#).
- b. A destination sectional center facility (DSCF) includes all facilities listed under [L005](#).
- c. A destination delivery unit (DDU) is a facility that delivers to the addresses appearing on the deposited pieces in a destination entry Parcel Select mailing. Refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#) for address) to determine the location of a 5-digit delivery facility. Use [L606](#) only for mailings prepared using the optional 5-digit scheme sort.

3.1.2 Basic Standards

For Parcel Select destination entry, pieces must meet the applicable standards in [455.4.0](#) and the following criteria:

- a. Pieces may be bedloaded on pallets, in pallet boxes on pallets, in sacks, or in other authorized containers as specified in [456.2.1](#) through [456.2.16](#), depending on the facility at which the pieces are deposited.
- b. Pieces may not be plant-loaded.
- c. Pieces must be part of a single mailing of 50 or more pieces that are eligible for and claimed at any Parcel Select destination entry price. When Parcel Select mailings are submitted under PVDS procedures, mailers may use the total of all line items for all destinations on a PVDS register or PVDS postage statement to meet the 50-piece minimum volume requirement for destination entry price

mailings. This means that a mailer may enter fewer than 50 pieces at an individual destination, provided there is a total of at least 50 Parcel Select pieces for all of the entry points for that single mailing job listed on the PVDS register or PVDS postage statement.

- d. Pieces must be deposited at a destination BMC or destination ASF or other equivalent facility, destination SCF, or destination delivery unit, as applicable for the price claimed and as specified by the USPS.
- e. Pieces must be addressed for delivery within the ZIP Code ranges that the applicable entry facility serves.

3.1.3 DBMC Prices

For DBMC prices, pieces must meet the applicable standards in 3.0 and the following:

- a. Pieces must be part of a Parcel Select destination entry mailing that is deposited at a BMC or ASF under L601 or L602.
- b. Machinable parcels must bear a barcode under 708.5.0 for the ZIP Code of the delivery address. Nonbarcoded machinable parcels are eligible only for Parcel Post Intra-BMC/ASF prices.
- c. Except as provided in Exhibit 3.1.3, BMC/ASF—DBMC Price Eligibility, pieces deposited at each BMC or ASF must be addressed for delivery within the ZIP Code range of that facility.
- d. Pieces must be within a ZIP Code eligible for DBMC prices under Exhibit 3.1.3 and, if sacked or palletized, must be prepared according to 455.4.0, Preparing Destination Entry Parcel Select, and 705.8.0, Preparing Pallets. Mail meeting the additional criteria in 456.2.15 or 456.2.16 may be deposited at an SCF.

3.1.4 DSCF and DDU Prices

For DSCF and DDU prices, pieces must meet the applicable standards in [3.0](#) and the following criteria:

- a. For DSCF prices, be part of a Parcel Select destination entry mailing of parcels sorted to 5-digit scheme or 5-digit destinations and deposited at a designated SCF under [L005](#). Nonmachinable parcels sorted to 3-digit ZIP Code prefixes and claimed at a DSCF price must be entered at the designated SCF under [L005](#). Mailers must not prepare mail on pallets or pallet boxes for the DSCF price if the 5-digit delivery facility is unable to handle pallets. Refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#)) to determine which 5-digit delivery facilities can handle pallets or pallet boxes. When the Drop Shipment Product shows that mail for a single 5-digit ZIP Code area is delivered out of more than one postal facility, use the facility where the majority of city carrier routes are located to determine if the delivery facility can handle pallets.
- b. For DDU prices, be part of a Parcel Select mailing deposited at a designated DDU facility that delivers parcels to the addresses appearing on the pieces. There is no required minimum number of pieces that must be deposited for the DDU price and no specific preparation requirements; however, the pieces must be part of a mailing of at least 50 Parcel Select destination entry price pieces

and must be prepared by 5-digit scheme (optional) and 5-digit sorts. To determine the location for entry of 5-digit scheme sorted pieces, use Column B of [L606](#). To determine the location for entry of 5-digit sorted pieces or whether a 5-digit delivery facility can handle pallets (or pallet boxes), refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#)). When the Drop Shipment Product shows that mail for a single 5-digit ZIP Code area is delivered out of more than one postal facility, use the facility from which the majority of city carrier routes are delivered as the facility at which the DDU mail must be entered. The Drop Shipment Product identifies the 5-digit ZIP Codes that are exceptions to the “majority of city carriers rule” or other facilities where parcels are normally dropped. If a mailer transports mail to a DDU facility that cannot handle pallets, the driver must unload the pallets into containers as specified by the delivery unit.

3.2 Parcel Select BMC and OBMC Presort (Inter-BMC) Price Eligibility

3.2.1 BMC Presort

Parcel Select BMC (bulk mail center) Presort per piece prices apply to Inter-BMC Parcel Select sorted to BMC destinations under [L601](#) for machinable pieces, and sorted to BMC and ASF destinations for nonmachinable pieces under [L605](#), and to pieces prepared as part of a combined mailing under [705.20.0](#). To qualify, machinable pieces must be placed in pallet boxes on pallets, and nonmachinable pieces must be placed directly on pallets under [705.8.0](#), or be prepared as part of a combined mailing under [705.20.0](#) and placed in a 5-digit, 3-digit, ADC, or BMC container. The mail must be entered at a postal facility that is not a BMC and must be part of a mailing containing 50 or more Parcel Select pieces.

3.2.2 OBMC Presort

Parcel Select OBMC (origin bulk mail center) Presort per piece prices apply to Inter-BMC Parcel Select sorted to BMC destinations under [L601](#) for machinable pieces, and sorted to BMC and ASF destinations for nonmachinable pieces under [L605](#), and to pieces prepared as part of a combined mailing under [705.20.0](#). To qualify, machinable pieces must be placed in pallet boxes on pallets; and nonmachinable pieces must be placed directly on pallets under [705.8.0](#), or be prepared as part of a combined mailing and placed in a 5-digit, 3-digit, ADC, or BMC container under [705.20.0](#). The mail must be entered at a BMC listed in [L601](#) and must be part of a mailing containing 50 or more Parcel Select pieces.

3.3 Parcel Select Barcoded Intra-BMC/ASF and Barcoded Inter-BMC/ASF Price Eligibility

3.3.1 Barcoded Intra-BMC/ASF

Parcel Select Barcoded Intra-BMC per piece prices apply to Parcel Select machinable parcels that are barcoded and that originate and destinate in the service area of the same BMC or ASF. Barcoded Intra-BMC prices also apply to Parcel Select machinable parcels that originate and destinate in the same state for Alaska and Hawaii and in the same territory for Puerto Rico. See [Exhibit 3.3.1, BMC/ASF Service Areas](#). Machinable parcels ([401.1.5](#)) must bear a UCC/EAN Code 128 barcode under [708.5.0](#) for the ZIP Code of the delivery address, and be part of a mailing of 50 or more pieces or when prepared as part of a combined mailing of 300 or more pieces under [705.20.0](#) in other than 5-digit containers.

3.3.2 Barcoded Inter-BMC /ASF

Parcel Select Barcoded Inter-BMC/ASF per piece prices apply to Parcel Select machinable parcels that are barcoded and originate in the service area of a BMC or ASF or in Alaska, Hawaii, or Puerto Rico and destinate outside that area, state, or territory. Machinable parcels ([401.1.5](#)) must bear a UCC/EAN Code 128 barcode under [708.5.0](#) for the ZIP Code of the delivery address and be part of a mailing of 50 or more pieces or when prepared as part of a combined mailing of 300 or more pieces under [705.20.0](#) in other than 5-digit containers.

3.4 Oversized Price

The oversized price applies to parcels that measure over 108 inches but not more than 130 inches in combined length and girth.

3.5 Balloon Price

The balloon price applies to parcels weighing less than 20 pounds but measuring more than 84 inches (but not more than 108 inches) in combined length and girth which is charged the price for a 20-pound parcel for the zone to which it is addressed (balloon price).

3.6 Loyalty Rebates

Beginning June 1 through August 1, 2009 and each June 1 through August 1 period thereafter, shippers may apply to the manager, Business Mailer Support (see [608.8.0](#)), for Loyalty Rebates based on their level of Parcel Select activity during the most recent twelve-month (June 1 - May 31) period.

3.6.1 Qualifying

For shippers meeting all of the eligibility criteria, the percentage level of their Loyalty Rebate is based on their total Parcel Select postage during the most recent twelve-month (June 1 - May 31) period, as shown in [Exhibit 3.6.1](#). The Loyalty Rebate is applied to all DDU volume. The Loyalty Rebate amount is calculated as

the average postage per DDU piece over the twelve-month period for that shipper, times the volume of qualified DDU volume over the twelve-month period for that shipper, times the applicable percentage shown in [Exhibit 3.6.1](#).

To qualify for the Loyalty Rebates, shippers must meet the following:

- a. Total annual Parcel Select postage must be in excess of \$5 million during the most recent twelve-month (June 1 - May 31) period.
- b. Total Parcel Select volume must have increased during the most recent twelve-month (June 1 - May 31) period, compared with the previous twelve-month (June 1 - May 31) period.
- c. Use eVS as of May 31, 2009.
- d. Identify both the mail owner and mailing agent within the electronic manifest.

Exhibit 3.6.1 Loyalty Rebate

PARCEL SELECT LOYALTY REBATE						
Annual Total Parcel Select Postage	\$5M	\$25M	\$50M	\$100M	\$300M	\$500M
Rebate on DDU Volume	0.25%	0.50%	0.75%	1.00%	1.25%	1.50%

3.7 Growth Rebates

Beginning June 1, 2009, and each June 1 thereafter, shippers who qualify for a Loyalty Rebate and who increase their Parcel Select volumes in the most recent twelve-month (June 1 - May 31) period (compared with the previous twelve-month period) by more than 10 percent will qualify for a Growth Rebate. (Shippers who had zero Parcel Select volume in the previous twelve-month period will not be eligible for a Growth Rebate.)

3.7.1 Qualifying

For shippers meeting all of the eligibility criteria, the percentage level of the Growth Rebate is based on their growth percentage and their total Parcel Select revenue in the twelve-month period, as shown in [Exhibit 3.7.1](#). The Growth Rebate is applied only to qualified incremental DDU volume. The Growth Rebate amount will be calculated by multiplying the difference between the previous twelve-month DDU volume and the most recent twelve-month DDU volume by the average postage per DDU piece over the current twelve-month period, times the applicable percentage shown in [Exhibit 3.7.1](#).

Exhibit 3.7.1 Growth Rebate

PARCEL SELECT GROWTH REBATE						
Total Parcel Select Postage to Qualify	>\$5M	>\$25M	>\$50M	>100M	>\$300M	>\$500M
Total Parcel Select Annual Growth Price	Rebate on Qualified Incremental DDU Volume					
>10%	2%	4%	6%	8%	10%	10%
>20%	4%	6%	8%	10%	12%	12%
>30%	6%	8%	10%	12%	14%	14%

3.7.2 Exemption

At the discretion of the USPS, volumes from the following 3-digit ZIP Codes may be exempt from the Growth Rebates due to delivery conditions: 100-102, 104, 107, 108, 111-113. Growth Rebates may not apply to volume growth as a result of mergers or acquisitions. Exclusions will be administered on a case-by-case basis.

3.8 Delivery and Return Addresses

All Parcel Select mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) or detached address labels under [602.4.0](#) may be used. Each piece must bear the sender's return address.

454 Postage Payment and Documentation

Overview

1.0 Basic Standards for Postage Payment

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

Mailing fees must be paid for the current 12-month period at the Postal Service facility where postage is paid for the mailing.

- a. The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Parcel Select mail may be paid by permit imprint or meter postage. Each piece with meter postage must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces provided the mail can be separated at acceptance into groups that each contain pieces subject to the same zone and same combination of prices (e.g., all are zone 4, Inter-BMC, with a BMC presort discount and a barcode discount). Identical-weight permit imprint mail may also be mailed under [705.2.0](#) through [705.4.0](#) in *Advanced Preparation and Special Postage Payment Systems*.
- b. Except for plant-verified drop shipments (see [705.15.0](#)), Electronic Verification System (eVS) shipments (see [705.2.9](#)), and metered mail drop shipments (see [705.18.0](#)), the mailer must have a meter license or permit imprint authorization at the destination facility parent Post Office for mailings deposited for entry at a DBMC or ASF, at a DSCF, or at the parent Post Office of a DDU. Except for manifested mail using eVS under [705.2.9](#), postage and fees are paid to the Post Office that verifies the mailings. The mailer must ensure that Form 8125 accompanies plant-verified drop shipments along with mailing documentation.

1.2 BMC as Agent

The DBMC may verify and accept mail if authorized by PS Form 4410, *Authorization for BMC Acceptance*, to act as an agent for the parent Post Office where the mailer's account, or license is held (see [Exhibit 1.2](#)).

1.3 Completing Postage Statements

All metered and permit imprint mailings of 50 pieces or more, except manifested mail using eVS under [705.2.9](#), must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement and document the correction.

1.4 Documentation

Mailings must be documented as follows:

- a. *Postage Statement.* A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing.
- b. *Other Documentation.* When presented for acceptance, documentation of postage by entry office and presort level (e.g., by DBMC, OBMC Presort and BMC Presort mail and by 5-digit ZIP Code for DSCF and DDU prices) is required under [705.2.0](#) through [705.4.0](#) in *Advanced Preparation and Special Postage Payment Systems*. Except for DSCF, mail palletized under the alternate preparation option that requires separate documentation, other documentation is not required when the correct price is affixed to each piece, or when each piece is of identical weight and the pieces are separated by zone and within each zone are grouped by pieces subject to the same combination of prices. DSCF mail palletized under the alternate preparation option in [705.8.0](#) must submit the detailed documentation required in [705.8.20.2](#).

1.5 Basic Documentation Standards

Unless manifested using eVS under [705.2.9](#), mailings presented to the USPS generally require documentation. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by postage when presented for acceptance. Documentation describes the preparation, price level, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or payment method used.

1.6 Preparing Documentation

As provided by standards, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

1.7 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

1.8 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607](#).

1.9 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the price and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if: the mailings are presented at the same time for verification; the

454.1.10

pieces are in the same processing category; each mailing separately meets all applicable eligibility standards; and the number of pieces in each mailing is separately reported on the postage statement.

1.10 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing, and other extraneous information that appears on the USPS form, do not have to be included. Facsimiles must include all other information pertaining to the mailing such as the postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

455 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Sacks](#)
- [3.0 Sack Labels](#)

- [5.0 Preparing BMC Presort and OBMC Presort \(Inter-BMC\) Parcel Select](#)
- [6.0 Preparing Barcoded Intra-BMC and Barcoded Inter-BMC](#)

1.0 General Information for Mail Preparation

1.1 Basic Standards

All mailings at Parcel Select prices are subject to these general standards:

- a. Each mailing must meet the applicable standards in [401](#), [402](#), [453](#), [455](#), and [456](#).
- b. All pieces that are palletized must be prepared under [705.8.0](#).

1.2 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations.

1.3 Definition of Mailings

A mailing is a group of pieces within the same class of mail and, within the same processing category that may be sorted together and/or presented under a single minimum volume mailing.

1.4 Terms for Presort Level

Terms used for presort levels are defined as follows:

- a. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *5-digit scheme (pallets and sacks)*: the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code zones processed by the USPS as a single scheme, as shown in L606.
- c. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- d. *Mixed [BMC, etc.]*: the pieces are for delivery in the service area of more than one BMC, etc.

1.5 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when pieces is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. A *5-digit scheme* sort for parcels yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#), and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for price eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. The *required at* [quantity] instruction (e.g., “required at 7 pieces”) means that the particular unit must be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Containers may contain more than the specified required at quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- e. The *optional at* [quantity] instruction means that the particular unit may be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Containers may contain more than the specified optional at quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- f. *Entry [facility] (or origin [facility])* refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer's location (e.g., for plant-verified drop shipment), the Post Office of entry determines the entry facility. Entry SCF includes both single-3-digit and multi-3-digit SCFs. Entry BMC includes subordinate ASFs unless otherwise specified.
- g. An *overflow sack* for Parcel Select DSCF mail is a 5-digit scheme or 5-digit sack prepared with fewer than seven pieces after all other sacks for that same 5-digit scheme or 5-digit ZIP Code area are prepared with seven or more pieces per sack as required by [4.2, Preparing Destination SCF \(DSCF\) Parcel Select](#). If all of the mail is sacked under [4.0](#), only one overflow sack is permitted for each 5-digit scheme or 5-digit ZIP Code. If a mailing is prepared on pallets, remaining pieces of Parcel Select mail may be prepared in one or more 5-digit scheme or 5-digit overflow sacks only after one or more 5-digit scheme or 5-digit pallets are prepared to meet the minimum pallet requirement specified in [705.8.0](#). Pieces in overflow sacks qualify for the Parcel Select DSCF prices.

- h. An overflow pallet in a Parcel Select DSCF mailing is a 5-digit scheme or 5-digit pallet containing pieces that remain after one or more 5-digit scheme or 5-digit pallets have been prepared to meet the minimum pallet requirement specified in [705.8.0](#). Only one overflow pallet per 5-digit scheme or 5-digit ZIP Code area is permitted for Parcel Select DSCF mail palletized under [705.8.0](#). Pieces on overflow pallets qualify for the DBMC rates
- i. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces.

1.6 Separation

Except for mail entered at DSCF or DDU prices (which are not zoned prices), Parcel Select pieces must be separated by zones when presented for acceptance unless either the correct postage is affixed to each piece or the mailing is prepared under [1.7](#), or the mailing is presented under a special postage payment system under [705.2.0, Manifest Mailing System](#), [705.3.0, Optional Procedure Mailing System](#), or [705.4.0, Alternate Mailing System](#). If DSCF sacks prepared under [4.2.3](#) are included in the same mailing as DSCF pallets prepared under [705.8.20.1e.](#), then at the time of acceptance the mailer must separate the sacks that are overflow from palletized mail from those sacks that were prepared under the provisions of [4.2](#).

1.7 Commingled Zones

Zoned Parcel Select pieces need not be separated by zones when presented for verification, other than as individual pieces or with full correct postage affixed to each piece, subject to this section. Nonidentical-weight pieces not bearing the full correct postage may not be commingled unless authorized by the BMS manager. The mail must be prepared and documented under either of the following:

- a. [705.2.0, Manifest Mailing System](#), or [705.4.0, Alternate Mailing System](#); or
- b. All of these conditions:
 - 1. A unique number is assigned to each sack/pallet in the mailing and printed on a separate line at the top of the sack/pallet label (above the Line 1 information).
 - 2. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to sacks/pallets in the mailing, that shows the Post Office where the mail is to be entered (entry Post Office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement(s), the name and address of the mailer, the permit number (if applicable), the date of mailing, individual line entries for each sack/pallet, and the total number of pieces to each zone and in the entire mailing or mailing segment. Line entries for sacks/pallets containing mail for only one zone must show the sack/pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the sack/pallet. Entries for sacks/pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the sack/pallet. Mailings are not accepted if there are

discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage.

1.8 Parcel Select Markings

Marking requirements for Parcel Select are as follows:

- a. *Destination Entry Mail.* Each piece mailed at a DBMC, DSCF, or DDU Parcel Select prices must bear the marking “Parcel Post” (or “PP”) or “Parcel Select” in the postage area as described under [402.2.2.1](#). If “Parcel Select” is shown in the postage area, then no other marking is required. If “Parcel Post” (or “PP”) is shown in the postage area, then the additional marking “Drop Ship” (or “D/S”), or “Parcel Select,” or both, must be placed on each piece in either the postage area or the address area (as described under [402.1.3](#)) to indicate that the piece was entered at a destination entry rate.
- b. *Other Parcel Select Mail.* Pieces must bear the marking “Parcel Post” (or “PP”) in the postage area as described under [402.2.2.1](#).

2.0 Sacks

2.1 Maximum Weight

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its contents must not exceed 70 pounds.

3.0 Sack Labels

3.1 Basic Standards

Sack labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.
- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.

3.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- c. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- d. Height (perpendicular to printing):
 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.

2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

3.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack.

3.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the processing category of the mail in the sack or tray and other information as specified by standards.
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

CONTENT TYPE	CODE
Carrier Route	C (type of route)
Carrier Routes	CR-RT or CR-RTS
Digit	D
General Delivery Unit	G
Highway Contract Route	H
Irregular Parcels	IRREG
Machinable	MACH
Mixed	MXD
Nonbarcoded	NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0)
Package Services	PSVC
Parcels	PARCELS
Post Office Box Section	B
Rural Route	R
Scheme	SCH
Working	WKG

3.5 Line 3 (Origin Line)

Line 3 (origin line showing office of mailing or mailer information) must be the bottom line of required information unless the sack contains mail manifested using the Electronic Verification System (eVS) (see for eVS labeling information). Line 3 must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

3.6 Electronic Verification System

All sacks containing parcels prepared and identified using the Electronic Verification System (eVS) under [705.2.9](#) must show "eVS" (or the alternatives "EVS" or "E-VS") directly below Line 3 using the same size and lettering used for Line 3. As an option, "eVS" may be placed as the first element on Line 3.

3.7 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

3.8 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.

- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.

4.0 Preparing Destination Entry Parcel Select

4.1 Preparing Destination Delivery Unit (DDU) Parcel Select

4.1.1 Definition

A destination delivery unit (DDU) is a facility that delivers to the addresses appearing on the deposited pieces in a destination entry Parcel Select mailing. Refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#) for address) to determine the location of a 5-digit delivery facility. Use [L606](#) only for mailings prepared using the optional 5-digit scheme sort.

4.1.2 Basic Standards

Pieces must meet the applicable standards in [4.0](#) and the following criteria:

- a. Must be part of a mailing of at least 50 Parcel Select pieces.
- b. Pieces must be entered by the mailer at the postal facility where the carrier delivers the parcels (delivery unit) as defined in [453.3.1.1](#).
- c. If the delivery unit serves more than one 5-digit ZIP Code, the pieces must be separated by 5-digit ZIP Code when unloaded, unless prepared as optional 5-digit scheme sacks or pallets. Refer to the Drop Shipment Product available from the National Customer Support Center (see [608.8.1](#)) to determine the location of the delivery unit, whether it serves more than one 5-digit ZIP Code, and whether it can handle pallets.

4.1.3 Sacking and Labeling

There are no minimum sacking or pallet preparation standards. DDU pieces may be bedloaded, sacked, placed directly on pallets, or placed in pallet boxes on pallets. Machinable and nonmachinable pieces may be combined in the same sack or on the same pallet (including pallet boxes on pallets).

Sacked mail must be labeled as follows:

- a. 5-digit scheme: Line 1, [L606](#); Line 2, "PSVC PARCELS 5D SCH."
- b. 5-digit: Line 1, city, state, and 5-digit ZIP Code on mail (see [3.3c](#) for overseas military mail); Line c. "PSVC PARCELS 5D."

4.1.4 Hold For Pickup Endorsement

In addition to the requirements in [4.1.1](#) through [4.1.3](#) mailers or their agents must prepare Parcel Select DDU parcels bearing the "Hold For Pickup" endorsement as follows:

- a. Submit a written request to the manager, Business Mailer Support (BMS) (see [608.8.1](#) for address).
- b. Mail the parcels using an authorized manifest mailing system.

455.4.1.4

- c. Enter parcels at the Parcel Select DDU prices under [453.1.2](#).
- d. Exchange electronic files with the USPS through an approved file transfer protocol to notify the addressees when parcels are available for pickup at the designated Post Office and to notify the mailer or agent that items are available to be picked up as “return to sender.”
- e. Place the official Hold For Pickup endorsement, Label LAB-HFP, on the address side of each parcel. The label must not cover the address label or the barcode information. See [Exhibit 4.1.4e](#).

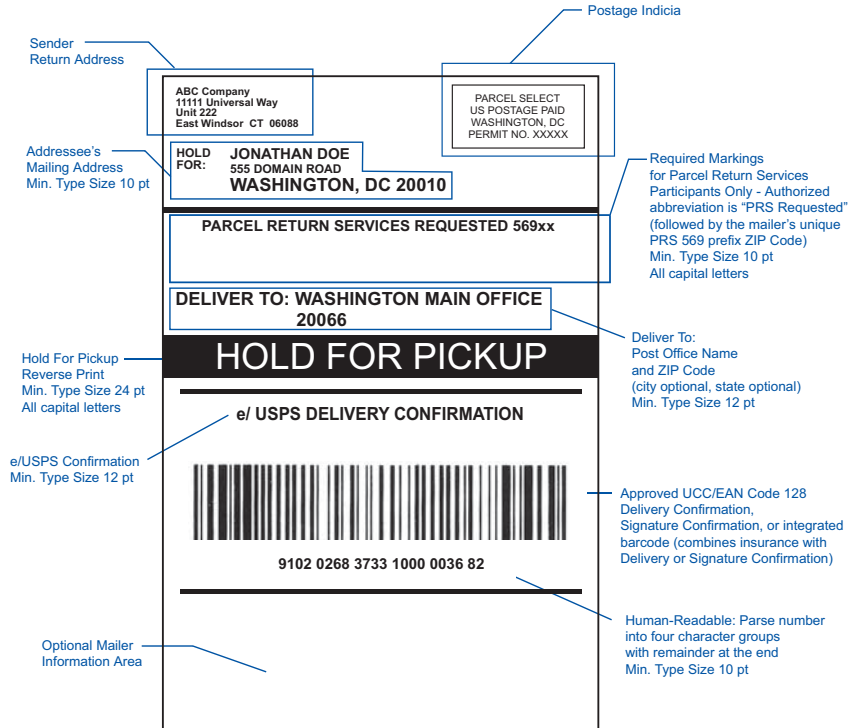

Exhibit 4.1.4e Official Hold For Pickup Endorsement, Label LAB-HFP

- f. Affix a properly formatted address label that has been approved by the National Customer Support Center (NCSC) (see [608.8.1](#) for address).
- g. In addition to the markings defined in [402.2.3](#), address labels on a Hold For Pickup parcel must contain the following elements. See [Exhibit 4.1.4g](#).
 1. The top portion of the address label must contain the return address for the mailer or agent and the postage indicia.
 2. The name and address for the customer (the “addressee”) must appear in at least 10-point type. Immediately to the left of the customer’s name, the words “HOLD FOR:” must appear in all capital letters.
 3. For Parcel Return Service (PRS) participants only, the marking, “PARCEL RETURN SERVICE REQUESTED” or “PRS REQUESTED,” followed by the participant’s unique PRS 569 prefix ZIP Code. This marking must be in at least 10-point type, in all capital letters.
 4. The words, “DELIVER TO:” in at least 12-point type and in all capital letters must appear immediately to the left of the Post Office name, city (optional), state (optional), and ZIP Code where the addressee will pick up the parcel.
 5. In the center of the label the words “HOLD FOR PICKUP” must appear in reverse print (white print on a black background) in at least 24-point type and in all capital letters.

6. The lower half of the address label must contain an approved UCC/EAN Code 128 Delivery Confirmation or Signature Confirmation barcode or an integrated barcode (which combines a confirmation service with insurance) as defined in Publication 91, *Confirmation Services Technical Guide*.

Exhibit 4.1.4g Hold For Pickup Address Label

4.2 Preparing Destination SCF (DSCF) Parcel Select

4.2.1 Definition

A destination sectional center facility (DSCF) includes all facilities listed under L605.

4.2.2 Basic Standards

Pieces must meet the applicable standards in 4.0 and the following criteria:

- a. Must be part of a mailing of at least 50 Parcel Select pieces.
- b. DSCF pieces must be for the same SCF area under L605.
- c. Sorted to optional 5-digit scheme destinations under L606, Column B, and 5-digit destinations, either in sacks or directly on pallets or in pallet boxes. Mailers must enter the pieces at the designated SCF, under L605, that serves the 5-digit ZIP Code destinations of the pieces. The DSCF price is not available for palletized mail for facilities that are unable to handle palletized mailings. Refer to the Drop Shipment Product available from the National Customer Support Center (NCSC) (see 608.8.1) to determine if the facility serving the 5-digit destination can handle pallets.

455.4.2.3

- d. Any remaining nonmachinable parcels (as defined in [401.2.3.2](#)) sorted to 3-digit ZIP Code prefixes in [L002](#), Column C. Machinable parcels may not be sorted to the 3-digit level.

4.2.3 Sacking and Labeling

Sacking requirements for DSCF entry:

- a. Only 5-digit scheme and 5-digit sacks are permitted.
- b. Each 5-digit scheme and 5-digit sack must contain a minimum of seven pieces. Machinable and nonmachinable pieces may be combined in the same sack to meet this requirement. One overflow sack per 5-digit ZIP Code is permitted (no piece minimum).
- c. 5-digit scheme sack labeling: Line 1, use [L606](#), Column B; for Line 2, "PSVC PARCELS 5D SCH."
- d. 5-digit sack labeling: Line 1, use city, state, and 5-digit ZIP Code on mail (see [3.3](#) for overseas military mail); for Line 2, "PSVC PARCELS 5D."
- e. 3-digit nonmachinable sack labeling: Line 1, use [L002](#), Column A; for Line 2, "PSVC IRREG 3D."
- f. See [705.8.0](#) for option to place 5-digit scheme and 5-digit DSCF sacks and 3-digit nonmachinable sacks on an SCF pallet.

4.3 Preparing Destination BMC (DBMC) Parcel Select

4.3.1 Definition

A destination bulk mail center (DBMC) includes all bulk mail centers (BMCs) and auxiliary service facilities (ASFs) under [L601](#) and [L602](#), and designated sectional center facilities (SCFs) under [456.2.16](#), *Acceptance at Designated SCF-USPS Benefit*.

4.3.2 Basic Standards

Pieces must meet the applicable standards in [4.0](#) and the following criteria:

- a. Must be part of a mailing of at least 50 Parcel Select pieces.
- b. Pieces must be part of a Parcel Select mailing that is deposited at a BMC or ASF under [L601](#) or [L602](#).
- c. Machinable parcels must bear a barcode under [708.5.0](#) for the ZIP Code of the delivery address. Nonbarcoded machinable parcels are eligible only for the Intra-BMC/ASF at Parcel Post prices.
- d. Except as provided in Exhibit [453.3.1.3](#), *DBMC Prices*, pieces deposited at each BMC or ASF must be addressed for delivery within the ZIP Code range of that facility.
- e. Pieces must be within a ZIP Code eligible for DBMC prices under [Exhibit 453.3.1.3](#) and, if sacked or palletized, must be prepared according to [4.0](#), *Preparing Destination Entry Parcel Select*, and [705.8.0](#), *Preparing Pallets*. Mail meeting the additional criteria in [456.2.15](#) or [456.2.16](#) may be deposited at an SCF.

4.3.3 Sacking and Labeling

DBMC mailing (if not bedloaded), must be prepared as follows:

- a. DBMC machinable parcels must be sacked under [5.0](#) and [6.0](#) or prepared on pallets under [705.8.0](#).
- b. DBMC nonmachinable parcels that each weigh 35 pounds or less must be sacked under [5.0](#) or [6.0](#), if the parcels do not contain perishables and the size of the parcels allows a sack to hold at least two pieces. DBMC nonmachinable parcels that cannot be sacked in this manner or that weigh more than 35 pounds must be transported as outside (unsacked) pieces. If authorized in advance by the USPS, DBMC nonmachinable parcels may be palletized.

5.0 Preparing BMC Presort and OBMC Presort (Inter-BMC) Parcel Select

5.1 Definitions

The following definitions apply:

- a. BMC Presort (Inter-BMC) - are pieces sorted to BMC destinations using [L601](#) if machinable and or BMC/ASF destinations using [L605](#) if nonmachinable, entered at any facility (other than a BMC) that accepts bulk mail.
- b. OBMC Presort (Inter-BMC) - are pieces sorted to BMC destinations using [L601](#) if machinable or BMC/ASF destinations using [L605](#) if nonmachinable, entered at a BMC listed in [L601](#).

5.2 Basic Standards

Pieces must meet the applicable standards in [4.0](#) and the following criteria:

- a. Must be part of a mailing of at least 50 Parcel Select pieces.
- b. Machinable pieces must be placed in pallet boxes on pallets, and nonmachinable pieces must be placed directly on pallets under [705.8.0](#).

6.0 Preparing Barcoded Intra-BMC and Barcoded Inter-BMC

6.1 Definition

Intra-BMC/ASF and Inter-BMC/ASF Parcel Select machinable parcels ([401.1.5](#)) that bear a barcode under [705.8.0](#) for the ZIP Code of the delivery address.

6.2 Basic Standards

Pieces must meet the applicable standards in [4.0](#) and the following criteria:

- a. Must be part of a mailing of at least 50 Parcel Select pieces.
- b. Each piece must be machinable and bear a barcode.

6.3 Sacking and Labeling

Sacking is not required, however mailers may opt to prepare Parcel Select machinable parcels in sacks under [2.0](#) or on pallets under [705.8.0](#). Pieces must be separated by zones when presented to the USPS unless either the correct postage is affixed to each piece or the mailing is prepared under [1.7, *Commingled Zones*](#).

6.3.1 Sack Preparation

Sack size, preparation sequence, and Line 1 labeling:

- a. 5-digit scheme: optional (minimum of 10 pieces or 20 pounds); for Line 1, use [L606](#), Column B.
- b. 5-digit: required (minimum of 10 pieces or 20 pounds); for Line 1, use city, state and 5-digit ZIP Code destination of pieces (see [3.3c](#). for military mail).
- c. ASF: optional; allowed only for mail deposited at an ASF to claim the DBMC price (minimum of 10 pieces or 20 pounds); for Line 1, use [L602](#), Column B. Exhibit [453.3.1.3](#) determines DBMC price eligibility.
- d. BMC: required (minimum of 10 pieces or 20 pounds); for Line 1, use [L601](#), Column B. Exhibit [453.3.1.3](#) determines DBMC price eligibility.
- e. Mixed BMC: required (no minimum); for Line 1, use “MXD” followed by the [L601](#), Column B information for the BMC serving the 3-digit ZIP Code prefix of the entry Post Office.

6.3.2 Sack Line 2

Line 2:

- a. 5-digit scheme: “PSVC MACH 5D SCHEME” or “PSVC MACH 5D SCH.”
- b. 5-digit: “PSVC MACH 5D.”
- c. ASF: “PSVC MACH ASF.”
- d. BMC: “PSVC MACH BMC.”
- e. Mixed BMC: “PSVC MACH WKG.”

456 Enter and Deposit

Overview

[1.0 Verification](#)

[2.0 Deposit](#)

1.0 Verification

1.1 Verification and Entry

All presort, destination entry, and barcoded mailings must be presented for verification and acceptance at the Post Office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-verified drop shipment (PVDS) mailings must be presented for verification, acceptance, and entry under [705.15.0](#). Plant-loaded mailings must be presented as specified by the applicable standards and the plant- load agreement. Metered mail may be deposited at other than the licensing Post Office only as permitted under [705.18.0](#).

1.2 Office of Mailing

Parcel Select must be mailed at the Post Office from which the zone-based postage was computed, except under [1.3](#) and [1.4](#).

1.3 Redirected Mailings

A shipper who presents large shipments of zoned Parcel Select mail may be authorized or directed to deposit such shipments at another postal facility when processing or logistics make such an alternative desirable for the USPS, subject to these conditions:

- a. Zoned postage need not be recomputed if both the original Post Office of mailing and the alternative facility use the same zone chart for computing zoned postage, based on the 3-digit prefix of their ZIP Codes.
- b. Postage must be recomputed on pieces in mailings redirected to a postal facility that uses a different zone chart for computing zoned postage.
- c. Postage for pieces claimed at the Parcel Select Intra-BMC local zone prices must be recomputed at the applicable zone price for the alternative postal facility. Postage also may be recomputed for other pieces that are ineligible for the Parcel Select Intra-BMC local zone price but could become eligible at the postal facility to which the mailing is redirected.

1.4 BMC Acceptance

A mailer may present Parcel Select at a BMC for acceptance if:

- a. Metered postage is paid through a postage meter licensed at the BMC parent Post Office, or permit imprint postage is paid through an advance deposit account at the BMC parent Post Office or another Post Office in the BMC service area, unless otherwise permitted by standard.
- b. Zoned postage is computed from the BMC parent Post Office.

456.1.5

- c. The BMC is authorized by Form 4410, *Authorization for BMC Acceptance*, to act as acceptance agent for the entry Post Office.

1.5 Drop Shipment Information

Essential information for entering drop shipment Parcel Select mailings at specific postal facilities can be found in the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#) for address).

2.0 Deposit

2.1 Bedloaded Parcels

A mailer may present bedloaded DBMC parcels if the mailer's vehicle has a road-to-bed height of 50 (± 2) inches. If applicable, the mail to be entered at different destinations must be separated to prevent mixing of mailings for deposit at different destinations. DBMC mailings may be bedloaded for deposit at BMCs/ASFs and DDU mailings may be bedloaded for deposit at DDUs. Refer to the Drop Shipment Product available from the National Customer Support Center (NCSC) (see [608.8.1](#) for address) to determine dock requirements for a DDU facility.

2.1.1 Containers

DBMC mailings (if not bedloaded), DDU mailings (if not bedloaded), and all DSCF mailings must be prepared as follows:

- a. Machinable parcels for which a DBMC, DSCF, or DDU price is claimed must be sacked under [455.4.0, *Preparing Destination Entry Parcel Select*](#), or prepared on pallets under [705.8.0](#).
- b. For DBMC price, nonmachinable parcels that each weigh 35 pounds or less must be sacked under [455.4.0, *Preparing Destination Entry Parcel Select*](#), if the parcels do not contain perishables and the size of the parcels allows a sack to hold at least two pieces. DBMC nonmachinable parcels that cannot be sacked in this manner or that weigh more than 35 pounds must be transported as outside (unsacked) pieces. If authorized in advance by the USPS, DBMC nonmachinable parcels may be palletized.
- c. For DSCF, if sacked under [455.4.0, *Preparing Destination Entry Parcel Select*](#), must contain at least seven pieces per sack. If the sack is overflow from a 5-digit scheme, 5-digit, or 3-digit sack that contains at least seven pieces, then a sack may contain fewer than seven pieces. For DSCF, if sacked under [705.8.0](#) as overflow from a 5-digit scheme, 5-digit, or 3-digit pallet that meets the applicable pallet minimum, may contain any number of pieces. Machinable and nonmachinable pieces may be included in the same sack.
- d. For DSCF, 5-digit scheme, 5-digit, and 3-digit sacks may be bedloaded or be placed on SCF pallets that are labeled and otherwise prepared under [705.8.0](#).
- e. For DSCF and DDU, nonmachinable parcels may be palletized (including pallet boxes on pallets). Nonmachinable parcels may be combined with machinable parcels on 5-digit scheme, 5-digit, and 3-digit pallets (including pallet boxes on pallets) claimed at DSCF or DDU prices under [705.8.0](#).

- f. For DDU, there are no minimums for sacks, pallets, or pallet boxes on pallets. DDU mail must be separated by 5-digit scheme and 5-digit (even if bedloaded) and, if placed in sacks or on pallets (including boxes on pallets), it must be properly labeled to the 5-digit scheme or 5-digit destination. Machinable and nonmachinable pieces may be combined in 5-digit scheme and 5-digit sacks or on 5-digit scheme and 5-digit pallets (including pallet boxes).

2.2 Mailer Transport

The mailer must transport the PVDS mailing from the place where it was verified to the destination postal facility (BMC, SCF, or delivery unit), appropriate to the mailing and the price claimed.

2.3 Freight

Drop shipments are freight until deposited, and accepted, as mail at the destination facility. The mailer may request use of a numbered PVDS band seal to secure mailer vehicles transporting plant-verified drop shipments.

2.4 Mail Separation and Presentation

Mailers must have Parcel Select mailings verified under an authorized PVDS system (see [705.15.0](#)) or eVS (see [705.2.9](#)), or they must present mailings for verification and acceptance at a BMEU located at a designated destination Postal Service facility. Mailers may deposit only PVDS and eVS mailings at a destination delivery unit not co-located with a Post Office or other Postal Service facility with a business mail entry unit. If authorized under [705.7.0](#), mailers may commingle Parcel Select with other approved parcel mail using eVS. Mailers presenting destination entry mailings to the Postal Service must meet the following requirements:

- a. Mark each DBMC, DSCF, or DDU Parcel Select piece as either “Parcel Post” or “Parcel Select,” according to [402.2.2](#). If eVS is used, include the marking “eVS” on each piece as described in [604.5.0](#).
- b. Separate DBMC mailings by zone for permit imprint mailings of identical-weight pieces that are not mailed using a special postage payment system under [705.2.0](#) through [705.4.0](#), or that are not mailed under [455.1.4](#).
- c. Ensure that all PVDS mailings are accompanied by a completed Form 8125, 8125-C, or 8125-CD. eVS mailings do not require these forms.
- d. Separate each mailing from other mailings for verification. For PVDS mailings and eVS mailings, separate mailings for deposit at different destination Postal Service facilities.
- e. Separate mail from freight transported on the same vehicle.
- f. If Periodicals mail is on the same vehicle as Parcel Select, load the Periodicals mail toward the tail of the vehicle.

2.5 BMC as Agent

The DBMC may verify and accept mail if authorized by Form 4410 to act as agent for the parent Post Office where the mailer's account or license is held.

2.6 Appointments

Appointments must be made for destination entry mail as follows:

456.2.7

- a. Except for local mailers, for mailings of perishable commodities ([601.9.0](#)) under [2.7, Exception to Scheduling Standard](#), appointments for deposit of destination entry mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one day in advance. Same day appointments may be granted by a control center on the basis of a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to thirty (30) calendar days prior to a desired appointment date. Mailers must comply with the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least a day in advance of a scheduled appointment time.
- b. Electronic appointments may be made by mailers/agents using a USPS-issued computer logon ID. Electronic appointments or cancellations must be made at least 12 hours prior to the desired time and date. All information required by the USPS appointment system regarding a mailing must be furnished.
- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, a mailer must notify the DDU at least a day in advance of a scheduled appointment. Recurring (standing) appointments will be allowed if shipment frequency is weekly or more often.

2.7 Exception to Scheduling Standard

Exceptions are as follows:

- a. The scheduling standard in [2.6, Appointments](#), does not apply when a mailer deposits mailings for verification and acceptance at the local Post Office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment system authorization. Under this exception, the mailer may claim the DBMC prices for mailings or portions of such mailings deposited at the local Post Office if the local Post Office is the DBMC/ASF or designated SCF that meets the application standards.
- b. Exceptions to the scheduling standard are made for shipments of products recognized by USPS as perishables under [601.9.0](#). While an appointment is not required for shipments of perishables, the destination facility must be notified at least 24 hours in advance of deposit to facilitate timely handling of the load.

2.8 Redirection by USPS

A mailer may be directed to transport destination entry mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints.

2.9 Advance Scheduling

Mailers must schedule appointments for deposit of destination entry mail under [2.6](#) and the conditions below. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared, and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type.

2.10 Deposit Conditions

Deposit of mail also is subject to these conditions:

- a. Destination facilities may refuse mailings that are unscheduled or late (i.e., if vehicles arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs and more than 20 minutes late at delivery units). If a mailing is refused, a mailer is permitted to make a new appointment.
- b. The BMC may approve drop and pick procedures only for Parcel Select mailers. The BMC specifies the time limit for vehicle retrieval.

2.11 Recurring Appointments

Recurring refers to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be comparable product in terms of size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule.

2.12 Vehicle Unloading

Unloading of destination entry mailings is subject to these conditions:

456.2.13

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. The driver must unload bedloaded shipments within 8 hours of arrival at BMCs, ASFs, and SCFs. Combination containerized and bedloaded drop shipment mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At destination delivery units (DDUs), drivers must unload all mail, whether bedloaded, sacked, or palletized (including boxes on pallets), within 1 hour of arrival. Unloading procedures are as follows:
 1. If pallets or pallet boxes are stacked, drivers must unload, unstrap, and unstack them.
 2. When drivers unload containerized mail, delivery unit employees may require drivers to place the containers together by 5-digit ZIP Codes or 5-digit schemes.
 3. When mail is not containerized or on pallets, drivers must place the mail into containers as delivery unit employees specify. Delivery unit employees may require drivers to place mail into containers to separate mail by 5-digit ZIP Codes or 5-digit schemes.
 4. At DDUs that cannot handle pallets, drivers must unload any mail from pallets and place it into containers as delivery unit employees specify.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except the dock and designated driver rest area.

2.13 Demurrage

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry mailings.

2.14 Appeals

Mailers who believe that they are denied equitable treatment may appeal to the manager, Customer Service (district), responsible for the destination postal facility.

2.15 Documentation

A postage statement must accompany each destination entry mailing. Any other documentation must be submitted as required by the standards for the price claimed or the postage payment method used.

2.16 Acceptance at Designated SCF-USPS Benefit

A mailing that is otherwise eligible for DBMC prices may be deposited, and accepted, at an SCF designated by the USPS when it benefits the USPS and:

- a. The mailing contains only machinable parcels prepared in 5-digit scheme and 5-digit sacks, pallets, or containers and nonmachinable parcels prepared under [2.1.1, Containers](#).
- b. All DBMC parcels are for delivery within the service area of the SCF at which they are deposited by the mailer.
- c. Postage on all parcels deposited at the SCF is computed using the zone chart for that postal facility.
- d. The marking required by [455.1.8, Parcel Select Markings](#), contains the correct information.
- e. The mailer is directed to deposit the mailing at that SCF by the district control center in whose area is located the BMC or ASF where the DBMC parcels would otherwise be deposited.

2.17 Acceptance at Designated SCF

Mailers may deposit parcels otherwise eligible for the DBMC prices at an SCF designated by the USPS for destination ZIP Codes listed in labeling list [L607](#). The following standards apply:

- a. Eligible machinable parcels are restricted to the ZIP Codes listed in [L607](#).
- b. Bound Printed Matter machinable parcels under [466.4.3](#) and Standard Mail parcels and NFMs under [705.6.3](#) may be included.
- c. Mailers must prepare parcels on 3-digit pallets or in 3-digit pallet boxes, or unload and physically separate the parcels into containers specified by the destination facility. Parcels are eligible for the applicable DBMC entry.
- d. All DBMC parcels must be for delivery within the service area of the SCF where they are deposited by the mailer.
- e. Postage on all parcels deposited at the SCF is computed using the zone chart for that postal facility.
- f. Parcels must contain the correct marking in [455.1.8, Parcel Select Markings](#).

Overview

- [1.0 Prices and Fees for Bound Printed Matter](#)
- [2.0 Basic Eligibility Standards for Bound Printed Matter](#)
- [3.0 Content Standards for Bound Printed Matter Parcels](#)
- [4.0 Price Eligibility for Bound Printed Matter Parcels](#)
- [5.0 Additional Eligibility Standards for Presorted and Carrier Route Bound Printed Matter Parcels](#)

1.0 Prices and Fees for Bound Printed Matter

1.1 Nonpresorted Bound Printed Matter

Apply the prices and discounts for nonpresorted Bound Printed Matter as follows:

1.1.1 Prices

Bound Printed Matter (BPM) prices are based on the weight of a single addressed piece or 1 pound, whichever is higher, and the zone to which the piece is addressed. The nonpresorted price applies to BPM not mailed at the Presorted or carrier route prices.

1.1.2 Price Application

The nonpresorted BPM price is charged per half-pound from 1 through 5 pounds, and per pound from more than 5 through 15 pounds. For pieces weighing 5 pounds or under, any fraction of a half-pound is considered a whole half-pound. For pieces weighing more than 5 but not more than 15 pounds, any fraction of a pound is considered a whole pound. For example, if a BPM item weighs 4.325 pounds, the weight (postage) increment is 4.5 pounds; if an item weighs 6.25 pounds, the weight (postage) increment is 7 pounds. The minimum postage price per piece is the 1-pound price.

1.1.3 Barcode Discount—Machinable Parcels

The barcoded discount applies only to BPM machinable parcels (see [401.1.5.1, Criteria](#)) that bear a correct, readable barcode under [708.5.0, Standards for Postal Routing Barcodes](#), for the ZIP Code of the delivery address. The pieces must be part of a nonpresorted price mailing of 50 or more BPM parcels.

1.1.4 Bound Printed Matter—Nonpresorted

For barcoded discount, deduct \$0.03 per parcel (machinable parcels only, 50-piece minimum).

463.1.1.5

Exhibit 1.1.4 Bound Printed Matter - Nonpresorted Prices

Weight Not Over (pounds) ¹	Zone						
	1 & 2	3	4	5	6	7	8
1.0	\$2.15	\$2.19	\$2.25	\$2.34	\$2.45	\$2.51	\$2.70
1.5	2.15	2.19	2.25	2.34	2.45	2.51	2.70
2.0	2.24	2.30	2.38	2.50	2.64	2.72	2.98
2.5	2.34	2.41	2.51	2.66	2.84	2.94	3.26
3.0	2.43	2.52	2.64	2.82	3.03	3.15	3.54
3.5	2.53	2.63	2.77	2.98	3.23	3.37	3.82
4.0	2.62	2.74	2.90	3.14	3.42	3.58	4.10
4.5	2.72	2.85	3.03	3.30	3.62	3.80	4.38
5.0	2.81	2.96	3.16	3.46	3.81	4.01	4.66
6.0	3.00	3.18	3.42	3.78	4.20	4.44	5.22
7.0	3.19	3.40	3.68	4.10	4.59	4.87	5.78
8.0	3.38	3.62	3.94	4.42	4.98	5.30	6.34
9.0	3.57	3.84	4.20	4.74	5.37	5.73	6.90
10.0	3.76	4.06	4.46	5.06	5.76	6.16	7.46
11.0	3.95	4.28	4.72	5.38	6.15	6.59	8.02
12.0	4.14	4.50	4.98	5.70	6.54	7.02	8.58
13.0	4.33	4.72	5.24	6.02	6.93	7.45	9.14
14.0	4.52	4.94	5.50	6.34	7.32	7.88	9.70
15.0	4.71	5.16	5.76	6.66	7.71	8.31	10.26

1. For barcode discount, deduct \$0.03 per piece (machinable parcels only, 50-piece minimum).

1.1.5 Computing Postage—Bound Printed Matter With Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable price per piece.

1.2 Commercial Bound Printed Matter

Apply the prices, fees and discounts for commercial Bound Printed Matter as follows:

1.2.1 Prices

Postage is based on the price that applies to the weight (postage) increment of each addressed piece.

1.2.2 Price Application

The Presorted Bound Printed Matter price has a per piece charge and a per pound charge. Postage is based on the price that applies to the weight (postage) increment of each addressed piece and on the zone to which the piece is addressed. The minimum postage price for an addressed piece is one unit of the per piece charge plus the per pound charge for an addressed piece weighing 1 pound.

1.2.3 Bound Printed Matter Presorted and Carrier Route Prices

Each piece is subject to both a piece price and a pound price. For the barcode discount on Presorted machinable parcels, deduct \$0.03 per piece.

1.2.4 Bound Printed Matter Destination Entry Prices

Each piece is subject to both a piece price and a pound price. For the barcode discount on machinable parcels, deduct \$0.03 per piece. The barcode discount is not available for parcels mailed at Presorted SCF or DDU prices.

Exhibit 1.2.4 Bound Printed Matter Presorted, Carrier Route, and Destination Entry Prices

Each piece is subject to both a piece price and a pound price. ¹		Carrier Route			Presorted ²		
		Price per piece	+	Price per pound	Price per piece	+	Price per pound
Zone	Local, 1&2	\$1.306	+	\$0.137	\$1.413	+	\$0.137
	3	1.306	+	0.170	1.413	+	0.170
	4	1.306	+	0.210	1.413	+	0.210
	5	1.306	+	0.269	1.413	+	0.269
	6	1.306	+	0.338	1.413	+	0.338
	7	1.306	+	0.381	1.413	+	0.381
	8	1.306	+	0.508	1.413	+	0.508
	Destination Entry						
DBMC	1&2	\$1.032	+	\$0.099	\$1.139	+	\$0.099
	3	1.032	+	0.127	1.139	+	0.127
	4	1.032	+	0.175	1.139	+	0.175
	5	1.032	+	0.234	1.139	+	0.234
DSCF		\$0.658	+	\$0.089	\$0.765	+	\$0.089
DDU		0.487	+	0.039	0.594	+	0.039

1. Multiply the number of pounds in the mailing by price per pound. Multiply the number of pieces in the mailing by price per piece. Add both totals.
2. Machinable presorted parcels may be eligible for barcode discount of \$0.03 per parcel (50-piece minimum), except for parcels mailed at presorted DDU or DSCF prices.

1.2.5 Destination Entry Mailing Fee

A destination entry mailing fee for BPM must be paid once each 12-month period at each Post Office of mailing by or for any person or organization that mails at the destination entry prices, except as provided otherwise for plant-verified drop shipments. All destination entry prices are covered under the payment of a single annual fee. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.2.6 Computing Postage for Permit Imprint

Presorted and Carrier Route Bound Printed Matter mailings paid with permit imprint are charged a per pound price and a per piece price as follows:

463.2.1

- a. Per pound price:
 1. *For pieces weighing 1 pound or less*, compute the per pound price by multiplying the total number of addressed pieces by the 1-pound price for the price category and zone. Do not round this result.
 2. *For pieces weighing more than 1 pound*, compute the per pound price by multiplying the unrounded total weight of the addressed pieces by the pound price for the category and zone. Do not round this result.
- b. Per piece price. Multiply the total number of addressed pieces by the applicable piece price.
- c. Total Postage. Calculate total postage by adding the total per piece calculation to the total per pound calculation. Round off the total postage to the nearest whole cent.

2.0 Basic Eligibility Standards for Bound Printed Matter

2.1 Service Objectives

The USPS does not guarantee the delivery of BPM within a specified time. BPM might receive deferred service. The local Post Office can provide more information concerning delivery times within its area.

2.2 Postal Inspection

BPM is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at BPM prices constitutes consent by the mailer to postal inspection of the contents.

2.3 Delivery and Return Addresses

All BPM mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under 602.3.0 may be used. Except for unendorsed BPM, each piece must bear the sender's return address.

3.0 Content Standards for Bound Printed Matter Parcels

3.1 Basic Content Standards

Bound Printed Matter (BPM) is a subclass of Package Services and must:

- a. Meet the basic standards in [2.0](#).
- b. Weigh no more than 15 pounds. Pieces might be subject to other minimum weights or dimensions based on the standards for specific prices.
- c. Consist of advertising, promotional, directory, or editorial material (or any combination of such material).
- d. Be securely bound by permanent fastenings such as staples, spiral binding, glue, or stitching. Loose-leaf binders and similar fastenings are not considered permanent.

- e. Consist of sheets of which at least 90% are imprinted by any process other than handwriting or typewriting with words, letters, characters, figures, or images (or any combination of them).
- f. Not have the nature of personal correspondence.
- g. Not be stationery, such as pads of blank printed forms.
- h. Consist of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (except as permitted under [2.2](#) or permitted or required under [707.7.9](#)).

3.2 Attachments or Enclosures of Periodicals Sample Copies

Sample copies of authorized and pending Periodicals publications may be enclosed or attached with merchandise sent at BPM prices. Postage at BPM prices is based on the combined weight of the host piece and the sample copies enclosed.

3.3 Attachments and Enclosures

3.3.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Bound Printed Matter piece or in an envelope marked “Invoice Enclosed” and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

3.3.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Bound Printed Matter piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Bound Printed Matter price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

3.3.3 Additional Enclosures

Bound Printed Matter may have the following additions and enclosures:

- a. Any printed matter mailable as Standard Mail.
- b. Nonprint attachments and enclosures. The combined weight of all nonprint attachments and enclosures in the mailpiece must be less than or equal to 25% of the weight of the BPM in the mailpiece. The individual cost of each nonprint attachment or enclosure must be less than or equal to the cost of a “low cost” item as defined in [703.1.6.11](#), *Products Mailable at Nonprofit Standard Mail*

463.3.4

Prices. In addition, the combined cost of all nonprint attachments and enclosures must not exceed two times the cost of a “low cost” item as defined in [703.1.6.11](#).

3.4 **Written Additions**

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by “From” or “To,” and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as “Do Not Open Until Christmas” and “Happy Birthday, Mother.”
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

4.0 Price Eligibility for Bound Printed Matter Parcels

4.1 **Price Eligibility**

BPM prices are based on the weight of a single addressed piece or 1 pound, whichever is higher, and the zone (where applicable) to which the piece is addressed. Price categories are as follows:

- a. **Nonpresorted Price.** The nonpresorted price applies to mailings of fewer than 300 pieces and to BPM not mailed at the Presorted or carrier route prices.
- b. **Presorted Price.** The Presorted price applies to BPM prepared in a mailing of at least 300 BPM pieces, prepared and presorted as specified in [465.5.0](#), [Preparing Presorted Parcels](#), [705.8.0](#), [Preparing Pallets](#), or [705.20.0](#), [Optional Combined Parcel Mailings](#).
- c. **Carrier Route Price.** The Carrier Route price applies to BPM prepared in a mailing of at least 300 pieces presorted to carrier routes, prepared and presorted as specified in [465.6.0](#), [Preparing Carrier Route Parcels](#), or [705.8.0](#), [Preparing Pallets](#).

- d. Barcoded Discount—Machinable Parcels. The barcoded discount applies only to BPM machinable parcels (see [401.1.5](#)) that bear a correct, readable barcode under [708.5.0, Standards for Postal Routing Barcodes](#), for the ZIP Code of the delivery address. The pieces must be part of a nonpresorted price mailing of 50 or more BPM parcels or part of a presort price mailing of at least 300 BPM parcels prepared under [465.5.0, Preparing Presorted Parcels](#), and [465.6.0, Preparing Carrier Route Parcels](#), and [705.8.0, Preparing Pallets](#). The barcoded discount is not available for parcels mailed at Presorted DDU or DSCF prices, or for Presorted DBMC price mailings entered at an ASF other than the Phoenix, AZ, ASF. Carrier route price mail is not eligible for the barcoded discount.

4.2 Nonidentical Weight Pieces

[9-11-08] Mailings may contain nonidentical-weight pieces only if Business Mailer Support (BMS) has authorized payment of postage by permit imprint under [705.2.0, Manifest Mailing System](#), [705.3.0, Optional Procedure Mailing System](#), or [705.4.0, Alternate Mailing System](#).

4.3 ZIP Code Accuracy

4.3.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, address means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain prices under [4.3.1d](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [4.3.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addressees used on pieces claiming the Bound Printed Matter Presort and carrier route prices, regardless of any required surcharges, must meet the ZIP Code accuracy standard.

4.3.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:

463.4.3.3

1. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
2. Any mailing list service in [507.7.0](#).
3. An authorized service provider.
4. CASS-certified matching software.
5. USPS Web site, www.usps.com.

4.3.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

5.0 Additional Eligibility Standards for Presorted and Carrier Route Bound Printed Matter Parcels

5.1 Basic Standards

In addition to the standards in [2.0](#) and [3.0](#), all pieces in a Bound Printed Matter mailing must:

- a. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
 1. The ZIP Code accuracy standard in [3.3](#).
 2. The carrier route accuracy standard in [5.2](#).
 3. If an alternative addressing format is used, the additional standards in [602.3.0](#).
 4. If pieces are prepared with detached address labels, the additional standards in [602.4.0](#).
- b. Meet the preparation standards under [465.5.0](#), *Preparing Presorted Parcels*, or [705.8.0](#), *Preparing Pallets*.

5.2 Carrier Route Accuracy

5.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming carrier route prices under [5.2.1d](#) that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [5.2.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.

- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and price is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming the Bound Printed Matter carrier route prices must meet the ZIP Code accuracy standard.

5.2.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, Address Information System Products](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).

5.2.3 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

464 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

1.0 Basic Standards for Postage Payment

1.1 Nonpresorted Bound Printed Matter

1.1.1 Payment Method

[9-11-08] The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage and fees for Bound Printed Matter must be paid by permit imprint, as defined in [604.5.0](#). Identical and nonidentical-weight permit imprint mailings may be mailed under [705, *Advanced Preparation and Special Postage Payment Systems*](#). Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Identical-weight pieces must be separated at acceptance into groups that contain pieces all subject to the same zone and same combination of prices (e.g., all are zone 4), unless mailed under [705.2.0](#) through [705.4.0](#).

1.1.2 Postage Paid with Permit Imprint

[9-11-08] The following standards apply for postage paid with permit imprint:

- a. Advance Deposit Account. A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees and must not be used to pay postage on any mailpiece that is designed for reply purposes.
- b. Minimum Quantity. Nonpresorted, non-discounted mailings are not subject to a minimum volume requirement.
- c. Postage Statement. A complete postage statement must accompany each mailing paid with permit imprint.

1.2 Commercial Bound Printed Matter

1.2.1 Postage Payment Options

[9-11-08] The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Bound Printed Matter must be paid by permit imprint only (see [604.5.0](#)). Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Identical-weight pieces must be separated at acceptance into groups that contain pieces all subject to the same zone and same combination of prices (e.g., all are zone 4, with a BMC entry discount and a barcoded discount), unless mailed under [705.2.0](#) through [705.4.0](#).

2.0 Mailing Documentation

2.1 **Completing Postage Statements**

[9-11-08] All mailings must be accompanied by a completed postage statement signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer to correct the postage statement accordingly and document the correction.

2.2 **Basic Documentation Standards**

[9-11-08] Documentation is required from a mailer when a mailing is presented to the USPS, and supporting documentation of postage is also required. Documentation describes the preparation, price levels, content of the mailing, and it details the volume and postage data. By comparison with the actual mailing, it describes and supports the claims contained on the postage statement that accompanies the mailing. It allows the USPS to validate the accuracy of the mailing. When specified, documentation must be submitted for the price claimed.

2.3 **Preparing Documentation**

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

2.4 **Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

2.5 **Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607](#).

2.6 **Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

2.7 **Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form

number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

465 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparing Presorted Parcels](#)
- [6.0 Preparing Carrier Route Parcels](#)
- [7.0 Standards for Barcode Discounts](#)

1.0 General Information for Mail Preparation

1.1 Basic Preparation—Nonpresorted

There are no presort, sacking, or labeling standards for nonpresorted price Bound Printed Matter.

1.2 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared.

1.3 Definition of Mailings

A mailing is a group of pieces within the same class of mail and, except for certain parcel prices, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.

1.4 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, Post Office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *5-digit scheme (pallets and sacks) for Bound Printer Matter parcels*: the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code ranges processed by the USPS as a single scheme, as shown in [L006](#).
- d. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).

- e. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- f. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- g. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- h. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.

1.5 Preparation Definitions and Instructions

[8-14-08] For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. A *5-digit scheme sort for Bound Printed Matter parcels* yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#) and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for price eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. An *origin 3-digit (or origin 3-digit scheme) tray/sack* contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray/sack must be prepared for each.
- e. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- f. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the

specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.

- g. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the Post Office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- h. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- i. A *bundle* is a group of addressed pieces secured together as a unit. Bundle preparation is described in 2.0.
- j. A “*logical presort destination*” represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Bound Printed Matter “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement.

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit. The term *bundle* does not apply to unsecured groups of pieces.

2.2 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye. This standard does not apply to the following:

- a. Bundles placed in or on 5-digit or 5-digit scheme (L001) sacks or pallets.
- b. Bundles placed in carrier route and 5-digit carrier routes sacks.
- c. Bundles of mailpieces at carrier route prices entered at a destination delivery unit (DDU).

2.3 Arranging Pieces in a Bundle (“Facing”)

Except as noted in 2.4, all pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.4 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

2.5 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment.

Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 - 1. Do not place any bands closer than 1 inch from any bundle edge.
 - 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 - 3. Do not use wire or metal banding.
 - 4. Do not use any loose banding.

- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

2.6 Bundle Sizes

Mailers must prepare unsacked, nonpalletized bundles of Presorted irregular parcels for DDU entry according to [2.8](#) and [5.2](#) for parcels weighing less than 10 pounds and [5.3](#) for parcels weighing 10 pounds or more. Mailers must prepare unsacked, nonpalletized bundles of carrier route irregular parcels for DDU entry according to [2.7](#) and [6.2](#) for parcels weighing less than 10 pounds and [6.3](#) for parcels weighing 10 pounds or more.

2.7 Additional Standards for Unsacked Bundles Entered at DDU Facilities

Mailers may enter unsacked, nonpalletized bundles of irregular parcels at destination delivery units (DDUs) if all of the following conditions are met:

- a. The maximum weight for a single bundle is 40 pounds; the maximum number of bundles per carrier route is one bundle for each 10 pounds (or increment) of mail for that route, as follows:
 1. Mailers must make the fewest number of bundles possible, up to the 40-pound maximum, while maintaining bundle integrity. To determine the maximum number of bundles allowable for a route, divide the total weight of mail for that route by 10 and round up to the next whole number. For example, if there are 34 pounds of mail for a carrier route, the maximum number of bundles for that route is four ($34 \div 10 = 3.4 = 4$ bundles).
 2. Mailers may balance the weight of the bundles across the maximum number of allowable bundles for a route. For example, if there are 36 pounds of mail for a carrier route, the maximum number of bundles for that route is four ($36 \div 10 = 3.6 = 4$ bundles), which may be in four 9-pound bundles.
- b. Mailers must prepare 5-digit bundles for entry at DDUs according to standards in [6.2.1](#).
- c. Mailers must prepare bundles to comply with other applicable standards in [2.0](#).
- d. Mailers must enter bundles at DDUs according to standards in [466.6.0](#).

2.8 Pieces With Simplified Addresses

For mail prepared with a simplified address, all pieces for the same Post Office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, Post Office boxholder). Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets, and for Bound Printed Matter in sacks, specific weight limits in [5.0](#), [Preparing Presorted Parcels](#), and [6.0](#), [Preparing Carrier Route Parcels](#).

465.2.9

2.9 Labeling Bundles

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X.

2.10 Use of Carrier Route Information Lines

Bundles for individual carrier routes, rural routes, highway contract routes, Post Office box sections, or general delivery units must be prepared with facing slips under [705.8.0, *Preparing Pallets*](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Carrier Route Bound Printed Matter mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level.

2.11 Facing Slips—All Carrier Route Mail

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “BPM IRR P CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin Post Office.

3.0 Sacks

3.1 Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds.

4.0 Sack Labels

4.1 Basic Standards

Sack labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.
- b. Use 2-inch labels for sacks with 2-inch label holder pockets.

- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.

4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- c. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- d. Height (perpendicular to printing):
 - 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.
 - 2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards.

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

CONTENT TYPE	CODE
Carrier Route	C (type of route)
Carrier Routes	CR-RT or CR-RTS
Digit	D
General Delivery Unit	G
Highway Contract Route	H
Irregular Parcels	IRREG
Machinable	MACH
Mixed	MXD
Nonbarcoded	NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0)
Package Services	PSVC
Parcels	PARCELS
Post Office Box Section	B
Rural Route	R
Scheme	SCH
Working	WKG

4.5 Line 3 (Origin Line)

Line 3 (origin line showing office of mailing or mailer information) must be the bottom line of required information unless the sack contains mail manifested using the Electronic Verification System (eVS) (see [4.6](#) for eVS labeling information). Line 3 must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

4.6 Electronic Verification System

All sacks containing parcels prepared and identified using the Electronic Verification System (eVS) under [705.2.9](#) must show "eVS" (or the alternatives "EVS" or "E-VS") directly below Line 3 using the same size and lettering used for Line 3. As an option, "eVS" may be placed as the first element on Line 3.

4.7 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.8 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).

- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

5.0 Preparing Presorted Parcels

5.1 Basic Standards

5.1.1 General Preparation Requirements

All mailings of Presorted Bound Printed Matter (BPM) are subject to these general standards:

- a. Each mailing must meet the applicable eligibility standards in [402.2.0](#), [Placement and Content of Markings](#), [463](#), [Prices and Eligibility](#), [465](#), [Mail Preparation](#), and [466](#), [Enter and Deposit](#),
- b. All pieces in a mailing must be within the same processing category as described in [401.1.1](#). A BPM irregular parcel is a piece that is not a machinable parcel as defined in [401.1.5.1](#). Irregular parcels also are pieces that meet the size and weight standards for a machinable parcel but are not individually boxed or packaged to withstand processing on BMC parcel sorters under [601.7.0](#).
- c. All pieces must be sorted to the finest extent possible under [5.2](#), [Preparing Irregular Parcels Weighing Less Than 10 Pounds](#), and [5.3](#), [Preparing Irregular Parcels Weighing 10 Pounds or More](#), or palletized under [705.8.0](#).
- d. Subject to [402.2.0](#), pieces must be marked “Bound Printed Matter” (or “BPM”) and “Presorted” (or “PRSRT”).

5.1.2 Separation

[9-11-08] Pieces for each zone must be sacked separately. When presented for verification, sacks must be separated by zone. Exception: Pieces for different zones may be sacked together, and the sacks do not have to be separated by zone for verification if the mailing is prepared under [705.2.0](#), [Manifest Mailing System](#), [705.3.0](#), [Optional Procedure Mailing System](#), [705.4.0](#), [Alternate Mailing System](#), or [5.1.3](#), [Commingling Zones](#).

5.1.3 Commingling Zones

[9-11-08] Subject to this section, when zoned BPM is presented as individual pieces, the mailing must be separated by zone. Nonidentical-weight pieces may not be commingled unless authorized by the BMS manager. The mail must be prepared and documented:

- a. A unique number is assigned to each pallet in the mailing and printed on a separate line at the top of the pallet label (above the Line 1 information).
- b. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to the pallets in the mailing, that shows the Post Office where the mail is to be entered (entry Post Office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement, the name and address of the mailer, the permit number, the date of mailing, individual line entries for each pallet, and the total number of pieces to each zone in the entire mailing or mailing segment. Line entries for pallets containing mail for only one zone must show the pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the pallet. Entries for pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the pallet. Mailings are not accepted if there are discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage.

5.2 Preparing Irregular Parcels Weighing Less Than 10 Pounds

5.2.1 Required Bundling

Bundling is required before sacking, except for pieces placed in 5-digit scheme and 5-digit sacks when such pieces are enclosed in an envelope, full-length sleeve, full-length wrapper, or polybag and the minimum bundle size is met. Otherwise, a bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces or 10 pounds, whichever occurs first. Smaller volumes are not permitted (except mixed ADC bundles). The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles placed in 5-digit scheme and 5-digit sacks or prepared for and entered at DDU prices may weigh a maximum of 40 pounds each. Each physical bundle must contain at least two addressed pieces (except mixed ADC bundles). Bundling also is subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 10-piece minimum; those that weigh more than 1 pound must be prepared using the 10-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies), or bundle by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows the number of pieces and their total weight.
- c. Mailers must note on the postage statement whether they applied the piece count, weight, or both, except for eVS mailings prepared under [705.2.9](#).

5.2.2 Bundling and Labeling

Preparation sequence and labeling:

- a. 5-digit (required); red Label 5 or optional endorsement line (OEL).

- b. 3-digit (required); green Label 3 or OEL.
- c. ADC (required); pink Label A or OEL.
- d. Mixed ADC (required); tan Label X or OEL.

5.2.3 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches either 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted (except mixed ADC sacks). Optional SCF sacks may be prepared only when there are at least 10 addressed pieces or 20 pounds, whichever occurs first. Sacking is not required for 5-digit bundles when prepared for and entered at DDU prices. Such bundles may be bedloaded and may weigh up to 40 pounds. Sacking also is subject to these conditions:

- a. Identical-weight pieces weighing 2 pounds or less must be prepared using the 10-piece minimum, those that weigh more must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies). Alternatively, sack by the actual piece count or mail weight for each bundle destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement whether they applied the piece count or weight except for eVS mailings prepared under [705.2.9](#).

5.2.4 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit/scheme (required); labeling:
 - 1. Line 1: For 5-digit scheme sacks, use [L006](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.4](#) for overseas military mail).
 - 2. Line 2: For 5-digit scheme sacks, "PSVC IRREG 5D SCH." For 5-digit sacks, "PSVC IRREG 5D."
- b. 3-digit (required); labeling:
 - 1. Line 1: [L002](#), Column A.
 - 2. Line 2: "PSVC IRREG 3D."
- c. SCF (optional); labeling:
 - 1. Line 1: [L005](#), Column B.
 - 2. Line 2: "PSVC IRREG SCF."
- d. ADC (required); labeling:
 - 1. Line 1: [L004](#), Column B.
 - 2. Line 2: "PSVC IRREG ADC."

- e. Mixed ADC (required); labeling:
 - 1. Line 1: [L009](#), Column B. If placed on an ASF or BMC pallet under option in [705.8.10.2](#), use [L010](#).
 - 2. Line 2: "PSVC IRREG WKG."

5.3 Preparing Irregular Parcels Weighing 10 Pounds or More

5.3.1 Piece Preparation

Each piece must be enclosed in an envelope, full-length sleeve, full-length wrapper, or polybag. Bundling is not permitted for pieces weighing 10 pounds or more except under [5.3.2, Required Sacking](#).

5.3.2 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 20 pounds. Smaller volumes are not permitted (except mixed ADC sacks). Optional 5-digit scheme and optional SCF sacks may be prepared only when there are at least 20 pounds. Smaller volumes are not permitted. Sacking is not required for 5-digit bundles when prepared for and entered at DDU prices. Such bundles may be bedloaded and may weigh up to 40 pounds.

5.3.3 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit/scheme (required); labeling:
 - 1. Line 1: For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.4](#) for overseas military mail).
 - 2. Line 2: For 5-digit scheme sacks, "PSVC IRREG 5D SCH." For 5-digit sacks, "PSVC IRREG 5D."
- b. 3-digit (required); labeling:
 - 1. Line 1: [L002](#), Column A.
 - 2. Line 2: "PSVC IRREG 3D."
- c. SCF (optional); labeling:
 - 1. Line 1: [L005](#), Column B.
 - 2. Line 2: "PSVC IRREG SCF."
- d. ADC (required); labeling:
 - 1. Line 1: [L004](#), Column B.
 - 2. Line 2: "PSVC IRREG ADC."
- e. Mixed ADC (required); labeling:
 - 1. Line 1: [L009](#), Column B. If placed on an ASF or BMC pallet under option in [705.8.10.2](#), use [L010](#).
 - 2. Line 2: "PSVC IRREG WKG."

5.4 Preparing Machinable Parcels Not Claiming DBMC Prices

5.4.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches either 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted (except origin (mixed) BMC sacks). Optional 5-digit scheme sacks may be prepared only when there are at least 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted. Sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies) or sack by the actual piece count or mail weight for each bundle destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement whether they applied the piece count or weight except for eVS mailings prepared under [705.2.9](#).

5.4.2 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit/scheme (required); labeling:
 1. Line 1: For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.4](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, "PSVC MACH 5D SCH." For 5-digit sacks, "PSVC MACH 5D."
- b. BMC (required); labeling:
 1. Line 1: [L601](#), Column B.
 2. Line 2: "PSVC MACH BMC."
- c. Mixed BMC (required); labeling:
 1. Line 1: "MXD" followed by the [L601](#), Column B, information for the BMC serving the 3-digit ZIP Code prefix of entry Post Office.
 2. Line 2: "PSVC MACH WKG."

5.5 Preparing Machinable Parcels Claiming DBMC Prices

5.5.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches either 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted (except origin (mixed) BMC sacks). Optional 5-digit scheme and optional ASF sacks may be prepared only when there are at least 10

465.5.5.2

addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted. See [466.4.0](#) for DBMC price eligibility. Sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies) or sack by the actual piece count or mail weight for each sack destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement whether they applied the piece count or weight except for eVS mailings prepared under [705.2.9](#).

5.5.2 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit/scheme (required); labeling:
 1. Line 1: For 5-digit scheme sacks, use [L006](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.4](#) for overseas military mail).
 2. Line 2: "PSVC MACH 5D SCHEME" or "PSVC MACH 5D SCH."
- b. ASF (optional, allowed only for mail deposited at an ASF to claim DBMC price); labeling:
 1. Line 1: [L602](#), Column B. DBMC price eligibility determined by [466.4.0](#), *Destination Bulk Mail Center (DBMC) Entry*, and [Exhibit 466.4.4](#), *BMC/ASF—DBMC Price Eligibility*.
 2. Line 2: "PSVC MACH ASF."
- c. BMC (required); labeling:
 1. Line 1: [L601](#), Column B. DBMC price eligibility determined by [466.4.0](#), *Destination Bulk Mail Center (DBMC) Entry*, and [Exhibit 466.4.4](#), *BMC/ASF—DBMC Price Eligibility*.
 2. Line 2: "PSVC MACH BMC."
- d. Mixed BMC (required); labeling:
 1. Line 1: "MXD" followed by the [L601](#), Column B information for the BMC serving the 3-digit ZIP Code prefix of entry Post Office.
 2. Line 2: "PSVC MACH WKG."

6.0 Preparing Carrier Route Parcels

6.1 Basic Standards

6.1.1 General Standards for Carrier Route Preparation

All mailings of Carrier Route Bound Printed Matter (BPM) are subject to the standards in 6.2 through 6.4 in *Preparing Carrier Route Parcels* and to these general standards:

- a. Each mailing must meet the applicable eligibility standards in 463, mail preparation standards in 2.0, through 4.0, and deposit and entry standards in 466.
- b. All pieces in a mailing must be within the same processing category as described in 401.1.0. A BPM irregular parcel is a piece that is not a machinable parcel as defined in 401.1.5.1. Irregular parcels also are pieces that meet the size and weight standards for a machinable parcel but are not individually boxed or packaged to withstand processing on BMC parcel sorters under 601.7.0.
- c. All pieces must be sorted to the finest extent possible under 6.0, *Preparing Carrier Route Parcels*, or palletized under 705.8.0, *Preparing Pallets*.
- d. Subject to 402.2.0, pieces must be marked “Bound Printed Matter” (or “BPM”) and “Carrier Route Presort” (or “CAR-RT SORT”).

6.1.2 Separation

[9-11-08] Pieces for each zone must be sacked separately. When presented for verification, sacks must be separated by zone. Exception: Pieces for different zones may be sacked together, and the sacks do not have to be separated by zone for verification if the mailing is prepared under 705.2.0, *Manifest Mailing System*, 705.3.0, *Optional Procedure Mailing System*, 705.4.0, *Alternate Mailing System*, or 6.1.3, *Commingling Zones*.

6.1.3 Commingling Zones

[9-11-08] Subject to this section, when zoned BPM is presented as individual pieces, the mailing must be separated by zone. Nonidentical-weight pieces may not be commingled unless authorized by the BMS manager. The mail must be prepared and documented:

- a. A unique number is assigned to each pallet in the mailing and printed on a separate line at the top of the pallet label (above the Line 1 information).
- b. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to the pallets in the mailing, that shows the Post Office where the mail is to be entered (entry Post Office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement, the name and address of the mailer, the permit number (if applicable), the date of mailing, individual line entries for each pallet, and the total number of pieces to each zone and in the entire mailing or mailing segment. Line entries for pallets containing mail for only one zone must show the pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the pallet. Entries for pallets

containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the pallet. Mailings are not accepted if there are discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage.

6.1.4 Residual Pieces

Residual pieces not sorted under 6.2 and 6.3 may be prepared as a Presorted Bound Printed Matter mailing under 5.0, *Preparing Presorted Parcels*, provided that they are part of the same mailing job and reported on the same postage statement. Residual pieces paid at the Presorted price do not need to meet a separate 300 piece minimum. These pieces must be separated from the Carrier Route portion when presented to the USPS for verification.

6.2 Preparing Irregular Parcels Weighing Less Than 10 Pounds

6.2.1 Bundle Preparation

Bundling is not required in direct carrier route sacks. Otherwise, a carrier route bundle (or bundles) must be prepared when the quantity of addressed pieces for a carrier route reaches a minimum of 10 pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted. The maximum weight of each physical bundle is 40 pounds. Each bundle must contain at least two addressed pieces except for the last bundle for each carrier route destination under 2.0. Bundles must be labeled with a facing slip unless the bundle is labeled using a carrier route information line (708.6.0) or an optional endorsement line (708.7.0). Bundling also is subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies), or bundle by the actual piece count or mail weight for each bundle destination, provided that documentation can be provided with the mailing that shows (specifically for each bundle) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count, weight, or both.

6.2.2 Required Sacking

Mailers may prepare irregular parcels as unsacked bundles under 2.7 or in bundles on pallets. Otherwise, mailers must prepare a direct carrier route sack when the quantity of mail for an individual carrier route reaches either 10 addressed pieces or 20 pounds, whichever occurs first; smaller volumes are not permitted. Mailers then must place remaining bundles in 5-digit scheme carrier routes sacks or 5-digit carrier routes sacks, which have no minimum sack size. Carrier route sacks also are subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies), or sack by the actual piece count or mail weight for each sack destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight.

6.2.3 Sack Preparation

Sack preparation sequence and Line 1 labeling:

- a. Carrier route: required; for Line 1, use city, state, and 5-digit ZIP Code on mail (see 4.3 for overseas military mail).
- b. 5-digit scheme carrier routes: optional (no minimum); for Line 1, use L606, Column B.
- c. 5-digit carrier routes: required (no minimum); for Line 1, use city, state, and 5-digit ZIP Code destination of bundles (for military mail, the ZIP Code is preceded by the prefixes under 4.3).

6.2.4 Sack Label Line 2

Line 2 information:

- a. Carrier route: "PSVC IRREG CR," followed by the route type and number.
- b. 5-digit scheme carrier routes: "PSVC IRREG CR-RTS SCH."
- c. 5-digit carrier routes: "PSVC IRREG CR-RTS."

6.3 Preparing Irregular Parcels Weighing 10 Pounds or More

Mailers may prepare irregular parcels as unsacked bundles under 2.6 or in bundles on pallets. When preparing irregular parcels in sacks, place parcels only in direct carrier route sacks. Each carrier route sack must contain a minimum of 20 pounds. Required preparation:

- a. Line 1: use city, state, and 5-digit ZIP Code destination of the pieces.
- b. Line 2: "PSVC IRREG CR," followed by the route type and number.

6.4 Preparing Machinable Parcels

6.4.1 Required Carrier Route Sacking

Machinable parcels may be prepared only in direct carrier route sacks. Each carrier route sack must contain a minimum of 10 addressed pieces or 20 pounds, whichever occurs first. Carrier route sacks also are subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.

465.6.4.2

- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies), or sack by the actual piece count or mail weight for each sack destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight.

6.4.2 Sack Label

Required preparation:

- a. Line 1: Use city, state, and 5-digit ZIP Code destination of the pieces.
- b. Line 2: "PSVC MACH CR," followed by the route type and number.

7.0 Standards for Barcode Discounts

7.1 Standards for Barcoded Mail

The barcode discount applies only to BPM machinable parcels (see [401.1.5.1](#)) that bear a correct, readable barcode under [708.5.0](#) for the ZIP Code of the delivery address. The pieces must be part of a nonpresorted price mailing of 50 or more BPM parcels or part of a presorted price mailing of at least 300 BPM parcels prepared under [5.0](#) or [6.0](#), and [705.8.0](#), *Preparing Pallets*. The barcode discount is not available for parcels mailed at the carrier route prices; or under [466.4.2](#), *Acceptance at Designated SCF—Mailer Benefit*; or at the DSCF or DDU prices; or for DBMC price mailings entered at an ASF. An exception is that properly prepared machinable pieces of DBMC price mail entered at the Phoenix, AZ, ASF may claim the barcode discount because that facility uses barcode scanning equipment.

466 Enter and Deposit

Overview

- [1.0 Deposit of Nonpresorted Bound Printed Matter](#)
- [2.0 Presenting a Mailing](#)
- [3.0 Destination Entry](#)
- [4.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [5.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [6.0 Destination Delivery Unit \(DDU\) Entry](#)

1.0 Deposit of Nonpresorted Bound Printed Matter

1.1 Nonpresorted Mailings

[9-11-08] Nonpresorted Bound Printed Matter postage must be paid via permit imprint and be deposited and accepted at the Post Office that issued the permit, at a time and place designated by the postmaster, except as otherwise provided for plant-verified drop shipments under [604.5.0](#).

2.0 Presenting a Mailing

2.1 Verification and Entry—Presorted, Carrier Route, Destination Entry, and Barcoded Mailings

[9-11-08] All presorted, carrier route, destination entry, and barcoded commercial mailings must be presented for verification and acceptance at the Post Office where the permit is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-verified drop shipment (PVDS) mailings must be presented for verification, acceptance, and entry under [705.15.0](#). Plant-loaded mailings must be presented as specified by the applicable standards and the plant-load agreement.

2.2 Verification and Entry—Nonpresorted Mailings

[9-11-08] Nonpresorted Bound Printed Matter is not accepted at retail counters, in collection boxes, or by carriers. Mailers must deposit nonpresorted Bound Printed Matter only at the Post Office where the permit is held at the time and place specified by the postmaster at the office of mailing (see [604.5.0](#)).

2.3 Office of Mailing

Bound Printed Matter must be mailed at the Post Office from which the zone price postage was computed, except under [2.4](#) and [2.5](#).

2.4 Redirected Mailings

A mailer who presents large mailings of Bound Printed Matter may be authorized or directed to deposit such mailings at another postal facility when processing or logistics make such an alternative desirable for the USPS, subject to these conditions:

466.2.5

- a. Zoned postage need not be recomputed if both the original Post Office of mailing and the alternative facility use the same zone chart for computing zoned postage, based on the 3-digit prefix of their ZIP Codes.
- b. Postage *must* be recomputed on pieces in mailings redirected to a postal facility that uses a different zone chart for computing zoned postage.

2.5 BMC Acceptance

[9-11-08] A mailer may present zoned Bound Printed Matter at a BMC for acceptance if:

- a. Permit imprint postage is paid through an advance deposit account at the BMC parent Post Office or another Post Office in the BMC service area, unless otherwise permitted by standard.
- b. Zoned postage is computed from the BMC parent Post Office.
- c. The BMC is authorized by Form 4410 to act as acceptance agent for the entry Post Office.

2.6 Drop Shipment Information

Essential information for entering drop shipment Package Services mailings at specific postal facilities can be found in the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#)).

3.0 Destination Entry

3.1 General

Destination entry prices apply to Presorted and Carrier Route Bound Printed Matter (BPM) that is deposited at a destination bulk mail center (DBMC), destination sectional center facility (DSCF), or destination delivery unit (DDU) as specified below. Eligibility for a destination entry price is determined by the sort level, processing category of the mail, and the type of container the mail is in (sack or pallet). Each piece can claim only one destination entry price; an individual pallet may contain pieces claimed at different destination entry prices.

3.2 Minimum Volume

A destination entry price BPM mailing is subject to these minimum volume requirements:

- a. Each mailing must contain at least 300 Presorted addressed pieces or 300 Carrier Route addressed pieces.
- b. Except as provided in [3.2e](#), each group of pieces prepared for deposit at different destination entry Post Offices must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by the appropriate Form 3605 postage statement.
- c. Separate Presorted and Carrier Route mailings may be copalletized under [705.8.0](#).

- d. Pieces deposited at the same destination entry Post Office but claimed at different destination entry prices may be included in a single mailing and reported on the same postage statement (subject to one minimum volume requirement) if the destination entry Post Office is the proper facility for claiming each of the destination entry prices.
- e. When Presorted or Carrier Route mailings are presented together under the plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from a single presort file (i.e., mailing job) for all line items to all destinations reported on a single Form 3605 and accompanied by a postage statement register to meet the separate 300-piece minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 300 pieces for a Presorted or Carrier Route mailing entered at a single destination entry Post Office if there is a total of at least 300 Presorted price pieces and/or 300 Carrier Route pieces for all entry points combined for the single presort file listed on Form 3605 and the postage statement register.
- f. When Bound Printed Matter presorted mailings are presented together under the Electronic Verification System (eVS), a mailer may use the total piece count for all line items to all destinations reported within the 24-hour mailing period defined in [705.2.9](#). Under this alternative, a mailer may enter fewer than 300 pieces for a presorted mailing at a single destination entry facility if there is at least 300 presorted price pieces for all entry points within the 24-hour mailing period.

3.3 Postage Payment

[9-11-08] Postage payment for Bound Printed Matter destination price mailings is subject to the same standards that apply generally to Bound Printed Matter and to the following:

- a. Mailers must pay postage and correct mailing fees at each Post Office where they are authorized to present mailings for verification unless using the Electronic Verification System (eVS) under [705.2.9](#). Except for plant-verified drop shipments (see [705.15.0](#)) and eVS shipments (see [705.2.9](#)); mailers must have a permit imprint authorization at the parent Post Office for mailings deposited for entry at a DBMC, ASF, DSCF, or DDU. Correct mailing fees must be paid for the current 12-month period at the USPS facility where postage is paid for the mailing.
- b. Mailers who mail parcels paid with a permit imprint and claimed at Bound Printed Matter destination entry prices may use eVS under [705.2.9](#). Mailers using eVS must pay postage and fees at the Post Office where they hold the permit used for all eVS mailings.

3.4 Mailing Fee

A destination entry mailing fee ([463.1.2.5](#)) must be paid once each 12-month period at each postal facility where the mailing(s) are verified. For mail manifested using eVS under [705.2.9](#), only one annual destination entry mailing fee, paid at the Post Office where the eVS permit imprint account is held, is required regardless of the number of Postal Service facilities where mailings are verified. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment.

466.3.5

3.5 Documentation

Each mailing must be accompanied by the appropriate Form 3605 and, if applicable, Form 8125. No additional documentation is required for destination entry prices.

3.6 Plant Loads

Plant load mailings, including expedited plant load shipments, are not eligible for destination entry prices.

3.7 Mailings of Unsacked Bundles

Mailers may present unsacked, nonpalletized bundles of BPM irregular parcels that are properly prepared for and entered at DDU prices and unloaded according to standards in [3.9.9](#). Pieces in these bundles are not eligible for barcode discounts.

3.8 Verification

3.8.1 Place

As directed by the postmaster, the mailer must present destination entry mailings to USPS employees for verification:

- a. At the origin mailer's plant or the origin Post Office serving the mailer's plant under an authorized plant-verified drop shipment system under [705.15.0](#) or, when required by class of mail, price category, or other reasons determined by the Postal Service, Electronic Verification System (eVS) under [705.2.9](#).
- b. At the destination Post Office or business mail entry unit.
- c. At the destination entry Postal Service facility for eVS mailings under [705.2.9](#).

3.8.2 Mail Separation and Presentation

Mailers must have Bound Printed Matter destination entry price mailings verified under a PVDS system (see [705.15.0](#)) or use eVS (see [705.2.9](#)), or they must present mailings for verification and acceptance at a BMEU located at a designated destination Postal Service facility. Mailers may deposit only PVDS and eVS mailings at a destination delivery unit not co-located with a Post Office or other Postal Service facility with a business mail entry unit. If authorized under [705.7.0](#), mailers may commingle Bound Printed Matter parcels with other approved parcel mail using eVS. Mailers presenting destination entry mailings to the Postal Service must meet the following requirements:

- a. Mark each destination entry price piece according to [402.2.2](#). If eVS is used, include the marking "eVS" on each piece as required by [604.5.0](#).
- b. Separate DBMC price mailings by zone for permit imprint mailings of identical-weight pieces that are not mailed using a special postage payment system under [705.2.0](#) through [705.4.0](#), or that are not mailed under [465.1.5](#).
- c. Ensure that all PVDS mailings are accompanied by a completed Form 8125, 8125-C, or 8125-CD. eVS mailings do not require these forms.
- d. Separate each mailing from other mailings for verification. For PVDS mailings and eVS mailings, separate mailings for deposit at different destination Postal Service facilities.
- e. Separate mail from freight transported on the same vehicle.

- f. If Periodicals mail is on the same vehicle, load the Periodicals mail toward the tail of the vehicle.

3.8.3 Form 8125

When mailings are verified and paid for at a postal facility different from the one at which they are accepted as mail and deposited into the mailstream, the mailer must ensure that they are accompanied by a Form 8125 completed by the mailer and the verifying Post Office.

3.8.4 At BMC

For a mailing to be verified at a BMC, the Post Office where the mailer's account or license is held must be within the service area of that BMC. The Post Office must authorize the BMC to act as its agent by sending Form 4410 to the BMC.

3.8.5 PVDS Seal

The mailer may ask that a PVDS band seal secure the vehicle containing verified mailings before dispatch to the destination facility.

3.8.6 Mailer Transport

The mailer must transport the PVDS mailing from the place where it was verified to the destination postal facility.

3.8.7 Volume Standards

Except as permitted for a local mailer under [3.9.12](#), destination entry mailings are subject to these volume standards:

- a. Regardless of total volume, the pieces for which a destination price is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, mailer is the party presenting the material to the USPS (or for whom a transportation company has presented the material to the USPS).
- b. The same mailer may not in a 24-hour period present for verification and acceptance more than four destination price mailings at the same destination postal facility (or at another acting as its agent). The mailer may ask for a waiver of this limit when scheduling the deposit of the mailings. There is no maximum for plant-verified drop shipments.

3.9 Deposit

3.9.1 Time and Location of Deposit

Each mailing claimed at a destination price must be deposited at the time and location specified by the USPS. Mailings must be presented in vehicles that are compatible with dock, yard, and DDU operations, as applicable.

3.9.2 Freight

Drop shipments are freight until deposited and accepted as mail at the destination facility.

3.9.3 Appointments

Appointments must be made for destination entry price mail as follows:

466.3.9.4

- a. Except for a local mailer under [3.9.12](#) and mailings of perishable commodities, appointments for deposit of destination entry price mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.
- b. Electronic appointments may be made through the Dropship Appointment System (DSAS) by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancellations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.
- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often.
- d. When Periodicals are transported together with BPM as a mixed load ([707.29.0, Destination Entry](#)), an appointment must be obtained for deposit at a destination entry facility.

3.9.4 Advance Scheduling

Mailers must schedule appointments for deposit of destination entry price mail under [3.9.3](#) and the conditions below. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type.

3.9.5 Adherence to Schedule

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units.

3.9.6 Redirection by USPS

A mailer may be directed to transport destination entry price mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints.

3.9.7 Redirection at Mailer's Request

For service reasons, a mailer may ask to transport destination SCF price mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF price in this situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF.

3.9.8 Recurring Appointments

Recurring appointments refer to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule.

3.9.9 Vehicle Unloading

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.

466.3.9.10

- b. At BMCs and ASFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At destination delivery units (DDUs), drivers must unload all mail within 1 hour of arrival. Unloading procedures are as follows:
 1. If pallets or pallet boxes are stacked, drivers must unload, unstrap, and unstack them.
 2. At DDUs that cannot handle pallets, drivers must unload any mail from pallets and place it into containers as delivery unit employees specify.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area.

3.9.10 Demurrage

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry price mailings.

3.9.11 Appeals

Mailers who believe they are denied equitable treatment may appeal to the manager, Customer Service (district), responsible for the destination postal facility.

3.9.12 Exception for Local Mailer

The restrictions in [3.8.7, Volume Standards](#), and [3.9.3, Appointments](#), do not apply when a mailer deposits mailings for verification and acceptance at the local Post Office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment authorization. Under this exception, the mailer may claim the destination entry prices for mailings or portions of mailings deposited at the local Post Office that meet the standards in [4.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [5.0, Destination Sectional Center Facility \(DSCF\) Entry](#), or [6.0, Destination Delivery Unit \(DDU\) Entry](#).

4.0 Destination Bulk Mail Center (DBMC) Entry

4.1 Eligibility

Pieces in a mailing meeting the standards in [3.0, Destination Entry](#), and [4.0](#) are eligible for the DBMC price when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route prices, subject to the corresponding standards for those prices.
- b. Are deposited at a BMC or ASF.
- c. Are addressed for delivery to one of the 3-digit ZIP Codes served by the BMC or ASF where deposited that are listed in [Exhibit 4.4](#).

- d. Are placed in a sack or pallet that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within that BMC's or ASF's service area (see [Exhibit 4.4](#)).
- e. Are entered at designated SCFs under [4.2](#).

4.2 Acceptance at Designated SCF – Mailer Benefit

Mailers may deposit machinable parcels otherwise eligible for the DBMC prices at an SCF designated by the USPS for destination ZIP Codes listed in labeling list [L607](#). The following standards apply:

- a. The parcels are prepared as, or part of, a mailing of at least 300 presorted pieces.
- b. Eligible machinable parcels are restricted to the ZIP Codes listed in [L607](#).
- c. Parcel Select machinable parcels under [456.2.6](#) and Standard Mail parcels and NFM's under [705.6.3](#) may be included.
- d. Mailers must prepare parcels on 3-digit pallets or in 3-digit pallet boxes, or unload and physically separate the parcels into containers specified by the destination facility. Parcels are eligible for the applicable DBMC entry price.
- e. All DBMC price parcels must be for delivery within the service area of the SCF where they are deposited by the mailer.
- f. Postage on all parcels deposited at the SCF is computed using the zone chart for that postal facility.
- g. Parcels must contain the correct marking in [402.2.2, Parcel Select, Bound Printed Matter, Media Mail, and Library Mail Markings](#).

4.3 Presorted Machinable Parcels

Presorted machinable parcels in sacks or on pallets at all sort levels may claim DBMC prices. Machinable parcels sacked under [465.5.0, Preparing Presorted Parcels](#), or palletized under [705.8.0](#) may be sorted to destination BMCs under [L601](#) or to destination BMCs and ASFs under [L601](#) and [L602](#). Except as provided in [Exhibit 4.4](#), sortation of machinable parcels to ASFs is optional but is required for the ASF mail to be eligible for DBMC prices. Mailers may opt to sort some or all machinable parcels for ASF service area ZIP Codes to ASFs only when the mail will be deposited at the respective ASFs where the DBMC prices are claimed, under applicable volume standards, using [L602](#). Mailers also may opt to sort machinable parcels only to destination BMCs under [L601](#). When machinable parcels are sorted under [L601](#), only mail for 3-digit ZIP Codes served by a BMC as listed in [Exhibit 4.4](#) is eligible for DBMC prices (i.e., mail for 3-digit ZIP Codes served by an ASF in [Exhibit 4.4](#) is *not* eligible for DBMC prices, nor are 3-digit ZIP Codes that do not appear on [Exhibit 4.4](#)). Machinable parcels prepared in mixed BMC sacks or on mixed BMC pallets that are sorted to the origin BMC under [465.5.0, Preparing Presorted Parcels](#), or [705.8.0, Preparing Pallets](#), are eligible for the DBMC prices if both of the following conditions are met:

- a. The mixed BMC sack or pallet is entered at the origin BMC facility to which it is labeled.

466.4.4

- b. The pieces are for 3-digit ZIP Codes listed as eligible destination ZIP Codes for that BMC in [Exhibit 4.4](#).

4.4 Presorted Irregular Parcels

Presorted irregular parcels in sacks or on pallets at all sort levels may claim DBMC prices. All pieces in an ADC sack or in a palletized ADC bundle are eligible for the DBMC price if the ADC facility ZIP Code (as shown in Line 1 of the corresponding sack label or the ADC facility that is the destination of the palletized ADC bundle as would be shown on an ADC sack label for that facility using [L004](#), Column B) is within the service area of the BMC at which the sack is deposited under [Exhibit 4.4](#). Separate mixed ADC sacks must be prepared for pieces eligible for and claimed at the DBMC price and for parcels not claimed at the DBMC price. Use the “label to” ZIP Code for the ADC to assign ADC bundles to the respective mixed ADC sack. Use the address on the parcels to assign parcels to the respective mixed ADC bundle or sack, as appropriate. Mail must be entered at the appropriate facility under [4.1](#).

466.4.5

4.5 **Carrier Route Machinable Parcels**

Carrier Route machinable parcels in individual carrier route sacks may claim DBMC prices. Mail must be entered at the appropriate facility under [4.1, Eligibility](#).

4.6 **Carrier Route Irregular Parcels**

Carrier Route irregular parcels in sacks at all sort levels or on pallets at all sort levels may claim DBMC prices. Mail must be entered at the appropriate facility under [4.1, Eligibility](#).

5.0 Destination Sectional Center Facility (DSCF) Entry

5.1 **Eligibility**

Pieces in a mailing meeting the standards in [3.0, Destination Entry](#), and [5.0, Destination Sectional Center Facility \(DSCF\) Entry](#), are eligible for the DSCF price when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route prices, subject to the corresponding standards for those prices.
- b. Are deposited at an SCF listed in [L005](#) or [L606](#).

5.2 **Presorted Machinable Parcels**

Presorted machinable parcels in sacks or on pallets at the 5-digit scheme and 5-digit sort levels may claim DSCF prices. Mail must be entered at the appropriate facility under [5.1, Eligibility](#).

5.3 **Presorted Irregular Parcels**

Presorted irregular parcels in sacks at the 5-digit scheme, 5-digit, 3-digit, and SCF sort levels, or on pallets at the 5-digit scheme, 5-digit, 3-digit, SCF, and ASF sort levels may claim DSCF prices. Mail must be entered at the appropriate facility under [5.1, Eligibility](#).

5.4 **Carrier Route Machinable Parcels**

Carrier Route machinable parcels in individual carrier route sacks may claim DSCF prices. Mail must be entered at the appropriate facility under [5.1, Eligibility](#).

5.5 **Carrier Route Irregular Parcels**

Carrier Route irregular parcels in sacks at all sort levels or on pallets at the 5-digit scheme, 5-digit, 3-digit, SCF, and ASF sort levels may claim DSCF prices. Mail must be entered at the appropriate facility under [5.1, Eligibility](#).

6.0 Destination Delivery Unit (DDU) Entry

6.1 **Eligibility**

Pieces in a mailing meeting the standards in [3.0, Destination Entry](#), and [6.0, Destination Delivery Unit \(DDU\) Entry](#), are eligible for the DDU price when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route prices, subject to the corresponding standards for those prices.

- b. Are addressed for delivery within the ZIP Code(s) served by the destination delivery unit.
- c. For parcels prepared using the optional 5-digit scheme sort, use Column B of [L606](#) to determine the 5-digit scheme destination. For parcels prepared using the 5-digit sort, the Drop Shipment Product must be used to determine the 5-digit destination. To determine the location for entry of 5-digit sorted pieces or whether a 5-digit delivery facility can handle pallets (or pallet boxes), refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#)). When the Drop Shipment Product shows that mail for a single 5-digit ZIP Code area is delivered out of more than one postal facility, use the facility from which the majority of city carrier routes are delivered as the facility at which the DDU mail must be entered. The Drop Shipment Product identifies the 5-digit ZIP Codes that are exceptions to the “majority of city carriers rule” or other facilities where parcels are normally dropped. If a mailer transports mail to a DDU facility that cannot handle pallets, the driver must unload the pallets into containers as specified by the delivery unit.

6.2 Presorted Machinable Parcels

Presorted machinable parcels in 5-digit scheme and 5-digit sacks or on 5-digit scheme and 5-digit pallets may claim DDU prices. Mail must be entered at the appropriate facility under [6.1](#).

6.3 Presorted Irregular Parcels

Presorted irregular parcels in 5-digit scheme sacks and 5-digit sacks, on 5-digit scheme or 5-digit pallets, or prepared as unsacked 5-digit bundles may claim DDU prices. Mailers must enter mail at the appropriate facility under [6.1](#).

6.4 Carrier Route Machinable Parcels

Carrier Route machinable parcels sorted to carrier route sacks may claim DDU prices. Mail must be entered at the appropriate facility under [6.1](#).

6.5 Carrier Route Irregular Parcels

Carrier Route irregular parcels in sacks, on 5-digit scheme and 5-digit pallets, or prepared as unsacked carrier route bundles may claim DDU prices. Mailers must enter mail at the appropriate facility under [6.1](#).

Overview

- [1.0 Media Mail Prices and Fees](#)
- [2.0 Content Standards for Media Mail Parcels](#)
- [3.0 Price Eligibility for Media Mail Parcels](#)

1.0 Media Mail Prices and Fees

1.1 Price Application

Postage is based on the price that applies to the weight (postage) increment of each addressed piece.

1.2 Media Mail Price Application

The Media Mail price is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. (Price application is identical for the single-piece and presort prices.) For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage price per piece is that for a piece weighing 1 pound.

1.3 Media Mail Presorted Prices

See [Exhibit 1.3, Media Mail Presorted Prices](#).

Exhibit 1.3 Media Mail Presorted Prices

Weight Not Over (pounds)	5-Digit	Basic ¹	Weight Not Over (pounds)	5-Digit	Basic ¹

34	12.97	13.45	69	25.22	25.70
35	13.32	13.80	70	25.57	26.05

1. Machinable parcels may be eligible for barcode discount of \$0.03 per parcel (50-piece minimum).

1.4 Mailing Fee

A mailing fee must be paid once each 12-month period at each Post Office of mailing by or for any person who mails at the Presorted Media Mail prices. For mail manifested using the Electronic Verification System (eVS) under [705.2.9](#), only one annual mailing fee for Presorted Media Mail prices, paid at the Post Office where the eVS permit imprint account is held, is required regardless of the number of Postal Service facilities where mailings are verified. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment. Presort mailing fees for Media Mail, per 12-month period: \$180.00.

1.5 Computing Postage for Media Mail**1.5.1 Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.5.2 Computing Postage for Affixed Postage

For each piece, affix the postage for the weight increment (including any discounts). To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece.

1.5.3 Computing Postage for Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable price per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent.

2.0 Content Standards for Media Mail Parcels**2.1 General**

Mailable matter meeting one of the specific eligibility standards in [2.2](#), and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Media Mail.

2.2 Content Standards

Only these items may be mailed at the Media Mail prices:

- a. Books, including books issued to supplement other books, of at least eight printed pages, consisting wholly of reading matter or scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising matter other than incidental announcements of books. Advertising includes paid advertising and the publishers' own advertising in display, classified, or editorial style.

473.2.3

- b. 16-millimeter or narrower width films, which must be positive prints in final form for viewing, and catalogs of such films of 24 pages or more (at least 22 of which are printed). Films and film catalogs sent to or from commercial theaters do not qualify for the Media Mail price.
- c. Printed music, whether in bound or sheet form.
- d. Printed objective test materials and their accessories used by or on behalf of educational institutions to test ability, aptitude, achievement, interests, and other mental and personal qualities with or without answers, test scores, or identifying information recorded thereon in writing or by mark.
- e. Sound recordings, including incidental announcements of recordings and guides or scripts prepared solely for use with such recordings. Video recordings and player piano rolls are classified as sound recordings.
- f. Playscripts and manuscripts for books, periodicals, and music.
- g. Printed educational reference charts designed to instruct or train individuals for improving or developing their capabilities. Each chart must be a single printed sheet of information designed for educational reference. The information on the chart, which may be printed on one or both sides of the sheet, must be conveyed primarily by graphs, diagrams, tables, or other nonnarrative matter. An educational reference chart is normally but not necessarily devoted to one subject. A chart on which the information is conveyed primarily by textual matter in a narrative form does not qualify as a printed educational reference chart for mailing at the Media Mail prices even if it includes graphs, diagrams, or tables. Examples of qualifying charts include maps produced primarily for educational reference, tables of mathematical or scientific equations, noun declensions or verb conjugations used in the study of languages, periodic table of elements, botanical or zoological tables, and other tables used in the study of science.
- h. Loose-leaf pages and their binders consisting of medical information for distribution to doctors, hospitals, medical schools, and medical students.
- i. Computer-readable media containing prerecorded information and guides or scripts prepared solely for use with such media.

2.3 Postal Inspection

Media Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Media Mail prices constitutes consent by the mailer to postal inspection of the contents.

2.4 Attachments and Enclosures

2.4.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Media Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.

- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

2.4.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Media Mail piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Media Mail price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

2.4.3 Loose Enclosures

Any printed matter that is mailable as Standard Mail may be included loose with any qualifying material mailed at the Media Mail prices.

2.4.4 Enclosures in Books

Enclosures in books mailed at Media Mail prices are subject to these additional standards:

- a. Either one envelope or one addressed postcard may be bound into the pages of a book. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [2.4.4b](#).
- b. One order form may be bound into the pages of a book. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [2.4.4a](#).
- c. Announcements of books may appear as book pages. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related or other materials or services. Announcements may fully describe the conditions and methods of ordering books and may contain ordering instructions for use with a separate order form. Up to three of these announcements may contain as part of their format a single order form, which may also serve as a postcard. The order forms permitted with these announcements are in addition to, and not in place of, order forms that may be enclosed under [2.4.4a](#) or [2.4.4b](#).

2.5 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.

473.3.1

- c. Words or phrases such as “Do Not Open Until Christmas” and “Happy Birthday, Mother.”
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

3.0 Price Eligibility for Media Mail Parcels

3.1 Basic Weight Standards

There is no minimum weight for Media Mail. A single piece of Media Mail can weigh no more than 70 pounds.

3.2 Price Eligibility Standards

A Presorted Media Mail mailing must contain a minimum of 300 pieces claimed at any combination of 5-digit and basic prices or be part of a combined mailing under [705.20.0](#). Those pieces in the mailing that meet the 5-digit presort requirements are eligible for the 5-digit presort price and those pieces that meet the basic presort requirements are eligible for the basic prices, subject to the preparation standards in [475.5.0](#), [Preparing Media Mail Parcels](#), [705.8.0](#), [Preparing Pallets](#), or [705.20.0](#), [Optional Combined Parcel Mailings](#). Pieces in a mailing do not need to be identical in size and content. Such nonidentical pieces may be merged, sorted together, and presented as a single mailing either with the correct postage affixed to each piece in the mailing or with postage paid with a permit imprint if authorized by Business Mailer Support (BMS), USPS headquarters.

3.3 Delivery and Return Addresses

All Media Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) or detached address labels under [602.4.0](#) may be used. Each piece must bear the sender's return address.

3.4 Price Categories for Media Mail

Media Mail prices are based on the weight of the piece without regard to zone. The price categories and discounts are as follows:

- a. To qualify for the 5-digit price, a piece must be prepared and sorted to either 5-digit scheme (machinable parcels only) and 5-digit sacks under [475.5.0, Preparing Media Mail Parcels](#), or to 5-digit scheme (machinable parcels only) and 5-digit pallets under [705.8.0](#), or [705.20.0, Optional Combined Parcel Mailings](#). All logical 5-digit bundles on pallets must contain at least 10 pieces. Nonmachinable parcels may qualify for the 5-digit price if prepared to preserve sortation by 5-digit ZIP Code as prescribed by the postmaster of the mailing office.
- b. All pieces prepared and sorted under [475.5.0, Preparing Media Mail Parcels](#), [705.8.0, Preparing Pallets](#), or [705.20.0, Optional Combined Parcel Mailings](#) that are not eligible for the 5-digit price may qualify for the basic or single-piece price. Nonmachinable parcels may qualify for the basic price if prepared to preserve sortation by BMC as prescribed by the postmaster of the mailing office.
- c. Barcode Discount. The barcode discount applies to Media Mail machinable parcels (see [401.1.5.1](#)) that are included in a mailing of at least 50 pieces of Media Mail or a combined mailing under [705.20.0](#). The pieces must be entered either at single-piece prices or basic prices and bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [402.4.0](#). The barcode discount is not available for pieces mailed at 5-digit prices.

474 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Mail manifested using the Electronic Verification System (eVS) under [705.2.9](#) must be paid with a permit imprint. Subject to the corresponding standards, postage for Media Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces.

2.0 Mailing Documentation

2.1 Completing Postage Statements

Unless manifested using eVS under [705.2.9](#), any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

2.2 Basic Documentation Standards

Unless manifested using eVS under [705.2.9](#), mailings presented to the USPS generally require documentation. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the separation, price levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

2.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

2.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

2.5 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#).

2.6 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

2.7 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

475 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparing Media Mail Parcels](#)

1.0 General Information for Mail Preparation

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations.

1.2 Definition of Mailings

Mailings are defined as:

- a. **General.** A mailing is a group of pieces within the same class of mail and, except for certain parcel prices, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Media Mail and any other type of mail may not be part of the same mailing even if in the same processing category.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. **5-digit:** the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. **5-digit scheme (pallets and sacks) for Media Mail parcels:** the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code zones processed by the USPS as a single scheme, as shown in [L606](#).
- c. **3-digit:** the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- d. **ADC:** all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- e. **ASF/BMC:** all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).

- f. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.

1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. A *5-digit scheme sort for Media Mail parcels* yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#) and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for price eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- e. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- f. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- g. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the price claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in [2.0](#).

- h. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces.

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit.

2.2 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye.

2.3 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.4 Preparing Bundles of Pieces of Nonuniform Thickness (“Counter-stacking”)

Bundles of pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

2.5 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment.

Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 1. Do not place any bands closer than 1 inch from any bundle edge.
 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 3. Do not use wire or metal banding.
 4. Do not use any loose banding.
- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

2.6 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Media Mail must meet the applicable minimum and maximum bundle size standards in [5.0, *Preparing Media Mail Parcels*](#), and [705.8.0, *Preparing Pallets*](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Bundles prepared on pallets must meet the additional bundling requirements under [705.8.0](#) and each physical bundle, including carrier route price mail, must always contain at least two pieces.

2.7 Exception to Bundle Sizes

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the price claimed without loss of price eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).

- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

2.8 Labeling Bundles

The presort level of each bundle must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X.

3.0 Sacks

3.1 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds.

4.0 Sack Labels

4.1 Basic Standards

Sack labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.
- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.

4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- c. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- d. Height (perpendicular to printing):
 - 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.

- 2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards.
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

CONTENT TYPE	CODE
Digit	D
General Delivery Unit	G
Highway Contract Route	H
Irregular Parcels	IRREG
Machinable	MACH
Mixed	MXD
Package Services	PSVC
Parcels	PARCELS
Post Office Box Section	B
Rural Route	R
Working	WKG

4.5 Line 3 (Origin Line)

Line 3 (origin line showing office of mailing or mailer information) must be the bottom line of required information unless the sack contains mail manifested using the Electronic Verification System (eVS) (see 4.6 for eVS labeling information). Line 3

must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

4.6 Electronic Verification System

All sacks containing parcels prepared and identified using the Electronic Verification System (eVS) under [705.2.9](#) must show “eVS” (or the alternatives “EVS” or “E-VS”) directly below Line 3 using the same size and lettering used for Line 3. As an option, “eVS” may be placed as the first element on Line 3.

4.7 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.8 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

5.0 Preparing Media Mail Parcels

5.1 Basic Standards

All mailings of Presorted Media Mail are subject to the standards in [5.0](#) and to these general requirements:

- a. Each mailing must meet the applicable price and eligibility standards in [473](#) and [1.0](#) through [4.0](#) in *Mail Preparation*.
- b. All pieces in a mailing must be within the same processing category as described in [401.1.0](#). A Media Mail irregular parcel is a piece that is not a machinable parcel as defined in [401.1.5](#). Pieces that meet the size and weight standards for a machinable parcel but are not individually boxed or packaged to withstand processing on BMC parcel sorters under [601.7.0](#) also are irregular parcels.
- c. All pieces must be sorted to the finest extent possible or palletized under [705.8.0](#).

- d. Each piece claimed at Media Mail prices must be marked “Media Mail.” Each piece claimed at Presorted Media Mail prices also must be marked “Presorted” or “PRSRT” under [402.2.0](#).

5.2 Preparing Machinable Parcels

5.2.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 10 addressed pieces or 20 pounds, whichever occurs first. At the mailer’s option, a sack may be prepared when the quantity of mail reaches 1,000 cubic inches. Smaller volumes are not permitted (except in mixed BMC sacks). Sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be sacked using the 10-piece minimum; those that weigh more must be sacked using the 20-pound or 1,000 cubic inch minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies). Alternately, mailers may sack by the actual piece count, mail weight for each bundle destination, or 1,000 cubic inch minimum, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement which sacking method was used except for eVS mailings prepared under [705.2.9](#).

5.2.2 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit/scheme (optional, but required for 5-digit price); labeling:
 - 1. Line 1: For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
 - 2. Line 2: For 5-digit scheme sacks, “PSVC MACH 5D SCH.” For 5-digit sacks, “PSVC MACH 5D.”
- b. BMC: required.
 - 1. Line 1: use [L601](#), Column B.
 - 2. Line 2: “PSVC MACH BMC.”
- c. Mixed BMC: required (no minimum).
 - 1. Line 1: “MXD” followed by the [L601](#), Column B information for the BMC serving the 3-digit ZIP Code of entry Post Office.
 - 2. Line 2: “PSVC MACH WKG.”

5.2.3 Standards for Barcode Discount

The barcode discount applies to Media Mail machinable parcels (see [401.1.5](#)) that are included in a mailing of at least 50 pieces of Media Mail. The pieces must be entered either at single-piece prices or basic prices and bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [708.5.0](#). The barcode discount is not available for pieces mailed at 5-digit prices.

5.3 Preparing Irregular Parcels

5.3.1 Required Bundling

A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Bundling is not required for pieces placed in 5-digit scheme sacks and 5-digit sacks when such pieces are enclosed in an envelope, full-length sleeve, full-length wrapper, or polybag and the minimum bundle volume is met. The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles placed in 5-digit sacks may weigh a maximum of 40 pounds. Each physical bundle must contain at least two addressed pieces. Bundling is also subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 10-piece minimum; those that weigh more than 1 pound must be prepared using the 10-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies), or bundle by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces in each bundle and their total weight.
- c. Mailers must note on the postage statement which sacking method was used except for the Electronic Verification System (eVS) mailings prepared under [705.2.9](#).

5.3.2 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit (optional, but required for 5-digit price eligibility); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL.

5.3.3 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 10 addressed pieces or 20 pounds, whichever occurs first. At the mailer's option, a sack may be prepared when the quantity of mail reaches 1,000 cubic inches. Smaller volumes are not permitted (except in mixed ADC sacks).

475.5.3.4

Optional 5-digit scheme sacks may be prepared only when there are at least 10 addressed pieces or 20 pounds. Smaller volumes are not permitted (except in mixed ADC sacks). Sacking is also subject to these conditions:

- a. Identical-weight pieces weighing 2 pounds or less must be sacked using the 10-piece minimum; those that weigh more must be sacked using the 20-pound or 1,000 cubic inch minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies). Alternatively, mailers may sack by the actual piece count, mail weight for each destination, or 1,000 cubic inch minimum, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces in each sack and their total weight.
- c. Mailers must note on the postage statement which sacking method was used except for eVS mailings prepared under [705.2.9](#).

5.3.4 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit/scheme (optional, but required for 5-digit price); labeling:
 1. Line 1: For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
 2. Line 2: For 5-digit scheme sacks, "PSVC IRREG 5D SCH." For 5-digit sacks, "PSVC IRREG 5D."
- b. 3-digit: required.
 1. Line 1: use [L002](#), Column A.
 2. Line 2: "PSVC IRREG 3D."
- c. ADC: required.
 1. Line 1: use [L004](#), Column B.
 2. Line 2: "PSVC IRREG ADC."
- d. Mixed ADC: required (no minimum).
 1. Line 1: "MXD" followed by city, state, and ZIP Code of ADC serving 3-digit ZIP Code prefix of entry Post Office, as shown in [L004](#). If placed on an ASF or BMC pallet under option in [705.8.10.4](#), use [L010](#).
 2. Line 2: "PSVC IRREG WKG."

476 Enter and Deposit

Overview

[1.0 Verification and Deposit](#)

1.0 Verification and Deposit

1.1 **Verification and Entry**

Except for Electronic Verification System (eVS) shipments (see [705.2.9](#)) or metered mail drop shipments (see [705.18.0](#)), all presorted and barcoded discount mailings must be presented for verification and acceptance at the Post Office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster at the office that verifies and accepts the mailing.

Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing Post Office only as permitted under [705.18.0](#).

483 Prices and Eligibility

Overview

- [1.0 Library Mail Prices and Fees](#)
- [2.0 Content Standards for Library Mail Parcels](#)
- [3.0 Price Eligibility for Library Mail Parcels](#)

1.0 Library Mail Prices and Fees

1.1 Price Application

Postage is based on the price that applies to the weight (postage) increment of each addressed piece.

1.2 Library Mail Price Application

The Library Mail price is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage price per addressed piece is that for an addressed piece weighing 1 pound.

1.3 Library Mail Presorted Prices

See [Exhibit 1.3, Library Mail Presorted Prices](#).

Exhibit 1.3 Library Mail Presorted Prices

Weight Not Over (pounds)	5-Digit	Basic ¹	Weight Not Over (pounds)	5-Digit	Basic ¹
1	\$1.35	\$1.81	36	\$12.90	\$13.36
2	1.68	2.14	37	13.23	13.69
3	2.01	2.47	38	13.56	14.02

35	12.57	13.03	70	24.12	24.58

1. Machinable parcels may be eligible for barcode discount of \$0.03 per parcel (50-piece minimum).

1.4 Mailing Fee

A mailing fee must be paid once each 12-month period at each Post Office of mailing by or for any person who mails at the Presorted Library Mail prices. For mail manifested using the Electronic Verification System (eVS) under [705.2.9](#), only one annual mailing fee for Presorted Library Mail prices, paid at the Post Office where the eVS permit imprint account is held, is required regardless of the number of Postal Service facilities where mailings are verified. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment. Presort mailing fees for Library Mail, per 12-month period: \$180.00.

1.5 Computing Postage for Library Mail**1.5.1 Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

1.5.2 Computing Postage for Affixed Postage

For each piece, affix the postage for the weight increment (including any discounts). To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece.

1.5.3 Computing Postage for Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable price per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent.

2.0 Content Standards for Library Mail Parcels**2.1 General**

Mailable matter meeting one of the specific eligibility standards in [2.3](#) or [2.4](#), as applicable, and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Library Mail.

2.2 Sender and Recipient Qualifications

Each piece must show in the address or return address the name of a school, college, university, public library, museum, or herbarium or the name of a nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organization or association. For Library Mail standards, these nonprofit organizations are defined in [703.1.0](#).

2.3 Content Standards for Mailings Between Entities

The items described in this section may be mailed at the Library Mail price when sent between: (1) schools, colleges, universities, public libraries, museums, and herbariums and nonprofit religious, educational, scientific, philanthropic (charitable),

483.2.4

agricultural, labor, veterans, and fraternal organizations or associations; (2) any such institution, organization, or association and an individual who has no financial interest in the sale, promotion, or distribution of the materials; or (3) any such institution, organization, or association and a publisher, if such institution, organization, or association has placed an order to buy such materials for delivery to itself:

- a. Books, consisting wholly of reading matter, scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising, except for incidental announcements of books.
- b. Printed music, whether in bound or sheet form.
- c. Bound volumes of academic theses, whether in typewritten or duplicated form.
- d. Periodicals, whether bound or unbound.
- e. Sound recordings.
- f. Other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts.
- g. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials for informing and furthering the educational work and interests of museums and herbariums.

2.4 Qualified Mailings “To” or “From”

The following specific items may be mailed at the Library Mail price when sent to or from schools, colleges, universities, public libraries, museums, and herbariums and to or from nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organizations:

- a. 16-millimeter or narrower width films, filmstrips, transparencies, slides, and microfilms. All must be positive prints in final form for viewing.
- b. Sound recordings.
- c. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials intended for informing and furthering the educational work and interests of museums and herbariums.
- d. Scientific or mathematical kits, instruments, or other devices.
- e. Catalogs of the materials in [2.4a.](#) through [2.4d](#) and guides or scripts prepared solely for use with such materials.

2.5 Postal Inspection

Library Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Library Mail prices constitutes consent by the mailer to postal inspection of the contents.

2.6 Attachments and Enclosures

2.6.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Library Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker.

2.6.2 Incidental First-Class Mail Attachments and Enclosures

Incidental First-Class Mail matter may be enclosed in or attached to any Library Mail piece without payment of First-Class Mail postage. An incidental First-Class Mail attachment or enclosure must be matter that, if mailed separately, would require First-Class Mail postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class Mail attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Library Mail price for the host piece is based on the combined weight of the host piece and the incidental First-Class Mail attachment or enclosure.

2.6.3 Enclosures in Books and Sound Recordings

Books and sound recordings mailed at the Library Mail price may contain these enclosures as well as the additions and enclosures permitted under [2.6.1](#), [2.6.2](#), and [2.7](#):

- a. Either one envelope or one addressed postcard. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [2.6.3b](#).
- b. One order form. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [2.6.3a](#).
- c. With books, announcements of books in book pages or as loose enclosures. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related materials or services. Announcements may fully describe the conditions and methods of ordering books (such as by membership in book clubs) and may contain ordering instructions for use with the single order form.
- d. With sound recordings, announcements of sound recordings on title labels, on protective sleeves, on the carton or wrapper, or on loose enclosures. These announcements of sound recordings must be incidental and exclusively devoted to sound recordings. They may not contain extraneous advertising of recording-related materials or services. Announcements may fully describe the

conditions and methods of ordering sound recordings (such as by membership in sound recording clubs) and may contain ordering instructions for use with the single order form.

2.6.4 Other Enclosures

Material mailed at the Library Mail price other than books and sound recordings may contain only those additions and enclosures permitted under [2.6.1](#), [2.6.2](#), and [2.7](#).

2.7 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class Mail prices. The following written additions and enclosures do not require additional First-Class Mail postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label.

3.0 Price Eligibility for Library Mail Parcels

3.1 Basic Weight Standards

There is no minimum weight for Library Mail. A single piece of Library Mail can weigh no more than 70 pounds.

3.2 Price Eligibility Standards

A Presorted Library Mail mailing must contain a minimum of 300 pieces claimed at any combination of 5-digit and basic prices or be part of a combined mailing under 705.20.0. Those pieces in the mailing that meet the 5-digit presort requirements are eligible for the 5-digit presort price, and those pieces that meet the basic presort requirements are eligible for the basic price, subject to the preparation standards in [485.5.0](#), [Preparing Library Mail Parcels](#), [705.8.0](#), [Preparing Pallets](#), or [705.20.0](#), [Optional Combined Parcel Mailings](#). Pieces in a mailing do not need to be identical

in size and content. Such nonidentical pieces may be merged, sorted together, and presented as a single mailing either with the correct postage affixed to each piece in the mailing or with postage paid with a permit imprint if authorized by Business Mailer Support (BMS), USPS headquarters.

3.3 Delivery and Return Addresses

All Library Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address.

3.4 Price Categories for Library Mail

Library Mail prices are based on the weight of the piece without regard to zone. The price categories and discounts are as follows:

- a. To qualify for the 5-digit price, a piece must be prepared and sorted to either 5-digit scheme (machinable parcels only) and 5-digit sacks under [485.5.0](#), [Preparing Library Mail Parcels](#), or to 5-digit scheme (machinable parcels only) and 5-digit pallets under [705.8.0](#), or [705.20.0](#), [Optional Combined Parcel Mailings](#). All logical 5-digit bundles on pallets must contain at least 10 pieces. Nonmachinable parcels may qualify for the 5-digit price if prepared to preserve sortation by 5-digit ZIP Code as prescribed by the postmaster of the mailing office.
- b. All pieces prepared and sorted under [485.5.0](#), [Preparing Library Mail Parcels](#), [705.8.0](#), [Preparing Pallets](#), or [705.20.0](#), [Optional Combined Parcel Mailings](#) that are not eligible for the 5-digit price may qualify for the basic or single-piece price. Nonmachinable parcels may qualify for the basic price if prepared to preserve sortation by BMC as prescribed by the postmaster.
- c. Barcode Discount. The barcode discount applies to Media Mail machinable parcels (see [401.1.5.1](#)) that are included in a mailing of at least 50 pieces of Library Mail or a combined mailing under [705.20.0](#). The pieces must be entered either at single-piece prices or basic prices and bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [402.4.0](#). The barcode discount is not available for pieces mailed at 5-digit prices.

484 Postage Payment and Documentation

Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

1.0 Basic Standards for Postage Payment

1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Mail manifested using the Electronic Verification System (eVS) under [705.2.9](#) must be paid with a permit imprint. Subject to the corresponding standards, postage for Library Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces.

2.0 Mailing Documentation

2.1 Completing Postage Statements

Unless manifested using eVS under [705.2.9](#), any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

2.2 Basic Documentation Standards

Unless manifested using eVS under [705.2.9](#), mailings presented to the USPS generally require documentation. Supporting documentation of postage is required unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance. Documentation describes the preparation, price levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the price claimed or postage payment method used.

2.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

484.2.4

2.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

2.5 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#).

2.6 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

2.7 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.

485 Mail Preparation

Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparing Library Mail Parcels](#)

1.0 General Information for Mail Preparation

1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations.

1.2 Definition of Mailings

Mailings are defined as:

- a. **General.** A mailing is a group of pieces within the same class of mail and, except for certain parcel prices, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Library Mail and any other type of mail may not be part of the same mailing even if in the same processing category.

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. **5-digit:** the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. **5-digit scheme (pallets and sacks) for Library Mail parcels:** the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code zones processed by the USPS as a single scheme, as shown in [L606](#).
- c. **3-digit:** the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- d. **ADC:** all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- e. **ASF/BMC:** all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).

- f. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.

1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and price claimed.
- c. A *5-digit scheme sort for Library Mail parcels* yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#) and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for price eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- e. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- f. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- g. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the price claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in [2.0](#).

- h. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces.

2.0 Bundles

2.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit.

2.2 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye.

2.3 Arranging Pieces in a Bundle (“Facing”)

Except as noted in [2.4, Preparing Bundles of Pieces of Nonuniform Thickness \(“Counter-stacking”\)](#), all pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

2.4 Preparing Bundles of Pieces of Nonuniform Thickness (“Counter-stacking”)

Bundles of pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

2.5 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment.

Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 1. Do not place any bands closer than 1 inch from any bundle edge.
 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 3. Do not use wire or metal banding.
 4. Do not use any loose banding.
- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

2.6 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Library Mail must meet the applicable minimum and maximum bundle size standards in [5.0, *Preparing Library Mail Parcels*](#), or [705.8.0, *Preparing Pallets*](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Bundles prepared on pallets must meet the additional bundling requirements under [705.8.0](#) and each physical bundle, including carrier route price mail, must always contain at least two pieces.

2.7 Exception to Bundle Sizes

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the price claimed without loss of price eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).

- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

2.8 Labeling Bundles

The presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X.

3.0 Sacks

3.1 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds.

4.0 Sack Labels

4.1 Basic Standards

Sack labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.
- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.

4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- c. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- d. Height (perpendicular to printing):
 1. For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.

- 2. For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards.
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

CONTENT TYPE	CODE
Digit	D
General Delivery Unit	G
Highway Contract Route	H
Irregular Parcels	IRREG
Machinable	MACH
Mixed	MXD
Package Services	PSVC
Parcels	PARCELS
Post Office Box Section	B
Rural Route	R
Working	WKG

4.5 Line 3 (Origin Line)

Line 3 (origin line showing office of mailing or mailer information) must be the bottom line of required information unless the sack contains mail manifested using the Electronic Verification System (eVS) (see 4.6 for eVS labeling information). Line 3

must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

4.6 Electronic Verification System

All sacks containing parcels prepared and identified using the Electronic Verification System (eVS) under [705.2.9](#) must show “eVS” (or the alternatives “EVS” or “E-VS”) directly below Line 3 using the same size and lettering used for Line 3. As an option, “eVS” may be placed as the first element on Line 3.

4.7 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

4.8 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

5.0 Preparing Library Mail Parcels

5.1 Basic Standards

All mailings of Presorted Library Mail are subject to the standards in [5.0, *Preparing Library Mail Parcels*](#), and to these general standards:

- a. Each mailing must meet the price and eligibility standards in [483](#) and [1.0](#) through [4.0 in *Mail Preparation*](#).
- b. All pieces in a mailing must be within the same processing category as described in [401.1.0](#). A Library Mail irregular parcel is a piece that is not a machinable parcel as defined in [401.1.5](#). Pieces that meet the size and weight standards for a machinable parcel but are not individually boxed or packaged to withstand processing on BMC parcel sorters under [601.7.0](#) are also considered irregular parcels.
- c. All pieces must be sorted to the finest extent possible or palletized under [705.8.0](#).

- d. Each piece claimed at Library Mail prices must be marked “Library Mail.” Each piece claimed at Presorted Library Mail prices also must be marked “Presorted” or “PRSRT.” (See [402.](#))

5.2 Preparing Machinable Parcels

5.2.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 10 addressed pieces or 20 pounds, whichever occurs first. At the mailer’s option, a sack may be prepared when the quantity of mail reaches 1,000 cubic inches. Smaller volumes are not permitted (except in mixed BMC sacks). Sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be sacked using the 10-piece minimum; those that weigh more must be sacked using the 20-pound or 1,000 cubic inch minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies). Alternately, mailers may sack by the actual piece count, mail weight for each bundle destination, or 1,000 cubic inch minimum, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement which sacking method was used except for eVS mailings prepared under [705.2.9](#).

5.2.2 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit/scheme (optional, but required for 5-digit price); labeling:
 - 1. Line 1: For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
 - 2. Line 2: For 5-digit scheme sacks, “PSVC MACH 5D SCH.” For 5-digit sacks, “PSVC MACH 5D.”
- b. BMC: required.
 - 1. Line 1: use [L601](#), Column B.
 - 2. Line 2: “PSVC MACH BMC.”
- c. Mixed BMC: required (no minimum).
 - 1. Line 1: “MXD” followed by the [L601](#), Column B information for the BMC serving the 3-digit ZIP Code of entry Post Office.
 - 2. Line 2: “PSVC MACH WKG.”

5.3 Preparing Irregular Parcels

5.3.1 Required Bundling

A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Bundling is not required for pieces placed in 5-digit scheme sacks and 5-digit sacks when such pieces are enclosed in an envelope, full-length sleeve, full-length wrapper, or polybag and the minimum bundle volume is met. The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles placed in 5-digit sacks may weigh a maximum of 40 pounds. Each physical bundle must contain at least two addressed pieces. Bundling is also subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 10-piece minimum; those that weigh more than 1 pound must be prepared using the 10-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies) or bundle by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement which sacking method was used except for eVS mailings prepared under [705.2.9](#).

5.3.2 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit (optional, but required for 5-digit price eligibility); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL.

5.3.3 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 10 addressed pieces or 20 pounds, whichever occurs first. At the mailer's option, a sack may be prepared when the quantity of mail reaches 1,000 cubic inches. Smaller volumes are not permitted (except in mixed ADC sacks).

Sacking is also subject to these conditions:

- a. Identical-weight pieces weighing 2 pounds or less must be sacked using the 10-piece minimum; those that weigh more must be sacked using the 20-pound or 1,000 cubic inch minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies).

485.5.3.4

Alternatively, mailers may sack by the actual piece count, mail weight for each bundle destination, or 1,000 cubic inch minimum, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.

- c. Mailers must note on the postage statement which sacking method was used except for eVS mailings prepared under [705.2.9](#).

5.3.4 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit/scheme (optional, but required for 5-digit price); labeling:
 - 1. Line 1: For 5-digit scheme sacks, use [L606](#), Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
 - 2. Line 2: For 5-digit scheme sacks, "PSVC IRREG 5D SCH." For 5-digit sacks, "PSVC IRREG 5D."
- b. 3-digit: required.
 - 1. Line 1: use [L002](#), Column A.
 - 2. Line 2: "PSVC IRREG 3D."
- c. ADC: required.
 - 1. Line 1: use [L004](#), Column B.
 - 2. Line 2: "PSVC IRREG ADC."
- d. Mixed ADC: required (no minimum).
 - 1. Line 1: "MXD" followed by city, state, and ZIP Code of ADC serving 3-digit ZIP Code prefix of entry Post Office, as shown in [L004](#). If placed on as ASF or BMC pallet under option in [705.8.10.4](#), use [L010](#).
 - 2. Line 2: "PSVC IRREG WKG."

5.4 Standards for Barcode Discount

The barcode discount applies to Library Mail machinable parcels (see [401.1.5](#)) that are included in a mailing of at least 50 pieces of Library Mail. The pieces must be entered either at single-piece prices or basic prices and bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [708.5.0](#). The barcode discount is not available for pieces mailed at 5-digit prices.

486 Enter and Deposit

Overview

[1.0 Verification and Deposit](#)

1.0 Verification and Deposit

1.1 **Verification and Entry**

Except for Electronic Verification System (eVS) shipments (see [705.2.9](#)) or metered mail drop shipments (see [705.18.0](#)), all presorted and barcoded discount mailings must be presented for verification and acceptance at the Post Office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster at the office that verifies and accepts the mailing.

Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing Post Office only as permitted under [705.18.0](#).

1.0 Extra Services for Express Mail

1.1 Available Services

1.1.1 Mailing Receipt

A receipt showing the time and date of mailing must be provided to the mailer on acceptance of Express Mail by the USPS. This receipt is a copy of the multipart Express Mail label affixed to the mailpiece and serves as evidence of mailing. Mailers authorized to present Express Mail under Express Mail Manifesting procedures in [705.2.0](#) must use a one-ply label and retain the verification manifest as the mailing receipt.

1.1.2 Proof of Delivery

Proof of delivery information for Express Mail is available as follows:

- a. Individual requests by article number can be retrieved at www.usps.com or by calling 1-800-222-1811. A proof of delivery letter is provided via fax or mail.
- b. Bulk proof of delivery letters are available only to mailers using Express Mail Manifesting service and can be obtained in CD-ROM or Signature Extract File formats. For additional information see Publication 80, *Bulk Proof of Delivery Program*.

1.1.3 Return Receipt

Return receipt service under [6.0](#) may be purchased for Express Mail. The return receipt serves as evidence of delivery. The fee paid for this service does not insure the mailpiece against loss or damage. If a return receipt is requested, the mailer must show a complete return address on the mailpiece. The return address on the Express Mail label meets this requirement.

503.1.1.4

1.1.4 Restricted Delivery

Restricted delivery service under [7.0](#) is not available for Express Mail.

1.1.5 COD

Collect on delivery (COD) service under [11.0](#) may be purchased with Express Mail next day and second day service only.

1.1.6 Insurance and Indemnity

Express Mail is insured against loss, damage, or rifling, subject to these standards:

- a. Insurance coverage for Express Mail drop shipment ends on receipt at the destination postal facility.
- b. All Express Mail signed for by the addressee, the addressee's agent, or the delivery employee constitutes a valid delivery, and no indemnity for loss is paid. A waiver of signature cannot be used for Express Mail Custom Designed Service, Express Mail COD, or Express Mail with additional insurance.
- c. Merchandise insurance coverage is provided against loss, damage, or rifling and is limited to a maximum liability of \$100. (Additional insurance under [1.1.7](#) may be purchased up to a maximum coverage of \$5,000.00.) Nonnegotiable documents are insured against loss, damage, or rifling, up to \$100 per piece, subject to the maximum limit per occurrence as defined in [609, Filing Indemnity Claims for Loss or Damage](#).
- d. Additional terms, coverage, and procedures of indemnity claims are in [609](#).

1.1.7 Additional Insurance

Additional insurance, up to a maximum coverage of \$5,000.00, may be purchased for merchandise valued at more than \$100 sent by Express Mail. The insurance fee is entered in the block marked "Insurance" on the mailing label. If the label does not contain this specific block, the mailer uses the "COD" block by crossing out "COD," writing "INS" to the right, and entering the fee for the applicable coverage. Coverage is limited to the actual value of the contents, regardless of the fee paid, or the highest insurance value increment for which the fee is fully paid, whichever is lower. If a waiver of signature is requested, additional insurance coverage is void.

1.1.8 Fees for Express Mail Insurance

Fee, in addition to postage and other fees:

Express Mail Insurance (Amount for Merchandise Insurance Coverage Desired)	Fee ¹
\$0.01 to \$100.00	\$0.00
100.01 to 200.00	0.75
200.01 to 500.00	2.10
500.01 to 5,000.00	\$2.10 plus \$1.35 for each \$500 or fraction thereof over \$500

1. Express Mail merchandise maximum coverage: \$5,000.
Document reconstruction maximum liability: \$100.

1.2 Express Mail Drop Shipment

For an Express Mail drop shipment, the content of each Express Mail pouch is considered one mailpiece for indemnity coverage, and the mail enclosed may receive only the following services:

- a. First-Class Mail pieces may be sent with Certified Mail service or special handling or, for First-Class Mail parcels only, electronic option Delivery Confirmation service or electronic option Signature Confirmation service.
- b. Priority Mail pieces may be sent with Certified Mail service, special handling, electronic option Delivery Confirmation, or electronic option Signature Confirmation.
- c. Standard Mail parcels and NFMs (except Customized MarketMail) may be sent with electronic option Delivery Confirmation service.
- d. Package Services and Parcel Select mail may be sent with special handling or, for parcels only, electronic option Delivery Confirmation service or electronic option Signature Confirmation service.

503.2.1

2.0 Registered Mail

2.1 Registered Mail Fees

Fees and charges are in addition to postage:

Declared Value	Fee (in addition to postage)	Declared Value	Fee (in addition to postage) ¹	
\$0.00	\$10.00	\$25,000.01 to \$15,000,000	\$42.10	
0.01 to 100	10.80		+ handling charge of	
100.01 to 500	12.10		\$1.20 per each \$1,000 or fraction	
500.01 to 1,000	13.30		thereof over first \$25,000	
1,000.01 to 2,000	14.50		Over \$15,000,000	\$18,012.10
2,000.01 to 3,000	15.70			+ amount determined by USPS
3,000.01 to 4,000	16.90			based on weight, space, and value
4,000.01 to 5,000	18.10			
5,000.01 to 6,000	19.30		Additional Services	Fee (in addition to postage)
6,000.01 to 7,000	20.50		COD Collection Charge	\$4.65
7,000.01 to 8,000	21.70	(maximum amount collectible is \$1,000)		
8,000.01 to 9,000	22.90	Restricted Delivery	4.30	
9,000.01 to 10,000	24.10			
10,000.01 to 11,000	25.30			
11,000.01 to 12,000	26.50	Return Receipts,	2.20	
12,000.01 to 13,000	27.70	requested at time of mailing showing to		
13,000.01 to 14,000	28.90	whom, signature, date of delivery, and		
14,000.01 to 15,000	30.10	addressee's address (if different)		
15,000.01 to 16,000	31.30			
16,000.01 to 17,000	32.50	Return Receipts,	1.00	
17,000.01 to 18,000	33.70	requested at time of mailing (receive		
18,000.01 to 19,000	34.90	electronically)		
19,000.01 to 20,000	36.10			
20,000.01 to 21,000	37.30	Return Receipts,	4.35	
21,000.01 to 22,000	38.50	requested after mailing showing only to		
22,000.01 to 23,000	39.70	whom and date delivered		
23,000.01 to 24,000	40.90			
24,000.01 to 25,000	42.10			

1. Fees for articles valued over \$25,000 are for handling only. Maximum amount of insurance coverage available is \$25,000.

2.2 Basic Information About Registered Mail

2.2.1 Description

Registered Mail is the most secure service that the USPS offers. It incorporates a system of receipts to monitor the movement of the mail from the point of acceptance to delivery. Registered Mail provides the sender with a mailing receipt and, upon request, electronic verification that an article was delivered or that a delivery attempt was made. Customers can retrieve the delivery status in three ways: (1) over the Internet at www.usps.com by entering the article number shown on the mailing receipt; (2) by telephone at 1-800-222-1811; or (3) by bulk electronic file transfer for mailers who provide an electronic manifest to the USPS. USPS

maintains a record of delivery (which includes the recipient's signature) for a specified period of time. Customers may obtain a delivery record by purchasing return receipt service. See [6.0](#) for details.

2.2.2 Eligible Matter

Only matter prepaid with postage at the First-Class Mail prices (including Priority Mail) may be registered. The face (address side) of the registered article must be at least 5 inches long and 3-1/2 inches high, regardless of thickness. Items returned under merchandise return service ([507.11.0](#)) may be registered without prepayment of postage and fees.

2.2.3 Place of Mailing

Registration may be obtained by presenting mail to the following:

- a. A retail employee at a Post Office, station, or branch (including any contractor-operated unit). A postmaster may require that an article of unusually high value be presented only at the main office or at designated stations and branches.
- b. A rural carrier on a rural route. The article and sufficient cash for postage and required fees for mailing the article may be left in a rural mailbox. The carrier must hand any change to the sender or place it in an envelope and leave the envelope in the box on the carrier's next trip. Responsibility is not assumed for the article or cash until a receipt is issued. No responsibility is assumed for the change left in the box by the carrier.
- c. A rural carrier at a nonpersonnel rural unit. The sender must meet the rural carrier to have mail registered.

2.2.4 Ineligible Matter

Registration may not be obtained for mail that is handled as follows:

- a. Sent as business reply mail or in a business reply envelope.
- b. Placed in a street letterbox or Post Office maildrop.
- c. Addressed to a Post Office to which it cannot be transported safely.
- d. Prepared improperly or packed inadequately to withstand normal handling (see [2.4.7, Fragile Item](#)).
- e. Tied or fastened with one or more articles, unless enclosed in the same envelope or wrapper.
- f. Presented for mailing in a padded envelope; envelope or mailer manufactured of spun-bonded olefin, such as Tyvek; plastic envelope or mailer; or envelope or mailer made of glossy-coated paper.

2.2.5 Additional Services

Purchasing Registered Mail service allows customers to then purchase restricted delivery service or a return receipt. The following additional services may be combined with Registered Mail if the applicable standards for the services are met and the additional service fees are paid:

- a. Collect on delivery (COD) service.
- b. Delivery Confirmation.

c. Signature Confirmation.

2.3 Fees and Liability

2.3.1 Full Value

Regardless of any insurance that may cover the article, the mailer must always declare its full value to the USPS when presenting it for registration and mailing (see chart below). The mailer must tell the USPS clerk (or enter on the firm sheet if a firm mailer) the full value of mail matter presented for registration. Private insurance carried on Registered Mail does not modify the requirements for declaring the full value. The accepting USPS employee may ask the mailer to show that the full value of the matter presented is declared, and may refuse to accept the matter as Registered Mail if a satisfactory declaration of value is not provided. Only articles of no value may be mailed as Registered Mail without insurance.

MAIL MATTER	VALUE TO BE DECLARED
Negotiable Instrument (instruments payable to bearer, including stock certificates endorsed in blank)	Market value (value based on value at time of mailing)
Nonnegotiable Instrument [registered bonds, warehouse receipts, checks, drafts, deeds, wills, abstracts, and similar documents (certificates of stock considered nonnegotiable so far as declaration of value is concerned unless endorsed in blank)]	No value or replacement cost if postal insurance coverage desired ¹
Money	Full value
Jewelry, Gems, Precious Metal	Market value or cost
Merchandise	Market value or cost
Nonvaluable (matter without intrinsic value such as letters, files, records)	No value or replacement cost if postal insurance coverage desired ¹

1. A mailer who does not know replacement costs should contact a person or firm familiar with such documents and determine replacement costs before mailing the articles.

2.3.2 Fee and Postage

The fee and postage may be paid with ordinary postage stamps, meter stamps, or permit imprints. If a permit imprint is used, the exact amount of postage and fees paid must be shown within the permit imprint. For pieces that are part of a manifest mailing, only the registry fee must be shown within the permit imprint. The fee and postage on official mail of authorized federal agencies may also be paid with penalty stamps, penalty meter stamps, or penalty permit imprints. The fees and postage on items registered with merchandise return service are paid through a postage due account under [507.11.0](#).

2.3.3 Postal Insurance

Postal insurance is provided for articles with a value of at least \$0.01 up to a maximum insured value of \$25,000. Insurance is included in the fee. Postal insurance is not available for articles with no value (\$0.00).

2.3.4 Refund

A fee for Registered Mail is not refunded after the USPS accepts the mail even if the sender later withdraws the mail under [2.4.10](#). A fee for return receipt service or restricted delivery service is not refunded unless the USPS fails to provide the service. The sender must present the Registered Mail receipt showing payment of these services.

2.3.5 Official Mail

Official mail of authorized government agencies, if prepared under applicable standards in [703.7.0](#) for transmission of mail without prepayment of postage, may be sent by Registered Mail without prepayment of a registration fee.

2.3.6 Merchandise Return

Matter registered with merchandise return service under [507.11.0](#) may be sent by Registered Mail without prepayment of postage and fees.

2.3.7 Indemnity

Except for matter registered with merchandise return service, no indemnity is paid for any matter registered without prepayment of postage and fees. If a government agency wants indemnity coverage, both the applicable postage and registry fee must be paid in full with stamps or meter stamps.

2.4 Mailing**2.4.1 USPS**

USPS employees are not permitted to help customers prepare or seal mail to be registered.

2.4.2 Addressing

The mail must bear the complete names and addresses of both sender and addressee.

2.4.3 Opened Envelope

Any envelope or package that appears to have been opened and resealed, or otherwise improperly prepared, may not be registered.

2.4.4 Label 200

Registered Mail must bear a barcoded red Label 200 (see [Exhibit 2.4.4](#)). The label must be placed above the delivery address and to the right of the return address, or to the left of the delivery address on parcels. A large-volume mailer can obtain Label 200 in rolls of 600.

Exhibit 2.4.4 Label 200**2.4.5 Privately Printed Label 200**

If authorized, a mailer may use a privately printed Label 200 for domestic mail only. Privately printed labels must be nearly identical in design and color to the USPS form, with a barcode and human-readable numbers that meet USPS specifications in Publication 109. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review by the mailpiece design analyst. Once approved, the mailer must print sample labels with barcodes to be certified under the technical requirements in Publication 109.

2.4.6 Sealing

The mailer must securely seal envelopes. Paper or cellulose strips or wax or paper seals must not be placed over the intersections of flaps of letter-size envelopes where the postmark impressions are made. Packages must be sealed with mucilage or glue or with plain paper or cloth tape. Packages containing currency or securities may not be sealed exclusively by paper strips, but must first be sealed securely with mucilage or glue. Large envelopes (flats) that are completely sealed and that also have paper strips or paper tape across the intersections of the flaps may be considered packages for sealing requirements. To be used on Registered Mail, tape must visibly damage the envelope or wrapper if removed and must absorb the ink in a postmark impression.

2.4.7 Fragile Item

The mailer must tell the USPS employee whether the item is fragile and, if so, describe the interior packing. All articles presented for registration must be packed as specified in 601.2.0. The USPS may refuse packages not properly packed to withstand normal handling in the mail. Indemnity may be denied if articles are not properly packaged.

2.4.8 Window Envelope

A window envelope must have a transparent panel covering the opening to be eligible for registry. If the panel is glued to the envelope, the envelope may contain only matter without intrinsic value. If the panel is part of the envelope, the envelope may be used for all Registered Mail.

2.4.9 Firm Sheet

If three or more registered articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet) or privately printed firm sheets. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to Registered Mail. The mailer submits the forms in duplicate and receives one copy as a mailing receipt after the entries are verified by the postal employee accepting the mailing. All entries made on firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line.

2.4.10 Withdrawal or Recall

The sender may withdraw or recall Registered Mail without charge before its delivery by writing on the receipt "Withdrawn before dispatch," and signing and surrendering the receipt; or filing a written request for its return after dispatch at the Post Office where the article was mailed, giving names and addresses of sender and addressee, the registry number, and date of mailing. The sender must pay for all telephone calls. If remailed, the article must be under new cover and bear new postage and fees.

2.5 Delivery**2.5.1 Basic Standards**

Delivery of Registered Mail is subject to [508.1.0, Recipient Options](#). The postmaster may require the addressee to call for Registered Mail at the Post Office if delivery by carrier would not be safe.

2.5.2 Bad Condition

If the addressee accepts a registered article in bad condition (repaired with sealing stamps or reenclosed in a new envelope or wrapper), the addressee must open it without disturbing the seal, in the delivering employee's presence. If anything is missing, the envelope or wrapper must be given to the employee after it is endorsed to show what was missing.

2.6 Inquiry on Uninsured Article**2.6.1 Who May File**

If postal insurance was purchased, the claim procedures in [609](#) apply. The procedures in this section apply only to uninsured Registered Mail. Only the mailer may file an inquiry on uninsured Registered Mail. For matter registered without postal insurance with merchandise return service, only the permit holder may file an inquiry.

2.6.2 When to File

The mailer may not file any inquiry until 15 days after the mailing date of the article. An inquiry may be filed at any Post Office, classified station, or classified branch, except for an inquiry about matter registered with merchandise return service, which must be filed by the permit holder at the Post Office where the permit is held. Form 1000 must be used in processing an inquiry for uninsured Registered Mail. An inquiry may be filed in the following manner:

503.2.6.3

- a. Any mailer filing an inquiry for the alleged loss of Registered Mail must provide proof that a loss occurred before a Post Office may accept the inquiry.
- b. Proof may be provided by these methods:
 1. The mailer may obtain Form 1000 from any Post Office. The mailer must complete the form and send it to the addressee. USPS employees may not mail the inquiry for the mailer, but they may help a mailer complete the form if requested. The addressee must complete item 13 and items 17 through 19 on Form 1000 and return it to the mailer. If the addressee signs the claim form and indicates the article was not received 15 days or more after the mailing date, the mailer may then take the claim form, with the original mailing receipt, to a Post Office and file an inquiry.
 2. If the mailer has the addressee's written and signed documentation (such as a letter dated at least 15 days after the mailing date) stating the addressee did not receive the article, the mailer may take this documentation to a Post Office, with the original mailing receipt, and file an inquiry.
 3. If the mailer cannot obtain the addressee's cooperation in signing Form 1000 for a registered article or, if preferable, the mailer may send a check or money order for the "return receipt requested after mailing" fee in [6.1.1](#) to the Post Office of address and request a copy of the delivery record, if 15 days or more have passed since the mailing date. Any such request for a delivery record must contain the date the article was mailed, the registered number, and the complete names and addresses of the mailer and addressee. The response to this search of delivery records ends the inquiry process.
- c. A merchandise return permit holder must ask the addressee to complete items 1 through 12 and 14 through 16 of Form 1000 and return it, along with the original mailing receipt, to the permit holder. The permit holder must complete item 13 and items 17 through 19 and submit the completed form, along with the original mailing receipt, to the Post Office where the permit is held. An inquiry may be filed no sooner than 15 days after the mailing date.

2.6.3 Duplicate Inquiry

A duplicate inquiry may not be filed sooner than 30 days after the original inquiry.

3.0 Certified Mail**3.1 Certified Mail Fees****3.1.1 Certified Fees**

Fee, in addition to postage and other fees, per piece: \$2.70.

3.1.2 Fee and Postage

The Certified Mail fee must be paid in addition to the correct postage. The fee and postage may be paid with ordinary postage stamps, meter stamps, or permit imprints. The fee and postage on official mail of federal government agencies and departments are collected under the applicable reimbursement procedures.

3.2 Basic Information

3.2.1 Description

Certified Mail service provides the sender with a mailing receipt and, upon request, electronic verification that an article was delivered or that a delivery attempt was made. Customers can retrieve the delivery status in three ways: (1) over the Internet at www.usps.com by entering the article number shown on the mailing receipt; (2) by telephone at 1-800-222-1811; or (3) by bulk electronic file transfer for mailers who provide an electronic manifest to the USPS. Certified Mail is dispatched and handled in transit as ordinary mail. Delivery of Certified Mail is subject to [508.1.0](#) and [508.2.0](#). No insurance coverage is provided. USPS maintains a record of delivery (which includes the recipient's signature) for a specified period of time. Customers may obtain a delivery record by purchasing return receipt service. See [6.0](#) for details.

3.2.2 Eligible Matter

Only mailable matter on which postage is paid at a First-Class Mail price (including Priority Mail) may be accepted as Certified Mail.

3.2.3 Additional Services

Purchasing Certified Mail service allows customers to then purchase restricted delivery service or a return receipt.

3.2.4 Delivery Record

Mailers may request a delivery record after mailing under [6.0](#), *Return Receipt*.

3.3 Mailing

3.3.1 Where to Mail

A mailer may mail Certified Mail at a Post Office, branch, or station or give it to a rural carrier. Certified Mail may also be deposited in a Post Office maildrop, a street letterbox, a nonpersonnel unit, or any other receptacle for First-Class Mail, subject to [3.3.5](#).

3.3.2 Available Destinations

Certified Mail may be addressed for delivery only in the United States and its territories and possessions, through APOs and FPOs, or through the United Nations Post Office, New York.

3.3.3 Form 3800

Certified Mail must bear a barcoded green Form 3800 (see [Exhibit 3.3.3](#)). The label part of the form must be placed above the delivery address and to the right of the return address, or to the left of the delivery address on parcels.

Sent To:	
Street, Apt. No., or PO Box No.	
City, State, ZIP+4	
PS Form 3800, June 2002 See Reverse for instructions	

3.3.4 Privately Printed Form 3800

If authorized, a mailer may use a privately printed Form 3800. The privately printed form must be nearly identical in design and color to the USPS form with a barcode and human readable numbers that meet the USPS specifications in Publication 109. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review by the mailpiece design analyst. Once approved, the mailer must print sample labels with barcodes to be certified under the technical requirements in Publication 109.

3.3.5 Procedure

A mailer of Certified Mail must:

- a. Enter on Form 3800 the name and complete address of the person or firm to whom the mail is addressed.
- b. If a return receipt is requested, check the block on the mailing receipt to show the fee. Near the Certified Mail endorsement on the address side, add the endorsement "Return Receipt Requested." Enter the Certified Mail number on the return receipt card, address it to himself or herself, and attach it to the back of a small envelope or on the front of a package or large envelope, if the card does not cover the address. Enter the name and delivery address on the reverse of the return receipt to show where the receipt is to be sent. When a return receipt is requested, a complete return address (sender's name and delivery address) is required on the mailpiece. The name and delivery address entered on the reverse of the return receipt do not have to match the sender's name and return address on the mailpiece.
- c. Affix to the envelope enough postage to pay for the Certified Mail fee and First-Class Mail price and, if requested, the return receipt fee.
- d. If a postmarked sender's receipt is requested, attach the Certified Mail sticker to the address side of the article and present the article and the completed receipt to the USPS employee, who then round-dates the receipt to show when the article was accepted. If asked to do so, the USPS employee also

shows on the receipt the time the article was accepted. Otherwise, attach the “Certified Mail” sticker to the address side of the article, detach the receipt, and mail the article. Mark the receipt to show the date.

- e. If restricted delivery of Certified Mail to the addressee or someone named by the addressee in writing is requested, endorse the mail “Restricted Delivery.” This service is available only for articles addressed to individuals by name.

3.3.6 Firm Sheet—Three or More Pieces

If three or more certified articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet) or privately printed firm sheets, in lieu of the receipt portion of Form 3800. Privately printed or computer-generated sheets that contain the same information as Form 3877 may be approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to Certified Mail. If the mailer wants the firm sheets receipted by the USPS, the mailer must present the books with the articles to be mailed at a Post Office. The sheets of the books become the mailer’s receipts. All entries made in firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line.

4.0 Insured Mail

4.1 Insured Mail Fees

4.1.1 Insurance Fees

Fee, in addition to postage and other fees, for merchandise insurance liability, per piece:

Amount for Merchandise Insurance Coverage Desired	Fee ¹
\$0.01 to \$50	\$1.70
50.01 to 100	2.15
100.01 to 200	2.60
200.01 to 300	4.60
300.01 to 400	5.55
400.01 to 500	6.50
500.01 to 600	7.45
600.01 to 5,000 (maximum liability is \$5000)	\$7.45 plus \$0.95 per \$100 or fraction thereof over \$600 in declared value

1. Bulk insurance discount \$0.80 per piece. (See 503.4.4 for eligibility.)

4.1.2 Fee and Postage

The applicable insurance fee must be prepaid in addition to the postage, except on official mail sent under applicable provisions. The fee and postage may be paid with postage stamps, meter stamps, or permit imprints. The mailer guarantees to pay return and forwarding postage, unless the mailer writes instructions on the wrapper or envelope not to forward or return the mail.

4.2 Basic Information**4.2.1 Description**

Insured mail provides the following features:

- a. Insured mail purchased at a retail Post Office provides up to \$5,000.00 indemnity coverage for a lost, rifled, or damaged article, subject to the standards for the service and payment of the applicable fee.
- b. Insured mail purchased online provides up to \$500 indemnity coverage for lost, rifled, or damaged articles, subject to the standards for the service and payment of the applicable fee.
- c. A bulk insurance discount is available for insured articles entered by authorized mailers who meet the criteria in 4.4. This service is not available for insurance purchased online.
- d. Insured mail service provides the mailer with a mailing receipt. No record of insured mail is kept at the office of mailing. For mail insured for \$200.00 or less, the USPS maintains delivery information (not including a signature) for a specified period of time. For mail insured for more than \$200.00, the USPS maintains a delivery record (which includes the recipient's signature) for a specified period of time. Customers may obtain a delivery record by purchasing additional services; see 6.0 for details.

4.2.2 Eligible Matter

The following types of mail may be insured:

- a. First-Class Mail (including Priority Mail), if it contains matter that may be mailed as Standard Mail or Package Services.
- b. Standard Mail pieces prepared as machinable or irregular parcels (bulk insurance only).
- c. Package Services and Parcel Select pieces.
- d. Official government mail endorsed "Postage and Fees Paid."

4.2.3 Ineligible Matter

The following types of mail may not be insured:

- a. Parcels containing matter offered for sale, addressed to prospective purchasers who have not ordered or authorized their sending. If such matter is mailed, payment is not made for loss, rifling, or damage.
- b. Nonmailable matter.
- c. Articles so fragile that they cannot be carried safely in the mail regardless of packaging.

- d. Articles not adequately prepared to withstand normal handling in the mail. As a rule, any mailable package should be insurable.
- e. Mail not bearing the complete names and addresses of the sender and addressee.
- f. Standard Mail letters, flats, and NFM's.
- g. Matter mailed at First-Class Mail prices (including Priority Mail) that consists of items described in [123.3.0, Content Standards for Priority Mail](#); [133.3.0, Content Standards](#); [233.2.0, Content Standards for First-Class Mail Letters](#); [333.2.0, Content Standards for First-Class Mail Flats](#); and [433.2.0, Content Standards for First-Class Mail Parcels](#), and required to be mailed at First-Class Mail prices.

4.2.4 Additional Services

Insuring an item for more than \$200.00 allows customers to purchase restricted delivery service or return receipt service. The following services may be purchased at a retail Post Office and combined with insurance if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation.
- b. Parcel airlift service (PAL).
- c. Return receipt for merchandise (for items insured for \$200.00 or less).
- d. Signature Confirmation.
- e. Special handling.

4.2.5 Delivery Record

Mailers may request a delivery record after mailing under [6.3.2](#).

4.3 Mailing

4.3.1 Where to Mail

Insured mail may be mailed as follows:

- a. A mailer must mail insured mail at a Post Office, branch, or station or give the mail to a rural carrier. Such mail may be placed in, but not on, a rural box. Such mail must not be placed in a Post Office maildrop or in or on a street letterbox. A mailer may leave the mail in a rural box with a note showing the requested amount of insurance, if stamps are affixed for postage and fees, or money for postage and fees is left in the box. The USPS is not liable for any article or money left in a rural box until the carrier receipts the article. A mailer at a nonpersonnel rural unit must meet the rural carrier at the unit for insurance service.
- b. A mailer who purchases insurance online may mail at a Post Office, branch, station, give the mail to the carrier assigned to that delivery address, or place the mail in a Post Office maildrop or a collection box. A mailer may leave the mail in a rural box, schedule a Pickup on Demand, or schedule a carrier pickup using www.usps.com. The USPS is not liable for any article or money left in a rural box until the carrier receipts the article.

4.3.2 USPS Inquiries

USPS employees are required to ask whether the mailpiece presented for insurance contains anything liquid, fragile, perishable, flammable, or potentially hazardous.

4.3.3 Markings and Forms

The treatment of pieces is determined by the insurance amount:

- a. Retail pieces insured for \$200.00 or less: The mailer must affix a barcoded Form 3813 (see [Exhibit 4.3.3a](#)) to each piece above the delivery address and to the right of the return address. No signature is obtained.

- c. Mail for which insurance is purchased online must include the text “Insured” in the indicia area of the online label; the markings in [4.3.3a](#) and [4.3.3b](#) are not required.
- d. All insured pieces, regardless of insurance amount, must be postmarked unless postage is paid by postage meter stamp, permit imprint, or PC Postage (when insurance is purchased online).

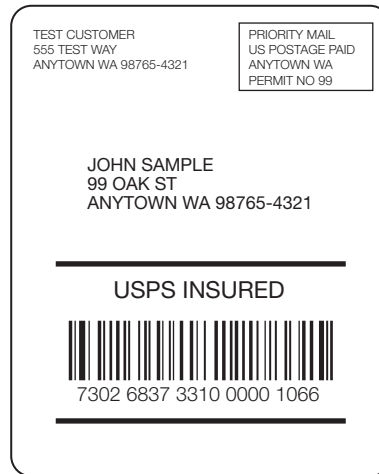

4.3.4 Privately Printed Form 3813-P

If authorized, a mailer may use a privately printed Form 3813-P for domestic mail only. The privately printed form must be nearly identical in design and color to the USPS form with a barcode and human readable numbers that meet the USPS specifications in Publication 109. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer’s location for review by the mailpiece design analyst. Once approved, the mailer must print sample labels with barcodes to be certified under the technical requirements in Publication 109.

4.3.5 Integrated Barcodes

The following options are available for mailers who print their own labels:

- a. An integrated barcode may be used by Confirmation Services electronic option mailers who wish to combine insurance with Delivery Confirmation or Signature Confirmation into a single barcode on the shipping label to eliminate multiple labels and barcodes on packages. Additional information on the integrated barcode solution can be found in Publication 91, *Confirmation Services Technical Guide*.
- b. Mailers have another option for printing labels with insurance (see [Exhibit 4.3.5b](#)). The privately printed label must meet the specifications described in Publication 91. Applicable certification procedures must be followed, also as specified in Publication 91.

Exhibit 4.3.5b Mailer-Printed Label With Integrated Barcode

- c. Mailers must use an integrated barcode (see [Exhibit 4.3.5c](#)) when insurance is purchased online for Priority Mail and for parcels mailed at First-Class Mail, Media Mail, Parcel Post, or Parcel Select prices. The online purchase of insurance is not available for parcels prepared using eVS under [705.2.9](#). This barcode combines insurance with electronic option Delivery Confirmation or Signature Confirmation into a single barcode on the shipping label. Additional information on the integrated barcode can be found in Publication 91, *Confirmation Services Technical Guide*.
1. Mailers may purchase insurance online for indemnity coverage of \$200.00 or less with electronic option Delivery Confirmation service. The human-readable text above the integrated barcode must state, “e/USPS DELIVERY CONFIRMATION.”
 2. Mailers may purchase insurance online for indemnity coverage of more than \$200.00, up to \$500, with electronic option Delivery Confirmation service. The human-readable text above the integrated barcode must state, “e/USPS INSURED.”
 3. Mailers may purchase insurance online for up to \$500 indemnity coverage and include the electronic option Signature Confirmation service. The human-readable text above the integrated barcode must state, “e/USPS INSURED.”

4.3.6 Prohibited Markings

Private insurance endorsements or markings may not appear on the address side of mail but may appear elsewhere, if they do not resemble official postal endorsements and are not confused with postal endorsements.

4.3.7 Receipt

Receipts are provided as follows:

- a. For each retail insured mail article, the mailer receives a USPS sales receipt and the appropriate postmarked (round-dated) insured mail form as follows:
 1. Form 3813 when the insurance coverage is \$200.00 or less.
 2. Form 3813-P when the insurance coverage is more than \$200.00.
- b. For each online mail article, the mailer has access to an electronic record of purchase and the option for a printed record of purchase as follows:
 1. A computer printout from the web-based application through which the label was printed and insurance was purchased. The printout must clearly identify the following information: the Delivery Confirmation or Signature Confirmation services number of the insured piece, total postage paid, insurance fee paid, declared value, declared mailing/shipping date, origin ZIP Code, and delivery ZIP Code.
 2. A printed online label record.

503.4.3.8

4.3.8 USPS Records

The USPS keeps no mailing records for insured pieces. The mailer must write the addressee's name and address on the receipt and keep it. The mailer must show the receipt when making a claim for loss or filing an inquiry.

4.3.9 Firm Sheet—Three or More Pieces

If three or more insured articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet) or privately printed firm mailing bills, in lieu of the receipt portion of Forms 3813 or 3813-P. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to insured mail. The mailer must present the books with the articles to be mailed at a Post Office. The sheets become the mailer's receipts. All entries made on firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line.

4.4 Bulk Insurance for Standard Mail**4.4.1 Eligibility**

To mail at the bulk insured service prices, mailers must obtain an authorization under [4.4.2](#) and must meet the following criteria:

- a. Enter mailings of insured articles under an approved manifest mailing system agreement.
- b. Mail a minimum of 10,000 insured articles annually. To meet the minimum volume requirement, mailers may total all insured articles mailed at multiple locations.
- c. Provide a printed Form 3877 or facsimile and a copy of Form 3877 on a disk or other electronic medium.
- d. Effective at a future date, provide a soft (electronic) copy of Form 3877 in a new, approved format.
- e. Mailings on which bulk insurance is requested must have postage and fees paid with permit imprint under a manifest mailing system ([705.2.0](#)).

4.4.2 Authorization

Mailers must apply for authorization to mail at the bulk insured service prices through their local postmaster or designee by completing the customer portion of the bulk insured service verification form. The postmaster or designee will verify on this form that the mailer meets the requirements in [4.4.1](#). If the mailer does not meet the requirements, the application will be denied. If the mailer meets the requirements in [4.4.1](#), the postmaster or designee will certify on the bulk insured service verification form that the mailer qualifies and forward the form to the manager of Claims Processing at the St. Louis Accounting Service Center (ASC). After reviewing the information, the ASC will notify the postmaster of their concurrence of the application and provide a range of claim numbers to be used by the mailer for filing claims. The postmaster or designee will then provide the customer with the approval of the application and with information needed to file claims, including the assigned claim numbers. At a future date, electronic filing of indemnity claims will

become mandatory. Prior to mandatory electronic claims filing, customers will be provided with the format instructions for the new electronic (soft copy) of Form 3877 and instructions for electronic filing of indemnity claims.

4.5 Delivery

An item insured for \$200.00 or less receives a delivery scan. An item insured for more than \$200.00 receives a delivery scan and the recipient's signature. Delivery of insured mail is subject to [508.1.0, Recipient Options](#), and [508.2.0, Conditions of Delivery](#).

5.0 Certificate of Mailing

5.1 Certificate of Mailing Fees

Individual Pieces	Fee
Individual article (Form 3817)	\$1.10
Duplicate copies of Form 3817 or mailing bill, per page	1.10
Firm mailing books (Form 3877), per article listed (minimum 3)	0.40
Bulk Quantities	Fee
For first 1,000 pieces (or fraction thereof)	\$6.00
Each additional 1,000 pieces (or fraction thereof)	0.70
Duplicate copy of Form 3606	1.10

5.1.1 Fee and Postage

In addition to the correct postage, the applicable certificate of mailing fee must be paid for each article on Form 3817 or for additional copies of either Form 3817 or Form 3877. The correct fee, based on the quantity mailed, must be paid in addition to postage for mailings of identical pieces of First-Class Mail (including Priority Mail) and Package Services. Mailers paying with ordinary stamps, precanceled stamps, or meter stamps reported on Form 3606 must affix stamps or meter stamps to pay the bulk certificate of mailing fees. Mailers using Form 3877 with a permit imprint mailing can pay certificate of mailing fees with permit imprint.

5.2 Basic Information

5.2.1 Description

Certificate of mailing service provides evidence that mail has been presented to the USPS for mailing. Certificate of mailing service does not provide a record of delivery.

5.2.2 Eligible Matter—Single Piece

Form 3817 is used for a certificate for a single piece of First-Class Mail (including Priority Mail) or Package Services. Facsimile forms also may be used.

5.2.3 Three or More Pieces

When requesting a certificate of mailing for three or more pieces presented at one time, a mailer may use Form 3877 (firm sheet) or a facsimile, subject to payment of the applicable fee for each item listed. Facsimile Forms 3877 must contain the same information as the postal-provided form. The sheets of the books become the sender's receipts. All entries made in firm sheets must be made by typewriter, ink, or

503.5.2.4

ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated by drawing a diagonal line through them.

5.2.4 Eligible Matter—Bulk Quantities

Form 3606 is used for a bulk mailing as a certificate to specify the number of pieces mailed. This certificate is provided only for a mailing of identical pieces of First-Class Mail, Standard Mail, and Package Services. This certificate states only the total number of articles mailed and must not be used as an itemized list. A certificate of mailing cannot be issued for a bulk mailing paid with a permit imprint.

5.2.5 Mailer Preparation

A certificate of mailing must be completed by the mailer, using a typewriter, ink, or ballpoint pen. Individual and firm sheet certificates must show the names and addresses of the sender and addressee and may show the amount of postage paid. The mailer may also place identifying invoice or order numbers on the certificate.

5.2.6 Additional Services

The following services may be combined with certificate of mailing on single pieces if the applicable standards for the services are met and the additional service fees are paid:

- a. Parcel airlift service (PAL).
- b. Special handling.

5.3 Presentation**5.3.1 Rural Carriers**

A mailer on a rural route or at a nonpersonnel rural unit may provide mail to the rural carrier with the fee for the certificate. The carrier obtains the certificate at the Post Office, attaches the stamps, cancels them by postmark, and delivers the certificate to the mailer on the next trip.

5.3.2 Quantity Mailings

When the number of articles ordinarily presented justifies such action, the mailer must comply with these standards:

- a. When the mailer wants individual certificates on Form 3817, the forms must be affixed by the stub to the pieces, or the forms must be numbered consecutively and fastened together.
- b. When the mailer describes and lists the pieces on firm sheets or approved forms, but does not present the pieces in the order shown on the sheets, the mailer must consecutively number each entry and lightly number each piece to show the sheet and line number on which described.

5.3.3 After Mailing

To obtain an additional certificate after mailing, the mailer must present the original certificate and an additional certificate endorsed "Duplicate" or a copy showing the original dates of mailing. The additional certificate must be postmarked to show the current date.

6.0 Return Receipt

6.1 Return Receipt Fees

6.1.1 Fees

Fee, in addition to postage and other fees, per piece:

Return Receipt (In conjunction with another service)	Fee
Requested at time of mailing (receive by mail)	\$2.20
Requested at time of mailing (receive electronically)	1.00
Requested after mailing (Form 3811-A) (receive by fax, mail, or e-mail)	4.35

6.1.2 Fee and Postage

The applicable fee for return receipt service must be paid in addition to postage and other fees. For purposes of computing postage, the weight of the return receipt is *excluded* from the weight of the mailpiece to which it is attached.

6.1.3 Refund

Return receipt fees are refunded only if the USPS fails to furnish a return receipt.

6.2 Basic Information

6.2.1 Description

Return receipt service provides a mailer with evidence of delivery (to whom the mail was delivered and date of delivery), along with information about the recipient's actual delivery address. A mailer purchasing return receipt service at the time of mailing may choose to receive the return receipt by mail or electronically. The electronic option is not available for items mailed to APO or FPO addresses or U.S. territories, possessions, or Freely Associated States listed in [608.2.0](#). A mailer purchasing return receipt service after mailing may choose to receive the proof of delivery record by fax, mail, or electronically. Electronic return receipts requested at the time of mailing also are available in bulk to mailers using privately printed Certified Mail, Registered Mail, insured mail (for more than \$200.00), or COD labels. Bulk delivery information can be obtained in CD-ROM or signature extract file formats. For additional information, see Publication 80, *Bulk Proof of Delivery Program*.

6.2.2 Eligible Matter

Return receipt service is available for:

- a. Express Mail (receive by mail (Form 3811) option only).
- b. First-Class Mail (including Priority Mail) when purchased at the time of mailing with Certified Mail, COD, insured mail (for more than \$200.00), or Registered Mail service.
- c. Standard Mail prepared as parcels when bulk insurance (for more than \$200.00) is purchased at the time of mailing.

503.6.2.3

- d. Package Services when purchased at the time of mailing with COD or insured mail (for more than \$200.00).

6.2.3 Endorsement

Mail for which return receipt service is requested by mail (Form 3811) must be endorsed "Return Receipt Requested" above the delivery address and to the right of the return address. No endorsement is required on mail for which electronic return receipt service is requested or is provided in bulk via a signature extract file or a CD-ROM.

6.2.4 Additional Services

If return receipt service has already been purchased with one of the services listed in [6.2.2](#) then one or more of the following extra services may be combined with those services at the time of mailing if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation (First-Class Mail parcels, Priority Mail, Package Services, and Parcel Select parcels).
- b. Parcel airlift service (PAL) (Priority Mail and Package Services).
- c. Restricted delivery.
- d. Signature Confirmation (Priority Mail, Package Services, and Parcel Select parcels).
- e. Special handling.

6.2.5 Privately Printed Form 3811

If authorized, a mailer may use a privately printed Form 3811. The privately printed form must be nearly identical in design and color to postal-provided forms. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review and approval by the mailpiece design analyst.

6.3 Obtaining Service**6.3.1 At Time of Mailing**

The mailer may request the service at the time of mailing by using Form 3811 and marking the mail "Return Receipt Requested." A firm mailer must complete the mailer's entries on the form, including the article identification number; attach the form; and place the correct one on the article. The name and address of the person or organization to which the return receipt is to be returned must be that of the mailer or the mailer's agent. The mailpiece must bear the return address of either the mailer or mailer's agent.

6.3.2 After Mailing

The mailer may request a delivery record after mailing for Express Mail, Certified Mail, Registered Mail, COD mail, and mail insured for more than \$200.00. When a delivery record is available, the USPS provides the mailer information from that record, including to whom the mail was delivered and the date of delivery. The mailer requests a delivery record by completing Form 3811-A, paying the appropriate fee in [6.1.1](#), and submitting the request to the appropriate office as follows:

- a. For items mailed to an APO/FPO, U.S. territory or possession, or freely associated state (with the exception of Puerto Rico and the U.S. Virgin Islands), the form should be sent to the office of delivery.
- b. For all other items, send the form to any Post Office.

6.3.3 Time Limit

A request for a return receipt after mailing for Express Mail must be submitted within 90 days after the date of mailing. All other requests must be submitted within 2 years from the date of mailing.

6.4 Delivery

Delivery of mail for which a return receipt is requested is subject to [508.1.0, Recipient Options](#), and [508.2.0, Conditions of Delivery](#).

6.5 Requests for Delivery Information

6.5.1 Receipt Not Received

After a reasonable period, not longer than 2 years after the date of mailing, a mailer who did not receive return receipt service for which the mailer had paid may request information from the delivery record, using Form 3811-A. Any request for such information for Express Mail must be filed within 90 days after the date of mailing.

6.5.2 Form 3811-A

The mailer must complete Form 3811-A at any Post Office. The applicable fee is waived if the mailer can produce a receipt showing that the applicable return receipt fee was paid.

6.5.3 Fee Not Charged

The fee for a return receipt after mailing is not charged for a duplicate receipt for Certified Mail if the original Form 3800 was date-stamped by a Post Office at the time of mailing.

7.0 Restricted Delivery

7.1 Restricted Delivery Fee

7.1.1 Fee

Fee, in addition to postage and other fees, per piece: \$4.30.

7.1.2 Fee and Postage

The applicable fee for restricted delivery service must be paid in addition to postage and other fees. The fee and postage may be paid with postage stamps, meter stamps, or permit imprint.

7.1.3 Refund

Restricted delivery fees are refunded only when the USPS fails to give restricted delivery service.

7.2 Basic Information

7.2.1 Description

Restricted delivery service permits a mailer to direct delivery only to the addressee or addressee's authorized agent. The addressee must be an individual (or natural person) specified by name.

7.2.2 Eligible Matter

Restricted Delivery service is available for:

- a. First-Class Mail (including Priority Mail) when purchased at the time of mailing with Certified Mail, COD, insured mail (for more than \$200.00), or Registered Mail service.
- b. Standard Mail prepared as machinable or irregular parcels when bulk insurance (for more than \$200.00) is purchased at the time of mailing.
- c. Package Services or Parcel Select pieces when purchased at the time of mailing with COD or insured mail (for more than \$200.00).

7.2.3 Endorsement

Mail for which restricted delivery service is requested must be endorsed "Restricted Delivery." The endorsement must be placed above the address and to the right of the return address.

7.2.4 Return Receipt

The mailer may obtain a return receipt by paying the applicable fees.

7.2.5 Additional Services

In addition to the prerequisites listed in [7.2.2](#), the following services may be combined with restricted delivery if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation.
- b. Parcel airlift service (PAL).
- c. Signature Confirmation.
- d. Special handling.

7.3 Obtaining Service

7.3.1 At Time of Mailing

The mailer may request restricted delivery at the time of mailing by advising the USPS clerk or by marking the mail "Restricted Delivery." A firm mailer must enter the proper fee in the correct column of the firm sheet and place the required endorsement on the mail. If a return receipt is requested, the correct block on Form 3811 must be checked to show that restricted delivery is also required.

7.3.2 After Mailing

The mailer may request restricted delivery after mailing by notifying the mailing Post Office in writing. The mailer must identify the article, including item number and addressee, and pay the service fee and communication costs required to effect

restricted delivery. USPS failure to provide the service because delivery was made before the delivery office received the request is not grounds for a refund of the fee or communication costs.

7.4 Delivery

7.4.1 Conditions

Mail marked “Restricted Delivery” is delivered only to the addressee or to the person authorized in writing as the addressee’s agent to receive the mail, subject to [508.1.0, Recipient Options](#), and [508.2.0, Conditions of Delivery](#), and these exceptions:

- a. Mail for famous personalities and executives of large organizations is normally delivered to an agent authorized to sign for such mail.
- b. Mail for officials of executive, legislative, and judicial branches of the government of the United States or of the states and possessions and their political subdivisions, or to members of the diplomatic corps, may be delivered to a person authorized by the addressee or by regulations or procedures of the agency or organization to receive the addressee’s mail.
- c. Mail for the commander, staff sections, or other officials of military organizations by name and title, is delivered to the unit mail clerk, mail orderly, postal clerk, assistant postal clerk, or postal finance clerk, when such individuals are designated on DD (Department of Defense) Form 285 to receipt for all mail addressed to the units for which they are designated. If the person accepting mail is designated on DD Form 285 to receipt for ordinary mail only, then restricted delivery mail addressed to the commander, or other official by name and title, is delivered to the mail clerk only if the addressee authorizes under [7.4.3](#).
- d. Mail for an inmate of a city, state, or federal penal institution, in cases where a personal signature cannot be obtained, is delivered to the warden or designee.
- e. Mail for minors or persons under guardianship may be delivered to their parents or guardians.

7.4.2 Identification

The USPS may require proof of identification from the addressee (or agent).

7.4.3 Agent Authorization

An addressee who regularly receives restricted delivery mail may authorize an agent on Form 3801 or by letter to the postmaster. The addressee must make the notation “this authorization is extended to include restricted delivery mail” on Form 3801 (in the area for signatures of authorized agents) or in the letter to the postmaster. Form 3849 may be left for the authorization if the Post Office has no standing delivery order or letter on file. The addressee may enter the name of the agent on the back of Form 3849 in the space provided and sign the form. The agent must sign for receipt of the article on the back of the form.

7.4.4 Joint Addressees

When mail is addressed to two or more persons jointly (as shown by the word “and” or symbol “&” connecting their names), all addressees or their agents are notified to be present to accept delivery together. The delivery receipt obtained and the return

503.7.4.5

receipt, if any, must be signed by all joint addressees or their agents. The mail may then be delivered to any of the addressees or their agents unless one or more addressees or their agents object, in which case delivery is not made until all the addressees or their agents sign a statement designating who is to receive the mail.

7.4.5 Addressed “In Care Of”

Either person may sign for mail addressed to one person in care of another.

8.0 Return Receipt for Merchandise

8.1 Return Receipt for Merchandise Fees

8.1.1 Fees

Fee, in addition to postage and other fees, per piece: \$3.60.

8.1.2 Fee and Postage

The applicable fee for return receipt for merchandise service must be paid in addition to the correct postage and the fees for any other service selected. The fees and postage may be paid with stamps, meter stamps, or permit imprint. The fees and postage on official mail of federal government agencies and departments are collected under applicable reimbursement procedures.

8.2 Basic Information

8.2.1 Description

Return receipt for merchandise service is a form of return receipt service that provides the sender with a mailing receipt (PS 3804) and a return receipt (PS 3811). After delivery, the return receipt is mailed back to the sender. A delivery record is maintained by the USPS, but no record is kept at the office of mailing. A return receipt for merchandise also supplies the recipient's actual delivery address if it is different from the address used by the sender. Mail using this service is dispatched and handled in transit as ordinary mail. This service does not include insurance coverage. A return receipt for merchandise may not be requested after mailing, and restricted delivery service is not available.

8.2.2 Eligible Matter

Return receipt for merchandise is available for merchandise sent as Priority Mail, Standard Mail machinable and irregular parcels, Package Services, and Parcel Select pieces.

8.2.3 Return Receipt for Merchandise for Standard Mail

If return receipt for merchandise is requested for all of the pieces in the mailing and the mailing consists of pieces of identical weight, then postage may be paid with metered postage or permit imprint under the applicable standards in [244.2.0](#) for letters, [344.2.0](#) for flats, and [444.2.0](#) for parcels. If return receipt for merchandise is not requested for all of the pieces in the mailing, or if the pieces are not identical weight, then either the exact metered postage must be affixed to each piece or postage must be paid with permit imprint under a manifest mailing system ([705.2.0](#)). Use of precanceled stamps is not permitted with return receipt for merchandise.

8.2.4 Additional Services

The following services may be combined with return receipt for merchandise if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation.
- b. Insurance (for up to \$200.00).
- c. Parcel airlift service (PAL).
- d. Special handling.

8.3 Mailing

8.3.1 Where to Mail

A mailer must mail articles at a Post Office, branch, or station or give them to a rural carrier. Articles must not be placed in Post Office maildrops or in or on street collection boxes. They may be placed in, but not on, rural mailboxes.

8.3.2 How to Mail

[9-11-08] A mailer can obtain Form 3804 and Form 3811 (return receipt) at the Post Office or from any rural carrier. Observe these procedures:

- a. Enter on the receipt part of the return receipt for merchandise, the name and complete address of the person or firm to whom the mail is addressed.
- b. Affix the numbered part of the gummed label from Form 3804 to the mailpiece.
- c. Place the correct endorsement on the address side. Enter the return receipt for merchandise number on Form 3811. Address the form to yourself and attach it to the front of the mailpiece. If the Form 3811 would cover the address, attach it to the back of the mailpiece. The name of the person to whom the return receipt is to be returned must be the same as that of the sender. If the return receipt is to show the address where the article was delivered, check the block at the top of Form 3811.
- d. Attach to the article, enough postage to pay for the postage price desired, the return receipt for merchandise fee, and the special handling fee.
- e. Attach the return receipt for merchandise label to the address side of the article and give the completed receipt to a USPS employee. If asked to do so, the USPS employee must show on the receipt the time the article is accepted for mailing. If given to a rural carrier, the carrier returns the postmarked receipt to the customer.
- f. By signing the waiver on Form 3804, customers are instructing the USPS to deliver the item without obtaining the addressee's or addressee's agent's signature. Completion of the waiver of signature authorizes the delivery employee to sign upon delivery. The item is delivered to the addressee's mail receptacle or other secure location. To request waiver of signature, detach both parts of the gummed sections of label 3804 and attach to the mailpiece.

8.3.3 Available Destinations

Return receipt for merchandise mail may be addressed for delivery only in the United States and its territories and possessions, through Army/Air Force (APO) and Navy (FPO) Post Offices, or through the United Nations Post Office, New York.

8.3.4 Form 3804

Return receipt for merchandise mail must bear a barcoded brown Form 3804 (see Exhibit 8.3.4). The label part of the form and the endorsement “Return Receipt Requested” must be placed above the delivery address and to the right of the return address, or to the left of the delivery address on parcels.

Exhibit 8.3.4 Form 3804

The image shows the U.S. Postal Service Form 3804, Return Receipt for Merchandise. The form is divided into several sections:

- Top Left:** A vertical barcode with the number 8099 3400 0000 5773 9080 printed vertically on either side.
- Top Center:** The text "RETURN RECEIPT FOR MERCHANDISE" printed vertically.
- Top Right:** The title "U.S. Postal Service RETURN RECEIPT FOR MERCHANDISE (Domestic Mail Only; No Insurance Coverage Provided)" and a large "OFFICIAL USE" stamp.
- Middle Left:** A signature waiver section with the text: "I wish delivery to be made without obtaining signature of the addressee or the addressee's agent. I authorize the delivery employee to sign that the shipment was delivered and understand that the signature of the delivery employee will constitute valid proof of delivery." Below this is a "CUSTOMER SIGNATURE" line.
- Middle Right:** A postage table with columns for "Postage", "Return Receipt for Merchandise Fee (Endorsement Required)", "Special Handling Fee", and "Total Postage & Fees". There is also a "Waiver of Signature" section with checkboxes for YES and NO.
- Bottom:** A "Sent To" address field with lines for "Street, Apt. No., or PO Box No." and "City, State, ZIP+4".
- Bottom Right:** A "Postmark Here" area.
- Bottom Left:** The number 8099 3400 0000 5773 9080 printed vertically.
- Bottom Center:** The text "PS Form 3804, June 2002".
- Bottom Right:** The text "See Reverse for Instructions".

8.3.5 Privately Printed Form 3804

If authorized, a mailer may use a privately printed Form 3804. The privately printed form must be nearly identical in design and color to the USPS form with a barcode and human readable numbers that meet the USPS specifications in Publication 109. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review by the mailpiece design analyst. Once approved, the mailer must print sample labels with barcodes to be certified under the technical requirements in Publication 109.

8.3.6 Firm Sheet—Three or More Pieces

If three or more return receipt for merchandise articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet), provided by the USPS at no charge, or privately printed firm sheets, in lieu of the receipt portion of Form 3804. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to return receipt for merchandise mail. The mailer must present the books with the articles to be mailed at a Post Office. The sheets of the books become the mailer's receipts. All entries made in firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line.

8.3.7 Receipt Not Received

A mailer who does not receive return receipt for merchandise service for which the mailer has paid may request information from the delivery record, at no additional charge, by using Form 3811-A. Any request must be filed within 2 years after the date of mailing. Mailers cannot request a delivery record unless the item originally was sent with return receipt for merchandise.

8.4 Delivery

Delivery of return receipt for merchandise mail is subject to [508.1.0, Recipient Options](#), and [508.2.0, Conditions of Delivery](#).

9.0 Delivery Confirmation**9.1 Delivery Confirmation Fee****9.1.1 Fee**

Fee, in addition to postage and other fees, per piece:

Delivery Confirmation		Fee
First-Class Mail (parcels only)	Retail	\$0.75
	Electronic	0.18
Priority Mail	Retail	0.65
	Electronic	0.00
Package Services (parcels only)	Retail	0.75
	Electronic	0.18
Standard Mail (NFMs and parcels)	Electronic	0.18
Parcel Select Destination Entry	Electronic	0.00
Parcel Select (all other)	Electronic	0.18

9.1.2 Fees and Postage

The applicable Delivery Confirmation fee in [9.1.1](#) must be paid in addition to the correct postage. The fee and postage may be paid with postage stamps, meter stamps, or permit imprint. Precanceled stamps are not permitted as postage payment.

9.2 Basic Information**9.2.1 Description**

Delivery Confirmation service provides the mailer with information about the date and time an article was delivered and, if delivery was attempted but not successful, the date and time of the delivery attempt. Delivery Confirmation service is available only at the time of mailing. No record is kept at the office of mailing. Delivery Confirmation service does not include insurance, but insurance may be purchased as an additional service (see [9.2.6](#)). Some statutes and regulations governing the mailing of documents with legal significance may require the use of Certified Mail or Registered Mail rather than Delivery Confirmation.

503.9.2.2

9.2.2 Eligible Matter

Delivery Confirmation is available for First-Class Mail parcels; all Priority Mail pieces; Standard Mail prepared as Not Flat-Machinable pieces or as machinable or irregular parcels (electronic option only); and Package Services or Parcel Select parcels under [401.1.0](#). For the purposes of using Delivery Confirmation with a Package Services or Parcel Select parcel, the parcel must meet these additional requirements:

- a. The surface area of the address side of the parcel must be large enough to contain completely and legibly the delivery address, return address, postage, and any applicable markings, endorsements, and extra service labels.
- b. Except as provided in [9.2.2c](#), the parcel must be greater than 3/4 inch thick at its thickest point.
- c. If the mailpiece is a parcel under [401.1.0](#) and no greater than 3/4 inch thick, the contents must be prepared in a strong and rigid fiberboard or similar container or in a container that becomes rigid after the contents are enclosed and the container is secured. The parcel must be able to maintain its shape, integrity, and rigidity throughout processing and handling without collapsing into a letter-size or flat-size piece.

9.2.3 Electronic Option Delivery Confirmation for Standard Mail

If electronic option Delivery Confirmation is requested for all of the pieces in the mailing and the mailing consists of pieces of identical weight, then postage may be paid with metered postage or permit imprint under the applicable standards in [444.2.0](#) for parcels and Not Flat-Machinable pieces. If electronic option Delivery Confirmation is not requested for all of the pieces in the mailing, or if the pieces are not identical weight, then either the exact metered postage must be affixed to each piece or postage must be paid with permit imprint under a manifest mailing system ([705.2.0](#)). Use of precanceled stamps is not permitted with Delivery Confirmation.

9.2.4 Ineligible Matter

Delivery Confirmation is not available for the following:

- a. Express Mail and Periodicals pieces.
- b. First-Class Mail letter-size and flat-size pieces.
- c. Standard Mail letters and flats and all Enhanced Carrier Route Standard Mail pieces.
- d. Package Services letter-size and flat-size pieces.
- e. Mail paid with precanceled stamps.
- f. Mail addressed to restricted APO/FPO destinations.

- g. Mail addressed to any U.S. territory, possession, or Freely Associated State listed in 608.2.0, with the exception of Puerto Rico, U.S. Virgin Islands, and the following ZIP Codes:

American Samoa	96799
Guam	96910, 96912-13, 96915-17, 96919, 96921, 96923, 96928-29, 96931-32
Rota Island	96951
Saipan Island	96950
Wake Atoll	96898

9.2.5 Service Options

The two Delivery Confirmation service options are:

- a. Retail option: Available at Post Offices at the time of mailing. A mailing receipt is provided. Mailers can access delivery information over the Internet at www.usps.com or by calling 1-800-222-1811 toll-free and providing the article number.
- b. Electronic option: Available to mailers who establish an electronic link with the USPS to exchange acceptance and delivery data. No mailing receipt is provided.

9.2.6 Additional Services

Delivery Confirmation may be combined with:

- a. Collect on delivery (COD).
- b. Insured mail.
- c. Registered Mail.
- d. Restricted delivery, if purchased with insurance for more than \$200.00, COD, or Registered Mail service.
- e. Return receipt, if purchased with insurance for more than \$200.00, COD, or Registered Mail service.
- f. Return receipt for merchandise.
- g. Special handling.

9.2.7 Where to Mail

A mailer may mail articles with retail option Delivery Confirmation at a Post Office, branch, or station, or give articles to a rural carrier.

9.2.8 Firm Sheets—Three or More Pieces

If three or more articles are presented for mailing at one time, the mailer may use Form 3877 provided by the USPS at no charge, or privately printed firm sheets. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be used if approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to Delivery Confirmation mail. Required elements are the package identification code (PIC), 5-digit destination ZIP Code, and applicable fees. If the mailer wants the firm sheets receipted by the USPS, the mailer must present the books with the articles to be mailed at a Post Office. The sheets of the books are the mailer's receipts. All entries

made in firm sheets must be made by typewriter or ink. Alterations must be initialed by the mailer and accepting postal employee. All unused portions of the addressee column must be obliterated with a diagonal line. A receipt is required for refund requests.

9.3 Labels

9.3.1 Types of Labels

Mailers must use one of the label options shown below (for additional information see Publication 91, *Confirmation Services Technical Guide*):

- a. Form 152, obtained from the Post Office at no charge. This form may be used only with the retail option (see [Exhibit 9.3.1a, Form 152](#)).

Exhibit 9.3.1a Form 152

- b. Label 314, available at no charge to electronic option mailers (see [Exhibit 9.3.1b, Label 314](#)).

Exhibit 9.3.1b Label 314

- c. Privately printed barcoded labels that meet the requirements in 9.3 and 9.4 (see Exhibit 9.3.1c). On the Priority Mail label, mailers must use the registered trademark symbol following the Priority Mail text or add the following statement at the bottom of the label in at least 6-point Helvetica type: "Priority Mail is a registered trademark of the U.S. Postal Service."

 9101 0268 3733 1000 0010 16	
ELECTRONIC RATE APPROVED #026837331	

9.3.2 Label Placement

The barcoded label section of Label 314 or Form 152 must be placed either above the delivery address and to the right of the return address or to the left of the delivery address. A privately printed Delivery Confirmation label that is separate from the address label must be placed in close proximity to the address label. In all cases, the entire Delivery Confirmation label must be placed on the address side and not overlap any adjacent item.

9.4 Barcodes

9.4.1 Symbology

Labels printed by mailers must meet the following barcode symbology requirements:

- a. Mailers printing their own barcodes and using the retail service option (9.2.5a) must use the Automatic Identification Manufacturers' (AIM) Uniform Specifications for USS Code Interleaved 2 of 5 barcode symbology. Each barcode must contain a unique Package Identification Code (PIC) as specified in 9.4.2. Barcodes also must meet the specifications in Publication 91.

503.9.4.2

- b. Mailers printing their own barcodes and using the electronic service option (9.2.5b) must use the UCC/EAN Code 128 barcode symbology. Each barcode must contain a unique PIC as specified in 9.4.2. Barcodes also must meet the specifications in Publication 91. Refer to 507.11.0 for Delivery Confirmation with Merchandise Return Service.

9.4.2 Package Identification Code (PIC)

Each barcode symbology must contain a unique PIC:

- a. For UCC/EAN 128, each barcode must contain a unique PIC and be made up of five fields totaling 22 characters. Additional information and specifications can be found in Publication 91. The five required data fields are:
 - 1. Application Identifier (AI): two characters; identifies the article as a Delivery Confirmation piece.
 - 2. Service Type Code (STC): two characters; identifies the type of product or service used for each item.
 - 3. Customer ID: nine characters; DUNS® number that uniquely identifies the customer.
 - 4. Package Sequence Number (PSN): eight characters; fixed sequential number.
 - 5. Modulus 10 Check digit: one character.
- b. For USS Code Interleaved 2 of 5, each barcode must contain a unique PIC and be made up of four fields totaling 20 characters. The four required data fields are fields 2 through 5 above. Additional information and specifications can be found in Publication 91. This symbology does not use an Application Identifier (AI).

9.4.3 Printing

Labels printed by mailers must meet the following specifications:

- a. Each barcoded label must bear a unique Delivery Confirmation PIC barcode as specified in 9.4.2. The text “USPS DELIVERY CONFIRMATION” (if using retail service option, as specified in 9.2.5) or “e/USPS DELIVERY CONFIRMATION” (if using electronic service option, as specified in 9.2.5, and the postage is evident on the mailpiece) must be printed between 1/8 inch and 1/2 inch above the barcode in minimum 12-point bold sans serif type. The indicator “e/” or the optional “ELECTRONIC PRICE APPROVED #[DUNS® NUMBER]” text is not used for Delivery Confirmation Electronic Verification System (eVS) mailpieces (see 705.2.9). Additionally, mailers approved for the electronic service option, at their discretion, may print the text “ELECTRONIC PRICE APPROVED #[DUNS® NUMBER]” in minimum 8-point bold sans serif type directly below the bottom horizontal identification bar (see Exhibit 9.4.3). Human-readable characters that represent the barcode ID must be printed between 1/8 inch and 1/2 inch under the barcode in minimum 10-point bold sans serif type. These characters must be parsed in accordance with Publication 91. A minimum 1/8-inch clearance must be between the barcode and any printing. The preferred range of widths of narrow bars and spaces is 0.015 inch to 0.017 inch. The width of the narrow bars or spaces must be at least 0.013 inch

but no more than 0.021 inch. All bars must be at least 3/4 inch high. Minimum 1/16-inch bold bars must appear between 1/8 inch and 1/2 inch above and below the human-readable endorsements to segregate the Delivery Confirmation barcode from other areas of the shipping label. The line length should extend across the width of the label but must extend the length of the barcode at a minimum (see [Exhibit 9.3.1c](#)). Only information relating to Delivery Confirmation and other extra services must be placed between these lines.

- b. Each barcode must meet the requirements in [9.4.1](#) for the type of service requested.
- c. Mailers must obtain USPS certification for each printer used to print barcoded Delivery Confirmation labels. For certification, a mailer must forward for evaluation and approval 10 barcoded labels/forms generated by each printer to the National Customer Service Center (NCSC), Attention Barcode Certification (see [608.8.0](#) for address). The USPS will issue the mailer a Form 3152 for each printer certified. All barcodes must be in accordance with [9.3](#) and [9.4](#). Further certification instructions are included in Publication 91.
- d. Barcodes that do not meet specifications will not be accepted by the USPS. The USPS will contact the mailer if problems with the barcodes are found and will try to resolve the problem. The USPS may suspend a mailer's certification if electronic file quality does not meet specifications.

Exhibit 9.4.3 Electronic Service Option Identification

9.4.4 Integrated Barcodes

An integrated barcode may be used by mailers printing their own barcodes and using the electronic service option. Mailers may combine Delivery Confirmation and insurance services into a single barcode on the shipping label and eliminate multiple labels and barcodes on packages. Mailers must still meet existing specifications in [9.4.1](#) and [9.4.2](#). Minor modifications allow users to request multiple extra services on Priority Mail and Package Services. Two required changes are:

- a. Change the text above the barcode to identify the service requested. Exhibits are included in Publication 91.
- b. Change the service type code in the barcode to identify the class of mail and/or type of extra services combined with Delivery Confirmation. Additional information on the Service Type Code Matrix can be found in Publication 91.

503.9.5

9.5 Electronic File Transmission

Mailers must meet the following standards for electronic file transmission:

- a. Publication 91 contains specifications for electronic file transmission. A test file transmission must be uploaded and approved before mailings begin. Upon certification, the USPS will issue the mailer Form 3152.
- b. Mailers using the electronic option must transmit a file with a unique record for each article mailed. The USPS will contact the mailer if problems with the file are found and will try to resolve those problems. The USPS may suspend a mailer's certification if the electronic file quality does not meet specifications. In addition, USPS acceptance units will be notified to charge the customer the retail Delivery Confirmation fee.
- c. Mailers using the electronic option must include additional fields in the electronic file when planning to use the integrated barcode. For more information consult Publication 91.

9.6 Acceptance

Customers must meet the following requirements when presenting electronic option Delivery Confirmation mail for acceptance:

- a. Presorted or permit imprint mailings containing pieces for which fees are paid for Delivery Confirmation service must be presented to a Post Office business mail entry unit (BMEU), detached mail unit (DMU) at the mailer's plant, bulk mail center or auxiliary service facility business mail entry unit, or other postal facility capable of properly verifying the mailing and at which the mailer has obtained the necessary permits or license and paid any applicable mailing fee.
- b. Mailers who use the electronic option or print their own labels must submit a copy of the original Form 3152 with their first mailing using Confirmation Services (see exception in 9.6c). The business mail or detached mail entry unit office will retain a copy of the form. However, mailers who wish to obtain an electronic entry scan must submit Form 3152 with each mailing to include the electronic file number associated with that mailing. The electronic file number on the form must be in either a barcode format (preferred) or written on the form. All barcode formats must comply with the standards in Publication 91. Mailers should keep the certification form on file while using Confirmation Services. If requested by the USPS, the form must be presented within 24 hours.
- c. Mailers of single-piece price mail with postage affixed using the electronic option price are not required to submit Form 3152 with their initial mailing. This includes mailings generated from the USPS online shipping label application at www.usps.com or labels generated from a third-party vendor or system that supports the electronic option prices. All labels must meet USPS format and design requirements, including the "e" (electronic price) endorsement in the barcode text line.

10.0 Signature Confirmation

10.1 Signature Confirmation Fees

10.1.1 Fee

Available for First-Class Mail parcels, Priority Mail, Package Services, and Parcel Select parcels. Fee, in addition to postage and other fees, per piece:

Signature Confirmation		Fee
First-Class Mail (parcels only)	Retail	\$2.20
	Electronic	1.80
Priority Mail	Retail	2.20
	Electronic	1.80
Package Services (parcels only)	Retail	2.20
	Electronic	1.80
Parcel Select	Electronic	1.80

10.1.2 Fees and Postage

The applicable Signature Confirmation fee in [10.1.1](#) must be paid in addition to the correct postage. The fee and postage may be paid with postage stamps, meter stamps, or permit imprint. Precanceled stamps are not permitted as postage payment.

10.2 Basic Information

10.2.1 Description

Signature Confirmation service provides the mailer with information about the date and time an article was delivered and, if delivery was attempted but not successful, the date and time of the delivery attempt. A delivery record, including the recipient's signature, is maintained by the USPS and is available, via fax or mail, upon request. No acceptance record is kept at the office of mailing. Signature Confirmation service is available only at the time of mailing. Signature Confirmation service does not include insurance, but insurance may be purchased as an additional service (see [10.2.6](#)). Some statutes and regulations governing the mailing of documents with legal significance may require the use of Certified Mail or Registered Mail rather than Signature Confirmation.

10.2.2 Eligible Matter

Signature Confirmation is available for First-Class Mail parcels, Package Services and Parcel Select parcels defined in [401.1.0](#), and for all Priority Mail pieces. For the purposes of using Signature Confirmation with a Package Services or Parcel Select parcels, the parcel must meet these additional requirements:

- a. The surface area of the address side of the parcel must be large enough to contain completely and legibly the delivery address, return address, postage, and any applicable markings, endorsements, and extra service labels.
- b. Except as provided in [10.2.2c](#) for machinable parcels, the parcel must be greater than 3/4 inch thick at its thickest point.
- c. If the mailpiece is a machinable parcel under [401.1.0](#) and no greater than 3/4 inch thick, the contents must be prepared in a strong and rigid fiberboard or similar container or in a container that becomes rigid after the contents are

503.10.2.3

enclosed and the container is secured. The parcel must be able to maintain its shape, integrity, and rigidity throughout processing and handling without collapsing into a letter-size or flat-size piece.

10.2.3 Ineligible Matter

Signature Confirmation is not available for the following:

- a. Express Mail, Periodicals, and Standard Mail pieces.
- b. First-Class Mail letter-size and flat-size pieces.
- c. Package Services letter-size and flat-size pieces.
- d. Mail paid with precanceled stamps.
- e. Mail addressed to APO/FPO destinations.
- f. Mail addressed to any U.S. territory, possession, or Freely Associated State listed in [608](#), with the exception of Puerto Rico and the U.S. Virgin Islands.

10.2.4 Service Options

The two Signature Confirmation service options are:

- a. Retail option: Available at Post Offices at the time of mailing. A mailing receipt is provided. Mailers can access delivery information over the Internet at www.usps.com or by calling 1-800-222-1811 toll-free and providing the article number.
- b. Electronic option: Available to mailers who establish an electronic link with the USPS to exchange acceptance and delivery data. No mailing receipt is provided.

10.2.5 Proof of Delivery

Proof of delivery information for Signature Confirmation is available as follows:

- a. Individual requests by article number can be retrieved at www.usps.com or by calling 1-800-222-1811. A proof of delivery letter is provided via fax or mail.
- b. Bulk proof of delivery letters are available only to mailers using Signature Confirmation service electronic option or privately printed labels. Bulk proof of delivery letters can be obtained in CD-ROM or Signature Extract File formats. For additional information see Publication 80, *Bulk Proof of Delivery Program*.

10.2.6 Additional Services

Signature Confirmation may be combined with:

- a. Collect on delivery (COD).
- b. Insured mail.
- c. Registered Mail.
- d. Restricted delivery, if purchased with insurance for more than \$200.00, COD, or Registered Mail service.
- e. Return Receipt (PS Form 3811), if purchased with insurance for more than \$200.00, COD, or Registered Mail service.
- f. Special handling.

10.2.7 Where to Mail

A mailer may mail articles with retail option Signature Confirmation at a Post Office, branch, or station, or give articles to a rural carrier.

10.2.8 Firm Sheets—Three or More Pieces

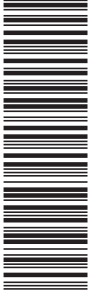

If three or more articles are presented for mailing at one time, the mailer may use Form 3877 provided by the USPS at no charge, or privately printed firm sheets. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be used if approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to Signature Confirmation mail. Required elements are the package identification code (PIC), 5-digit destination ZIP Code, and applicable fees. If the mailer wants the firm sheets receipted by the USPS, the mailer must present the books with the articles to be mailed at a Post Office. The sheets of the books are the mailer's receipts. All entries made in firm sheets must be made by typewriter or ink. Alterations must be initialed by the mailer and accepting postal employee. All unused portions of the addressee column must be obliterated with a diagonal line. A receipt is required for refund requests.

10.3 Labels**10.3.1 Types of Labels**

Mailers must use one of the label options shown below (for additional information see Publication 91, *Confirmation Services Technical Guide*):

- a. Form 153, obtained from the Post Office at no charge. This form may be used only with the retail option (see [Exhibit 10.3.1a](#)).

Exhibit 10.3.1a Form 153

United States Postal Service® SIGNATURE CONFIRMATION™	 2303 2160 0000 0884 1158	U.S. Postal Service™ Signature Confirmation™ Receipt Postage and Signature Confirmation fees must be paid before mailing. Article Sent To: (to be completed by mailer) _____ _____ _____ (Please Print Clearly)
	SIGNATURE CONFIRMATION NUMBER: 2303 2160 0000 0884 1158	Postmark Here
PS Form 153, January 2005		(See Reverse)

- b. Label 315, available at no charge to electronic option mailers (see [Exhibit 10.3.1b](#)).

503.10.3.1

Exhibit 10.3.1b Label 315

- c. Privately printed barcoded labels that meet the requirements in [10.3, Labels](#), and [10.4](#) (see [Exhibit 10.3.1c](#)). On the Priority Mail label, mailers must use the registered trademark symbol following the Priority Mail text or add the following statement at the bottom of the label in at least 6-point Helvetica type: "Priority Mail is a registered trademark of the U.S. Postal Service."

Exhibit 10.3.1c Privately Printed Label

10.3.2 Label Placement

The barcoded label section of Label 315 or Form 153 must be placed either above the delivery address and to the right of the return address or to the left of the delivery address. A privately printed Signature Confirmation label that is separate from a privately printed address label must be placed in close proximity to the address label. In all cases, the entire Signature Confirmation label must be placed on the address side of the mailpiece and not overlap any adjacent item.

10.4 Barcodes**10.4.1 Symbology**

Labels printed by mailers must meet the following barcode symbology requirements:

- a. Mailers printing their own barcodes and using the retail service option (10.2.4a) must use the Automatic Identification Manufacturers' (AIM) Uniform Specifications for USS Code Interleaved 2 of 5 barcode symbology. Each barcode must contain a unique Package Identification Code (PIC) as specified in 10.4.2. Barcodes also must meet the specifications in Publication 91.
- b. Mailers printing their own barcodes and using the electronic service option (10.2.4b) must use the UCC/EAN Code 128 barcode symbology. Each barcode must contain a unique PIC as specified in 10.4.2. Barcodes also must meet the specifications in Publication 91.

10.4.2 Package Identification Code (PIC)

Each barcode symbology must contain a unique PIC:

- a. For UCC/EAN 128, each barcode must contain a unique PIC and be made up of five fields totaling from 16 to 22 characters. Additional information and specifications can be found in Publication 91. The five required data fields are:
 1. Application Identifier (AI): two characters; identifies the barcode as a postal barcode.
 2. Service Type Code (STC): two characters; identifies the type of product or service used for each item.
 3. Customer ID: nine characters; DUNS® number that uniquely identifies the customer.
 4. Package Sequence Number (PSN): variable from two to eight numbers.
 5. Modulus 10 Check digit: one character. See Publication 91 for use of the concatenated barcode for routing purposes.
- b. For USS Code Interleaved 2 of 5, each barcode must contain a unique PIC and be made up of four fields totaling 20 characters. The four required data fields are fields 2 through 5 above with a fixed sequential number of 8 digits. Additional information and specifications can be found in Publication 91. This symbology does not use an Application Identifier (AI).

10.4.3 Printing

Labels printed by mailers must meet the following specifications:

503.10.4.3

- a. Each barcoded label must bear a return address and a unique Signature Confirmation PIC barcode as specified in [10.4.2](#). The text “USPS SIGNATURE CONFIRMATION” (if using retail service option, as specified in [10.2.4](#)) or “e/USPS SIGNATURE CONFIRMATION” (if using electronic service option, as specified in [10.2.4](#), and the postage is evident on the mailpiece) must be printed between 1/8 inch and 1/2 inch above the barcode in minimum 12-point bold sans serif type. The indicator “e/” or the optional “ELECTRONIC PRICE APPROVED #[DUNS® NUMBER]” text is not used for Signature Confirmation Electronic Verification System (eVS) mailpieces (see [705.2.9](#)). Additionally, mailers approved for the electronic service option, at their discretion, may print the text “ELECTRONIC PRICE APPROVED #[DUNS® NUMBER]” in minimum 8-point bold sans-serif type directly below the bottom horizontal identification bar (see [Exhibit 10.4.3c](#)). Human-readable characters that represent the barcode ID must be printed between 1/8 inch and 1/2 inch under the barcode in minimum 10-point bold sans serif type. These characters must be parsed in accordance with Publication 91. A minimum 1/8-inch clearance must be maintained between the barcode and any printing. The preferred range of widths of narrow bars and spaces is 0.015 inch to 0.017 inch. The width of the narrow bars or spaces must be at least 0.013 inch but no more than 0.021 inch. All bars must be at least 3/4 inch high. Minimum 1/16-inch bold bars must appear between 1/8 inch and 1/2 inch above and below the human-readable endorsements to segregate the Signature Confirmation barcode from other areas of the shipping label. The line length should extend across the width of the label but must extend the length of the barcode at a minimum (see [Exhibit 10.3.1c](#)). Only information relating to Signature Confirmation and other extra services must be placed between these lines.
- b. Each barcode must meet the requirements in [10.4.1](#) for the type of service requested.
- c. Mailers must obtain USPS certification for each printer used to print barcoded Signature Confirmation labels. For certification, a mailer must forward for evaluation and approval 10 barcoded labels/forms generated by each printer to the National Customer Support Center (NCSC), Attention Barcode Certification (see [608.8.0](#) for address). The USPS will issue the mailer a Form 3152 for each printer certified. All barcodes must be in accordance with [10.3, Labels](#), and [10.4](#). Further certification instructions are included in Publication 91.

Exhibit 10.4.3c Electronic Service Option Identification

- d. Barcodes that do not meet specifications will not be accepted by the USPS. The USPS will contact the mailer if problems with the barcodes are found and will try to resolve the problem. The USPS may suspend a mailer's certification if electronic file quality does not meet specifications.
- e. Mailers who have previously received certification for label printing under the Delivery Confirmation program are not required to obtain any additional certification to use Signature Confirmation.

10.4.4 Integrated Barcodes

An integrated barcode may be used by mailers printing their own barcodes and using the electronic service option. Mailers may combine Signature Confirmation and insurance services into a single barcode on the shipping label and eliminate multiple labels and barcodes on packages. Mailers must still meet existing specifications in 10.4.1 and 10.4.2. Minor modifications allow users to request multiple extra services on Priority Mail and Package Services. Two required changes are:

- a. Change the text above the barcode to identify the service requested. Exhibits are included in Publication 91.
- b. Change the service type code in the barcode to identify the class of mail and/or type of extra services combined with Signature Confirmation. Additional information on the Service Type Code Matrix can be found in Publication 91.

10.5 Electronic File Transmission

Mailers must meet the following standards for electronic file transmission:

- a. Publication 91 contains specifications for electronic file transmission. A test file transmission must be uploaded and approved before mailings begin. Upon certification, USPS will issue the mailer Form 3152.
- b. Mailers using the electronic option must transmit a file with a unique record for each article mailed. The USPS may suspend a mailer's certification if the electronic file quality does not meet specifications. In addition, USPS acceptance units will be notified to charge the customer the retail option Signature Confirmation fee.
- c. Mailers who previously received certification for electronic file transmission under the Delivery Confirmation program are not required to obtain an additional certification for Signature Confirmation use.

503.10.6

- d. Mailers using the electronic option must include additional fields in the electronic file when planning to use the integrated barcode. For more information see Publication 91.

10.6 Acceptance

Customers must meet the following requirements when presenting electronic option Signature Confirmation mail for acceptance:

- a. Presorted or permit imprint mailings containing pieces for which fees are paid for Signature Confirmation service must be presented to a Post Office business mail entry unit (BMEU), detached mail unit (DMU) at the mailer's plant, bulk mail center or auxiliary service facility, business mail entry unit, or other postal facility capable of properly verifying the mailing and at which the mailer has obtained the necessary permits or license and paid any applicable mailing fee.
- b. Mailers who use the electronic option or print their own labels must submit a copy of their original Form 3152 with their first mailing using Confirmation Services (see exception in [10.6c](#)). The business mail or DMU office will retain a copy of the form. However, mailers who wish to obtain an electronic entry scan must submit Form 3152 with each mailing to include the electronic file number associated with that mailing. The electronic file number on the form must be in either a barcode format (preferred) or written on the form. All barcode formats must comply with standards in Publication 91. Mailers should keep the certification form on file while using Confirmation Services. If requested by the USPS, the form must be presented within 24 hours.
- c. Mailers of single-piece price mail with postage affixed using the electronic option price are not required to submit Form 3152 with their initial mailing. This includes mailings generated from the USPS online shipping label application at www.usps.com or labels generated from a third-party vendor or system that supports the electronic option prices. All labels must meet USPS format and design requirements, including the "e" (electronic price) endorsement in the barcode text line.

11.0 Collect on Delivery (COD)

11.1 Collect on Delivery Fees

11.1.1 Fee

Fee, in addition to postage and other fees, per piece:

Amount to be collected or insurance coverage desired, whichever is higher ¹	Fee
\$0.01 to \$50	\$5.25
50.01 to 100	6.45
100.01 to 200	7.65
200.01 to 300	8.85
300.01 to 400	10.05
400.01 to 500	11.25
500.01 to 600	12.45
600.01 to 700	13.65
700.01 to 800	14.85
800.01 to 900	16.05
900.01 to 1,000	17.25
Additional COD Services	Fee
Restricted delivery ²	\$4.30
Notice of nondelivery	3.70
Alteration of COD charges	3.70
Designation of new addressee	3.70
Registered COD ³	4.65

1. For Express Mail COD shipments valued at \$100 or less, the COD fee is based on the amount to be collected. Express Mail insurance automatically provides up to \$100 merchandise insurance.

2. Not available with Express Mail COD.

3. Maximum amount collectible is \$1,000.

11.1.2 Fee and Postage

The applicable COD fee must be paid in addition to the correct postage and the fees for other services requested. The amount to be collected or the amount of insurance coverage desired, whichever is higher, determines the COD fee. The fees for COD service include insurance against loss, rifling, or damage to the article or failure to receive a postal money order or the recipient's check. Postal liability for failure to receive the recipient's check or a postal money order is limited to loss in transit.

11.2 Basic Information

11.2.1 Description

Any mailer may use collect on delivery (COD) service to mail an article for which the mailer has not been paid and have its price and the cost of the postage collected from the recipient. The recipient has the option to pay the COD charges using either cash or personal check. Only one form of payment may be used for a single mailpiece. If the recipient pays the amount due by check payable to the mailer, the USPS forwards the check to the mailer. If the recipient pays the amount due in cash, the USPS collects the money order fee(s) from the recipient and sends a postal

503.11.2.2

money order(s) to the mailer. The amount collected from the recipient may not exceed \$1,000.00. COD service provides the mailer with a mailing receipt. USPS maintains a record of delivery (which includes the recipient's signature) for a specified period of time. Customers may obtain a delivery record by purchasing return receipt service. See 6.0 for details.

11.2.2 Eligible Matter

COD service may be used for Express Mail, First-Class Mail, Priority Mail, and any Package Services or Parcel Select subclass if:

- a. The mail has the complete names and addresses of the mailer and addressee.
- b. The mailer guarantees to pay any return postage, unless otherwise specified on the mail.
- c. The goods shipped are ordered by the addressee.

11.2.3 Additional Services

Purchasing COD service allows customers to then purchase restricted delivery service or a return receipt. The following additional services may be combined with COD if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation (not available with Express Mail COD).
- b. Registered Mail.
- c. Signature Confirmation (not available with Express Mail COD).
- d. Special handling.

11.2.4 Registered COD Mail

Sealed domestic mail of any class bearing First-Class Mail postage may be sent as registered COD mail. Such mail is handled the same as other Registered Mail. The maximum amount collectible from the recipient on an individual parcel is \$1,000.00. Indemnity may be purchased up to the registry limit of \$25,000 by paying the applicable registry fee for the value declared. The total fees charged for registered COD service include the proper registry fee for the value declared plus the registered COD fee. The mailer must declare the full value of the article being mailed, regardless of the amount to be collected from the recipient. The registered label and the COD form must be affixed to each article. The registration number is used for delivery receipt and indemnity claims.

11.2.5 Express Mail COD

Any article sent COD also may be sent by Express Mail next day and second day service. Such mail is handled in the same manner as other Express Mail. The maximum amount collectible from the addressee on an individual article is \$1,000.00, and indemnity for failure to collect or issue payment is limited to \$1,000.00. Express Mail postage and the proper COD fees must be paid. Both the Express Mail label and COD form must be affixed to each article. The Express Mail article number is used for delivery receipt and indemnity claims.

11.2.6 Ineligible Matter

COD service may not be used for:

- a. Articles sent to or from an APO or FPO address, including official mail and shipments to Armed Forces agencies.
- b. The return of merchandise about which some dissatisfaction arises, unless the new addressee consents in advance to such return.
- c. The mailing of only bills or statements of account, even with the addressee's consent. If a legitimate COD shipment of merchandise is mailed, the balance due on a past or expected transaction may be included in the charges on a COD article, if the addressee consents in advance to such action. In such a case, USPS indemnity is limited to the value of the article lost or damaged, not the full COD charges to be collected.
- d. Moving-picture films mailed by exhibitors to moving-picture manufacturers, distributors, or exchanges. Such films may be sent as insured mail or, if sealed, as Registered Mail.
- e. Collection agency purposes.
- f. Articles sent to or from the Republic of the Marshall Islands and the Federated States of Micronesia.

11.2.7 Altering COD Charges or Address

The mailer of a COD package may alter the COD charges or direct delivery to a new addressee by filing a request with the postmaster at the office of address and paying the applicable fee. The request must show the Post Office and date of mailing, the COD number, the name and address of addressee shown on form, the name and address of new addressee if applicable, and the new COD charges or delivery to be made without collecting COD charges.

11.2.8 Notice to Mailer

A mailer wanting a notice of undelivered COD mail must request Form 3849-D by checking the proper box on the COD form. The request may also be placed on the address label. It must appear conspicuously, directly under the return name and address of the mailer and separate from other instructions, as follows: "Form 3849-D Requested." A mailer's request may include directions to send the notice to the mailer or designated representative. When the mailer's representative is designated, the representative's name and local or nearby address must be shown in a bordered space with instructions, reading: "Do not deliver to mailer's designated representative without collecting COD charges," or "Deliver without collecting COD charges to mailer's designated representative."

11.3 Forms

11.3.1 Form 3816

Mailers must complete barcoded Form 3816 (see [Exhibit 11.3.1](#)) and attach it either above the delivery address and to the right of the return address, or to the left of the delivery address on parcels. If more than three articles are sent at a time, the mailer may use Form 3816-AS.

Exhibit 11.3.1 Form 3816

				Date Form 3849-D Sent	
PS Form 3816, December 2004				Copy 1 - Delivery Unit	
1. DO NOT allow the recipient (addressee or agent) to examine the contents before payment. 2. DO NOT deliver this article until payment is collected.			3. If payment is by check, enter check number above		

11.3.2 Privately Printed Form 3816-AS

If authorized, a mailer may use a privately printed Form 3816-AS. The privately printed form must be nearly identical in design and color to postal-provided forms, with COD article numbers that can be read by automated postal equipment. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review by the mailpiece design analyst. Once approved, the mailer is provided a block of COD numbers to be used.

11.3.3 Nursery Stock

A firm that mails nursery stock (the sender) may print special COD forms if the forms have instructions for disposing of shipments not delivered immediately, include a remittance coupon to be returned with the money order or recipient's check, and meet these conditions:

- a. If the firm does not want the undeliverable parcel disposed of to the highest bidder, the firm's instructions on the back of the delivery office part of the COD form (1), and on the remittance coupon (2), should read as follows:
 - 1. "If recipient refuses to pay charges for any reason, deliver at once without collecting the charges. Notify sender at once if parcel is not delivered and, if no reply is received in 30 days, destroy parcel. See remittance coupon for further instructions."

2. "Return this coupon with money order. If parcel is delivered without collection of charges, or is destroyed after 30 days, check disposition and send coupon to sender in penalty envelope."
 Delivered to addressee without collecting charges.
 Destroyed after 30 days.
- b. If the firm wants the undeliverable parcel disposed of to the highest bidder, the firm's instructions on the back of the delivery office part of the COD form (1), and on the remittance coupon (2), should read as follows:
 1. "If addressee refuses to pay charges for any reason, deliver at once without collecting the charges. Notify sender at once if parcel is not delivered and if no reply is received in 30 days, sell to highest bidder and remit proceeds, less commission. If sale cannot be made, destroy parcel. See remittance coupon for further instructions."
 2. "Return this coupon with money order or addressee's check. If parcel is delivered without collection of charges, is destroyed after 30 days, or is sold, check disposition and send coupon to sender in penalty envelope."
 Delivered to addressee without collecting charges.
 Destroyed after 30 days.
 Sold for \$____ remittance, less commission, herewith.

11.4 Mailing

11.4.1 Identifying Number

COD articles are identified by a number that appears on each section of the COD form. When Express Mail COD service is used, the mailer must place the completed Express Mail label and the COD form on the front of the article. The Express Mail article number is used for delivery receipt and indemnity claims. When registered COD mail service is used, the mailer must place the completed registered label and the COD form on the front of the article. The registration number is used for delivery receipt and indemnity claims.

11.4.2 Numbering for Large Volumes

A mailer who regularly mails a large volume of COD mail must ensure that a unique COD number is used for each article mailed.

11.4.3 Completing COD Forms

The mailer must securely affix a COD form to each COD article. The form must show article number, names and addresses of mailer and recipient, amount due mailer, and amount of money order fee necessary to make remittance. The USPS is not responsible for errors that a mailer makes in stating the charges to be collected. The mailer may use USPS forms or privately printed forms approved by the USPS. The information required on the COD form must be handwritten with ink, typewritten, or computer printed. The mailer may not stipulate "Cash Only" on the COD form.

11.4.4 Addressing Forms

The name and address of the person to whom the remittance is to be sent must appear in the proper spaces on the COD form and in the return address area on the COD article itself, with the postal endorsements for return if undeliverable. The return address on the COD form must be the same as the return address on the COD

503.11.4.5

article, except that a mailer using a privately printed COD form may print a different address on the remittance coupon where payments are to be sent. The mailer's address where undeliverable articles are to be returned must appear on the other parts of the form. Only domestic addresses may be used.

11.4.5 Receipt

A mailer of one or two parcels per mailing receives a section of Form 3816 as a receipt. If three or more COD articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet), provided by the USPS at no charge, or privately printed firm sheets. (Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be approved by the local postmaster; the mailer may omit columns from Form 3877 that are not applicable to COD mail.) The mailer submits the forms in duplicate and receives one copy of the postmarked form as a mailing receipt after the entries are verified by the postal employee accepting the mailing. All entries made on firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line.

11.4.6 Where to Mail

COD mail must be mailed at a Post Office, station, or branch or through a rural carrier or a nonpersonnel rural unit. It may not be placed in a Post Office maildrop or in or on a street letterbox. It may be placed in, but not on, a rural mailbox.

11.4.7 Rural Carriers

COD articles may be given to rural carriers for mailing. The articles must be prepared properly and stamps for the required postage and fees affixed. If the mailer wants insurance for an amount more than the COD amount to be collected, that amount must be shown. The USPS assumes no responsibility for any article or money left in a rural mailbox until the carrier issues a receipt. Customers at nonpersonnel rural units must meet the rural carrier at the unit for COD service.

11.4.8 Delays

Mailers may report delays in remittance (more than 60 days for domestic mailings) to the Postal Inspection Service giving all necessary particulars.

11.5 Delivery

Delivery of COD mail is subject to [508.1.0, *Recipient Options*](#), and [508.2.0, *Conditions of Delivery*](#). Except for Express Mail COD, a postmaster may restrict delivery of COD mail if the amount to be collected makes the carrier a potential target for theft or if previous experience indicates that the addressee will be unavailable to receive the article at the time of delivery. If payment is by check, the recipient's check, made payable to the mailer, may be accepted by the USPS employee upon the recipient's presentation of adequate identification. If payment is made by cash, in addition to the COD amount, a money order fee is collected from the recipient.

12.0 Special Handling

12.1 Fees for Special Handling

12.1.1 Fees

Fee, in addition to postage and other fees, per piece:

Weight	Fee
Not more than 10 pounds	\$7.10
More than 10 pounds	9.90

12.1.2 Fee and Postage

The applicable special handling fee must be paid in addition to postage for each addressed piece for which special handling service is desired. Except for official mail, the special handling fee must be paid at the time of mailing. For official mail, the special handling fee is collected under established reimbursement procedures.

12.2 Basic Information

12.2.1 Description

Special handling service provides preferential handling, but not preferential delivery, to the extent practicable in dispatch and transportation. The service does not itself insure the article against loss or damage. Special handling service is mandatory for material that requires extra care in handling, transportation, and delivery.

12.2.2 Availability

Special handling service is available only for First-Class Mail, Priority Mail, Package Services, and Parcel Select pieces.

12.2.3 Additional Services

The following extra services may be combined with special handling if the applicable standards for the services are met and the additional service fees are paid:

- a. COD.
- b. Delivery Confirmation.
- c. Insurance.
- d. PAL (for Package Services only).
- e. Return receipt for merchandise.
- f. Signature Confirmation.

12.2.4 Bees and Poultry

Unless sent at the First-Class Mail or Priority Mail prices, special handling is required for parcels containing honeybees or baby poultry. Under [601.9.3.7](#), only queen honeybees may be shipped by aircraft. Check with your local Post Office for mailability prior to mailing honeybees other than queen honeybees at First-Class Mail or Priority Mail prices.

12.2.5 Marking

The marking "Special Handling" must appear prominently above the address and to the right of the return address on each piece for which special handling service is requested.

503.12.2.6

12.2.6 Nonmachinable Parcel Post

The Parcel Post nonmachinable surcharge is not charged on parcels sent special handling.

13.0 Confirm Service**13.1 Confirm Fees****13.1.1 Fee**

Fee, in addition to postage and other fees:

Subscription Level	Subscription Fee and Term	Additional ID Code Fee and Term	Additional Scans Fee and Number
Silver	\$2,000 3 months	\$900 each 3 months	\$500 block of 2 million scans
Gold	\$6,500 12 months	\$900 each 3 months \$2,500 annual	\$800 block of 6 million scans
Platinum	\$23,500 12 months	\$900 each 3 months \$2,500 annual	NA

13.1.2 Fees and Postage

The Confirm subscription fees as defined in [13.2.7](#) and shown in [13.1.1](#) must be paid in advance. These subscription fees are in addition to other postage and fees.

13.1.3 Deposit

The class of mail and price claimed and the postage payment method used determine the point of deposit or entry.

13.2 Basic Information**13.2.1 Description**

Confirm is a service that provides an authorized subscriber with data electronically collected from the optical scanning of specially barcoded mailpieces as they pass through certain automated mail processing operations. Scanned data can include the postal facility where such pieces are processed, the postal operation used to process the pieces, the date and time when the pieces are processed, and the numeric equivalent of two barcodes that help to identify the specific pieces. Any piece intended to generate scanned data must meet the appropriate physical characteristics and standards in [13.0](#), although not every properly prepared piece is guaranteed such data or complete data. Confirm does not provide proof of delivery.

13.2.2 Available Service and Handling

Confirm is available only to authorized subscribers as described in [13.2.3](#). Service applications are described in [13.2.6](#) and subscription levels in [13.2.7](#). Confirm may be used for one or more pieces in a mailing. Mail prepared for Confirm is dispatched and handled in transit as ordinary mail unless combined with a service available for the class of mail and price claimed that requires different handling.

13.2.3 Authorization

[6-5-08] Participation in Confirm service requires USPS authorization after mailers pay applicable fees and meet technical requirements. As part of the application process, a mailer must submit mailpieces with the appropriate PLANET Code barcodes, POSTNET barcodes, or Intelligent Mail barcodes for evaluation and approval to the National Customer Support Center (see 608.8.0 for address). The application process also includes, if applicable, evaluating and approving of the electronic format and uploading of the preshipment notification file and the associated shipment identification barcode printed on required documentation accompanying mailings. Mailers may use Confirm service only after receiving authorization. Information generated from the service is provided only to mailers meeting the standards for participation.

13.2.4 Availability

Confirm is available to authorized subscribers for tracking automation-compatible letter-size or flat-size mail in the following classes:

- a. First-Class Mail (including Priority Mail).
- b. Periodicals.
- c. Standard Mail.
- d. Package Services.

13.2.5 Additional Services

Confirm does not preclude or require the use of any extra service available for the class of mail and price claimed.

13.2.6 Service Applications

Two service applications are available:

- a. Origin Confirm for incoming mail. This use notifies the subscribing mailer of various movements of individual reply pieces, such as business reply mail being returned by customers, before delivery to the Confirm subscriber.
- b. Destination Confirm for outgoing mail. This use notifies the subscribing mailer of various movements of individual pieces, such as letter-size or flat-size pieces in a specific mailing, from the entry of the mailing to final automated processing steps of the pieces before delivery to the destination address.

13.2.7 Subscription Levels

Confirm is available in three distinct subscription levels as defined below. A mailer may subscribe to one or more of these levels at the same time, at different times, or at overlapping times:

- a. *Silver Subscription*. The Silver subscription level has a term of 3 consecutive months, includes one five-digit identification code assigned by the USPS, and provides up to 15 million scans. A mailer subscribing to this level may also:
 1. License additional identification codes for a term of 3 consecutive months or until the expiration of the underlying subscription, whichever occurs first.

503.13.3

2. License additional scans in blocks of 2 million scans at any time before the underlying subscription expires. Unused scans expire at the end of the subscription term.
- b. *Gold Subscription.* The Gold subscription level has a term of 12 consecutive months, includes one five-digit identification code assigned by the USPS, and provides up to 50 million scans. A mailer subscribing to this level may also:
 1. License additional identification codes for a term of 3 consecutive months or until the expiration of the underlying subscription, whichever occurs first.
 2. License additional scans in blocks of 6 million scans at any time before the underlying subscription expires. Unused scans expire at the end of the subscription term.
 3. Raise the subscription level to a Platinum subscription level at any time before the expiration of the Gold subscription by paying the difference of the respective subscription fees. This change in service level does not extend the term of the underlying initial subscription.
- c. *Platinum Subscription.* The Platinum subscription level has a term of 12 consecutive months, includes three five-digit identification numbers assigned by the USPS, and provides an unlimited number of scans. A mailer subscribing to this level may also license additional identification codes for a term of 3 consecutive months or until the expiration of the underlying subscription, whichever occurs first.

13.3 Barcodes

13.3.1 General Barcode Requirement

[6-5-08] At the time of mailing, each piece in a mailing that is intended to generate Confirm service information must bear a customer-applied PLANET Code barcode under 13.3.4 or an Intelligent Mail barcode under 13.3.2. Instead of a PLANET Code barcode, mailers may apply an Intelligent Mail barcode, under 708.4.0, on letters or flats. Mailers must apply barcodes that meet the applicable specifications in 708.4.0 and the following standards:

- a. Origin Confirm pieces must meet the following standards:
 1. For Business Reply Mail, the piece must bear a PLANET Code barcode and either a POSTNET barcode or Intelligent Mail barcode that corresponds to the subscriber's Business Reply Mail ZIP+4 codes assigned by the USPS under 507.9.0. Business Reply Mail may bear an Intelligent Mail barcode in lieu of a PLANET Code barcode and a POSTNET barcode.
 2. For other flat-size reply mail, the piece must bear both a PLANET Code barcode and a POSTNET barcode that correctly corresponds to the delivery address. Mailers may use an Intelligent Mail barcode under 13.3.2 and 708.4.0 instead of using a PLANET Code barcode and POSTNET barcode.

- b. Destination Confirm pieces must bear either an Intelligent Mail barcode or a PLANET Code barcode. If required by the price claimed at the time of mailing, Intelligent Mail barcodes must correctly correspond to the delivery address. Mailers not using an Intelligent Mail barcode for Destination Confirm must use PLANET Code and POSTNET barcodes under these conditions:
 1. If required by the price claimed at the time of mailing, Destination Confirm pieces with a PLANET Code barcode also must bear an appropriate POSTNET barcode that correctly corresponds to the delivery address.
 2. If a POSTNET barcode is not required by the price claimed, the mailer has the option to apply the POSTNET barcode to such pieces for optimal Confirm service information if the barcode correctly corresponds to the delivery address.

13.3.2 Intelligent Mail Barcodes

Customers participating in OneCode Confirm may apply Intelligent Mail barcodes on letter-size pieces or on flat-size pieces meeting automation-compatibility standards in [201.3.0](#) (letters) or [301.3.0](#) (flats). Do not apply a PLANET Code barcode to any mailpiece with an Intelligent Mail barcode. Only one Intelligent Mail barcode may appear on each piece, according to these standards:

- a. Intelligent Mail barcodes meeting all applicable standards may be used in lieu of POSTNET barcodes. When using an Intelligent Mail barcode on letter-size pieces for price eligibility and OneCode Confirm, place the barcode in any position permitted in [202.5.0](#).
- b. When using an Intelligent Mail barcode on letter-size pieces only for OneCode Confirm, place the barcode according to [202.5.0](#) or directly above the address block with the top of each bar less than 4 inches from the bottom of the mailpiece.
- c. When using an Intelligent Mail barcode on flat-size pieces, place the barcode according to [302.4.0](#).
- d. Mailers must generate Intelligent Mail barcodes by the same method used to receive USPS barcode certification during the application process in [13.2.3](#).
- e. Intelligent Mail barcodes must meet the barcode and format standards in [708.4.0](#) and in Specification USPS-B-3200 at ribbs.usps.gov/OneCodeSOLUTION.

13.3.3 POSTNET Barcode

The type of POSTNET barcode (e.g., ZIP+4 barcode or delivery point barcode) and the placement of the barcode on a Confirm piece must meet the standards for the price claimed. If two POSTNET barcodes are applied to the same piece, they must meet these standards:

- a. Only one POSTNET barcode may be used in the address block as provided in [13.3.7](#).
- b. The second POSTNET barcode must be placed outside the address block in a position meeting the applicable standards in [708.4.0](#) for letter-size mail or flat-size mail.

13.3.4 PLANET Code Barcode Use

Only one PLANET Code barcode may appear on a Confirm piece. For letter-size mail, the PLANET Code barcode may be placed in any position permitted in [708.4.0](#) for a POSTNET barcode except the lower right corner barcode clear zone. For flat-size mail, the PLANET Code barcode may appear in any position of the piece permitted for a POSTNET barcode in [708.4.0](#). Any PLANET Code barcode printed on mail for Confirm information must:

- a. Be genericized by the method used to receive USPS barcode certification during the application process in [13.2.3](#).
- b. Meet the barcode specifications in [13.3.5](#).
- c. Meet the format specifications in [13.3.6](#).

13.3.5 PLANET Code Barcode Specifications

The PLANET Code barcode symbology, which is the inverse of the POSTNET barcode symbology, uses a unique combination of three tall and two short bars to define each digit from 0 to 9. PLANET Code barcodes must meet the same dimensional specifications (including pitch, tilt, and baseline positioning) and print specifications (including reflectance) as required in [708.4.0](#) for POSTNET barcodes and in Publication 197, *Customer Guide to Confirm Service*. Publication 197 is available from the National Customer Support Center (see [608.8.0](#) for address).

13.3.6 PLANET Code Barcode Format

PLANET Code barcodes must meet the following format standards required in Publication 197 for service type:

- a. Origin Confirm mailpieces (incoming reply mail) require these data fields in the following order from left to right:
 1. Mailpiece type identification: two digits; identifies type of reply mail (courtesy reply mail, business reply mail (BRM), or Qualified BRM) and physical characteristic of piece (letter, card, or flat); defined by USPS.
 2. Customer identification: nine or eleven digits; identifies mailpiece; defined by subscriber.
 3. Check digit: one digit; defined as the number which, when added to the sum of the other digits in the barcode, results in a total that is a multiple of 10.
- b. Destination Confirm mailpieces (outgoing mail) require these data fields in the following order from left to right:
 1. Mailpiece type identification: two digits; identifies class of mail and physical characteristic of piece (letter, card, or flat); defined by USPS.
 2. Identification code: five digits; identifies mailer; assigned by USPS.
 3. Mailing: four (or six) digits; identifies specific mailing; defined by subscriber.
 4. Check digit: one digit; defined as the number which, when added to the sum of the other digits in the barcode, results in a total that is a multiple of 10.

13.3.7 Address Block Barcoding

If both a PLANET Code barcode and a POSTNET barcode are used as part of the delivery address block, the following standards must be met:

- a. One barcode must be placed in the upper part of the address block in one of two positions:
 1. Between the top address line (the first line of the delivery address block usually containing the recipient's name or attention line) and any keyline, optional endorsement line, or carrier route information line directly above the top address line.
 2. Directly above any keyline, optional endorsement line, or carrier route information line that is directly above the top address line.
- b. The other barcode must always be placed directly below the bottom address line (the city, state, and ZIP Code line).
- c. Both barcodes must maintain a minimum clearance of 1/25 inch directly above and below the barcodes.
- d. The entire address block must be placed on the piece under the applicable standards in [708.4.0](#). The barcodes and address block, along with any keyline, optional endorsement line, or carrier route information line, must maintain the other applicable minimum clearances under [708.4.0](#), including clearances for inserts in window envelopes.

13.3.8 Reply Mail Barcodes

Reply pieces prepared for the Origin Confirm service application under [13.2.6](#) must meet any applicable format and barcode standards as follows:

- a. For Business Reply Mail (BRM), [507.9.0](#).
- b. For Qualified Business Reply Mail (QBRM), [507.9.0](#).
- c. For courtesy reply mail (CRM), [202](#) for letters, [302](#) for flats.

13.4 Preshipment Notification

13.4.1 Purpose

[\[6-5-08\]](#) Mailers may submit a preshipment notification for mailings in which Destination Confirm information is desired. Preshipment notifications must be in a specific file format and presented before or at the time of the mailing. These electronic notices enable the USPS to generate entry scans for Confirm mail shipments. A test file transmission must be uploaded and approved before Confirm mailings may be made, as provided in [13.2.3](#).

13.4.2 Data Format

[\[6-5-08\]](#) The preshipment notification data file is a single data file in a comma-delimited flat file format. Each record is made up of a single row of data elements (fields) as defined in Publication 197. Preshipment notification data include specific mailer-generated information about each Destination Confirm mailing, such as shipment and mailer identification.

503.13.4.3

13.4.3 Shipment ID Barcode

[6-5-08] In addition to an electronic preshipment notification transmission for each mailing, a Shipment ID barcode (used as shipment identification) may be printed on the documentation accompanying the mailing. This documentation is either Form 8125 for mail prepared as a plant-verified drop shipment or Form 3152-A for mail entered and verified at a business mail entry unit. The USPS scans the Shipment ID barcode using a hand-held scanner. Shipment ID barcode symbology is USS Code 128 Subset B and must meet the technical specifications in Publication 197.

13.5 Delivery

Any mailpiece prepared for Confirm is delivered as ordinary mail unless combined with any available service subject to [508.1.0, Recipient Options](#), and [508.2.0, Conditions of Delivery](#).

14.0 Money Orders**14.1 Fees for Money Orders**

Fee, each:

Service	Fee
Domestic money order	
\$0.01 to \$500	\$1.05
\$500.01 to \$1,000	1.50
Postal military money order (issued by military facilities)	0.30
Inquiry fee (includes the issuance of a copy of a paid money order)	5.20
Maximum amount per money order—\$1,000	

14.2 Issuing Money Orders**14.2.1 Availability**

Domestic money orders may be purchased from:

- a. All Post Offices, branches, and stations in the United States and its territories and possessions.
- b. Money order facilities for members of the U.S. Armed Forces.
- c. Rural route carriers and authorized highway contract route carriers. A customer fills out Form 6387 (available from the carrier) and gives it and the payment to the carrier. Unless the customer provides a preaddressed envelope and pays postage and any required fees for mailing, the carrier delivers the money order on the next trip.

14.2.2 Purchase Restrictions

A postal customer may buy multiple money orders at the same time, in the same or differing amounts, subject to these restrictions:

- a. The maximum amount of any single money order is \$1,000.

- b. Any customer whose daily total of purchased money orders is \$3,000 or more, regardless of the number of visits made by the customer to one or more postal facilities, must complete Form 8105-A, Funds Transaction Report (FTR), and show identification bearing the purchaser's photograph, name, and address.

14.2.3 Purchase Method

Money orders must be paid for in one of these ways:

- a. In U.S. currency and coins (in any amount).
- b. With established traveler's checks payable in U.S. dollars if the purchase is for at least 50% of the value of the traveler's checks.
- c. With ATM/debit cards at locations approved by USPS Corporate Treasury where the customer's personal identification number must be entered on a keypad connected to a credit/debit terminal.

14.2.4 Purchaser

The purchaser must complete the money order and customer's receipt by filling in the names and addresses of the payee and purchaser. Money orders must be made payable to a single identifiable party, which can be the purchaser. The USPS does not guarantee a 100% refund on a stolen money order if the customer's receipt is not presented with the claim for refund.

14.2.5 Replacement

The USPS replaces without charge a defective money order or one that is spoiled during imprinting or customer completion if the customer returns the negotiable portion of the money order and the matching customer receipt.

14.3 Cashing Money Orders

14.3.1 Validity and Value

Domestic money orders are paid regardless of the time passed since their issue. Money orders are not interest-bearing instruments; they are paid only in the exact amount imprinted up to the authorized maximum amount. USPS records serve as the basis for adjudicating claims for payment of money orders.

14.3.2 Redemption

All U.S. money orders, including military, may be cashed at any U.S. Post Office or bank. Subject to funds availability, money orders may be cashed by rural carriers. Any customer whose daily total of cashed money orders exceeds \$10,000.00, irrespective of the number of Post Offices visited to cash the money orders, must also complete Form 8105-A, Funds Transaction Report (FTR), and show identification bearing the customer's photograph, name, and address.

14.3.3 Identification

When presenting a money order for payment, the customer seeking payment must sign in the presence of a USPS employee. If the customer is not known to the employee, suitable identification can be required. The USPS may refuse payment on any money order when the identity of the customer seeking payment is not proved to the satisfaction of the employee.

14.3.4 Acceptable Signature

The paying Post Office may accept any signature of the payee, purchaser, or endorsee that is not different from the name shown on the money order, subject to these conditions:

- a. A customer who cannot write may sign by using a mark, if a witness (who may not be a USPS employee) is present at the time of cashing.
- b. All money orders payable to a business firm, an organization, society, institution, or government agency must be signed in the name of the organization by an authorized representative (who must also sign with his or her own name and organizational title). Evidence of the representative's authority may be required.
- c. If the money order is drawn in favor of an official by name and presented by a successor, the successor must sign accordingly (e.g., "William Jones, treasurer, successor to George Thompson").
- d. Use of a title (e.g., Mrs., M.D.) is not required in signing a money order for payment, whether such title is used on the face of the money order.
- e. A stamped signature is an acceptable endorsement on a money order drawn in favor of a firm, corporation, association, society, or individual, when the money order is presented to a bank for payment. A Post Office accepts a stamped signature only if an agreement is on file specifying the individual responsible for the correctness of such payments.

14.3.5 More Than One Payee

A money order completed by the purchaser to show more than one firm or person as payee is paid to either payee if the conjunction "or" is used to connect the payees. If no conjunction is used, or if the conjunction "and" is used to connect the payees, then all the listed payees must endorse the money order.

14.3.6 Payment to Another Party

Money orders may be paid to another party under these conditions:

- a. Only the payee of a money order may endorse it to any other person or firm. A person with power of attorney may cash money orders for a payee who gave the person that authority. A copy of the power of attorney must be filed at the office of payment. A payee may file a separate written order with the Post Office authorizing payment to another person. The person must be designated by name as the one to receive payment.
- b. When a payee (e.g., an individual or firm) makes an assignment and intends that money orders be paid to the assigned person, the payee must file a copy of a power of attorney or a written order with the USPS. The person who is designated to receive payment must sign the money order and write below the signature the capacity in which he or she acts.
- c. A money order may be paid to an executor or court-appointed administrator of the estate of the deceased person who was entitled to payment, provided that a copy of the appointment as executor or administrator is filed with the local postmaster. Such payments are made pursuant to the law of the state in which the deceased was a resident.

- d. Money orders are paid to the legal representative of a firm, association, or company that has ceased to exist. Appropriate documents proving legal representation must be provided to the USPS.
- e. Money orders are not issued or paid to a ward when declared incompetent by a court. They are paid only to the committee, guardian, or other duly authorized person responsible for the ward. Appropriate proof of authority must be provided to the USPS.
- f. A money order payable to a minor may be paid to the father or mother as natural guardian, unless prohibited by court order. Proof of parenthood may be required.

14.3.7 Second Endorsement

A money order with more than one endorsement is invalid, except under [14.3.5](#).

14.3.8 COD Parcel

No payment is made when a money order is issued in return for a COD parcel, and is presented by the addressee (purchaser), and the money order is not endorsed by the payee (shipper) or the payee has not authorized payment to the purchaser by written approval.

14.3.9 Payment Inquiry

A purchaser, payee, or endorsee may, at any time, inquire about payment of a domestic money order by completing, signing, and filing Form 6401 and paying the appropriate fee; a separate form and fee are required for each money order. The fee is not required if Form 6401 is filed by a bank, other financial institution, government agency that processes money orders directly with the Federal Reserve Bank, or postal official engaged in official USPS business.

14.4 Federal Reserve System

14.4.1 General

All money orders are forwarded through the Federal Reserve Banking System, to which commercial banks have access. For this standard:

- a. *Money order* means a U.S. Postal Money Order.
- b. *Federal Reserve Bank* means a Federal Reserve Bank or branch thereof that presents a money order for payment by the postmaster general.
- c. *Presenting bank* means a bank that presents a money order to and receives credit for the money order from a Federal Reserve Bank.
- d. *Reclamation* means the action taken by the postmaster general to obtain refund of the amounts of paid money orders.
- e. *Examination* includes examination of money orders for indicia of theft, forged endorsements, forged signatures or initials of issuing employees, raised amounts, and other material defects by electronic methods and visual inspection for defects that cannot be discovered electronically.

503.14.4.2

- f. *Stolen money order* means a U.S. Postal Money Order stolen from a Post Office, classified or contract station or branch, or USPS employee before it is officially issued by the Post Office, classified or contract station or branch, or by a USPS employee discharging his or her official duties.

14.4.2 Payment

The postmaster general has the usual right of a drawee to examine money orders presented for payment by banks through the Federal Reserve System and to refuse payment of money orders, and has a reasonable time after presentation to make each examination. Provisional credit is given to the Federal Reserve Bank when it furnishes the money orders for payment by the postmaster general. Money orders are deemed paid only after examination is completed, subject to the postmaster general's right to make reclamation under [14.4.4](#).

14.4.3 Endorsement

The presenting bank and the endorser of a money order presented for payment are deemed to guarantee to the postmaster general that all prior endorsements are genuine, whether an express guarantee to that effect is placed on the money order. When an endorsement is made by a person other than the payee personally, the presenting bank and the endorser are deemed to guarantee to the postmaster general, in addition to other warranties, that the person who so endorsed had capacity and authority to endorse the money order for the payee.

14.4.4 Reclamation

The postmaster general has the right to demand refund from the presenting bank of the amount of a paid money order if, after payment, the money order is found to be stolen, or to have a forged or unauthorized endorsement, or to contain any material defect or alteration not discovered on examination. Such right includes, but is not limited to, the right to make reclamation of the amount by which a genuine money order with a proper and authorized endorsement has been raised. Such right must be exercised within a reasonable time after the postmaster general discovers that the money order is stolen, bears a forged or unauthorized endorsement, or is otherwise defective. If refund is not made by the presenting bank within 60 days after demand, the postmaster general takes such actions as may be necessary to protect the interests of the United States.

507 Mailer Services

Overview

- 1.0 Treatment of Mail
- 2.0 Forwarding
- 3.0 Premium Forwarding Service
- 4.0 Address Correction Services
- 5.0 Recall of Mail
- 6.0 Pickup on Demand Service
- 7.0 Mailing List Services
- 8.0 Address Sequencing Services
- 9.0 Business Reply Mail (BRM)
- 10.0 Permit Reply Mail
- 11.0 Merchandise Return Service
- 12.0 Bulk Parcel Return Service
- 13.0 Parcel Return Service

1.0 Treatment of Mail

1.1 Nondelivery of Mail

Mail can be undeliverable for these reasons:

- a. No postage.
- b. Incomplete, illegible, or incorrect address.
- c. Addressee not at address (unknown, moved, or deceased).
- d. Mail unclaimed.
- e. Mail refused by the addressee at time of delivery.
- f. Mail refused by the addressee after delivery when permitted.
- g. Minimum criteria for mailability not met.

1.2 USPS Address Adjustments

1.2.1 Types of Adjustments

Mail can be undeliverable because of USPS adjustments such as the following:

- a. Renumbering of houses.
- b. Renaming of streets.
- c. Conversion from rural-style addresses (rural route and box number or highway contract route and box number) to city-style addresses (house number and street name).
- d. Realignment of rural or highway contract routes.
- e. Conversion from rural or highway contract service to city delivery service.
- f. Consolidation of routes.

507.1.2.2

- g. Consolidation of Post Offices or adjustment of delivery districts.

1.2.2 Charges

For 3 years after the date when the new address information appears in Address Information System (AIS) products, a mailer who regularly sends bulk mailings into an area affected by USPS adjustments is not charged for requested corrections to galley lists when such corrections relate to those adjustments.

1.2.3 Disposal

Mail that is undeliverable because of USPS adjustments is redirected and delivered to the destination without an additional postage charge as follows:

- a. For an adjustment under [1.2.1a](#) through [1.2.1c](#), for 1 year from the date when the new address appears in the AIS bimonthly products released in February, April, June, August, October, and December.
- b. For an adjustment under [1.2.1d](#) through [1.2.1g](#), for 1 year from the end of the month in which the adjustment occurs.
- c. For mail bearing the simplified address “Rural Route Box Customer,” “Highway Contract Route Box Customer,” or “Post Office Box Customer,” either for 90 days or until the next June 30, whichever is later.

1.2.4 Records

Records of address changes caused by USPS adjustments are kept by the local Post Office for 3 years.

1.3 Directory Service

USPS letter carrier offices give directory service to the types of mail listed below that have an insufficient address or cannot be delivered at the address given (the USPS does not compile a directory of any kind):

- a. Mail with extra services (certified, COD, registered, special handling).
- b. Foreign, except circulars. (Foreign mail received in quantities with letter-class postage but the general characteristics of circular mail is not given directory service.)
- c. Mail from overseas Armed Forces.
- d. Parcels mailed at any Package Services price or endorsed by the mailer.
- e. Perishable matter.
- f. Official USPS mail.
- g. Express Mail Next Day Service (Post Office to Addressee only).

1.4 Basic Treatment**1.4.1 General**

Mail that is undeliverable as addressed is forwarded, returned to the sender, or treated as dead mail, as authorized for the particular class of mail.

Undeliverable-as-addressed mail is endorsed by the USPS with the reason for nondelivery as shown in [Exhibit 1.4.1 USPS Endorsements for Mail Undeliverable as Addressed](#). All nonmailable pieces are returned to the sender.

Exhibit 1.4.1 USPS Endorsements for Mail Undeliverable as Addressed

ENDORSEMENT	REASON FOR NONDELIVERY
Attempted—Not Known	Delivery attempted, addressee not known at place of address.
Box Closed—No Order*	Post office box closed for nonpayment of rent.
Deceased	Used only when known that addressee is deceased and mail is not properly deliverable to another person. This endorsement must be made personally by delivery employee and under no circumstance may it be rubber-stamped. Mail addressed in care of another is marked to show which person is deceased.
Delivery Suspended to Commercial Mail Receiving Agency	Failure to comply with 508.1.9.1 through 508.1.9.3 .
Illegible*	Address not readable.
In Dispute*	Mail returned to sender by order of chief field counsel (or under 508.1.0 and 508.2.0) because of dispute about right to delivery of mail and cannot be determined which disputing party has better right to mail.
Insufficient Address*	Mail without number, street, box number, route number, or geographical section of city or city and state omitted and correct address not known.
Moved, Left No Address	Addressee moved and filed no change-of-address order.
No Mail Receptacle*	Addressee failed to provide a receptacle for receipt of mail.
No Such Number*	Addressed to nonexistent number and correct number not known.
No Such Office in State*	Addressed to nonexistent Post Office.
No Such Street*	Addressed to nonexistent street and correct street not known.
Not Deliverable as Addressed—Unable to Forward	Mail undeliverable at address given; no change-of-address order on file; forwarding order expired.
Outside Delivery Limits*	Addressed to location outside delivery limits of Post Office of address. Hold mail for out-of-bounds customers in general delivery for specified period unless addressee filed order.
Refused*	Addressee refused to accept mail or pay postage charges on it.
Returned for Better Address*	Mail of local origin incompletely addressed for distribution or delivery.
Returned for Postage	Mail without postage or indication that postage fell off.
Returned to Sender Due to Addressee's Violation of Postal False Representation and Lottery Law*	Mail returned to sender under false representation order and lottery order.
Returned to Sender Due to Addressee's Violation of Postal False Representation Law*	Mail returned to sender under false representation order.
Returned to Sender Due to Addressee's Violation of Postal Lottery Law*	Mail returned to sender under lottery order
Temporarily Away*	Addressee temporarily away and period for holding mail expired.
Unclaimed*	Addressee abandoned or failed to call for mail.
Undeliverable as Addressed, Missing PMB or # Sign	Failure to comply with 508.1.9.2e.
Vacant*	House, apartment, office, or building not occupied. (Use only if mail addressed "Occupant.")

* Alternative addressing formats may not be used on the following: Express Mail pieces; mail with any special service; mail sent with any ancillary service endorsement; mail sent to any overseas military Post Office. When an alternative addressing format is used on Periodicals pieces, the publisher is notified of nondelivery only for those reasons marked with an asterisk (*).

507.1.4.2

1.4.2 Official Mail

Official mail is treated the same as mail for the general public. All fees and services must be paid or collected on delivery of mail or address correction notices.

1.4.3 Mailer Endorsement

A mailer endorsement is used to request forwarding, return, or address correction service. This endorsement (and other marking) must be prepared under [102](#), [202](#), [302](#), or [402](#). The endorsements authorized for each class of mail and the required wording are listed in the charts according to class of mail.

1.4.4 Order

The information in the charts in this unit is associated with a customer's change-of-address order. Information on temporary changes of address is not provided.

1.4.5 Extra Services

Mail with extra services is treated according to the charts for each class of mail in [1.5](#), except that:

- a. Undeliverable-as-addressed Certified Mail is treated as First-Class Mail.
- b. All insured First-Class Mail is forwarded and returned at no additional cost. All insured Standard Mail and Package Services is forwarded or returned.
- c. Parcels with special handling that are undeliverable as originally addressed and forwarded to the addressee continue to receive special handling service without an additional special handling fee.
- d. Undeliverable-as-addressed return receipt for merchandise mail receives the treatment appropriate for the class of mail of the host piece.
- e. All Registered Mail items are treated as registered while they are being forwarded or returned.

1.4.6 Metered Pieces

Mail paid by postage meter that does not have a delivery address and a return address is returned to the Post Office of mailing. The reason for nondelivery is attached but the address correction fee is not charged. The piece is returned to the meter licensee upon payment of the applicable return postage.

1.5 Treatment for Ancillary Services by Class of Mail**1.5.1 First-Class Mail and Priority Mail**

Undeliverable-as-addressed (UAA) First-Class Mail (including stamped cards and postcards) and Priority Mail are treated as described in [Exhibit 1.5.1](#), with these additional conditions:

- a. First-Class Mail and Priority Mail cards and unregistered letters that do not appear to contain merchandise and do not bear "Return Service Requested" or "Change Service Requested" (Option 1 only) may be forwarded to international addresses.
- b. Alternative addressing formats under [602.3.0](#) may not be used on mail with any ancillary service endorsement or mail with any extra service. Forwarding service is not provided for such mail. Undeliverable First-Class Mail with any alternative

addressing format is returned with the reason for nondelivery attached only if the address is incorrect or incomplete or the mail is undeliverable for another reason as shown in [Exhibit 1.4.1 USPS Endorsements for Mail Undeliverable as Addressed](#).

- c. The Priority Mail portion of a Priority Mail drop shipment receives the forwarding, return, and address correction services described in [Exhibit 1.5.1](#). The mail enclosed within the drop shipment receives the services appropriate for its class.
- d. First-Class Mail or Priority Mail bearing Standard Mail markings and endorsements permitted by [202](#) for letters, [302](#) for flats, and [402](#) for parcels and [244.5.1](#) for letters, [344.5.1](#) for flats, and [444.4.1](#) for parcels receives forwarding, return, and address correction services for Standard Mail under [1.5.3](#).
- e. “Change Service Requested” is not permitted for the following:
 1. Priority Mail, other than Priority Mail containing perishable matter under [601.9.0](#) (except for live animals).
 2. First-Class Mail or Priority Mail containing hazardous materials under [601.10.0](#).
 3. First-Class Mail or Priority Mail with an extra service other than Delivery Confirmation or Signature Confirmation.
- f. Address Change Service (ACS) as described in [4.0](#) is available for First-Class Mail and Priority Mail displaying the appropriate ACS participant code for an authorized ACS participant in conjunction with a permitted ancillary service endorsement. Mailers participating in OneCode ACS under [4.2.6](#) may print an Intelligent Mail barcode on First-Class Mail automation-price letters instead of a participant code and endorsement. The only endorsements permitted for use on First-Class Mail and Priority Mail valid ACS pieces are “Address Service Requested”, “Change Service Requested” or “Electronic Service Requested” subject to the following:
 1. “Address Service Requested” (Option 1) is valid for use on all mailpieces, including ACS participating pieces. “Address Service Requested” (Option 2) is valid for use only on ACS participating pieces.
 2. “Change Service Requested” (Options 1 and 2) are valid for use only on ACS participating pieces.
 3. The words “Option 1” or “Option 2” must not be part of the “Address Service Requested” or “Change Service Requested” endorsement on mailpieces.
 4. Participating ACS mailers are limited to selecting only one of the two options available for “Address Service Requested” and one of the two options available for “Change Service Requested.” The option(s) selected along with the mailer’s ACS participant code will be programmed at the CFS unit to facilitate processing of valid ACS pieces within the conditions that apply to ACS.

507.1.5.1

Exhibit 1.5.1 Treatment of Undeliverable First-Class Mail and Priority Mail

MAILER	
ENDORSEMENT USPS TREATMENT OF UAA PIECES	
No Endorsement	In all cases: Same treatment as “Forwarding Service Requested.”
“Electronic Service Requested”	In all cases: Mailpiece is directed to a Computerized Forwarding System (CFS) or Postal Automated Redirection System (PARS) site for processing. “Address Service Requested” and “Change Service Requested” handling instructions and options are required to be predefined within the ACS mailer profile data. OneCode ACS mailers are also required to insert this service request through a valid service type code in an Intelligent Mail barcode. The service type code in the Intelligent Mail barcode will take precedence over the instructions in the mailer account profile.
“Address Service Requested”	<p><i>OPTION 1</i>¹ If no change-of-address order on file: Piece returned with reason for nondelivery attached (no charge).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded (no charge); separate notice of new address provided (address correction fee charged). • <i>Months 13 through 18:</i> Piece returned with new address attached (no charge). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (no charge). <p><i>OPTION 2</i>² If no change-of-address order on file: Piece returned with reason for nondelivery attached (no charge); separate notice of reason for nondelivery provided (address correction fee charged).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded (no charge); separate notice of new address provided (address correction fee charged). • <i>Months 13 through 18:</i> Piece returned with new address attached (no charge); separate notice of new address provided (address correction fee charged). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (no charge); separate notice of reason for nondelivery provided (address correction fee charged).
“Forwarding Service Requested”	<p>If no change-of-address order on file: Piece returned with reason for nondelivery attached (no charge).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded (no charge). • <i>Months 13 through 18:</i> Piece returned with new address attached (no charge). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (no charge).
“Return Service Requested”	In all cases: Piece returned with new address or reason for nondelivery attached (in either case, no charge).
“Change Service Requested”	<p><i>OPTION 1</i>² In all cases (regardless of whether a change-of-address order is on file): Separate notice of new address or reason for nondelivery provided (in either case, address correction fee charged); piece disposed of by USPS.</p> <p><i>OPTION 2</i>² If no change-of-address order on file: Piece disposed of by USPS; separate notice of reason for nondelivery provided (address correction fee charged).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded (no charge); separate notice of new address provided (address correction fee charged). • <i>Months 13 through 18:</i> Piece disposed of by USPS; separate notice of new address provided (address correction fee charged). • <i>After month 18:</i> Piece disposed of by USPS; separate notice of reason for nondelivery provided (address correction fee charged).
<i>RESTRICTIONS (FOR OPTIONS 1 AND 2)</i>	<p>The following restrictions apply:</p> <p>(1) This endorsement is limited to use on valid mailpieces bearing a proper ACS participant code and only for: (a) Priority Mail containing perishable matter (other than live animals) and the marking “Perishable” and; (b) First-Class Mail (excluding hazardous materials).</p> <p>(2) Delivery Confirmation and Signature Confirmation are the only extra services permitted with this endorsement.</p>

**MAILER
ENDORSEMENT USPS TREATMENT OF UAA PIECES**

“Temp— Return Service Requested”	<p>If no change-of-address order on file: Piece returned with reason for nondelivery attached (no charge).</p> <p>If permanent change-of-address order on file: Piece returned with new address or reason for nondelivery attached (in either case, no charge).</p> <p>If temporary change-of-address order on file: Piece forwarded to temporary address (no charge); no separate notice of temporary address provided.</p>
---	---

1. Valid for all pieces, including Address Change Service (ACS) participating pieces subject to [507.4.0](#).
2. Valid only for ACS participating pieces subject to [507.4.0](#) other than pieces containing hazardous materials.

1.5.2 Periodicals

Undeliverable-as-addressed (UAA) Periodicals publications (including publications pending Periodicals authorization) are treated as described in [Exhibit 1.5.2](#), with these additional conditions:

- a. Periodicals matter is forwarded only to domestic addresses.
- b. Publications with an alternative addressing format under [602.3.0](#) are delivered to the address when possible. Forwarding service is not provided for such mail. Periodicals publishers are notified only when mailpieces with the occupant or exceptional address formats are undeliverable for solely address-related reasons.
- c. When a change of address is filed, copies of Periodicals publications bearing the old address are forwarded to the new address even if the copies show the sender's request for return.
- d. Address correction service is mandatory for all Periodicals publications, and the address correction service fee must be paid for each notice issued.
- e. Address correction service (including Address Change Service (ACS)) is provided for the first issue after 60 days for all publications, unless copies are to be returned at the publisher's request. ACS participants may receive the change notice before day 60, if so requested. Copies received after the address correction notice is mailed are disposed of by the USPS. When copies of the publication cannot be forwarded, the address correction notice is prepared for the first undeliverable issue of the publication received. Forms 3579 are mailed to publishers at least once a week.
- f. The publisher may request the return of copies of undelivered Periodicals by printing the endorsement “Address Service Requested” on the envelopes or wrappers, or on one of the outside covers of unwrapped copies, immediately preceded by the sender's name, address, and ZIP+4 or 5-digit ZIP Code. This endorsement obligates the publisher to pay return postage. Each returned piece is charged the single-piece First-Class Mail price for the weight and shape of the piece, and the nonmachinable surcharge if applicable, or the Priority Mail price for the weight and destination of the piece. When the address correction is provided incidental to the return of the piece, there is no charge for the correction.
- g. A publisher of Periodicals publications may request a refund of the fees paid for duplicate address correction notices on Forms 3579 provided by the USPS if the customer submitted a change-of-address order and the first and duplicate notices are provided on magnetic tape by ACS or on printed copy by a

507.1.5.3

Computerized Forwarding System (CFS) unit. The refund request must be supported by documentation showing the number of duplicate notices received. The USPS does not process refunds for duplicate notices if:

1. The customer did not submit a change-of-address order.
2. The original and duplicate notices are not provided both by ACS or both by CFS.
3. The publisher does not submit documentation to support the refund amount.

Exhibit 1.5.2 Treatment of Undeliverable Periodicals

MAILER ENDORSEMENT	USPS TREATMENT OF UAA PIECES
No Endorsement ¹	<p>If no change-of-address order on file: Separate notice of reason for nondelivery provided (address correction fee charged); piece disposed of by USPS.</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>First 60 days:</i> Piece forwarded (no charge). • <i>After 60-day period:</i> Separate notice of new address or reason for nondelivery provided (in either case, address correction fee charged); piece disposed of by USPS.
“Electronic Service Requested”	<p>In all cases: Mailpiece is directed to a Computerized Forwarding System (CFS) or Postal Automated Redirection System (PARS) site for processing. Handling instructions and options are required to be predefined within the ACS mailer profile data. OneCode ACS mailers are also required to insert this service request through a valid service type code in an Intelligent Mail barcode. The service type code in the Intelligent Mail barcode will take precedence over the instructions in the mailer account profile</p>
“Address Service Requested” ¹	<p>If no change-of-address order on file: Piece returned with reason for nondelivery attached (only return postage charged at First-Class Mail single-piece price or Priority Mail single-piece price, as appropriate for weight of piece).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>First 60 days:</i> Piece forwarded (no charge). • <i>After 60-day period:</i> Piece returned with new address or reason for nondelivery attached (in either case, only return postage charged at First-Class Mail single-piece price or Priority Mail single-piece price, as appropriate for weight of piece).
“Forwarding Service Requested”	Not available for Periodicals.
“Return Service Requested”	Not available for Periodicals.
“Change Service Requested”	Not available for Periodicals.

1. Valid for all pieces, including Address Change Service (ACS) participating pieces.

1.5.3 Standard Mail

Undeliverable-as-addressed (UAA) Standard Mail is treated as described in [Exhibit 1.5.3a](#) and [Exhibit 1.5.3k](#), with these additional conditions:

- a. Standard Mail is forwarded only to domestic addresses.

Exhibit 1.5.3a Treatment of Undeliverable Standard Mail

MAILER ENDORSEMENT	USPS TREATMENT OF UAA PIECES
No Endorsement ¹	<p>In all cases: Piece disposed of by USPS.</p> <p><i>RESTRICTIONS:</i> Standard Mail containing hazardous materials must bear a permissible endorsement (see 507.1.5.3c.).</p>
“Electronic Service Requested”	<p>In all cases: Mailpiece is directed to a Computerized Forwarding System (CFS) or Postal Automated Redirection System (PARS) site for processing. “Address Service Requested” and “Change Service Requested” handling instructions are required to be predefined within the ACS mailer profile data. OneCode ACS mailers are also required to insert this service request through a valid service type code in an Intelligent Mail barcode. The service type code in the Intelligent Mail barcode will take precedence over the instructions in the mailer account profile.</p>
“Address Service Requested” ²	<p>If no change-of-address order on file: Piece returned with reason for nondelivery attached (only weighted fee charged).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded (no charge); separate notice of new address provided (address correction fee charged). • <i>Months 13 through 18:</i> Piece returned with new address attached (only weighted fee charged). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (only weighted fee charged).
“Address Service Requested” ³	<p>If no change-of-address order on file: Piece returned with reason for nondelivery attached (First-Class Mail price charged).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded (\$0.35 per letter or \$1.05 per flat postage due charged to mailer); separate notice of new address provided (address correction fee charged). • <i>Months 13 through 18:</i> Piece returned with new address attached (First-Class Mail price charged). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (First-Class Mail price charged).
“Forwarding Service Requested”	<p>If no change-of-address order on file: Piece returned with reason for nondelivery attached (only weighted fee charged).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded (no charge). • <i>Months 13 through 18:</i> Piece returned with new address attached (only weighted fee charged). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (only weighted fee charged).
“Return Service Requested”	<p>In all cases: Piece returned with new address or reason for nondelivery attached (in either case, only return postage charged at First-Class Mail single-piece price or Priority Mail single-piece price, as appropriate for weight of piece).</p>

MAILER ENDORSEMENT	USPS TREATMENT OF UAA PIECES
“Change Service Requested” ^{1, 4}	<p>In all cases: Separate notice of new address or reason for nondelivery provided (in either case, address correction fee charged); piece disposed of by USPS.</p> <p><i>RESTRICTIONS:</i> The following restrictions apply: (1) Delivery Confirmation is the only extra service permitted with this endorsement. (2) This endorsement is not permitted for Standard Mail containing hazardous materials.</p>
<p>1. Not valid for pieces containing hazardous materials.</p> <p>2. Valid for all pieces not using Address Change Service electronic and automated options under footnote 3.</p> <p>3. Valid only for pieces using Address Change Service electronic and automated options as automated postage due transactions are implemented.</p> <p>4. Not valid for pieces containing hazardous materials. Valid for all other pieces, including ACS participating pieces.</p> <p>b. The exceptional address format under 602.3.0 may not be used on mail with any ancillary service endorsement or mail with any extra service. Forwarding service and address correction service are not provided for undeliverable Standard Mail with this address format.</p> <p>c. The endorsement “Change Service Requested” is not permitted for Standard Mail containing hazardous materials under 601.10.0. Standard Mail containing hazardous materials must bear the endorsement “Address Service Requested,” “Forwarding Service Requested,” or “Return Service Requested.”</p> <p>d. Standard Mail can be forwarded or returned at the appropriate Media Mail or Library Mail price if the content of the mail qualifies as Media Mail under 173, 373, or 473 or Library Mail under 183, 383, or 483 and the mail is marked “Media Mail” or “Library Mail” directly below the ancillary service endorsement.</p> <p>e. Mail that can qualify for Shipper Paid Forwarding under the applicable standards in 2.3.5 is forwarded or returned at the First-Class Mail single-piece price or Priority Mail single-piece price applicable for the weight of the piece.</p> <p>f. If a Standard Mail piece and any attachment to that piece are not opened by the addressee and the sender has guaranteed forwarding and return postage, the addressee may refuse delivery of the piece and have it returned to the sender without affixing postage. If a Standard Mail piece or any attachment to that piece is opened by the addressee, the addressee must affix the required postage to return the piece to the sender.</p> <p>g. Standard Mail with bulk insurance or return receipt for merchandise must be endorsed “Address Service Requested,” “Forwarding Service Requested,” or “Return Service Requested.” Standard Mail with Delivery Confirmation must be endorsed “Address Service Requested,” “Forwarding Service Requested,” “Return Service Requested,” or “Change Service Requested.”</p> <p>h. When a large volume of identical-weight pieces originates from a single mailer and is endorsed “Return Service Requested,” the USPS may weigh a sample of at least 25 pieces and divide that weight by the number of pieces to determine the weight of a single piece. After the per piece weight is determined, all the pieces are weighed in bulk and divided by the per piece weight to determine the total number of pieces. The return postage is calculated using these numbers. Pieces of identical weight counted in this manner are returned to the sender with the new address or the reason for nondelivery endorsed on the piece.</p>	

- i. A weighted fee is charged when an unforwardable or undeliverable piece is returned to the sender and the piece is endorsed “Address Service Requested” or “Forwarding Service Requested.” The weighted fee is the First-Class Mail or Priority Mail single-piece price and, if applicable, the nonmachinable surcharge (see [123.1.0](#) or [133.1.0](#)), multiplied by 2.472 and rounded up to the next whole cent (if the computation yields a fraction of a cent). The weighted fee is computed (and rounded if necessary) for each piece individually. Using “Address Service Requested” or “Forwarding Service Requested” obligates the sender to pay the weighted fee on all returned pieces.
- j. A returned piece endorsed “Return Service Requested” is charged the single-piece First-Class Mail price for the weight and shape of the piece, and the nonmachinable surcharge if applicable, or the Priority Mail price for the weight and destination of the piece. The appropriate First-Class Mail price for a Not Flat-Machinable piece is the First-Class Mail parcel price.
- k. Mail sent as Bulk Parcel Return Service (BPRS) under [12.0](#) is returned at the BPRS per piece fee if one of the endorsements includes “ — BPRS” as shown in [Exhibit 1.5.3k](#).

Exhibit 1.5.3k Treatment of Undeliverable BPRS Standard Mail

MAILER ENDORSEMENT	USPS TREATMENT OF UAA PIECES
“Return Service Requested— BPRS”	<p>In all cases: Piece returned with new address or reason for nondelivery attached (in either case, only Bulk Parcel Return Service fee charged).</p>
“Address Service Requested— BPRS”	<p>If no change-of-address order on file: Piece returned with reason for nondelivery attached (only Bulk Parcel Return Service fee charged).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> piece forwarded (no charge to addressee); separate ACS notice of new address provided (ACS address correction fee and forwarding postage charged at First-Class Mail single-piece price or Priority Mail single-piece price, as appropriate for weight of piece, via ACS participant code). • <i>Months 13 through 18:</i> piece returned with new address attached (only Bulk Parcel Return Service fee charged). • <i>After month 18:</i> piece returned with reason for nondelivery attached (only Bulk Parcel Return Service fee charged).

- i. Customized MarketMail under [705.1.0](#) is not eligible to use ancillary service endorsements.

1.5.4 Package Services and Parcel Select

Undeliverable-as-addressed (UAA) Package Services mail is treated as described in [Exhibit 1.5.4](#), with these additional conditions:

- a. Package Services and Parcel Select mail is forwarded only to domestic addresses.
- b. The exceptional address format under [602.3.0](#) may not be used on mail with any ancillary service endorsement or mail with any extra service. Forwarding service is not provided for such mail. Undeliverable Parcel Post, Parcel Select, Media Mail, and Library Mail with this address format are returned with the reason for nondelivery attached only if the address is incorrect or incomplete or

507.1.5.4

the mail is undeliverable for another reason as shown in [Exhibit 1.4.1 USPS Endorsements for Mail Undeliverable as Addressed](#). Undeliverable Bound Printed Matter with this address format is disposed of by the USPS.

- c. The endorsement “Change Service Requested” is not permitted for Package Services mail containing hazardous materials under [601.10.0](#).
- d. If a Package Services piece and any attachment to that piece are not opened by the addressee and the sender has guaranteed forwarding and return postage, the addressee may refuse delivery of the piece and have it returned to the sender without affixing postage and still have other Package Services pieces forwarded to the addressee. If a Package Services piece or any attachment to that piece is opened by the addressee, the addressee must affix the required postage to return the piece to the sender. If the addressee does not want to pay forwarding postage for all Package Services mail, the postmaster of the new address must use Form 3546 to notify the postmaster of the old address to discontinue the forwarding of Package Services mail.
- e. Package Services mail bearing a postage meter indicia from a customer meter that is unaddressed and without a return address (undeliverable) is returned to the Post Office of mailing. The reason for nondelivery is attached without charging the address correction fee. The piece is returned to the meter licensee on payment of the return postage.
- f. Bound Printed Matter with no ancillary service endorsement and:
 1. With Delivery Confirmation, with Signature Confirmation, or with no other extra service, is disposed of by USPS.
 2. With an extra service other than Delivery Confirmation or Signature Confirmation is treated as though endorsed “Forwarding Service Requested.”

Exhibit 1.5.4 Treatment of Undeliverable Package Services Mail and Parcel Select

MAILER ENDORSEMENT	USPS TREATMENT OF UAA PIECES
No Endorsement	<p>In all cases: Same treatment as “Forwarding Service Requested.”</p> <p><i>EXCEPTION:</i> Bound Printed Matter with Delivery Confirmation, with Signature Confirmation, or with no other extra service is disposed of by USPS.</p>
“Electronic Service Requested”	<p>In all cases: Mailpiece is directed to a Computerized Forwarding System (CFS) or Postal Automated Redirection System (PARS) site for processing. “Address Service Requested” and “Change Service Requested” handling instructions are required to be predefined within the ACS mailer profile data. OneCode ACS mailers are also required to insert this service request through a valid service type code in an Intelligent Mail barcode. The service type code in the Intelligent Mail barcode will take precedence over the instructions in the mailer account profile.</p>
“Address Service Requested”¹	<p>If no change-of-address order on file: Piece returned with reason for nondelivery attached (only return postage charged at appropriate Package Services single-piece price).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded locally (no charge); forwarded out of town (as postage due for addressee at appropriate Package Services single-piece price); separate notice of new address provided (address correction fee charged). If addressee refuses to pay postage due, piece returned with reason for nondelivery attached (only forwarding postage, where attempted, and return postage charged at appropriate Package Services single-piece price). • <i>Months 13 through 18:</i> Piece returned with new address attached (only return postage charged at appropriate Package Services single-piece price). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (only return postage charged at appropriate Package Services single-piece price).
“Forwarding Service Requested”	<p>If no change-of-address order on file: Piece returned with reason for nondelivery attached (only return postage charged at appropriate Package Services single-piece price).</p> <p>If change-of-address order on file:</p> <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded locally (no charge); forwarded out of town (as postage due for addressee at appropriate Package Services single-piece price). If addressee refuses to pay postage due, piece returned with reason for nondelivery attached (only forwarding postage, where attempted, and return postage charged at appropriate Package Services single-piece price). • <i>Months 13 through 18:</i> Piece returned with new address attached (only return postage charged at appropriate Package Services single-piece price). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (only return postage charged at appropriate Package Services single-piece price).
“Return Service Requested”	<p>In all cases: Piece returned with new address or reason for nondelivery attached (in either case, only return postage charged at appropriate Package Services single-piece price).</p>
“Change Service Requested”²	<p>In all cases: Separate notice of new address or reason for nondelivery provided (in either case, address correction fee charged); piece disposed of by USPS.</p> <p><i>RESTRICTIONS:</i> The following restrictions apply: (1) Delivery Confirmation and Signature Confirmation are the only extra services permitted with this endorsement. (2) This endorsement is not permitted for Package Services mail containing hazardous materials.</p>

1. Valid for all pieces, including Address Change Service (ACS) participating pieces.

2. Not valid for pieces containing hazardous materials. Valid for all other pieces, including ACS participating pieces.

507.1.5.5

1.5.5 Express Mail

Undeliverable-as-addressed (UAA) Express Mail is treated as described in [Exhibit 1.5.5](#), with these additional conditions:

- a. Express Mail is forwarded only to domestic addresses.
- b. Directory service is provided for Express Mail that cannot be delivered because of an incorrect or incomplete address.
- c. The Express Mail portion of an Express Mail drop shipment receives the forwarding, return, and address correction services described in [Exhibit 1.5.5](#). The mail enclosed within the drop shipment receives the services appropriate for its class.
- d. Undeliverable or unclaimed Express Mail is held by the USPS for 5 calendar days before it is returned to the sender at no additional postage, unless either of the following applies:
 1. The mail is refused before the end of the 5 calendar days.
 2. The mail is not refused and the sender has specified in the return address a longer holding period (not to exceed 30 days). The sender may also place an instruction above the return address, subject to [202.4.0](#), [302.3.0](#), or [402.3.0](#), directing the return of undeliverable mail after fewer than 5 calendar days.

Exhibit 1.5.5 Treatment of Undeliverable Express Mail

MAILER ENDORSEMENT	USPS TREATMENT OF UAA PIECES
No endorsement	In all cases: Same as USPS treatment for "Forwarding Service Requested."
"Address Service Requested"	If no change-of-address order on file: Piece returned with reason for nondelivery attached (no charge). If change-of-address order on file: <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded (no charge); separate notice of new address provided (address correction fee charged). • <i>Months 13 through 18:</i> Piece returned with new address attached (no charge). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (no charge).
"Forwarding Service Requested"	If no change-of-address order on file: Piece returned with reason for nondelivery attached (no charge). If change-of-address order on file: <ul style="list-style-type: none"> • <i>Months 1 through 12:</i> Piece forwarded (no charge). • <i>Months 13 through 18:</i> Piece returned with new address attached (no charge). • <i>After month 18:</i> Piece returned with reason for nondelivery attached (no charge).
"Return Service Requested"	In all cases: Piece returned with new address or reason for nondelivery attached (in either case, no charge).
"Change Service Requested"	Not available for Express Mail.

1.6 Attachments and Enclosures

1.6.1 Periodicals

Undeliverable Periodicals (including publications pending Periodicals authorization) with a nonincidental First-Class Mail attachment or enclosure are returned at the single-piece First-Class Mail price for the weight and shape of the piece, and the nonmachinable surcharge if applicable, or Priority Mail price for the weight and destination of the piece. The weight of the attachment or enclosure is not included when computing the charges for return of the mailpiece. Undeliverable Periodicals (including publications pending Periodicals authorization) with an incidental First-Class Mail attachment or enclosure are treated as dead mail unless endorsed "Address Service Requested."

1.6.2 Standard Mail

Undeliverable, unendorsed Standard Mail with a nonincidental First-Class Mail attachment or enclosure is returned at the single-piece First-Class Mail price for the weight and shape of the piece or Priority Mail price for the weight and destination of the piece. The weight of the First-Class Mail attachment or enclosure is not included when computing the charges for return of the mailpiece. Undeliverable, unendorsed Standard Mail with an incidental First-Class Mail attachment or enclosure is treated as dead mail.

1.6.3 Package Services

Undeliverable, unendorsed Package Services with a nonincidental First-Class Mail attachment or enclosure is either forwarded or returned at the single-piece Package Services price. The weight of the First-Class Mail attachment or enclosure is not included when computing the charges for return of the mailpiece. Undeliverable, unendorsed Package Services with incidental First-Class Mail attachments or enclosures is returned at the single-piece Package Services price.

1.7 Mixed Classes

1.7.1 Combination With First-Class Mail

Combination mailings of First-Class Mail with Standard Mail or Package Services are provided the forwarding and return service of Standard Mail, as appropriate:

- a. An undeliverable combination mailpiece, including a piece that cannot be forwarded, one part of which is First-Class Mail (other than an incidental First-Class Mail attachment or enclosure), must be returned to the sender, subject to the charge for return according to its class. The weight of the First-Class Mail piece is not included when computing the charge for return of the Periodicals, Standard Mail, or Package Services part.
- b. Items with incidental First-Class Mail enclosures or attachments are returned according to the class of the host piece.
- c. An undeliverable combination mailpiece *that is not returnable to the sender*, of which one part is First-Class Mail, is given the treatment that applies to the class of the other part.

507.1.7.2

1.7.2 Other Combinations

Pieces of Periodicals, Standard Mail, or Package Services with other classes of mail attached or enclosed (other than incidental First-Class Mail attachments or enclosures) must be forwarded as specified for the host piece by the applicable standards. Neither the enclosures nor the host piece are provided the forwarding service of First-Class Mail.

1.7.3 Host Piece

Any undeliverable combination mailpiece that does not include First-Class Mail matter is given the treatment applicable to the host piece.

1.7.4 Parcel

A combination parcel containing Media Mail and Bound Printed Matter is charged postage at the Parcel Post Inter-BMC price when forwarded or returned.

1.8 Returning Mail**1.8.1 Nonmailable**

Nonmailable matter is returned to the sender immediately.

1.8.2 Refused Mail

Returnable mail is returned if refused by the addressee.

1.8.3 Express Mail, Priority Mail, First-Class Mail

Mailpieces sent as Express Mail, Priority Mail, or First-Class Mail that cannot be delivered as addressed or forwarded to a new address, unless otherwise requested by the sender, are returned when possible to the sender at no additional charge. Excluding pieces containing live animals, the following are disposed of by the USPS:

- a. Priority Mail bearing the appropriate Address Change Service (ACS) participant code and marked "Perishable" and endorsed "Change Service Requested."
- b. First-Class Mail bearing the appropriate ACS participant code and endorsed "Change Service Requested."

1.8.4 Other Classes

Other returnable mail is treated as appropriate for the class of mail and the sender's instructions except as noted below.

1.8.5 Extra Services

If a return receipt is attached to a certified, collect on delivery (COD), numbered insured, registered, return receipt for merchandise, or Express Mail piece to be returned, the reason for nondelivery is shown on the face of the piece. The receipt stays attached to the piece and is returned to the sender. Registered Mail is returned through the registry system. The sender must sign a delivery receipt for returned Express Mail and for certified, COD, numbered insured, registered, and return receipt for merchandise mail.

1.8.6 No Sender Instructions

Mail without a specific address or instructions from the sender is held:

- a. For 5 days if for delivery by rural or highway contract route carrier.

- b. For 10 days if for general delivery at an office with city carrier service. If the addressee notifies the postmaster of a delay in claiming the mail, the postmaster may hold such mail up to 30 days.
- c. For 15 days if for general delivery at an office without city carrier service.

1.8.7 Post Office Box

Deliverable mail addressed to a Post Office box is not returned until after the box is declared vacant, except for certified, collect on delivery (COD), insured, registered, postage due, and perishable mail.

1.8.8 Franked Mail

Unclaimed franked mail from a Member of Congress is returned to the origin Post Office (if known) or the Washington, DC, Post Office.

1.9 Dead Mail

1.9.1 Basic Information

Dead mail is matter deposited in the mail that is or becomes undeliverable and cannot be returned to the sender from the last office of address. Every reasonable effort is made to match articles found loose in the mail with the envelope or wrapper from which lost and to return or forward the articles.

- a. Nonmail matter (e.g., wallets and bank deposits) found in collection boxes or at other points within USPS jurisdiction is returned postage due at the single-piece First-Class Mail or Priority Mail price for keys and identification devices that is applicable based on the weight of the matter.
- b. Undeliverable, unendorsed Standard Mail, printed matter, circulars, newspapers, magazines, and other publications, and unidentified articles that have no value are disposed of as waste.
- c. Undeliverable articles of \$10 or more in value are treated as dead mail.
- d. Dead letters are opened at mail recovery centers to determine the name and address of the addressee or sender to permit delivery or return.
- e. Except for unendorsed Standard Mail, all undeliverable Standard Mail and Package Services, and insured First-Class Mail containing Standard Mail or Package Services enclosures, that cannot be returned because of an incorrect, incomplete, illegible, or missing return address is opened and examined to identify the sender or addressee.
- f. Dead parcels are opened at mail recovery centers to determine name and address of the addressee or sender to permit delivery or return. Dead parcels returned to the sender or delivered to the addressee are priced postage due at the zone price from the dead parcel branch. If parcels are endorsed to show that they are USPS property, or that the sender refused to pay postage due on return as undelivered, the parcels are considered USPS property.

1.9.2 Books and Sound Recordings

Books and sound recordings are disposed of by the USPS under [1.9.1](#) and [1.9.3](#), unless the publisher or distributor requests that books and sound recordings bearing specific trade names, company names, or other organizational identifications be released to the requester or its representative. The requester must

submit a written application to the manager, Policy and Program Development, Office of the Consumer Advocate, USPS Headquarters. The application must state that the requester is the publisher or distributor of the books and sound recordings listed. The request may specify only one location where the books and sound recordings are to be picked up. If the request is approved, instructions and conditions for release are established. The approval stays in effect for 5 years or until canceled in writing by the requester or the USPS.

1.9.3 USPS Policy and Procedures

The *Postal Operations Manual* contains USPS policy and procedures for handling and disposing of dead mail (including through sale at auction or by donation to institutions).

2.0 Forwarding

2.1 **Change-of-Address Order**

2.1.1 Normal Time Limit

Records of permanent change-of-address orders are kept by city delivery Post Offices for 18 months, for forwarding and for address correction purposes, from the end of the month when the change takes effect. A record of change-of-address orders from general delivery to a permanent local address without time limit is kept 6 months. A record of change-of-address orders to other than a permanent local address is kept 30 days.

2.1.2 Time Limit Extension

When a customer notifies the Post Office of a permanent change in mailing address or the USPS changes a customer's mailing address, the postmaster may extend the forwarding period for 1 additional year if mail is regularly received addressed to the old address. To qualify for this extension, the customer must show that a financial hardship will ensue if extended forwarding is not granted. The customer must also show that reasonable effort is being made to notify correspondents of the new address.

2.1.3 Temporary Forwarding

A customer temporarily moving away may have mail forwarded for a specific period of time, not to exceed 12 months (364 total consecutive days). The Postal Service provides temporary forwarding service for a period of two weeks to six months (15 to 185 days) in response to an initial temporary change-of-address order. Customers may extend the temporary forwarding period up to a maximum of 12 months (364 days), by filing a second change-of-address order to begin on the first day of the second six-month period (the 186th day), and expiring on the desired date, up to and including the last day of the second six-month period (364th day). Every temporary change-of-address order must specify both beginning and end dates.

2.1.4 Methods of Filing

Customers may use one of the following methods to file a change-of-address with the Post Office:

- a. Mail or submit Form 3575 or other written notice to any Post Office, or as otherwise directed by the Postal Service.
- b. Use Internet Change of Address (ICOA) at <https://moversguide.usps.com>. Customers using the ICOA method must provide a valid credit card number for identity verification. The customer's credit card is charged \$1.00 for the verification.
- c. Use Telephone Change of Address (TCOA) at 1-800-ASK-USPS. Customers using the TCOA method must provide a valid credit card number for identity verification. The customer's credit card is charged \$1.00 for the verification.

2.1.5 Prohibited Use

A change-of-address order cannot be filed for the following:

- a. An addressee (e.g., an individual or a business entity or other organization) may not file a change-of-address order for mail originally addressed to the addressee at an organization, business, place of employment, or other affiliation. The organization or business may change the address (but not the addressee's name) on a mailpiece to redirect it to the addressee. Barcodes on redirected mailpieces should be obliterated to facilitate automation processing.
- b. Individual addressees at the Department of State. Individuals may not file a change-of-address order for mail originally addressed to the individuals at any Department of State ZIP Code. Additionally, individuals may not file a change-of-address order to have mail forwarded to any Department of State ZIP Code.

2.2 Forwardable Mail

2.2.1 Classes

Forwarding is available for all classes of mail, subject to the corresponding conditions described in 1.0.

2.2.2 Reforwarding

The address (but not the name) may be changed and the mail reforwarded as many times as necessary to reach the addressee.

2.2.3 Discontinued Post Office

All Express Mail, First-Class Mail, Periodicals, and Package Services addressed to a discontinued Post Office may be forwarded without added charge to a Post Office that the addressee designates as more convenient than the office to which the USPS ordered the mail sent.

2.2.4 Rural Delivery

When rural delivery service is established or changed, a customer of any office receiving mail from the rural carrier of another office may have all Express Mail, First-Class Mail, Periodicals, and Package Services forwarded to the latter office for delivery by the rural carrier without added charge, if the customer files a written request with the postmaster at the former office.

2.2.5 Converted Service

Mail addressed to Post Office, rural, or highway contract route boxholders is delivered to customers residing in the affected area until June 30 following establishment of, or conversion to, city delivery service or for 90 days, whichever is later.

2.2.6 Mail for Military Personnel

All Express Mail, First-Class Mail, Periodicals, and Package Services addressed to persons in the U.S. Armed Forces (including civilian employees) serving where U.S. mail service operates is forwarded at no added charge when the change of address is caused by official orders. This free forwarding also applies to mail for household members whose change of address is caused by official orders to persons serving in or who are civilian employees of the U.S. Armed Forces. If the official permanent change of station order is to an overseas APO/FPO address, military authorities forward mail between the United States and those addresses; forwarding is limited to 60 days.

2.2.7 Mail Addressed to CMRA Customers

Mail addressed to an addressee at a commercial mail receiving agency (CMRA) is not forwarded through the USPS. The CMRA customer may make special arrangements for the CMRA operator to remail the mail with payment of new postage. A CMRA must accept and remail mail to former customers for at least 6 months after termination of the agency relationship. After the 6-month period, the CMRA may refuse mail addressed to a former customer.

2.3 Postage for Forwarding**2.3.1 Origin**

Forwarding postage is computed by using the forwarding office as the origin office.

2.3.2 Express Mail

Express Mail is forwarded without charge.

2.3.3 First-Class Mail

First-Class Mail (including postcards and stamped cards) and Priority Mail are forwarded without charge when postage is fully prepaid by the sender.

2.3.4 Periodicals

Periodicals publications (including publications pending Periodicals authorization) are forwarded without charge for 60 days when postage is fully prepaid by the sender.

2.3.5 Standard Mail

Generally, Standard Mail is subject to collection of additional postage from the mailer when forwarding service is provided by charging the Standard Mail weighted fee on all returns. Shipper Paid Forwarding, used in conjunction with Address Change Service (4.0), provides mailers of Standard Mail machinable parcels an option of paying forwarding postage at the applicable single-piece First-Class Mail or Priority Mail price. Mail that qualifies for Bulk Parcel Return Service (BPRS) is returned at the BPRS per piece charge if the mailer uses one of the ancillary service endorsements that specifies BPRS (e.g., "Return Service Requested—BPRS").

2.3.6 Package Services

Package Services is subject to the collection of additional postage at the applicable price for nonlocal forwarding. Unless endorsed "Change Service Requested," all Package Services is delivered as directed without additional postage charge when the old and new addresses are served by the same Post Office. The addressee may refuse any piece of Package Services that has been forwarded. This refusal does not revoke the right to have other Package Services forwarded. If the addressee does not want to pay forwarding postage for all Package Services, the addressee must ask the postmaster of the new address to use Form 3546 to notify the postmaster of the old address to discontinue the forwarding of Package Services.

2.3.7 Extra Services

Certified, collect on delivery (COD), Delivery Confirmation, insured, registered, Signature Confirmation, and special handling mail is forwarded without additional extra service fees, subject to the applicable postage charge (to a domestic address only).

3.0 Premium Forwarding Service**3.1 Prices and Fees****3.1.1 Application Fee**

Customers must pay a \$10.00 nonrefundable application fee.

3.1.2 Weekly Reshipment Charge

The reshipment charge for each Priority Mail shipment to one temporary address is \$11.95 for each week of service requested. The amount due for the total weeks requested must be paid in full at the time the application is received.

3.1.3 Extension of Service

A Premium Forwarding Service (PFS) customer may contact the Post Office responsible for delivery to the primary address prior to the last shipment date and extend PFS service (up to 1 year maximum service from the initial start date) as needed. An extension is processed only after the Post Office receives payment of the reshipment charges due for the total weeks of extension requested.

3.1.4 Early Termination of Service

A customer who terminates PFS early (e.g., a customer prepays for 10 weeks but returns to a primary address after 8 weeks, either temporarily or permanently) may request a refund for any unused weekly shipment charges from the Post Office serving the primary address. The application fee is nonrefundable.

3.2 Basic Standards**3.2.1 Description**

Premium Forwarding Service (PFS) provides residential delivery customers and certain Post Office box customers an option to have all mail addressed to their primary address reshipped or rerouted to a temporary address mainly by means of a

507.3.2.2

weekly Priority Mail shipment. PFS is available for a period of not less than 2 weeks and not more than 1 year. This optional service is separate from the piece-by-piece forwarding service offered in [2.0](#), whereby only certain mailpieces are forwarded.

3.2.2 Use

Participation in PFS is subject to the following standards:

- a. PFS is available to residential delivery customers and to Post Office box customers with a size-one or size-two Post Office box.
- b. A customer must submit a completed PFS application, Form 8176, Premium Forwarding Service (PFS) Application, as specified by the Postal Service. The application fee and weekly reshipment charges for the full duration of the requested service must accompany the application.
- c. Except as provided in [3.2.2d](#), customers must designate on the application whether the order is for an “Individual” or an “Entire Household.”
- d. For customers whose primary address is a Post Office box, only the box customer is authorized to initiate the application and “Entire Household” must be designated on the application.
- e. PFS is available for a period of not less than 2 weeks and not more than 1 year.
- f. PFS is available only from and to domestic addresses.
- g. PFS is available to, but not from, single-point central delivery addresses such as RV parks, hospitals, hotels, and U.S. Department of State addresses. See [703.3.0](#) for additional U.S. Department of State requirements.

3.2.3 Prohibited Use

PFS cannot be combined with any ancillary or extra services beyond those purchased by the original sender. In addition, PFS is not available for:

- a. Customers who have an active temporary or permanent change-of-address (COA).
- b. Customers who have an active Hold Mail Authorization (PS Form 8076). Mail that has previously been held at the primary address Post Office cannot be included in PFS reshipments to a customer's temporary address.
- c. Customers whose primary address is a size-three, size-four, or size-five Post Office box. Residential customers who use these Post Office box sizes due to the unavailability of smaller boxes may request a waiver of this restriction.
- d. Customers whose primary address is a business delivery address.
- e. Customers whose primary address is a central point to which the USPS provides delivery in bulk to a third party, such as a commercial mail receiving agency (CMRA), RV park, trailer park, or hotel.
- f. Customers whose primary address or temporary address is an APO or FPO.
- g. Customers whose temporary address is within the 969 3-digit ZIP Code area or is otherwise in a U.S. territory or possession that requires a customs declaration.

3.3 Preparation

3.3.1 Weekly Priority Mail Reshipments

Regardless of any mailer's ancillary service endorsement on a mailpiece, all mail is reshipped in the weekly Priority Mail shipment, except as specified in 3.3.2 through 3.4.1.

3.3.2 Mailpieces Arriving at the Primary Address Endorsed "Surface Mail Only" or With Other Hazardous Materials Markings

Any mailpiece arriving at the primary address that indicates surface only transportation such as Label 127, "Surface Mail Only" or bears other hazardous materials markings such as "Consumer Commodity ORM-D", cannot be reshipped in the weekly Priority Mail shipment and must be rerouted separately via surface transportation.

3.3.3 Mailpieces Requiring a Scan or Signature at Delivery

Mailpieces requiring a scan or signature at delivery, such as Express Mail, Certified Mail, numbered insured mail or mailpieces with Delivery Confirmation, are appropriately scanned, then rerouted immediately and separately to the temporary address, subject to the following:

- a. Express Mail, Priority Mail, and First-Class Mail are rerouted at no additional charge.
- b. Standard Mail parcels are separately rerouted postage due at the appropriate 1-pound Parcel Post single-piece price.
- c. Package Services mailpieces (Parcel Post, Bound Printed Matter, Media Mail, Library Mail and Parcel Select) are separately rerouted postage due at the appropriate single-piece price in the subclass in which the mailpiece was originally shipped. For Parcel Select items, the applicable price is the Parcel Post price.

3.3.4 Priority Mail Not Requiring a Scan or Signature at Delivery

Priority Mail that does not require a scan or signature at delivery is immediately and separately rerouted to the temporary address, unless it will fit into the weekly Priority Mail shipment and such inclusion does not delay its delivery to the temporary address.

3.3.5 Large First-Class Mail and Periodicals Parcels Not Requiring a Scan or Signature at Delivery

First-Class Mail and Periodicals parcels (firm bundles) not requiring a scan or signature at delivery and that do not fit into the weekly Priority Mail shipment are separately rerouted at no additional charge.

3.3.6 Standard Mail Parcels Not Requiring a Scan or Signature at Delivery

Eligible Standard Mail parcels that do not require a scan or signature at delivery are included in the weekly Priority Mail shipment provided they will fit. Parcels that do not fit or are otherwise ineligible (e.g., mailpieces identified as surface transportation only) are separately rerouted postage due at the appropriate 1-pound Parcel Post single-piece price.

3.3.7 Package Services and Parcel Select Mailpieces Not Requiring a Scan or Signature at Delivery

Package Services and Parcel Select mailpieces not requiring a scan or signature at delivery are separately rerouted postage due at the appropriate single-piece price in the subclass in which the mailpiece was originally shipped. For Parcel Select items, the applicable price is the Parcel Post price.

3.4 Enter and Deposit

3.4.1 Mailpieces Arriving Postage Due at the Primary Address

Any mailpiece arriving postage due at the Post Office serving a customer's primary address is not reshipped in the weekly Priority Mail shipment and will be rerouted individually. Mailpieces arriving postage due are rerouted as follows:

- a. Postage due First-Class Mail mailpieces are rerouted as First-Class Mail postage due. Only the original postage due amount is collected. There is no additional charge for rerouting the mailpiece.
- b. Postage due Priority Mail mailpieces are rerouted as Priority Mail postage due. Only the original postage due amount is collected. There is no additional charge for rerouting the mailpiece.
- c. Postage due Package Services and Parcel Select mailpieces are rerouted postage due at the appropriate single-piece price in the subclass in which the mailpiece was originally shipped. For Parcel Select items, the applicable price is the Parcel Post price. The total postage due for Package Services and Parcel Select mailpieces is the sum of the postage due at the time of receipt at the primary address plus the postage due for rerouting the mailpiece from the primary Post Office to the temporary address at the appropriate single-piece price.

4.0 Address Correction Services

4.1 Address Correction Service

4.1.1 Address Correction Service Fee

Per manual notice issued—\$0.50

Per electronic notice (or manual notice for electronic option customers) issued:

- First-Class Mail—\$0.08
- Other than First-Class Mail—\$0.25

Per automated notice issued:

- First-Class Mail letters (first two notices)—\$0.00
- First-Class Mail letters (per additional notice)—\$0.06
- Standard Mail letters (first two notices)—\$0.03
- Standard Mail letters (per additional notice)—\$0.18

4.1.2 Purpose

If mail cannot be delivered as addressed, address correction service allows the sender on request, using the appropriate ancillary service endorsement under [1.0](#), to obtain the addressee's new (forwarding) address (if the addressee filed a change-of-address order with the USPS) or the reason for nondelivery. Address

corrections and notices are not provided for customers who file a temporary change of address or for individuals at a business address (see 2.1). Address correction service is available alone or in combination with forwarding and return service.

4.1.3 Invalid Endorsement

Any obsolete ancillary service endorsement or similar sender endorsement not shown in 1.0 is considered invalid. Material bearing invalid or conflicting ancillary service endorsements will not be accepted for mailing. If discovered in the mailstream, pieces bearing an invalid ancillary service endorsement or conflicting endorsements are treated as unendorsed mail. *Exception:* Undeliverable Parcel Post, Media Mail, Library Mail, and Parcel Select pieces that bear invalid or conflicting ancillary service endorsements are treated as if endorsed “Forwarding Service Requested.”

4.1.4 Periodicals

Address correction service is provided automatically for all Periodicals publications (including publications pending Periodicals authorization) and begins 60 days after the effective date of the addressee’s change of address. Address corrections are provided as separate notices or, at the mailer’s request, on the returned pieces.

4.1.5 Other Classes

When possible, “on-piece” address correction is provided for First-Class Mail, Express Mail, Priority Mail, Standard Mail, and Package Services. If the piece cannot be forwarded, it is returned with the address information or reason for nondelivery attached. Generally, when separate corrections are necessary, Form 3547 is returned to the sender with the address correction fee charged and the mail is forwarded. This service is not available for Express Mail, First-Class Mail, or Standard Mail addressed for delivery to the addressee by military personnel at any military installation, including APOs and FPOs.

4.1.6 Fee and Return Postage

Unless excepted, the applicable fee for address correction service is charged for each separate notification of address correction or the reason for nondelivery. When “on-piece” address correction is provided, no address correction fee is charged but return postage can be charged, depending on mail class.

4.2 Address Change Service (ACS)

4.2.1 Description

Address Change Service (ACS) is an automated or electronic process providing mailers with notices of address correction or reason for nondelivery. ACS is designed to reduce the volume of manual notifications provided for valid participating ACS mailpieces, but it does not completely eliminate manual notifications. Mailers must keep their address records in electronic format and mark or encode their mailpieces with the correct ACS symbology under 4.2 and the correct ancillary service endorsement under 1.5 to obtain address corrections. See 4.2.6 for an option to use OneCode ACS with an Intelligent Mail barcode for letters and flats in First-Class Mail, Periodicals, and Standard Mail. To obtain nondelivery information under 1.4.1, mailers must use an ACS keyline or an Intelligent Mail barcode on mailpieces. Mailers also can use traditional ACS, along with Shipper Paid Forwarding under 4.2.9, to pay forwarding postage on most Standard Mail and

507.4.2.2

Package Services pieces. Mailers can find additional information about traditional ACS and OneCode ACS in Publication 8a, Address Change Service - Traditional, and Publication 8b, Address Change Service - OneCode ACS.

4.2.2 Service Options

ACS offers three levels of service, as follows:

- a. An automated option for letters and flat-size mailpieces bearing an Intelligent Mail barcode, mailed as First-Class Mail, Standard Mail, and Periodicals, with electronic notices processed using Intelligent Mail technology (see 4.2.6). Only automated First-Class Mail and Standard Mail letters qualify for automated address correction prices when using the Intelligent Mail barcode (see 4.1.1).
- b. An electronic option for notices processed electronically, except automated notices under 4.2.2a.
- c. A default manual process for notices generated manually.

4.2.3 Participant Code and Mailer ID

Participant codes or Mailer IDs are used on ACS mailpieces as follows:

- a. Traditional Address Change Service (ACS) human-readable participant codes are provided to authorized mailers by the National Customer Support Center (NCSC) (see 608.8.0 for address). A participant code consists of seven alpha characters, aligned left, and must be preceded by a single pound sign (#) delimiter on the top or OEL line of the address block. Additional information for using the human-readable option is available in Publication 8a, Address Change Service—Traditional.
- b. When using Intelligent Mail barcodes, mailers can participate in the OneCode ACS option of ACS (see 4.2.6 for restrictions). The NCSC provides the numeric OneCode ACS Mailer ID, the equivalent of a participant code, to authorized mailers using an Intelligent Mail barcode (see 708.4.3). As part of the application process, a Mailer ID is assigned to identify the participant, or mailers can choose to register one or more of their existing Mailer IDs for use with OneCode ACS. Mailers must incorporate the Mailer ID in the Mailer Identifier field, the unique mailpiece identifier in the Serial Number field, and the appropriate service in the Service Type Identifier field of the Intelligent Mail barcode according to Specification USPS B-3200. Customers can access the Intelligent Mail barcode specification at ribbs.usps.gov/OneCodeSOLUTION.

4.2.4 Basic Standards for All ACS Mailpieces

Mailers preparing ACS mailpieces must meet these specifications:

- a. When using a window envelope, maintain a clearance between the top line of the address block and the top edge of the address window of at least 1/25 inch. This clearance must be maintained during the insert's range of movement in the envelope.
- b. When using an address label, maintain a clearance between the top line of the address block and the top edge of the address label of at least 1/25 inch.

4.2.5 Additional Standards—When Using Human-Readable ACS Participant Codes

Mailers must use human-readable ACS participant codes according to the following specifications:

- a. Print and place the ancillary service endorsement according to the requirements in [102.4.0](#) and [1.5](#).
- b. Print the ancillary service endorsement and the participant code in a non-narrow variant of Helvetica or Arial sans serif font in the range of 10 to 12 points.
- c. Use equal line spacing in the address block, including the participant code line and mailer keyline.
- d. When placing the participant code in an optional endorsement line (OEL), the participant code must occupy the first eight positions in the left part of the OEL and be formatted as indicated in [708.7.2.3](#).
- e. When placing the participant code in the address block, place it on the top line. The address block information may be on an insert in a window, on an address label, or preprinted on the mailpiece.
- f. Mailers preprinting the participant code on an envelope (rather than printing it in the address block or on a label) must meet the conditions in [4.2.4](#) in addition to the following:
 1. The participant code must be left-justified with the address block, with a tolerance of 1/4 inch left or right. Place the participant code not more than two line spaces above the top line of the address block (using the same line spacing size as used in the address block).
 2. When using a mailer keyline, place it in the top line of the address block (but below the preprinted participant code).
 3. OELs are prohibited when a mailer keyline is used.
- g. If using delivery point barcodes in the address block, mailers must place them in one of the following positions:
 1. When using a mailer keyline, place the barcode between the top line of the address information and the mailer keyline.
 2. When not using a mailer keyline, place the barcode between the top line of the address information and the participant code.
 3. Below the City-State-ZIP Code line.
 4. Above the participant code and OEL, except when placing the participant code under [4.2.5f](#).

4.2.6 Additional Standards—When Using Intelligent Mail Barcodes

Mailers can access OneCode ACS using an Intelligent Mail barcode, which is capable of encoding a valid Service Type Identifier indicating the ancillary service requested; a numeric Mailer ID; and the Serial Number, a unique numeric mailpiece identifier (keyline equivalent). This option is available for letters and flat-size mailpieces mailed as First-Class Mail, Standard Mail, and Periodicals. Address

507.4.2.7

Service and Change Service ancillary services are available for letters and flat-sized mailpieces mailed as First-Class Mail or Standard Mail by choosing the appropriate Service Type Identifier and registering the same choice in the mailer profile maintained by the NCSC, ACS Department. In order to receive requested information, mailers wishing to change their ancillary service choice or endorsement must notify the NCSC, ACS Department in Memphis, TN, in writing, seven days prior to the mailing. Periodicals mailers not requesting Address Service will receive their current address correction notification option. The Service Type Identifier will indicate the ancillary service requested, and this choice must be indicated in the mailer's ACS profile maintained at the NCSC, ACS Department. In order to receive requested information, mailers wishing to change their ancillary service endorsement must notify the NCSC, ACS Department in Memphis, TN, in writing, seven days prior to the mailing. Standard Mail pieces with OneCode ACS using an Intelligent Mail barcode require the use of a printed on-piece endorsement. ACS mailers are encouraged to use the "Electronic Service Requested" text endorsement. Other printed endorsements are not required to request ancillary services in conjunction with an Intelligent Mail barcode used on First-Class Mail or Periodicals mailpieces, and their use may produce unintended results. Mailpieces must meet the following specifications:

- a. Letter-size mailpieces must be automation-compatible.
- b. Flat-size mailpieces may be mailed at nonautomation or automation prices. The Intelligent Mail barcode may appear anywhere a POSTNET barcode can be placed.
- c. If using a window envelope, maintain a clearance between the leftmost and rightmost bars and any printing or window edge of at least .125 (1/8) inch, and maintain a clearance between the Intelligent Mail barcode and the top and bottom window edges of at least .040 (1/25) inch. These clearances must be maintained during the insert's range of movement in the envelope.
- d. The Intelligent Mail barcode must contain an 11-digit delivery point code that correctly corresponds to the delivery address.
- e. The Intelligent Mail barcode must meet the technical specifications as described in [708.4.3](#) and USPS Specification USPS-B-3200.

4.2.7 Periodicals

Address correction by ACS is provided based on the mailer profile option chosen by participating Periodicals publications (including publications pending Periodicals authorization).

4.2.8 Address Correction Service Fee

Unless excepted, the applicable fee for address correction is charged for each separate notification of address correction or the reason for nondelivery provided.

4.2.9 Shipper Paid Forwarding

Shipper Paid Forwarding is an ACS fulfillment vehicle. It allows mailers of Standard Mail machinable parcels and most Package Services to pay forwarding charges via approved ACS participant code(s). For information about Shipper Paid Forwarding, contact the National Customer Support Center (see [608.8.0](#) for address). Mailers

have the option of paying forwarding charges through a postage due advance deposit account. Mailers who choose to do so must pay an annual account maintenance fee.

4.2.10 Shipper Paid Forwarding Fee

Annual account maintenance fee for (optional) advance deposit account: \$565.00.

4.3 FASTforward

4.3.1 Purpose

FASTforward is an automated system that interfaces with addressing and automation systems, such as multiline optical character reader (MLOCR) or remote video encoding (RVE) technologies, to identify names and addresses for which current change-of-address orders are on file with the USPS. Approved *FASTforward* MLOCR and RVE systems print an on-piece address correction (text and delivery point barcode of the new address) for identified pieces before entry in the mailstream. Technical and licensing information is available from the National Customer Support Center (see [608.8.0](#) for address).

4.3.2 Addressing

When MLOCR and/or video image technologies are used with *FASTforward*, all name lines and lines of the delivery address as defined in [602.1.0](#) on each mailpiece must have a uniform left margin and be entirely within the OCR read area defined in [202.2.1](#). The term name lines includes recipient's name, firm name, and building name. An optional information line (e.g., keyline or optional endorsement line) is permitted if placed above the top line of the address block. Any alternative addressing format under [602.3.0](#) is not permitted.

4.3.3 Barcoding

When MLOCR and/or video image technologies are used with *FASTforward*, each letter-size piece must have a barcode clear zone meeting the standards in [202.5.1](#), free of any printing and barcode. If a *FASTforward* match is made, the new address and barcode representing the new address are printed in the barcode clear zone and, for mail processing, take precedence over the old address and any barcode in the address block. The new barcode must meet the barcoding standards in [708.4.0](#). An envelope containing a window that intrudes into the barcode clear zone is not eligible for *FASTforward*.

4.4 Sender Instruction

4.4.1 Mail Not Forwarded

The following types of mail are not forwarded:

- a. Mail addressed to "Occupant" or "Postal Customer."
- b. Mail with exceptional address format.
- c. Mail showing specific instructions of the sender (e.g., "Return Service Requested" or "Change Service Requested").
- d. Perishable items not marked to abandon that cannot be delivered before spoiling, or day-old poultry that cannot be delivered within 72 hours after hatching. These items are returned to the sender immediately, if the return can be made before spoilage or within the 72-hour period.

507.4.4.2

4.4.2 Extra Services

A change-of-address order covers Certified Mail, collect on delivery (COD), insured, Registered Mail, and return receipt for merchandise mail unless the sender gives other instructions or the addressee moves outside the United States. This mail is treated as follows:

- a. COD mail is not forwarded to overseas military Post Offices.
- b. Ordinary, insured, and COD parcels marked on the envelope or wrapper with the mailer's instructions to abandon or sell perishable items are treated following the instructions, such as:
 1. "Do not forward or return. If not accepted within ____ days, treat as abandoned. Notify mailer of disposition."
 2. "Do not forward or return. If undelivered after ____ days, sell contents to highest bidder and remit proceeds, less commission, to mailer." (A commission of 10%, but not less than \$0.25, is kept by the USPS from the amount for which perishable items are sold.)
- c. When the mailer so requests, Form 3849-D is sent to the mailer. The mailer then may designate a new addressee or alter the amount of COD charges by submitting a written request to the postmaster and paying the proper fee. The USPS returns the article to the mailer after the holding period if no response is received. The postage charge, if any, is collected from the mailer for returning the mail (but not registration or COD fees). When COD mail is addressed to a person who moved and left no forwarding address, Form 3849-D is not sent, and the mail is returned to the mailer.
- d. Insured Standard Mail is forwarded and returned.
- e. Insured Package Services without any other endorsement is forwarded at no charge locally and postage due nonlocally. (For forwarding, local means within the same Post Office.) If the mailpiece is undeliverable, the USPS returns it to the sender with the new address or the reason for nondelivery. The sender is charged for the return of the piece only and the attempted forwarding, when appropriate.
- f. The USPS holds undeliverable Certified Mail, insured, Registered Mail, and return receipt for merchandise mail for no fewer than 3 days nor more than 15 days (unless the sender specifies fewer).
- g. The USPS holds undeliverable collect on delivery (COD) mail for no fewer than 3 nor more than 30 days (unless the sender specifies fewer).

4.4.3 Express Mail Pouch

The USPS opens an undeliverable-as-addressed Express Mail pouch to find a delivery address on any envelope or article inside. The USPS does not open the wrappers or envelopes or break the seals of any Express Mail article in the pouch. If no address information is found, the pouch is treated as dead mail. Express Mail is held no more than 5 calendar days unless the sender sets a shorter period.

4.4.4 Holding Mail

At the sender's request, the delivery Post Office holds mail, other than Registered Mail, insured, Certified Mail, COD, and return receipt for merchandise, for no fewer than 3 days nor more than 30 days. A specific retention time of not less than 3 nor more than 30 days, if requested, must be included by the sender in the return address on the mailpiece (e.g., "Return in 30 days to" followed by sender's return address).

5.0 Recall of Mail**5.1 Who May Recall Mail****5.1.1 Sender**

Mail deposited in a collection box or at a Post Office may be recalled, with proper identification, by the sender or the sender's representative. Form 1509 must be submitted to the postmaster at the office of mailing.

5.1.2 Federal Agency

A federal agency may recall any mailpiece sent as official mail by submitting an Express Mail letter identifying the piece to any Post Office. This provision excepts a federal agency only from the requirement to file recall orders at the office of mailing and does not authorize an agency to recall mail that it did not send.

5.1.3 Expenses and Postage

The mailer must pay all expenses of recalling mail (including return postage for other than First-Class Mail). If mail recalled before dispatch is again presented for mailing, the original stamps are accepted for postage at face value. This provision does not apply to stamps paying for registry, insurance, or COD fees.

5.1.4 Registered Mail

For recalled Registered Mail, the sender must write or stamp "Withdrawn Before Dispatch" on the customer's copy of the Registered Mail receipt, sign it, and surrender it. The same words must be written or stamped on the face of the article.

5.2 Mailer Request for Withdrawal and Disposal of Mail**5.2.1 Mail Without Scheduled Delivery Date**

The mailer may request the USPS to withdraw and dispose of mail without a scheduled delivery date before its delivery if:

- a. The mailing contains at least 200 pieces.
- b. The mailer gives the USPS a written and signed request, describing the mail by size, color, weight, identifying markings, number of pieces, class of mail, and type of postage payment. The request must include the authorization to withdraw and dispose of the mail.
- c. The mailer sends the request to the postmaster of the accepting Post Office (if the mailing has been deposited but not accepted) or to the postmaster of each destination office (if the mailing has been accepted).

507.5.2.2

5.2.2 Mail With Scheduled Delivery Date

The mailer may request the USPS to withdraw and dispose of mail with a scheduled delivery date (time-dated) before its delivery if:

- a. The mailing contains at least 200 pieces.
- b. The mailer entered the mailing early enough so that delivery can be expected on or before the scheduled delivery date.
- c. The mailer sends the request to the postmaster of the accepting Post Office (if the mailing has been deposited but not accepted) or, if the mailing has been accepted, the mailer either:
 1. Attaches a facing slip to each bundle of mail showing the company name, person to contact, telephone number (where collect calls are accepted), and the scheduled delivery date after which the mailer does not want the mail delivered. The mailer also authorizes the withdrawal but not the disposal of the mail.
 2. Sends a written request to the postmasters of destination Post Offices before depositing the mail, stating that time-dated mail is to be received at their offices and describing the mail by size, color, weight, identifying markings, number of pieces, class of mail, and type of postage payment. The mailer also authorizes the withdrawal and disposal of time-dated mail if received after the scheduled dates.

5.2.3 No Guarantee

The USPS does not guarantee success in preventing delivery of all pieces in a withdrawn mailing.

5.2.4 Mail Disposal

Disposal of mail at the mailer's request creates no obligation of the USPS to refund postage. The mailer must pay all expenses that the USPS incurred in disposing of the mail.

6.0 Pickup on Demand Service**6.1 Pickup on Demand Service Fee**

Available for Express Mail, Priority Mail, and Parcel Post, per pickup: \$14.75.

6.2 Basic Standards**6.2.1 Availability**

Pickup on Demand service is available from designated Post Offices for:

- a. Express Mail.
- b. Priority Mail.
- c. Single-piece price Parcel Post.

6.2.2 Extra Services

Certified Mail, Delivery Confirmation, and Signature Confirmation are the only extra postal services that may be used with pieces that are picked up.

6.2.3 Volume

There are no limits on the number of pieces that may be picked up. The USPS may defer pickup or make multiple pickups at no additional charge to the customer if the volume to be picked up exceeds available vehicle capacity. The USPS may establish plant load service if warranted.

6.2.4 Standards

Each piece of Express Mail, Priority Mail, or Parcel Post must meet all applicable eligibility and preparation standards. Material prepared for Express Mail or Priority Mail drop shipment must meet the applicable standards in [705.16.0](#).

6.2.5 Form 5541

When paying the fee, a customer must sign Form 5541. The USPS employee completes the information required on the form.

6.2.6 Collecting Other Mail

Incidental amounts of other postage-affixed, full-price mail also may be collected when Pickup on Demand service is provided.

6.2.7 Service Changes

The USPS may suspend or refuse Pickup on Demand service due to exceptional or unsafe situations (e.g., hazardous weather or road conditions, facility emergencies on customer or USPS property, unforeseen employee or vehicle shortages, or unsafe or inadequate mailer facilities).

6.2.8 International Mail

Certain types of international mail that meet all eligibility and preparation standards required in the *International Mail Manual* may be collected when Pickup on Demand service is provided.

6.3 Postage and Fees**6.3.1 Postage**

The correct amount of postage must be affixed to each piece. *Exception:* Express Mail paid with a corporate account, Priority Mail or Parcel Post with a merchandise return service permit label ([11.0](#)), and manifest mailings approved by Business Mailer Support (BMS) do not need to have postage affixed.

6.3.2 Fee Charged

Pickup on Demand fees are listed in [113.1.6](#), [123.1.7](#), and [153.1.6](#), *Pickup on Demand Fees*. The customer is charged the required fee:

- a. Every time Pickup on Demand service is provided, regardless of the number of pieces or combination of classes of mail.
- b. For additional trips to pick up exceptional volume of which the serving Post Office was not notified.

6.3.3 Fee Not Charged

The customer is not charged the applicable fee for:

- a. A scheduled Pickup on Demand that is canceled as required.
- b. An on-call Pickup on Demand that is canceled before the USPS employee is dispatched for the pickup.

507.6.3.4

- c. Express Mail, Priority Mail, or Parcel Post that is collected during a regular delivery stop or a scheduled stop to collect mail not subject to a Pickup on Demand fee.
- d. Priority Mail or Parcel Post using a merchandise return service label that indicates that the permit holder will pay for Pickup on Demand service.
- e. Priority Mail reshipment service (11.7).

6.3.4 Fee Payment Method

The Pickup on Demand fee must be paid by one of these methods:

- a. Meter, precanceled, or adhesive stamps affixed to Form 5541.
- b. Federal agency number or Express Mail Corporate Account Number written on Form 5541.
- c. Check payable to the postmaster of the serving Post Office.
- d. Advance deposit account used by the merchandise return service permit holder to pay other applicable postage and fees (11.4.3).
- e. Regular postage due account maintained by the mailer at the serving Post Office.

6.4 On-Call Service

6.4.1 Availability

On-call Pickup on Demand service is available only from designated Post Offices with city delivery.

6.4.2 Requesting Pickup on Demand Service

A customer may obtain information about the availability of Pickup on Demand service and schedule a pickup by calling 1-800-222-1811. Pickups are made within 2 hours of the request. A pickup can be made later than 2 hours after the request if the customer and the serving Post Office agree and service is not adversely affected. Depending on the time of the request and the delivery schedule of the serving Post Office, the pickup may be deferred to the next business day. When scheduling a Pickup on Demand, the customer must indicate the quantity of mail to be picked up.

6.5 Scheduled Service

6.5.1 Availability

Scheduled Pickup on Demand service is available from Post Offices with city delivery and from other Post Offices where the customer's address is along the line of travel and within the regular delivery period of a rural route or highway contract route.

6.5.2 Service Agreement

A customer requesting scheduled Pickup on Demand service must enter into a service agreement with the USPS. The agreement specifies the time, place, day or date, frequency of service, and approximate volume per pickup.

6.5.3 Service hours

Scheduled Pickup on Demand service may be requested during the regular business hours of the serving Post Office. Scheduled Pickup on Demand service begins the day after the service agreement is finalized and continues until the customer cancels it.

6.5.4 Customer Changes

The customer must notify the serving Post Office at least 24 hours before a scheduled pickup if the pickup is to be canceled or the volume of mail to be picked up is more than 20% higher than the volume specified in the service agreement. The customer may:

- a. Amend the service agreement, effective 5 business days after the USPS receives the customer's written notice to the serving Post Office.
- b. Terminate scheduled Pickup on Demand service, effective 24 hours after the USPS receives the customer's written notice to the serving Post Office. The customer must pay all fees for Pickup on Demand service provided before termination of service.

6.5.5 USPS Changes

The USPS may:

- a. Change the service agreement, effective 5 business days after the customer receives written notice from the serving Post Office. The customer may appeal this notice to the district manager but must pay all fees for Pickup on Demand service provided during the appeal period.
- b. Terminate scheduled Pickup on Demand service, effective 24 hours after the customer receives written notice from the serving Post Office. Termination must be based on the customer's failure to pay postage and fees or to meet the standards for Pickup on Demand service or Express Mail, Priority Mail, or Parcel Post. The customer may appeal this notice to the district manager but must pay for all fees for Pickup on Demand service provided during the appeal period.

6.6 Express Mail Reshipment Service

6.6.1 Reshipment Service

The USPS gathers mail addressed to Post Office boxes or business street addresses and dispatches it as a Custom Designed or Next Day Service shipment under a service agreement (PS Form 5637, Corporate Account/Custom Designed Agreement) between the USPS and the mailer, subject to these standards:

- a. Service frequency is scheduled.
- b. The mailer is charged a Pickup on Demand fee each time mail is collected for reshipment from a Post Office no matter how many Post Office boxes or business street addresses the mailer may have at that office.
- c. Express Mail postage and fees are paid by Express Mail Corporate Account or federal agency "Postage and Fees Paid" indicia. The sack or container and its contents are considered a single piece for calculation of the Express Mail price of postage and must not exceed 70 lbs.

507.6.6.2

- d. The mailer must keep a postage-due, merchandise return service, or business reply mail account at the postal facility where the Post Office box or business street address is located for any shortpaid, merchandise return service, or business reply mail. The service agreement (PS Form 5637) must state that such an account exists.
- e. Express Mail reshipment service is not available for Registered Mail, Certified Mail, COD, insured, or Express Mail items. The mailer must give instructions for redirecting such items on PS Form 1093, Application for Post Office Box or Caller Service, for mail originally addressed to Post Office boxes, or on PS Form 5637 for mail originally addressed to business street addresses.
- f. The service agreement must list the Business Development Team at the originating office as the “Firm Representative” and show the pickup time is when the USPS employee gathers the mail and prepares it for dispatch as Express Mail.
- g. Commencement and termination of service agreements are subject to the standards for Express Mail Custom Designed Service.

6.6.2 Delivery

Delivery of Express Mail is subject to [508.1.1.7](#).

7.0 Mailing List Services

7.1 Mailing List Service Fees

For correction of name and address on occupant lists, per name on list—\$0.34. Minimum per list (30 items)—\$10.20

For sorting mailing lists on cards by 5-digit ZIP Code, per 1,000 addresses or fraction—\$115.00

For address changes provided to election boards and voter registration commissions, per Form 3575—\$0.33

7.2 General Information

7.2.1 Definition

A *mailing list* is a listing of names and addresses, or addresses only, produced on individual cards or in sheet form.

7.2.2 Carrier Route File

The official city delivery scheme, called the Carrier Route File, is available to mailers.

7.2.3 Purpose

To improve address quality, the USPS offers (for a designated fee) mailing list services to correct name and address lists; correct occupant lists; and sort mailing lists on cards by 5-digit ZIP Code (available only for multi-ZIP Code Post Offices). These services are available for mailing lists submitted by members of Congress; federal agencies; departments of state governments; municipalities; religious, fraternal, and recognized charitable organizations; and concerns or persons who solicit business by mail. For the designated fee, the USPS also provides address changes to election boards and voter registration commissions.

7.2.4 Lists

In providing services, the USPS does not compile any mailing list, including an occupant list. All corrections are marked on the list submitted by the customer.

7.2.5 Prohibitions

Persons other than USPS employees may not copy, or record by any means, names or addresses from carrier cases. Labels, wrappers, envelopes, stamped cards, or postcards indicating one-time use are not accepted as mailing lists.

7.3 Fee Assessment**7.3.1 Corrections**

The fee for correcting name and address lists or occupant lists is assessed for each name or street address on the list. Individual apartments are considered separate addresses. The minimum fee in 7.1 applies to lists with fewer than 30 names or addresses. For assessing the fee, the USPS considers a list to be all the addresses sent at one time to the appropriate postal facility.

7.3.2 Rural Route Consolidation

No fee is charged for correcting name and address lists or occupant lists where rural routes are consolidated or changed to another Post Office, or where rural route and box number addresses are changed to city-style addresses. The lists must contain only names and/or addresses of persons residing on the routes involved, and the lists must be submitted for correction during the time when the local Post Office is required to keep the address conversion information.

7.3.3 Cards

The fee for sorting mailing lists on cards by 5-digit ZIP Code is assessed per 1,000 addresses or fraction thereof.

7.3.4 Election Board and Voter Commissions

The fee for address changes provided to election boards and voter registration commissions is assessed for each Form 3575 submitted. The fee is collected on a per card basis regardless of the number of changes made on the card and whether the change concerns a person on the board's or commission's list of registrants. Instead of the actual forms, the USPS may supply facsimiles of the forms or copies of the information they contain at no additional fee.

7.3.5 Payment

The Post Office providing the correction service annotates the total fee due on the outside of the package containing the corrected cards or lists. Payment must be made to the postal installation to which the list was submitted. Payment must be in cash or by check or money order made payable to the postmaster. Payment for correcting a list submitted by a federal agency or a person authorized to send matter as official mail may be made under the official mail reimbursement program. Payment may be made when the list is submitted or when the corrected list is delivered.

7.3.6 Time Limit

The USPS corrects and returns a mailing list to the owner within 15 workdays after receipt. This time limit does not apply to mailing lists received for correction between November 16 and January 1; they are returned as soon as possible.

7.4 Name and Address List Correction

7.4.1 Preparation

If addresses are submitted in list form, the list must be typewritten, printed, or computer-prepared and in sheet form, with enough space between or next to each address to permit entry of corrections. The list owner's name must appear in the upper left corner of each page or sheet. Lists must be separated by Post Office. A separate list must be presented for each carrier route served by a Post Office with 190 or more revenue units. Each Post Office can advise customers in this regard.

7.4.2 Card Size

If the addresses are submitted on cards, the cards must be about the size (3-1/2 by 5-1/2 inches) and quality of a stamped card; data processing cards are acceptable. Information on the cards must be typewritten, printed, or computer-prepared, having only one name and address per card, and with enough space to permit entry of corrections. The list owner's name must appear in the upper left corner of each card. Lists (groups of cards) must be separated by individual Post Office.

7.4.3 Submission

The customer must submit the address cards or mailing lists to the district manager of Address Management Systems for addresses within the district. (The address of each district may be found at www.usps.com/oncost/lookups/ams_office_locator.html.) Unless directed otherwise by the district, the customer must address the submission as follows:

MANAGER
ADDRESS MANAGEMENT SYSTEMS
[STREET ADDRESS]
[CITY STATE ZIP CODE]

7.4.4 Postage

Cards or lists may be mailed by their owners to the designated district, but the list owner must prepay the postage for such items at the applicable price. The submitted items are returned free of postage.

7.4.5 Elements Corrected

USPS employees:

- a. Cross off names to which mail cannot be delivered or forwarded.
- b. Correct initials and/or last names when the name apparently is known to the owner of the list.
- c. Correct the house, rural, or Post Office box number; correct the last line (Post Office name, state abbreviation, and 5-digit ZIP Code); and, in multiple-unit buildings, add apartment, suite, or room numbers if known by the USPS employee.
- d. Correct spelling of street names, suffixes, and placement of directionals to conform to the Carrier Route File scheme.
- e. Provide new addresses, including ZIP Codes, for customers who have moved and filed permanent forwarding orders that are still active, and for addresses, if known, that are undeliverable because of USPS adjustments.

- f. Mark an "X" in the upper right corner of the card or next to each entry on the sheet where no change is necessary.

7.4.6 No Additions

In making list corrections, USPS employees do not add a new name or address to a card or list.

7.5 Occupant Lists

7.5.1 Submission

Customers must submit occupant lists of street addresses in the same way as for name and address corrections. Customers must not submit lists that include more than 110% of the possible deliveries for a specific 5-digit ZIP Code delivery area.

7.5.2 Elements Corrected

USPS employees:

- a. Provide new addresses, if known, for addresses that are undeliverable because of USPS adjustments.
- b. Correct last lines (Post Office names, state abbreviations, and 5-digit ZIP Codes), spelling of street names, suffixes, and placement of directionals to conform to the Carrier Route File scheme.
- c. Cross off numbers representing incorrect or nonexistent street addresses, but do not change or add numbers.
- d. Indicate business addresses with a "B" in the upper right corner of the card, or opposite the street number as printed on the sheet, as applicable.
- e. Indicate rural route addresses with an "R" in the upper right corner of the card, or opposite the street number as printed on the sheet, as applicable.
- f. Enter the number of separate family units opposite addresses of multiple-unit dwellings.
- g. Mark an "X" in the upper right corner of the card or next to each entry on the sheet where no change is necessary.
- h. Group the corrected cards or sheets by carrier route for return to the list owner.

7.6 Sortation of Lists on Cards by 5-Digit ZIP Code

7.6.1 Coding

The customer must code mailing lists by 5-digit ZIP Code for single 5-digit ZIP Code Post Offices.

7.6.2 Preparation

To allow the USPS to sort a mailing list to 5-digit ZIP Codes, a mailing list of addresses only for multi-ZIP Code Post Offices must be prepared on cards about the size (3-1/2 by 5-1/2 inches) and quality of a stamped card; data processing cards are acceptable. Only one address may appear on each card. The owner must separate the cards by Post Office of address and submit each group to the district manager of Address Management Systems serving that Post Office. The list owner must wrap mailing lists (cards) for mailing when practicable. The owner's name and address must appear on the outside of the wrap or container.

507.7.6.3

7.6.3 USPS Sortation

USPS employees sort cards by 5-digit ZIP Code and securely package them with a facing slip marked "All for ZIP Code Area (00000)." ZIP Codes are not written on individual cards.

7.7 Election Boards and Voter Registration Commissions**7.7.1 General**

Election boards or voter registration commissions may use the "Return Service Requested" endorsement and/or the National Change of Address Linkage System (NCOA^{Link}) to maintain current address lists.

7.7.2 Procedure

Election boards or voter registration commissions using permanent registration also may obtain residential change-of-address information from Forms 3575:

- a. An authorized official of the board or commission must sign and submit to the manager, address management systems (district), a written request that lists the Post Offices for which change-of-address information is desired.
- b. If the request is approved, an agreement must be obtained from and signed by an authorized official of the board or commission detailing the terms under which the change-of-address information is to be released.
- c. The board or commission receives the requested information from the postmasters of the listed Post Offices and pays those postmasters the applicable fees.

8.0 Address Sequencing Services**8.1 Address Sequencing Service Fees****8.1.1 Basic Service**

Each card or address removed because of an incorrect or undeliverable address: \$0.34.

8.1.2 Blanks for Missing Addresses

Each card or address removed because of an incorrect or undeliverable address: \$0.34.

Insertion of each blank card for missing or new address: no charge.

8.1.3 Missing or New Addresses Added

Insertion of each addressed card for missing or new address: \$0.34.

8.2 Service Levels

The USPS provides the following levels of manual or electronic address sequencing service for city carrier routes, rural routes, highway contract routes, and Post Office box sections:

- a. Sequencing of address cards or electronic address files.

- b. Sequencing of address cards or electronic address files, plus inserting only blank cards for missing addresses or missing sequence numbers for the addresses missing from the electronic files.
- c. Sequencing of address cards or electronic address files, plus inserting cards with addresses for missing or new addresses, or inserting addresses into electronic files for missing or new addresses.
- d. For address cards or electronic files, if qualification is met, the USPS will provide seeded addresses to the list owners for inclusion in their address files for file protection.
- e. If a request for sequencing contains a seeded address, the owner of the seeded address will be notified within 30 days of detection. If all known possibilities of fraud cannot be ruled out, the request will be denied and the Postal Inspection Service will be notified.

8.3 Card Preparation and Submission

8.3.1 Color, Size, and Quantity

When submitting cards, all address cards must be made of white or buff-colored card stock and of an identical size (5 to 8-5/16 inches long and 2-1/4 to 4-1/4 inches high). Blank cards for missing and/or new addresses must be of the same size as the submitted address cards but of a different color. A customer must provide enough blank cards to equal at least 10% of the number of address cards submitted.

8.3.2 Limitation

The customer must not submit address cards or an address file in excess of 110% of the possible deliveries for a specific 5-digit ZIP Code delivery area. Customers requesting the service level in 8.2c will be allowed three attempts to qualify a ZIP Code for the service within a 12-month period. Failure to qualify within three attempts within 12 months will result in a suspension of 1 year for any additional attempts to qualify the ZIP Code.

8.3.3 Addressing Format

Addressing format is specific to the media being used.

- a. Card Processing. Cards must be faced in the same direction and bear only one address each. The customer's current address information must be computer-generated, typed, or printed along the top of the card. The address must be within 1 inch from the top edge of the card in about the same location on each card submitted. Each card must include a complete address, but the ZIP Code is optional. Street designators may be abbreviated as shown in Publication 28, *Postal Addressing Standards*. When sequence cards are used to obtain address sequencing information for Post Office boxes, the box section number must be substituted for the carrier route number (if shown).
- b. Electronic Processing. The customer must submit address files on electronic media, as described by USPS. Call the National Customer Support Center at 1-800-331-5747 for a copy of the required format.

507.8.3.4

8.3.4 Header Cards

When submitting address cards, customers must provide carrier route header cards prepared with standard 80-column computer card stock (or another size as described in [8.3.1](#)). The header cards must be typed, computer-generated, or printed by the customer. A route header card of the same size as the address cards must be placed in front of the cards for each route. All columns must be provided on the header cards, regardless of the service level requested. Column headings may be abbreviated. Examples of the required format for the route header card can be obtained from the National Customer Support Center (see [608.8.0](#) for address).

8.3.5 Delivery Unit Summary

A Delivery Unit Summary must be typed, computer-generated, or printed and provided by the customer for card processing. A printed copy or electronic file will be acceptable for address file submissions. When submitting address cards, an original and two copies must be submitted for each 5-digit ZIP Code. When submitting an address file, an original and two copies of a printed form or one electronic file must be submitted for each 5-digit ZIP Code. This form, used by the USPS to provide summary information to the customer, is necessary for calculating total charges for the service level provided. For address card submissions, the original is returned to the customer with the cards as the customer's bill. For electronic address file submissions, a computer-generated Delivery Unit Summary is returned as the customer's bill. Upon receipt of payment, the ZIP Code will be qualified for Computerized Delivery Sequence (CDS), and product fulfillment will begin. Examples of the required printed or electronic format of the Delivery Unit Summary can be obtained from the National Customer Support Center (see [608.8.0](#) for address).

8.3.6 5-Digit ZIP Codes

When submitting address cards, the cards for each 5-digit ZIP Code must be placed in separate containers, each with an envelope affixed containing a packing list and Delivery Unit Summary sheets for that 5-digit ZIP Code. For each 5-digit ZIP Code, the customer must also show the number of containers submitted on the Delivery Unit Summary and number those containers sequentially (e.g., "1 of 3," "2 of 3," and "3 of 3"). If there is more than one container for the 5-digit ZIP Code, the Delivery Unit Summary must be affixed to the first container.

8.3.7 Submitting Cards or Electronic Files

The designated place for submission of addresses for sequencing depends on the type of media used.

- a. Card Processing. The customer must submit the containers of address cards to the district manager of Address Management Systems for carrier routes within the corresponding district. (Exception: Address cards only for addresses in the city where the customer is located may be submitted to the postmaster of that city.) Unless directed otherwise, the customer must address containers of address cards to:

MANAGER ADDRESS MANAGEMENT SYSTEMS
UNITED STATES POSTAL SERVICE
[STREET ADDRESS]
[CITY/STATE/ZIP+4]

- b. Electronic Processing. The customer must submit address files on electronic media to:

COMPUTERIZED DELIVERY SEQUENCING DEPARTMENT
NATIONAL CUSTOMER SUPPORT CENTER
UNITED STATES POSTAL SERVICE
6060 PRIMACY PKWY STE 201
MEMPHIS TN 38188-0001

8.3.8 Postage

Containers of cards mailed to the Post Office must have postage paid at the applicable price. Address files can be mailed at the appropriate price or be electronically transmitted, as determined by the USPS, to the National Customer Support Center. They are returned to the customer free of postage.

8.3.9 USPS Sequencing

Unsequenced address cards received at Post Offices or unsequenced address files received at the National Customer Support Center will be arranged in sequence of carrier route delivery without charge. Cards with incorrect or undeliverable addresses are removed from carrier route bundles, bundled separately, and returned to the customer. When address files are submitted, incorrect or undeliverable addresses are removed from the original file and returned as a separate file.

8.3.10 USPS Time Limits and Billing

The Post Office or the National Customer Support Center, whichever performs the service, returns the cards or address file and the bill for applicable charges to the customer within 15 working days after receiving a properly prepared request for address sequencing. This time limit does not apply to cards received between November 16 and January 1; they are returned as soon as possible.

8.3.11 Seasonal Addresses

Under all service levels, correct addresses subject to seasonal occupancy, but which do not indicate seasonal treatment, will be identified with an "S" on cards or a flag on address files. If the address is included in a series, such as those used for apartment buildings, trailer parks, and seasonal delivery areas in general, the

appropriate “seasonal” indicator box is checked on the card or flagged on the address file. When correct address cards or address files that are not subject to seasonal occupancy but that include seasonal treatment notations are submitted, the seasonal indicator is marked out on cards or left blank on address files. For cards, a rubber band is placed around the card to identify it before it is put in carrier route sequence order in the returned deck of cards. No charge is assessed for this service.

8.4 Sequencing Cards With Blanks for Missing Addresses or Sequencing Address Files With Missing Sequence Numbers

USPS employees at Post Offices (for cards) or the National Customer Support Center (for address files) arrange unsequenced addresses in sequence of carrier route delivery without charge, remove incorrect or undeliverable addresses, and, if cards, package separately for return to the customer, and insert a blank card or missing sequence number for address files for each existing address that is not included in the customer’s cards or address file. (If several addresses in a series are missing, a single blank card is inserted for the series showing the number of missing addresses, or for address files a series of missing sequence numbers will be omitted identifying the number of missing addresses.)

8.5 Sequencing With Address Cards or Address File Sequencing With Addresses Added for Missing and New Addresses

8.5.1 USPS Sequencing

USPS employees at Post Offices (for cards) or the National Customer Support Center (for address files) arrange unsequenced addresses in sequence of carrier route delivery without charge, remove incorrect or undeliverable addresses, and, if cards, package separately for return to the customer or, if an address file, return as a separate file, and add new or missing addresses (including rural address conversions to city delivery) for each existing address that is not included in the customer’s cards or address file.

8.5.2 Separate Address Groups

Separate groups of address cards must be submitted for the addresses in each 5-digit ZIP Code delivery area: city carrier (residential addresses only); city carrier (business addresses only); city carrier (combination of residential and business addresses); rural and highway contract route addresses; or Post Office box addresses (whether business, residential, or a combination). If submitting an electronic address file, a single file meeting the same requirements is acceptable. Each group must be accompanied by a statement showing:

- a. Types of addresses (residential, business, or a combination).
- b. Number of addresses on the cards or in the address file.
- c. Name, mailing address, and telephone number of the list owner or agent.

8.5.3 Post Office Boxes

Within a 5-digit ZIP Code, Post Office box addresses must be placed in separate groups from city carrier, rural, and highway contract route addresses and separately identified on the customer’s statement.

8.5.4 Address Percentage

For the 5-digit ZIP Code, the mailing list that the cards or address file represents must contain 90% of all possible residential or business city carrier addresses in the respective address group, 90% of all city carrier addresses in a combination residential/business address group, or 90% of all possible deliveries in rural/highway contract route and Post Office box groups.

8.5.5 Calculating Percentage

In calculating the total number of addresses within a 5-digit ZIP Code, each apartment unit in an apartment building or each office in an office building that is a deliverable address is treated as a separate address.

8.5.6 Resubmitting Cards or Address File

Customers must monitor community growth and determine when address cards or address files need to be submitted for resequencing to maintain the 90% eligibility level of address coverage. Such a determination is not supplied by the USPS. See [509.1.0, Address Information System Products](#), for information on obtaining delivery statistics.

8.6 Service Charges**8.6.1 Basic Service**

For sequencing of address cards or address files, the fee in [8.1.1, Basic Service](#), is charged for each address card or address that is removed because of an incorrect or undeliverable address. All cards removed are packaged separately and returned to the customer.

8.6.2 Blanks for Missing Addresses

For sequencing of address cards or address files with total possible deliveries shown, the fee in [8.1.2](#) is charged for each address card or address that is removed because it is incorrect or undeliverable. No charge is assessed for the insertion of blank cards or missing sequence numbers (for address files) showing the range of missing addresses in a submitted list.

8.6.3 Missing or New Addresses

For sequencing of address cards or address files with missing or new addresses added, the fee in [8.1.3](#) is charged for each address card or address that is removed because it is incorrect or undeliverable, and for each address (possible delivery) that is added to the customer's list. For apartment or office buildings with a series of addresses for which the USPS provides a range of addresses, the charge is for each address (possible delivery) in the range or series.

8.6.4 Customer's Bill

For all services, the original of the Delivery Unit Summary is returned to the customer after completion by USPS employees and serves as the customer's bill. The customer must submit payment for the amount due to the local Post Office or as instructed.

8.6.5 Free Services

These services are provided at no charge for all three levels of service:

507.8.7

- a. If the customer includes a rural address (box number) in a deck of cards or address file submitted for sequencing, and a street address is assigned to that box number so it can be served on a city delivery route, a correct address card or address is included at no charge.
- b. The USPS attempts, but does not guarantee, to make simple corrections to addresses (e.g., obvious spelling errors) that can be identified as a specific delivery address and are not undeliverable as addressed or nonexistent. Corrections are noted on the cards placed in proper carrier route sequence in the returned cards and identified by a rubber band around the card.

8.7 Submitting Properly Sequenced Mailings

8.7.1 Customer Responsibility

The customer must ensure that mailings are prepared in correct carrier route delivery sequence and resequence cards or an address file when necessary. The USPS does not provide list-sequencing service for mailings not prepared in correct carrier route delivery sequence if the customer is so notified but fails to take corrective action.

8.7.2 Changes

When delivery changes affect delivery sequence but do not cause scheme changes, card customers will be notified in writing and must then submit cards for the affected routes or the complete ZIP Code for resequencing. Computerized Delivery Sequence (CDS) customers will automatically receive an updated electronic file from the USPS.

8.7.3 Out-of-Sequence Mailing

If a mailing is found to be out of sequence, the customer is informed in writing both of the error and that, unless the situation is corrected, the USPS will not provide carrier route sequencing service. If the customer does not take corrective action, the USPS gives written notice that the customer is no longer allowed to submit address cards to the Post Office or address files to the National Customer Support Center for sequencing. Within 30 days, the customer may file a written appeal with the postmaster who gave notice.

8.7.4 Reinstatement

Generally, a customer denied address card or address file sequencing service for a specific ZIP Code may not submit address cards (to the Post Office) or address files (to the National Customer Support Center) for sequencing where that sequencing service was terminated for 1 year after the effective date of termination. After that time, the customer is again authorized to submit the ZIP Code address cards (to the Post Office) or address files (to the National Customer Support Center) for sequencing. At any time during the year after termination of service, the customer may renew the submission if the postmaster (for address cards) or the National Customer Support Center (for address files) is convinced that the customer has taken all necessary action to correct the past errors.

9.0 Business Reply Mail (BRM)

9.1 Business Reply Mail (BRM) Prices and Fees

9.1.1 Basic BRM

Annual permit fee: \$180.00.

Per piece fee: \$0.72 (in addition to the applicable First-Class Mail or Priority Mail postage ([123.1.0, Priority Mail Prices and Fees](#), or [133.1.0, First-Class Mail Prices and Fees](#))).

9.1.2 High-Volume BRM

Annual permit fee: \$180.00.

Annual account maintenance fee (for advanced deposit account): \$565.00.

Per piece fee: \$0.08 (in addition to the applicable First-Class Mail or Priority Mail postage ([123.1.0, Priority Mail Prices and Fees](#), or [133.1.0, First-Class Mail Prices and Fees](#))).

9.1.3 Basic Qualified BRM

Annual permit fee: \$180.00.

Annual account maintenance fee (for advanced deposit account): \$565.00.

Per piece fee: \$0.05 (in addition to the automation First-Class Mail QBRM postage (in [507.9.2](#))).

9.1.4 High-Volume Qualified BRM

Annual permit fee: \$180.00.

Annual account maintenance fee (for advanced deposit account): \$565.00.

Quarterly fee: \$1,855.00.

Per piece fee: \$0.006 (in addition to the automation First-Class Mail QBRM postage in [9.2, Qualified Business Reply Mail \(QBRM\) Prices](#)).

9.1.5 Bulk Weight Averaged Nonletter-Size BRM

Annual permit fee: \$180.00.

Annual account maintenance fee (for advanced deposit account): \$565.00.

Monthly maintenance fee: \$930.00.

Per piece fee: \$0.012 (in addition to the applicable First-Class Mail or Priority Mail postage in [123.1.0, Priority Mail Prices and Fees](#), or [133.1.0, First-Class Mail Prices and Fees](#)).

9.2 Qualified Business Reply Mail (QBRM) Prices

9.2.1 Cards

Cards meeting the standards in [9.3](#) through [9.12](#), in addition to the fees in [9.1](#): \$0.247 each.

9.2.2 Letters

Letter-size single pieces meeting the standards in [9.3](#) through [9.12](#), in addition to the fees in [9.1](#):

WEIGHT INCREMENT	PRICE
First ounce or fraction of an ounce	\$0.397
Additional ounce or fraction, (up to and including 2 ounces)	0.170

9.3 Qualified Business Reply Mail (QBRM) Basic Standards

9.3.1 Description

Qualified Business Reply Mail (QBRM) is First-Class Mail that:

- a. Is letter-size and is prepared to meet the automation compatibility requirements in [201.3.0](#) (except [201.3.13.1, Using Labels and Stickers](#)).
- b. Meets all the Business Reply Mail (BRM) standards in [9.4](#) through [9.12](#).
- c. Has postage and per piece charges deducted from a BRM advance deposit account.
- d. Is authorized to mail at QBRM prices and fees under [9.3.2](#). During the authorization process, the mailer is assigned a unique ZIP+4 code for each price category of QBRM to be returned under the system (one for card-price pieces, one for letter-size pieces weighing 1 ounce or less, and one for letter-size pieces weighing over 1 ounce up to and including 2 ounces) and has the option of using either an Intelligent Mail barcode or POSTNET barcode to encode the assigned ZIP +4 code.
- e. Bears the proper ZIP+4 code, assigned by USPS for the appropriate price category, in the address of each piece. The ZIP+4 codes assigned for this program must be used only on the organization's appropriate QBRM pieces.
- f. Bears the correct Intelligent Mail barcode or POSTNET barcode that corresponds to the unique ZIP+4 code in the address on each piece distributed. The barcode must be correctly prepared under [9.9](#) and [708.4.0](#).
- g. Bears a properly prepared facing identification mark (FIM) C on each piece distributed (see [708.9.0](#)).

9.3.2 Authorization

To participate in QBRM, a mailer must have a valid BRM permit and pay the annual account maintenance fee. The following conditions also apply:

- a. Any mailer who applies for a BRM permit on Form 3615 must submit Form 6805 to the postmaster or business mail entry manager at the Post Office to which the QBRM pieces are to be returned. The USPS reviews the Form 6805 and preproduction samples provided by the mailer for compliance with relevant standards. If the mailer's request is approved, the USPS issues the mailer an authorization on the approved Form 6805.
- b. Any mailer who applies for a BRM permit online (see [9.0](#)) completes an electronic version of Form 6805 as part of the online application approval process in place of a printed Form 6805. The mailer is not required to submit preproduction samples when the BRM permit is approved and issued online.

9.3.3 QBRM Postage

The single-piece postage prices for QBRM First-Class Mail are applied to each returned piece as follows:

- a. The QBRM price for cards in [9.2.1](#) applies to a card meeting the applicable standards in [9.3.1](#) and [201.1.0](#).
- b. The QBRM price for letters in [9.2.2](#) applies to a letter meeting the applicable standards in [9.3.1](#) that is not eligible for and claimed at the QBRM price for cards.

9.3.4 QBRM Per Piece Charges

Each piece of returned QBRM is charged the per piece charge in [9.1](#).

9.3.5 QBRM Fees

The following fees apply to QBRM First-Class Mail:

- a. The annual BRM permit fee.
- b. The annual BRM account maintenance fee.
- c. At the mailer's option, a quarterly fee.

9.4 General Information

9.4.1 Description

Business reply mail (BRM) service enables a permit holder to receive First-Class Mail and Priority Mail back from customers and pay postage and a per piece fee only for the pieces returned. BRM cards, envelopes, self-mailers, cartons, and labels may be distributed by a BRM permit holder in any quantity for return to any Post Office in the United States and its territories and possessions, including military Post Offices overseas. Qualified Business Reply Mail (QBRM) is a subset of BRM available for specific automation-compatible letter-size pieces that qualify for an automation postage price and a reduced per piece fee (see [9.10](#)). Domestic BRM may not be distributed to foreign countries. Standards for International Business Reply Service (IBRS) are in the *International Mail Manual*.

9.4.2 Payment Guarantee

The permit holder guarantees payment of the applicable First-Class Mail or Priority Mail postage, plus a per piece fee, on all returned BRM. This includes any incomplete, blank, or empty BRM cards and envelopes and any mailable matter with a BRM label affixed.

9.4.3 Services

No extra services (e.g., Certified Mail, insurance, Registered Mail) are permitted with BRM.

9.4.4 Address

The delivery address on a piece of BRM may not be altered to redirect the mailpiece to any address other than the one preprinted on the piece.

9.4.5 Official Mail

Authorized users of official (penalty) mail may distribute BRM subject to the additional standards in [703.7.0](#), which supersede any conflicting standards in [9.0](#).

9.4.6 Intentions of the Permit Holder

BRM may not be used for any purpose other than that intended by the permit holder, even when postage is affixed. In cases where a BRM card or letter is used improperly as a label, the USPS treats the item as waste.

9.4.7 Samples

Prior to printing, permit holders are encouraged, but not required, to submit preproduction samples of BRM to the USPS for approval. QBRM pieces require USPS approval ([9.3](#)).

9.4.8 Error Notification

If the USPS discovers a BRM format error, the responsible permit holder or authorized agent receives written notification of the error. The permit holder must correct the error and make sure that all future BRM pieces meet appropriate specifications. The repeated distribution of BRM with format errors is grounds for revoking a BRM permit (9.5.6).

9.5 Permits**9.5.1 Required**

Any mailer who wants to distribute BRM must apply for and receive a permit. The permit number, city, and state where the permit is held must appear on all pieces of BRM.

9.5.2 Application Process

The mailer may apply for a BRM permit using one of the following processes:

- a. Form 3615. The mailer submits a completed Form 3615 to the Post Office issuing the permit and pays the annual permit fee. If a completed Form 3615 is already on file for the mailer at that office for other permits, then the mailer must submit the annual permit fee and the USPS amends Form 3615 by adding the BRM authorization.
- b. Online. The mailer applies online at www.usps.com. Online application is available only for BRM permits issued for certain Post Offices, determined by logging on to www.usps.com/replymail and entering the 5-digit ZIP Code of the Post Office where the mailer wants the BRM permit issued. If the online application option is not available for a 5-digit Zip Code, the applicant must apply using Form 3615.

9.5.3 Annual Permit Fee

A permit fee must be paid once each 12-month period at each Post Office where a BRM permit is held. Payment of the permit fee is based on the anniversary date of the permit's issuance. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. Agents authorized by a permit holder under 9.11 are not required to pay an annual permit fee at the Post Office where their BRM is received.

9.5.4 Renewal of Annual Permit Fee

An annual renewal notice is provided to each BRM permit holder by the USPS. The notice and the payment for the next 12 months must be returned by the expiration date to the Post Office that issued the permit. After the expiration date, if the permit holder has not paid the annual permit fee, then returned BRM pieces are treated as follows:

- a. Postcards of no obvious value are treated as waste and disposed of at the delivery unit.
- b. Pieces (excluding postcards) with a return address are endorsed "Business Reply Permit Canceled" and are returned to the sender.
- c. Pieces without a return address are endorsed "Business Reply Permit Canceled" and forwarded to the mail recovery center for handling.

9.5.5 Other Post Offices

A permit holder may distribute BRM through any Post Office for delivery at any Post Office under [9.11](#).

9.5.6 Revocation of a Permit

The USPS may revoke a BRM permit because of format errors or for refusal to pay permit fees (annual, accounting, quarterly, or monthly), postage, or per piece fees. If the permit was revoked due to format errors, then a former permit holder may obtain a new permit and permit number by completing and submitting a new Form 3615, paying the required BRM annual permit fee, paying a new annual account maintenance fee (if applicable), and, for the next 2 years, submitting two samples of each BRM format to the appropriate Post Office for approval.

9.6 Postage, Per Piece Fees, and Account Maintenance Fees

9.6.1 Postage

Each piece of returned BRM is charged the applicable single-piece First-Class Mail or Priority Mail postage ([123.1.0](#), [Priority Mail Prices and Fees](#), and [133.1.0](#), [First-Class Mail Prices and Fees](#)). Cards must meet the standards in [201.1.0](#) to qualify for card price postage. Any card larger than those dimensions is charged the applicable First-Class Mail letter price. For Priority Mail over 1 pound, if the zone cannot be determined from a return address or cancellation, then the permit holder is charged zone 4 postage for the weight of the piece. For QBRM, see [9.10](#).

9.6.2 Per Piece Fees

Per piece fees listed in [9.1](#) are charged for each piece of returned BRM (in addition to postage in [9.6.1](#)). If a permit holder has not paid an annual account maintenance fee and established a BRM advance deposit account, then the basic (higher) BRM per piece fee must be paid. If a permit holder has paid the annual account maintenance fee and has established a BRM advance deposit account, then the high-volume (lower) BRM per piece fee is paid. For QBRM, see [9.10](#).

9.6.3 Advance Deposit Account and Annual Account Maintenance Fee

A permit holder may choose to pay an annual account maintenance fee and establish an advance deposit account, which qualifies returned BRM pieces for the high-volume per piece fee. The account maintenance fee must be paid once each 12-month period at each Post Office where a permit holder holds an advance deposit account. Payment of the account maintenance fee is based on the anniversary date of the initial payment. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current 12-month period. The fee charged is that which is in effect on the date of payment. A separate advance deposit account solely for BRM is not required. An advance deposit account can be used for BRM under these conditions:

- a. For each withdrawal, only one statement is provided for each annual account maintenance fee paid.
- b. If a permit holder distributes BRM with different addresses (including Post Office box numbers) under the same permit number going to the same delivery unit and has only one business reply account, then the BRM is separated by each different address but only one statement is provided and only one annual account maintenance fee is paid.

507.9.6.4

- c. The permit holder must pay an annual account maintenance fee for each separate statement (accounting) requested. If only one annual account maintenance fee is paid, then the permit holder receives only one statement.
- d. The permit holder must maintain a balance in the BRM advance deposit account that is sufficient to cover postage and per piece fees for returned mailpieces. The permit holder is notified if funds are insufficient. After 3 calendar days, if no funds are deposited, then BRM on hand is charged the basic BRM per piece fee and postage and charges are collected from the permit holder (e.g., in cash) prior to delivery.
- e. BRM addressed to several different firms at the same delivery unit may be delivered to an agent authorized by a valid BRM permit holder. The agent pays one annual account maintenance fee for all the firms represented by the agent in the same delivery unit. If the agent, or any of the firms represented by the agent, wants a separation of charges, then separate (additional) account maintenance fees must be paid.

9.6.4 Renewal of Annual Account Maintenance Fee

An annual renewal notice is provided to each BRM permit holder with a BRM advance deposit account. The notice and the payment for the next 12 months must be returned by the expiration date to the Post Office that holds the advance deposit account. After the expiration date, if the permit holder has not paid the annual account maintenance fee but still has a valid BRM permit, returned BRM pieces no longer qualify for the high-volume BRM per piece fee and are charged the basic BRM per piece fee in [9.1.1](#).

9.6.5 Combined Pieces as a Single Item

Two or more BRM pieces may be mailed as a single piece if the BRM pieces are identically addressed and prepared for mailing in accordance with [201.1.0](#). The permit holder is charged postage based on the total weight of the combined piece plus one per piece fee. If the combined pieces become separated, then the permit holder must pay postage and a per piece fee for each individual piece. Combined pieces are not eligible for QBRM postage prices or per piece fees.

9.6.6 With Postage Affixed

BRM with postage affixed is handled the same as other BRM. No effort is made to identify or separate BRM pieces with postage affixed. The amount of affixed postage is not deducted from the postage or per piece fees owed. The permit holder may request a refund or credit for postage affixed to BRM under [604.9.2.10](#).

9.6.7 Payment Options

Permit holders may pay for postage and per piece fees on returned pieces by cash or check upon delivery, through a regular postage due account ([604.6.3](#)), or through a BRM advance deposit account. A regular postage due account does not qualify the permit holder for high-volume BRM per piece fees, and no annual account maintenance fee is charged to maintain the account.

9.7 Mailpiece Characteristics

9.7.1 Paper Weight

BRM paper envelopes must have a minimum basis weight of 20 pounds (500 17- by 22-inch sheets). Other pieces (cards and self-mailers) must meet the basis weight requirements in [201.3.0](#).

9.7.2 Nonpaper Envelopes

USPS Engineering must approve nonpaper envelopes for mailability. See [201.3.0](#).

9.7.3 Envelope Reflectance

Envelope material must not have a red fluorescence exceeding 4.0 phosphor meter units.

9.7.4 Sealing and Edges

BRM pieces must be rectangular, with four square corners, and parallel opposite sides, but may have finished corners as described in [201.1.0](#) for letter-sized pieces or [301.1.0](#) for flat-sized pieces. BRM pieces are not mailable if they are sealed with wax, clasps, string, staples, or buttons.

9.7.5 Window Envelopes

The following standards apply to BRM prepared in an open-panel or a covered window envelope:

- a. All window envelopes:
 1. When a mailpiece has a barcode in the address block, the mailpiece must meet the applicable standards in [202.5.7](#) for letters or [302.4.6](#) for flats.
 2. The address showing through the window must be that of the permit holder or an authorized representative.
 3. The facing identification mark (FIM) must be printed on the envelope as specified in [708.9.0](#).
 4. See [601.6.3](#) for required clearances for information showing within a window envelope.
- b. Covered window envelopes:
 1. The “No Postage Necessary” imprint, the business reply legend, and the horizontal bars must be printed either directly on the envelope or on the insert appearing through the covered window. The minimum size of the information appearing in the covered window is 2 inches high and 4-1/4 inches long.
 2. The window cover must be of a nontinted clear or transparent material (e.g., cellophane or polystyrene) that permits the barcode and its background, as viewed through the window material, to meet the reflectance standards in [708.4.4](#). The edges of the window cover must be securely glued to the envelope.
- c. Open panel window envelopes:
 1. The “No Postage Necessary” imprint, the business reply legend, and the horizontal bars must be printed directly on the envelope.

507.9.7.6

2. Other required and optional elements in [9.8](#) may be printed on the insert appearing through the address window.

9.7.6 Self-Mailers and Reusable Mailpieces

In addition to the standards in [9.7](#) and [9.8](#), self-mailers and reusable mailpieces must meet the standards in [201.3.14](#) and [601.6.4](#). Permit holders must provide instructions to the user for re-folding and sealing (see [601.4.0](#)) so that upon return the piece meets sealing and folding requirements in [201.3.0](#).

9.7.7 Cards

Cards must meet the standards in [201.1.2](#).

9.7.8 Labels

For general use, the minimum size of a BRM label is 2 inches high and 3 inches long. BRM labels are not required to have a FIM or a ZIP+4 barcode, but all other format standards in [9.8](#) must be met. In cases where a BRM card or letter is used improperly as a label, the USPS treats the item as waste. See [9.7.9](#) for labels for letter-size pieces.

9.7.9 Labels for Letter-Size Pieces

The following standards apply to BRM labels for use on letter-size pieces:

- a. The minimum size of a BRM label is 2-5/8 inches high and 4-1/4 inches long. All format elements, including a FIM, must be printed on the label. *Exception:* The vertical series of horizontal bars must be at least 3/4-inch high. The back of the label must be coated with a permanent adhesive strong enough to firmly attach the label to an envelope.
- b. The permit holder must provide instructions to the user describing how the label should be applied to a mailpiece and what precautions must be observed when applying the label (see [Exhibit 9.7.9](#)). A pictorial diagram showing proper placement of the label must be included with the instructions. At a minimum, the instructions must include the following directions:
 1. Place the label squarely in the upper right corner of the envelope.
 2. Do not write on the envelope or label.
 3. Do not use a window envelope, an envelope that is less than 1 inch higher than the label an envelope that is more than 4-1/2 inches high, or an envelope with any printing other than a return address.
 4. Do not use tape to affix the label.
- c. When the label is affixed to an envelope, the address must be placed within the OCR read area (see [202.2.1](#)).
- d. Pieces with business reply labels cannot qualify for QBRM prices.

Exhibit 9.7.9 Instructions for Affixing Business Reply Label

How to use your business reply label:
Affix label to upper right corner of envelope. Be sure the label is at the edge of the right corner. Do not use tape. Do not write on the envelope or use an envelope with printing other than a return address.

9.8 Format Elements

9.8.1 General

All pieces of BRM are subject to these format elements. Pieces of QBRM and bulk weight averaged nonletter-size BRM are subject to additional format standards listed in 9.10 and 9.12, respectively. BRM format elements are shown in [Exhibit 9.8.1](#).

Exhibit 9.8.1 Business Reply Mail Format**9.8.2 Printing and Print Reflectance**

All forms of printing are permissible if legible to the satisfaction of the USPS. Handwriting, typewriting, and handstamping may not be used to prepare BRM. Printed borders are not permitted on letter-size BRM, but are permitted on business reply labels and cartons and envelopes greater than 6-1/8 inches high or 11-1/2 inches long or 1/4 inch thick. All ink colors are acceptable if the piece meets the appropriate reflectance standards in [708.4.4](#).

9.8.3 "No Postage Necessary" Imprint

The imprint "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES" must be printed in the upper right corner of the address side of the piece. The imprint must not extend more than 1-3/4 inches from the right edge of the piece.

9.8.4 Business Reply Legend

The legend "BUSINESS REPLY MAIL" or "BUSINESS REPLY LABEL," as appropriate, must appear on all pieces. This legend must appear above the address in capital letters at least 3/16 inch high. At the permit holder's discretion, the business reply legend may be surrounded by a rule or border.

9.8.5 Permit Number and Postage Endorsement

Directly below the business reply legend, the words "FIRST-CLASS MAIL PERMIT NO. [NO., CITY, STATE]" (representing the permit holder's number and Post Office that issued the permit) must appear in capital letters. Directly below that, the endorsement "POSTAGE WILL BE PAID BY ADDRESSEE" must appear in capital letters. At the permit holder's discretion, the permit number and postage endorsement may be surrounded by a rule or border.

9.8.6 Delivery Address

The complete address (including the permit holder's name, delivery address, city, state, and BRM ZIP Code) must be printed directly on the piece, except as allowed under [9.7.5](#) or under item a below, subject to these conditions:

- a. Preprinted labels with only delivery address information (including an Intelligent Mail barcode or POSTNET ZIP+4 barcode under [9.9](#)) are permitted, but the permit holder's name and other required elements must be printed directly on the BRM piece.
- b. On letter-size pieces, the complete delivery address must appear within the OCR read area (see [202.2.1](#)).
- c. There must be at least a 1/2-inch clearance between the ZIP Code and the horizontal bars.
- d. A unique ZIP Code (i.e., firm ZIP Code) must not be used for BRM unless the ZIP Code has been assigned specifically for BRM. A unique 4-digit add-on to denote BRM may not be used with a unique 5-digit ZIP Code not specifically assigned to BRM.

9.8.7 Horizontal Bars

A vertical series of horizontal bars parallel to the length of the piece must be printed directly below the imprint "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES." The bars must be uniform in length, at least 1 inch long and 1/16 inch to 3/16 inch thick, and evenly spaced. On letter-size nonbarcoded BRM, the bars must not extend below the delivery address line (the line above the line containing the ZIP Code). On barcoded BRM, the bars must not extend lower than 5/8 inch from the bottom edge of the piece.

9.8.8 Facing Identification Mark (FIM)

A FIM must be printed on all letter-size BRM and on business reply labels affixed to letter-size mail (see [9.7.9](#)). FIM B must be used with BRM without a barcode. FIM C must be used with any BRM printed with a barcode. The FIM must meet the physical standards in [708.9.0](#).

9.8.9 Company Logo

A company logo is permitted:

- a. On nonbarcoded BRM, if it is placed outside the OCR read area (see [202.2.1](#)).
- b. On letter-size barcoded BRM, if it is placed no lower than 5/8 inch from the bottom edge of the piece.
- c. On any piece, if the logo does not interfere with any required format elements.

9.9 Additional Standards for Letter-Size Barcoded BRM

In addition to the format standards in [9.8](#), letter-size BRM enclosed in automation price mailings and all QBRM must be ZIP+4 barcoded with an Intelligent Mail barcode or POSTNET barcode. Other BRM may be barcoded at the permit holder's option. Barcoded BRM must meet the barcode standards in [708.4.0](#), the envelope basis weight standards in [9.7.1](#), all other mailpiece design standards in [201.3.0](#) (including thickness), and these standards:

507.9.10

- a. Permit holders must use the ZIP+4 codes and equivalent Intelligent Mail barcode or POSTNET barcodes assigned by the USPS. Delivery point barcodes are not permitted on BRM. The ZIP+4 barcode must be placed on the address side of the piece and positioned in either of these two locations:
 1. As part of the delivery address block under [202.5.7](#).
 2. Within the barcode clear zone in the lower right corner of the piece if printed directly on the piece.

9.10 Additional Standards for Qualified Business Reply Mail (QBRM)

9.10.1 Description

Qualified business reply mail (QBRM) is a subset of business reply mail. Permit holders distribute automation-compatible letter-size pieces that qualify for automation postage prices and reduced per piece fees. QBRM postage and per piece fees must be deducted from a BRM advance deposit account.

9.10.2 Eligibility

To qualify for QBRM, pieces must meet the eligibility requirements in [9.3](#).

9.10.3 Authorization

BRM permit holders must apply for authorization to participate in QBRM under [9.3](#).

9.10.4 Postage

Each piece of returned QBRM is charged the automation postage price for QBRM pieces in [9.2](#). Pieces that do not meet the format requirements for QBRM cannot qualify for automation postage prices and are charged First-Class Mail postage according to [9.6.1, Postage](#).

9.10.5 Per Piece Fees

Per piece fees listed in [9.1.3](#) are charged for each piece of returned QBRM (in addition to postage in [9.10.4](#)). Pieces that do not meet the format requirements for QBRM cannot qualify for QBRM per piece fees and are charged the high-volume BRM per piece fees in [9.1.2](#).

9.10.6 Annual Account Maintenance Fee and Advance Deposit Account

Permit holders are required to pay QBRM postage and per piece fees through a BRM advance deposit account, which requires payment of an annual account maintenance fee (see [9.6.3](#)).

9.10.7 Quarterly Fee for High-Volume QBRM

Mailers may choose to pay a quarterly fee in addition to the annual account maintenance fee. Payment of the quarterly fee entitles mailers to a lower per piece fee (the high-volume QBRM per piece fee listed in [9.1.4](#)). The quarterly fee and annual account maintenance fee must be paid at each Post Office where mail is returned and for each separate billing desired. Mailers are eligible for the high-volume QBRM rates and per piece fees only for the time they pay the quarterly fee (i.e., mailers can opt out of the quarterly fee and related high-volume QBRM per piece fees simply by not paying the fee for the next quarter). The quarterly fee cannot be paid or renewed retroactively to receive a lower per piece fee on pieces already paid for and delivered. The quarterly fee can be paid for any three consecutive calendar months.

9.10.8 Payment Period for Quarterly Fee

The quarterly fee must be paid in advance for at least one but no more than four quarterly periods. A quarterly period begins on either the first day of the month (if a mailer pays on or before the 15th of the month) or the first day of the following month (if a mailer pays after the 15th of the month) and continues for three consecutive calendar months. A mailer who pays the quarterly fee is entitled to the high-volume QBRM per piece fee from the date of payment through the end of the quarterly period. The fee paid is that which is in effect on the date of payment.

9.11 BRM Distributed and Received by Agents of a Permit Holder**9.11.1 Description**

Permit holders may give permission to subsidiary offices, agents, or authorized representatives to distribute and receive BRM using a single (corporate) permit number. BRM pieces are distributed by and returned to agents, who pay postage and per piece fees on those returned pieces. Agents may use any type of BRM service.

9.11.2 Permit

The main permit holder or “corporate” office applies for the permit number and pays the permit fee. The agent must present a letter of authorization from the permit holder showing the name, address, and telephone number of the local agent authorized to receive the BRM to the Post Office where the BRM is to be returned. Any time there is a change to the original permit application or the authorization letter, each agent must provide an amended letter of authorization to their local Post Office.

9.11.3 Annual Permit Fee

The annual permit fee must be paid by the permit holder (9.6.3). Agents do not pay a separate annual permit fee but must submit evidence (usually a copy of Form 3544) to the local office once each 12-month period to show that the annual permit fee has been paid. This evidence is not required if the permit holder has a centralized account processing system (CAPS) account through which the local Post Office can determine that the permit fee has been paid.

9.11.4 Postage, Per Piece Fees, and Annual Account Maintenance Fees

Agents receiving BRM or QBRM pay the postage, per piece fees, and annual account maintenance fees listed in 9.1 for the type of service received. The agent may choose to pay an annual account maintenance fee and establish a BRM advance deposit account. The agent receiving BRM is responsible for paying all postage and per piece fees.

9.11.5 Payment Guarantee

The permit holder is ultimately responsible for postage and per piece fees for all pieces returned under that permit number. If a local agent refuses or neglects to pay postage or per piece fees on returned pieces, then those pieces are forwarded to the Post Office that issued the original permit for collection of postage and per piece fees from the permit holder. Once forwarded to the permit holder, these pieces cannot qualify for QBRM postage and per piece fees. The permit holder's refusal to accept and pay the required postage and per piece fees for BRM offered for delivery is grounds for immediate revocation of the BRM permit (9.5.6).

507.9.11.6

9.11.6 Format

BRM distributed by agents must meet all required format standards in [9.7](#) and [9.8](#). Authorized representatives distributing BRM on behalf of a permit holder must have the permit holder's name and permit number printed on the BRM and their own names and addresses printed below the permit holder's name, except:

- a. When the agent is a branch of an authorized business.
- b. The permit holder notifies a Post Office that authorized representatives may use the permit holder's permit number without printing the permit holder's name.

9.12 Bulk Weight Averaged Nonletter-size BRM**9.12.1 Description**

Bulk weight averaging is a method of counting, rating, and billing incoming nonletter-size BRM based on principles of mathematical statistics. Probability sampling techniques are used to measure the characteristics of the total BRM volume by examining a fraction of the volume. Statistically valid samples that are drawn from the incoming BRM volume each postal accounting period are used by Post Offices to compute average postage due per pound and average piece count per pound factors. The net bulk weight of mail received is multiplied by these conversion factors to get the estimated volume received and postage and fee amounts.

9.12.2 Eligibility

BRM pieces rated by the weight averaging method must:

- a. Meet the basic standards for BRM in [9.0](#).
- b. Not be letter-size ([201.1.0](#)) or card-size ([201.1.2](#)).
- c. Not exceed 5 pounds.

9.12.3 Postage, Per Piece Fees, and Other Fees

Returned pieces of bulk weight averaged nonletter-size BRM are charged postage and per piece fees according to [9.1.5](#). Permit holders participating in bulk weight averaged nonletter-size BRM must pay an annual account maintenance fee (see [9.6.3](#)) and a monthly maintenance fee ([9.3](#)).

9.12.4 Application Procedures

A permit holder who wants to use bulk weight averaged BRM for nonletter-size pieces must submit a written request to the postmaster of the office where the BRM permit is held. The postmaster forwards this information to the manager, Customer Service Support, USPS Headquarters (see [608.8.0](#) for address). The request must include the following information:

- a. Permit holder's name and address.
- b. Name and location of the Post Office at which BRM will be received and a CAPS account number, if available.

- c. Information about the number of pieces expected to be returned over a 24-hour period and a 30-day period, and a breakdown of the weight distribution of those pieces (in nearest ounces or pounds) (e.g., X number of 3-ounce pieces, Y number of 4-ounce pieces, and Z number of 5-ounce pieces).
- d. Based on the estimated volume in [9.12.4c](#), a 24-hour estimate and a 30-day estimate of postage and per piece fees using the postage and charges listed in [9.1.5, Bulk Weight Averaged Nonletter-Size BRM](#).
- e. A statement indicating whether the piece volume has seasonal variation and, if applicable, estimates of monthly volumes for a 12-month period.

9.12.5 Authorization

The permit holder's request will be reviewed and approved by the manager, Customer Service Support, USPS Headquarters. If the request is approved, then a letter of authorization is sent to the permit holder from the Post Office where the BRM permit is held. The permit holder signs a service agreement and, if necessary, is assigned a Post Office box address.

9.12.6 Denial of Authorization

If the permit holder's request is not approved, then the Post Office sends a written notice, giving reasons for the denial. The permit holder has 15 days following receipt of the notice to file a written appeal of the decision with the postmaster and to furnish further information. If the postmaster still finds that the application should be denied, then the postmaster forwards the file to the manager, Customer Service Support, USPS Headquarters, who issues a final written decision to the permit holder.

9.12.7 Revoking Authorization

To revoke authorization for bulk weight averaging, the postmaster sends written notice to the permit holder. A postmaster may terminate authorization for bulk weight averaged BRM for any of the following reasons:

- a. The permit holder provided incorrect or incomplete information on the request for authorization.
- b. The permit holder's BRM pieces no longer meet the eligibility requirements in [9.0](#).
- c. The USPS finds that bulk weight averaging no longer provides adequate revenue protection.
- d. The permit holder no longer desires to participate in bulk weight averaging.

9.12.8 Notice and Appeal

Termination takes effect 15 days from the permit holder's receipt of the notice unless the permit holder files a written appeal within that period with the postmaster. The postmaster forwards the permit holder's appeal together with all pertinent information to the manager, Customer Service Support, USPS Headquarters, who issues a final agency decision to the permit holder. The permit holder may continue to use the bulk weight averaging method until a final decision is made on the appeal.

507.10.1

10.0 Permit Reply Mail

10.1 General Information

10.1.1 Description

Permit reply mail (PRM) enables a permit imprint permit holder to receive First-Class Mail and Priority Mail back from customers by prepaying postage for reply pieces at the time of mailing. Mailers must distribute PRM pieces as part of a First-Class Mail mailing (see [230](#)) using a permit imprint, and not through any other means.

10.1.2 Services

No extra services (e.g., Certified Mail, insurance, Registered Mail) are permitted with PRM.

10.1.3 Address

The delivery address on a PRM mailpiece may not be altered to redirect it to any address other than the one preprinted on the piece.

10.1.4 Permit Holder Intentions

PRM may not be used for any purpose other than the purpose intended by the permit holder, even when postage is affixed.

10.2 Authorization and Revocation

10.2.1 Authorization

PRM customers must apply for authorization through the district manager of Business Mail Entry at the office where the permit imprint account is held.

10.2.2 Samples

Permit holders must submit preproduction samples of PRM pieces to the Postal Service for approval prior to distribution.

10.2.3 Error Notification

If the Postal Service discovers a PRM format error, the permit holder or authorized agent will receive a written notification of the error. The permit holder must correct the error and ensure that all future PRM pieces meet appropriate specifications. The Postal Service may revoke a PRM authorization if a mailer repeatedly distributes PRM with format errors (see [10.2.4](#)).

10.2.4 Revocation of Authorization

The Postal Service may revoke a PRM authorization because of format errors or misuse. If the authorization is revoked due to format errors, the format errors must be corrected before reauthorization.

10.3 Format Elements

10.3.1 General

All pieces of PRM must include the format elements shown in [Exhibit 10.3.1](#).

Exhibit 10.3.1 Permit Reply Mail Format Elements

10.3.2 Printing and Print Reflectance

All legible forms of printing are permitted. Mailers may not use handwriting, typewriting, or handstamping to prepare PRM.

10.3.3 No Postage Necessary Imprint

The imprint, "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES," must be printed in the upper right corner of the address side of the piece. The imprint must not extend more than 1-3/4 inches from the right edge of the piece.

10.3.4 Permit Reply Mail Legend

The legend, "PERMIT REPLY MAIL," must appear on all pieces. The legend must appear above the address in capital letters at least 3/16 inch high. At the permit holder's discretion, the permit reply mail legend may be surrounded by a rule or border.

10.3.5 Permit Number and Postage Endorsement

Directly below the permit reply mail legend, the words, "FIRST-CLASS MAIL PERMIT NO. [NO., CITY, STATE]" (representing the permit holder's number and the Post Office that issued the permit) must appear in capital letters. The permit holder may replace the permit number and the Post Office with a company permit as described in 10.5. Directly below that, the endorsement, "POSTAGE HAS BEEN PREPAID BY ADDRESSEE," must appear in capital letters. At the permit holder's discretion, the permit number and postage endorsement may be surrounded by a rule or border.

10.3.6 Delivery Address

The complete address (including the permit holder's name, delivery address, city, state, ZIP+4 code, and corresponding delivery point barcode) must be printed directly on the piece.

507.10.3.7

10.3.7 Facing Identification Mark

A facing identification mark (FIM) C must be printed on all letter-size PRM. The FIM C must meet the physical standards in [708.9.0](#).

10.3.8 Company Logo

A company logo is permitted as follows:

- a. On letter-size PRM, if the logo is placed no lower than 5/8 inch from the bottom edge of the piece.
- b. On any piece, if the logo does not interfere with any required format element.

10.4 Permit Imprint Account

Mailers may distribute PRM as part of the contents of an outgoing mailing only by using a valid permit imprint account. The standards for using permit imprints are located in [604.5.0](#).

10.5 Company Permit Reply Mail Imprint**10.5.1 Definition**

A company permit reply mail imprint is one in which the exact name of the company holding the permit is shown in the permit reply mail indicia in place of the city, state, and permit number.

10.5.2 Use

A customer may use a company permit reply mail imprint if, for 1 year from the date of mailing, the permit holder or its agent keeps records of each mailing paid with a company permit reply mail imprint and makes them available for USPS review on request. These records must include the weight of a single piece; the total number of pieces mailed; the total postage; and the dates and Post Offices of mailing. A complete sample mailpiece must be included for each mailing.

10.5.3 Format

To create a company permit reply mail imprint, replace the words "PERMIT No. [NO., CITY, STATE]" (representing the permit holder's number and the Post Office that issued the permit), with "PERMIT PAID BY [COMPANY NAME]" (representing the name of the company in the delivery address of the mailpiece) in capital letters.

11.0 Merchandise Return Service**11.1 Prices and Fees****11.1.1 Permit Fee**

Annual permit fee: \$180.00. An annual permit fee must be paid once each 12-month period at each Post Office where a Merchandise Return Service (MRS) permit is held. Payment of the annual permit fee is based on the anniversary date of the permit's issuance. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

11.1.2 Advance Deposit Account and Account Maintenance Fee

Annual account maintenance fee (for advance deposit account): \$565.00.
The permit holder must pay postage and extra service fees through an advance deposit account and must pay an annual account maintenance fee (see [11.1](#)). The account maintenance fee is charged once each 12-month period on the anniversary

date of the initial account maintenance fee payment. The fee may be paid in advance only for the next year and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. A separate advance deposit account for MRS is not required; the annual account maintenance fee is charged if MRS postage and fees are paid from an existing account:

- a. For each withdrawal, only one statement is provided for each annual account maintenance fee paid.
- b. The permit holder must pay an annual account maintenance fee for each separate statement (accounting) requested. If only one annual account fee is paid, then the permit holder receives only one statement.

11.1.3 Postage

Merchandise return service parcels are charged single-piece price postage and extra service fees based on the class or subclass marking on the label. If a parcel is unmarked, then it is charged Parcel Post prices. If the postage for the returned parcel is zoned and there is no way to determine its zone of origin (i.e., no postmark or return address), then postage is calculated at zone 4 (for Priority Mail) or zone 4 Inter-BMC/ASF prices (for Parcel Post). Postage is deducted from an advance deposit account.

11.1.4 Postage Due Weight Averaging

MRS mailers may participate in the Postage Due Weight Averaging program described in [705.19.0](#).

11.2 Basic Standards

11.2.1 Description

Merchandise return service allows an authorized permit holder to pay the postage and extra service fees on single-piece price First-Class Mail, Priority Mail, and Package Services parcels that are returned to the permit holder by the permit holder's customers via a special label produced by the permit holder.

11.2.2 Availability

Merchandise return service is available to the permit holder for mailing to the postage due unit at any Post Office where authorized by an approved application.

11.2.3 Payment Guarantee

The permit holder guarantees payment of the proper postage and extra service fees (except for insurance and certificate of mailing purchased by the sender) on all parcels returned via a special label produced by the permit holder.

11.2.4 Where Service Established

Merchandise return service may be established at any Post Office in the United States and its territories and possessions or at any U.S. military Post Office overseas (APO/FPO). It is not available for any foreign country.

11.2.5 Official Mail

Any authorized user of official (penalty) mail may use merchandise return service subject to the standards in [703.7.0](#), which supersede conflicting standards below.

507.11.2.6

11.2.6 Application Process

The applicant must submit a completed Form 3615 and the annual permit fee to the Post Office issuing the permit. If the applicant already has a completed Form 3615 on file at that office, the form may be amended by adding the merchandise return service authorization to existing permit authorizations. Except for MRS labels generated by the USPS Application Program Interface (API), the Form 3615 must be accompanied by copies of the MRS labels (including printed copies of labels intended to be faxed to customers or transmitted to customers electronically) and the instructions provided to the permit holder's customers. All MRS labels that have preprinted Delivery Confirmation barcodes must be approved by the USPS (503.9.0). If articles are to be returned from customers as Registered Mail, the applicant must write "Registered Mail" on the application. After a permit is obtained, any change to label formats or customer instructions must be approved by the Post Office where the permit is held. The permit is valid for 12 months after the approval date of the application.

11.2.7 Procedure

An approved merchandise return permit on Form 3615 must be on file at every Post Office to which parcels are returned.

11.2.8 Multiple Accounts

When an advance deposit account is kept at each entry location, a separate permit is needed and the annual merchandise return service permit and annual account maintenance fees must be paid at each Post Office.

11.2.9 Renewal

To renew the permit, the permit holder must send the annual fee to the issuing Post Office by the expiration date of the permit or authorize the postmaster to deduct the fee from the advance deposit account. Written authorization is not needed for permit renewal if there is no change to the authorization on file at the delivery unit.

11.2.10 Nonrenewed Permit

If the permit is not renewed, merchandise return mail is returned to the sender if a return address is provided. Merchandise return mail that does not contain the sender's return address is treated as dead mail.

11.2.11 Permit Cancellation

The USPS may cancel a permit if the permit holder refuses to accept and pay postage and fees on merchandise return service parcels, fails to keep sufficient funds in the advance deposit account to cover postage and fees, or distributes merchandise return labels or tags that do not meet USPS standards.

11.2.12 Reapplying After Cancellation

To receive a new permit at the same Post Office after a merchandise return permit is canceled, the applicant must amend the Form 3615 on file at that office to reflect the new application date; pay a new permit fee; submit for approval two samples of any label format to be used; provide evidence that the reasons for the permit cancellation are corrected; and provide and keep funds in an advance deposit account to cover normal returns for at least 2 weeks.

11.2.13 Using Other Post Offices

The permit holder may distribute merchandise return labels for return through other Post Offices without paying an additional permit fee if the permit holder opens and keeps a centralized advance deposit account at the Post Office where the permit is issued and supplies the postmaster of the Post Office where the application is submitted the name, address, and telephone number of a representative in each additional location if different from the information on the application.

11.3 Additional Standards for Permit Holder**11.3.1 Insurance**

The permit holder may obtain insured mail service with MRS. Only Package Services matter (matter not required to be mailed at First-Class Mail prices under [133.3.0, Content Standards](#)) may be insured. Insured mail may be combined with Delivery Confirmation and special handling, or both. To request insured mail service, the permit holder must preprint or rubber-stamp “Insurance Desired by Permit Holder for \$_____ (value)” to the left of and above the “Merchandise Return Label” legend and below the “Total Postage and Fees Due” statement on the merchandise return label. The value part of the endorsement, showing the dollar amount of insurance for the article, may be handwritten by the permit holder. If insurance is paid for by the MRS permit holder, then only the MRS permit holder may file a claim ([609](#)).

11.3.2 Registered Mail

The permit holder may obtain Registered Mail service with MRS. The following standards apply:

- a. The customer using the MRS label must declare the full value of the article to be registered when presented at the Post Office. Registered Mail service may be obtained only on articles returned at First-Class Mail or Priority Mail prices and may not be combined with any other extra service.
- b. A permit holder wanting to add Registered Mail service under an existing permit must submit a written request to the Post Office where the permit is held, with samples of the merchandise return labels and a copy of the instructions to be provided to the permit holder’s customers. The permit holder must not distribute labels that request Registered Mail service before receiving USPS written approval.

11.3.3 Delivery Confirmation

The permit holder may obtain Delivery Confirmation service with MRS. If the permit holder chooses to preprint the Delivery Confirmation barcode on labels, then those labels must be approved by the USPS. MRS labels with Delivery Confirmation barcodes must meet the standards in [503.9.0](#) as shown in [Exhibit 11.5.13d](#). Delivery Confirmation may be combined with insurance and special handling, or both. Delivery Confirmation is always charged at the retail price ([503.9.1](#)).

11.3.4 Return Receipt for Merchandise

The permit holder may obtain return receipt for merchandise ([503.6.0](#)) with MRS.

11.3.5 Special Handling

The permit holder may obtain special handling service with MRS.

507.11.3.6

11.3.6 Pickup on Demand Service

The permit holder may obtain Pickup on Demand service with MRS. Pickup on Demand service may be combined with Certified Mail (Priority Mail only), Delivery Confirmation, and special handling.

11.3.7 Mailing Acknowledgment

The permit holder may prepare a detachable mailing acknowledgment form, subject to these conditions:

- a. The acknowledgment must not bear adhesive but must be attached to the label and perforated or designed for easy separation at the time of mailing.
- b. The acknowledgment establishes no USPS liability for the parcel if damaged, lost, or stolen.
- c. The acknowledgment provides documentation for account management between the mailing customer and the permit holder. The USPS charges no fee, keeps no records, and does not provide copies of or further information about the acknowledgment.
- d. A merchandise return service parcel containing the detachable mailing acknowledgment form must be presented to the USPS acceptance employee at the time of mailing to be executed.
- e. Each mailing acknowledgment part of the label must include a unique parcel identification number assigned by the permit holder; the return address of the customer mailing the parcel, in the upper part of the detachable form; the permit holder's address, in the lower part of the form; an initials section in the acknowledgment portion for use by the USPS acceptance employee; and space in the acknowledgment part where the USPS acceptance employee places the date stamp.

11.4 Additional Standards for Permit Holder's Customer**11.4.1 Customer Options**

If the permit holder has not indicated the extra services listed in [11.3.1](#) through [11.3.6](#) a customer may request the extra services listed in [11.3.1](#) through [11.3.6](#) at their own expense.

11.4.2 Insurance

If insurance is paid by the customer, then only the customer may file a claim ([609](#)).

11.4.3 Certificate of Mailing

A customer mailing merchandise return service articles may also obtain a certificate of mailing at the customer's own expense at the time of mailing by presenting the certificate at a Post Office to obtain the receipt.

11.5 Preparation**11.5.1 Distribution of Labels**

Merchandise return service labels may be distributed to customers as an enclosure with merchandise, as a separate item, as part of a double postcard subject to [201.1.2.8](#) and the approval of the PCSC, as a facsimile transmission (fax), as an electronic transmission for customer downloading and printing, or through one of

the permit holder's designated pickup facilities. Any such label distributed to a customer must meet the format standards in [11.5.13](#), including the requirement to furnish instructions.

11.5.2 Labels

The label or tag used for merchandise return service must have the delivery address of the postage due unit at the Post Office where the permit is held, the permit holder's address, a space for the customer's return address, and otherwise meet the format standards in [11.5.13](#).

11.5.3 Mailer Markings and Endorsements

It is recommended but not required that permit holders preprint a price marking on the merchandise return service labels they distribute. Preprinting a price marking guarantees that returned parcels will be given service and charged postage according to the wishes of the permit holder. Regardless of weight, all unmarked parcels will be treated as Parcel Post and charged Parcel Post prices.

11.5.4 Label Preparation

Any photographic, mechanical, or electronic process or any combination of such processes other than typewriting or handwriting may be used to prepare the MRS label or tag and detachable acknowledgment form. The background may be any light color that allows the address, postmark, and other endorsements to be readily discerned. Brilliant colors may not be used for the background. If labels are faxed to customers or electronically transmitted to customers for their local printing, the permit holder must advise customers of these preparation requirements as part of the instructions required by [11.5.6](#). All MRS labels that include Delivery Confirmation barcodes must be certified for use by the USPS prior to distribution. Labels with Delivery Confirmation barcodes cannot be faxed to customers.

11.5.5 Labeling Methods

If all applicable content and format standards are met (including the written instructions required by [11.5.6](#)), a merchandise return service label may be produced by any of the following methods:

- a. As an impression printed by the permit holder directly onto the mailpiece to be returned.
- b. As a separate label preprinted by the permit holder for affixing by the customer onto the mailpiece to be returned. The reverse side of the label must bear an adhesive strong enough to bond the label securely to the mailpiece.
- c. As a facsimile transmission (fax) of a preprinted label sent by the permit holder to the customer. The facsimile transmission must include instructions that explain how to affix the label securely to the mailpiece to be returned and that caution against covering with tape or other material any part of the label where postage and fee information is to be recorded.
- d. As an electronic file created by the permit holder for local output and printing by the customer. The electronic file must include instructions that explain how to affix the label securely to the mailpiece to be returned and that caution against covering with tape or other material any part of the label where postage and fee information is to be recorded.

507.11.5.6

11.5.6 Instructions

Written instructions must be provided with the label that, at a minimum, direct the customer:

- a. To affix the label squarely onto the address side of the parcel, covering up any previous delivery address and barcode without overlapping any adjacent side. If tape or similar material is used, it must not cover any part of the label where postage and fee information is to be recorded.
- b. To obliterate any other addresses and barcodes on the outside of the parcel.
- c. To take the parcel to a Post Office, drop it in a collection box, or give it to a postal carrier. If insurance, return receipt for merchandise, or special handling is marked on the label, the parcel must be taken to a Post Office.

11.5.7 Insured Markings

The permit holder must either leave a clear space on the merchandise return label to the right of the return address for the insured label or instruct the customer to affix the merchandise return label to the article so that the USPS acceptance employee can place the insured label on the article directly above the merchandise return label.

11.5.8 Registered Mail Endorsement

To request Registered Mail service, the permit holder must preprint or rubber-stamp “Registered Mail Service without Postal Insurance Desired by Permit Holder” or “Registered Mail Service with Postal Insurance Desired by Permit Holder,” as applicable, to the left of and above the “Merchandise Return Label” legend and below the “Total Postage and Fees Due” statement on the merchandise return label. The First-Class Mail or Priority Mail marking must also be preprinted or hand-stamped on the labels.

11.5.9 Placement of Registered Mail Label

The permit holder must either leave a clear space on the merchandise return label to the right of the return address for the placement of Label 200 or instruct the customer to affix the merchandise return label to the article so that the USPS acceptance employee can place the Registered Mail label on the article directly above the merchandise return label.

11.5.10 Placement of Return Receipt for Merchandise Label

The permit holder must either leave a clear space on the MRS label to the right of the return address for the placement of Label 3804 or instruct the customer to affix the MRS label to the article so that the USPS acceptance employee can place Label 3804 on the article directly above the MRS label.

11.5.11 Special Handling Endorsement

To request special handling, the permit holder must preprint or rubber-stamp “Special Handling Desired by Permit Holder” to the left of and above the “Merchandise Return Label” legend and below the “Total Postage and Fees Due” statement on the merchandise return label.

11.5.12 Special Handling Label

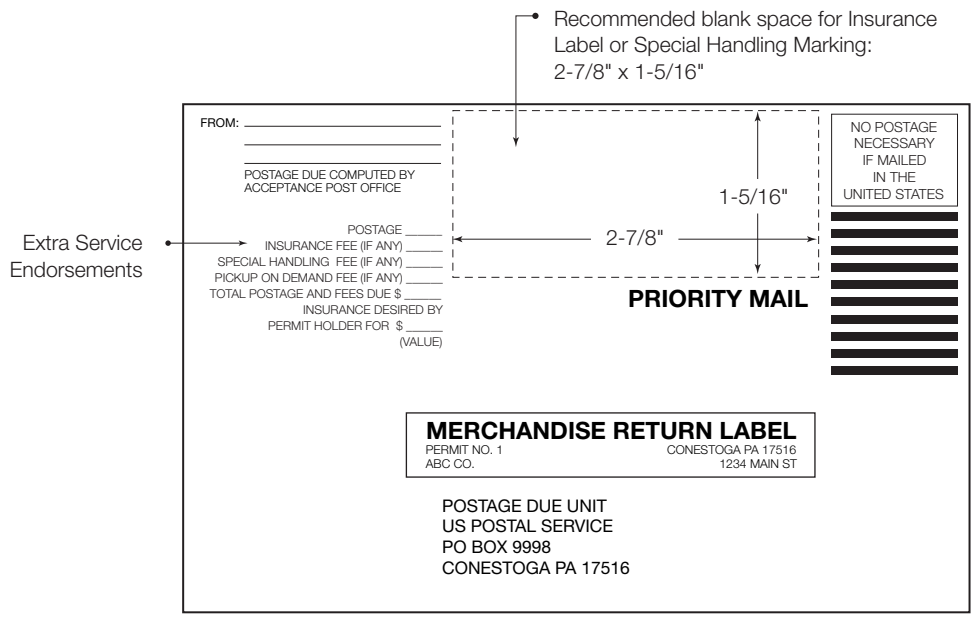

The permit holder must provide “Special Handling” labels with instructions to customers about their placement on the parcel, leave a clear space on the merchandise return label to the right of the return address for the placement of the “Special Handling” marking, or instruct the customer to affix the merchandise return label to the article so that the USPS acceptance employee can place the “Special Handling” marking on the article directly above the merchandise return label.

11.5.13 Format Elements

Format standards required for the merchandise return label are shown in [Exhibit 11.5.13a](#) through [Exhibit 11.5.13d](#), and described as follows:

- a. Postage Guarantee. The endorsement “No Postage Necessary if Mailed in the United States” must be printed in the upper right corner on the face of the label. The left edge of the endorsement must not extend more than 1-3/4 inches from the right edge of the label.

Exhibit 11.5.13a Merchandise Return Label With No Extra Services or With Insurance, Special Handling, or Pickup on Demand Service (*see 11.5.13d)

- b. “Merchandise Return Label” Rectangle. The “Merchandise Return Label” rectangle must be placed above the return delivery address and must enclose these lines:
 1. Line1: The words “MERCHANDISE RETURN LABEL” (the “Merchandise Return Label” legend) must be shown in capital letters at least 3/16 inch high.

507.11.5.13

2. Line 2: The words "PERMIT NUMBER" or "PERMIT NO.," followed by the permit number, and the name of the issuing Post Office (city and state), followed by the ZIP Code, must be shown in capital letters.
3. Line 3: The name and delivery address (street or Post Office box number) of the permit holder at that Post Office must be placed directly below the permit number line. Alternatively, a permit holder may use a name other than the permit holder's own name on this line if a written notification of the change is provided to the issuing Post Office. A separate permit or fee is not required for using this alternative name.

Exhibit 11.5.13b Merchandise Return Label With Registered Mail Service

- c. **Price Marking.** If a price marking is used, it must be placed in the space to the right and above the "Merchandise Return Label" legend. The marking must be at least 3/16 inch high and printed or rubber-stamped. Only the permit holder may apply this marking.

Exhibit 11.5.13c Merchandise Return Label With Mailing Acknowledgment
 (*see 11.5.13d)

- d. Extra Services Except Registry. If no extra service is requested, or if extra services other than registry service are requested, the applicable entries below must be shown in capital letters above the “Merchandise Return Label” legend rectangle and to the left of the space reserved for any class marking:
 - 1. If no extra service is requested, “POSTAGE DUE COMPUTED BY DELIVERY UNIT” must appear; if any available extra service other than registry is requested, “POSTAGE DUE COMPUTED BY ACCEPTANCE POST OFFICE” must appear.

507.11.5.13

2. As marked with an asterisk below, insurance, special handling, Delivery Confirmation, return receipt for merchandise, and Pickup on Demand service fee entries may not appear if the permit holder does not choose the corresponding service(s). As appropriate, these postage and fee markings must appear:

POSTAGE _____

*INSURANCE FEE (IF ANY) _____

*DELIVERY CONFIRMATION FEE (IF ANY) _____

*RETURN RECEIPT FOR MERCHANDISE FEE (IF ANY) _____

*SPECIAL HANDLING FEE (IF ANY) _____

*PICKUP ON DEMAND SERVICE FEE (IF ANY) _____

TOTAL POSTAGE AND FEES DUE \$ _____

• Delivery Confirmation barcode

- e. Registry Service. If registry service is requested, the appropriate class marking must appear for First-Class Mail (“First-Class” or “First-Class Mail”) or Priority Mail (“Priority” or “Priority Mail”). In addition, the following applicable endorsements must appear in capital letters above the “Merchandise Return Label” legend rectangle and to the left of the space reserved for the class marking:

1. “ACCEPTANCE POST OFFICE COMPUTE POSTAGE DUE.”

2. The following postage and fee entries:
 - POSTAGE _____
 - REGISTERED FEE _____
 - TOTAL POSTAGE AND FEES DUE \$ _____

3. The appropriate insurance endorsement, below the "TOTAL POSTAGE AND FEES DUE" entry: if matter returned has value (\$0.01 or greater), "REGISTERED MAIL SERVICE WITH POSTAL INSURANCE DESIRED BY PERMIT HOLDER"; if matter returned has no value (\$0.00), "REGISTERED MAIL SERVICE WITHOUT POSTAL INSURANCE DESIRED BY PERMIT HOLDER."

- f. Customer's Return Address. The return address of the customer mailing the article back to the permit holder must be shown in the upper left corner. Space must be provided for the customer's return address if it is not preprinted by the permit holder.

- g. Delivery Address. The lines "POSTAGE DUE UNIT" and "US POSTAL SERVICE," followed by the delivery address line and by the city, state, and ZIP Code line of the postage due unit at the Post Office where the permit is authorized, must be printed on the front of the mailpiece, at least 1 inch from the left edge of the piece, in capital letters at least 1/8 inch high.

- h. Horizontal Bars. Horizontal bars must be placed on the label below the postage endorsement that appears in the upper right corner. The bars must be uniform in length, at least 1 inch long, 1/16 inch thick, and evenly spaced. The vertical column of horizontal bars must not extend below the delivery address line, which is the line above the line containing the ZIP Code. A facing identification mark (FIM) must not be used on this label.

- i. Additional information. Additional information (e.g., company logo, return authorization number, inventory barcode) is permitted if it does not interfere with any required format elements. Inventory barcodes must not resemble the barcodes described in [402.4.0](#).

11.5.14 Certificate of Mailing

A customer mailing merchandise return service articles may obtain a certificate of mailing at the customer's own expense at the time of mailing by presenting the certificate at a Post Office to obtain the receipt.

11.6 Enter and Deposit

11.6.1 Customer Mailing Options

The permit holder's customers must mail the parcel within the service area of the Post Office shown in the return address on the label by depositing it at the main Post Office or any associated office, station, or branch; in any collection box (except an Express Mail box); with any rural carrier; on business routes during regular mail delivery if prior arrangements are made with the carrier; as part of a collection run for other mail (special arrangements might be required); or at any place designated by the postmaster for the receipt of mail. Parcels with extra services must be mailed

507.11.7

either with the rural carrier or at the main Post Office or any associated office, station, or branch. Any such parcels deposited in collection boxes are returned to the sender or, if there is no return address, treated as undeliverable mail.

11.7 Priority Mail Reshipment

11.7.1 Description

An authorized permit holder may use merchandise return service to have mail (previously sent at First-Class Mail and Package Services prices) reshipped by Priority Mail to the Post Office where the permit is held. The permit holder must make a written request for reshipment and send the request to the postmaster where the merchandise return service permit is authorized, specifying how often the reshipments are to be made from each affected postal facility. Reshipment is activated by the use of tags and address labels provided by the permit holder to those designated postal facilities that the permit holder authorizes to reship the mail by Priority Mail merchandise return service.

11.7.2 Reshipment Service

The USPS gathers mail addressed to Post Office boxes or business street addresses and dispatches it as a Priority Mail merchandise return service shipment based on the written request and agreement between the USPS and the mailer, subject to these standards:

- a. Service frequency is scheduled.
- b. Priority Mail postage and fees are paid against the merchandise return service permit. The sack or container and its contents are considered a single piece for calculation of the Priority Mail price of postage and must not exceed 70 lbs.
- c. The mailer must keep a postage-due, merchandise return service account, or business reply mail account at the postal facility where the Post Office box or business street address is located for any shortpaid, merchandise return service, or business reply mail. The letter of request must state that such an account exists.
- d. Priority Mail reshipment service is not available for Registered Mail, Certified Mail, COD, insured, or Express Mail items. The mailer must give instructions for redirecting such items on a PS Form 1093, Application for Post Office Box or Caller Service, for mail originally addressed to Post Office boxes or in the letter of request for mail originally addressed to business street addresses.
- e. The written request by the customer must list the postmaster at the originating office as the "Firm Representative" and show the pickup time is when the USPS employee gathers the mail and prepares it for dispatch as Priority Mail merchandise return service.
- f. A written request to the postmaster by the customer to terminate the agreement must be submitted 30 days in advance

11.7.3 Sack Tag

If a sack is used as the mail container for Priority Mail reshipment, the permit holder must provide a tag and an address label containing the delivery address of the postage due unit at the Post Office where the permit is held, the permit holder's address, a space for the customer's return address, and otherwise meet the format

standards in [11.6](#) for each affected postal facility. The sack or container and its contents are considered a single piece for calculation of the Priority Mail price of postage.

12.0 Bulk Parcel Return Service

12.1 Bulk Parcel Return Service (BPRS) Fees

12.1.1 Permit Fee

Annual permit fee: \$180.00.

12.1.2 Account Maintenance Fee

Annual account maintenance fee: \$565.00.

12.1.3 Per Piece Charge

For each piece returned, regardless of weight: \$2.25.

12.2 Charges and Fees

12.2.1 Permit Fee

An annual permit fee must be paid once each 12-month period at each Post Office where a BPRS permit is held. Payment of the annual permit fee is based on the anniversary date of the permit's issuance. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

12.2.2 Per Piece Fee

Each piece returned through BPRS is charged only the per piece fee in [12.1](#). Postage is not charged for pieces returned through BPRS.

12.2.3 Advance Deposit Account and Annual Account Maintenance Fee

The permit holder must pay BPRS fees through an advance deposit account and must pay an annual account maintenance fee (see [12.1](#)). This fee covers the administrative cost of maintaining the account and provides the mailer with a single accounting of all charges deducted from that account. The account maintenance fee is charged once each 12-month period on the anniversary date of the initial account maintenance fee payment. The fee may be paid in advance only for the next year and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

12.2.4 Existing Advance Deposit Account

A separate advance deposit account for BPRS is not required; the annual account maintenance fee is charged if BPRS fees are paid from an existing account.

12.2.5 Payment Guarantee

The permit holder guarantees payment of all applicable fees. The Post Office returns BPRS items to the permit holder only when there are sufficient funds in the advance deposit account to pay the fees on returned pieces.

12.2.6 Postage Due Weight Averaging

BPRS mailers may participate in the Postage Due Weight Averaging program described in [705.19.0](#).

12.3 General Information

12.3.1 Description

Bulk parcel return service (BPRS) allows mailers of large quantities of Standard Mail machinable parcels that are either undeliverable-as-addressed or opened and remailed by addressees to be returned to designated postal facilities. The mailer has the option of picking up all returned parcels from a designated postal facility at a predetermined frequency specified by the USPS or having them delivered by the USPS in a manner and frequency specified by the USPS. For this service a mailer pays an annual permit fee and a per piece charge for each parcel returned. Payment for the returned pieces is deducted from an advance deposit account.

12.3.2 Availability

A mailer may be authorized to use BPRS when the following conditions apply:

- a. All returned parcels are initially prepared as Regular or Nonprofit Standard Mail and are machinable parcels as defined in [401.1.0](#).
- b. At least 10,000 Standard Mail machinable parcels will be returned to a designated postal facility during a 12-month period.
- c. Parcels are returned to the mailer either because they are undeliverable-as-addressed or because they have been opened, resealed, and redeposited in the mail by the recipient and it is impractical or inefficient for the USPS to return them.
- d. Parcels bear one of the following BPRS endorsements ([2.0, Forwarding](#)):
 - “Return Service Requested — BPRS”
 - “Address Service Requested — BPRS”
- e. Parcels have a return address that is in the delivery area of the Post Office that issued the BPRS permit.
- f. The postal facility designated for returned parcels is located in the United States, its territories or possessions, or is a U.S. military Post Office overseas (APO or FPO).
- g. The mailer has a valid postage due advance deposit account and pays the annual BPRS permit fee.
- h. BPRS parcels may be combined with the shipper paid forwarding service ([4.2.9](#)).
- i. Standard Mail parcels that qualify for a single-piece Package Services price under the applicable standards and that contain the name of the Package Services price in the mailer’s ancillary service endorsement are not eligible for BPRS.

12.3.3 Optional Label

An authorized BPRS permit holder has the option to use a label to identify BPRS parcels for return to a designated postal facility. The label is prepared at the mailer’s expense and must meet all format requirements described in [12.5](#) and [12.6](#) and specifications in [402.4.0, General Barcode Placement for Parcels](#), for a postal

routing barcode symbology used to produce a correct, readable barcode for the return address. Each label must be accompanied by complete instructions for its use.

12.3.4 Extra Services

Extra services cannot be added to pieces returned via bulk parcel return service.

12.4 Permits

12.4.1 Application Procedures

To obtain a BPRS permit, a mailer must send a written request to the postmaster at each Post Office where parcels are to be returned. The request must include the following:

- a. Payment for the annual BPRS permit fee.
- b. Information pertinent to each requested delivery point that documents either the receipt of at least 10,000 machinable parcels originally mailed at Standard Mail prices during the past 12 months, or that there are reasonable grounds to expect at least 10,000 machinable parcels originally mailed at Standard Mail prices will be returned during the next 12-month period.
- c. A description of the returned parcels (e.g., piece size and packaging).
- d. A statement of the desired frequency and location of the parcel pickup or delivery point.
- e. Sample documentation that will be used to substantiate the number of parcels returned daily to each location.
- f. If labels will be furnished for returning opened parcels, sample labels prepared in accordance with [12.5](#) along with instructions for their use.
- g. A written statement agreeing to pay the per piece fee for each returned parcel from a centralized advance deposit account.

12.4.2 Authorization

Upon approval of a mailer's request, the Post Office issues an authorization letter and provides a postage due service agreement with a BPRS permit number. The permit number is used for account administration only and is not for use on mail.

12.4.3 Postage Due Service Agreement

A BPRS mailer will be required to sign a postage due service agreement with each Post Office that issues a permit for the return of BPRS parcels.

12.4.4 Permit Renewal

A Post Office provides BPRS permit holders with annual renewal notices advising that their permits are due to expire. A notice must be returned to the issuing Post Office with the fee payment or authorization for the postmaster to deduct the fee from the advance deposit account by the permit expiration date. Written authorization is not necessary for renewal of a permit if there is no change to the authorization on file at the Post Office where the parcels are returned. If a permit holder does not renew a BPRS permit after having been given notice, the USPS will endorse the mail "Bulk Parcel Return Service Canceled" and will charge postage

507.12.4.5

due at the single-piece First-Class Mail or Priority Mail price as appropriate for the weight of the piece. If the single-piece First-Class Mail or Priority Mail price is not paid, the mail is forwarded to the nearest mail recovery center.

12.4.5 Permit Cancellation

A BPRS permit may be canceled by the USPS for any of the following reasons:

- a. Failure to meet the minimum volume requirement of 10,000 parcels returned during a 12-month period to each postal facility.
- b. Failure of the mailer to pay the required postage and fees for returned parcels.
- c. Insufficient funds in an advance deposit account to cover postage and fees that are due for returned parcels.
- d. Failure to fulfill the terms and conditions of the BPRS permit authorization.
- e. Failure to conform return labels to the specifications in sections [12.5](#) and [12.6](#).

12.4.6 Reapplying After Cancellation

A mailer must do the following to receive a new BPRS permit at the same Post Office where a permit was previously canceled:

- a. Submit a letter to that office requesting a permit and new agreement.
- b. Pay a new permit fee.
- c. Provide evidence showing that the reasons for cancellation of the previous permit no longer exist.
- d. Maintain adequate funds in an advance deposit account to cover the number of returns expected over at least a 2-week period.

12.5 Label Requirements**12.5.1 Production Methods**

Any photographic, mechanical, or electronic process, or any combination of such processes other than typewriting or handwriting may be used to prepare the BPRS label. The background may be any light color that allows the address, postmark, and other endorsements to be easily read. Brilliant colors may not be used for the background. If a label is prepared with adhesive on its reverse side, the adhesive must be capable of securely bonding the label to the parcel.

12.5.2 Label Instructions

Written instructions must be provided with the label that, at a minimum, advise the user to do the following:

- a. Obliterate all other delivery addresses and barcodes on the outside of the parcel.
- b. Print a complete return address in the location provided in the upper left corner of the label.
- c. Place the label with the delivery address and barcode on the side of the mailpiece with the largest surface area. If tape or similar material is used, it must not cover any part of the label where the mailer's return address and postal

routing barcode are located. The barcode should be at least 1 inch from the edge of the parcel. If the shape of the parcel requires specific orientation for stability, the label must be placed on the top surface.

- d. Take the parcel to a Post Office, drop it in a collection box, or give it to a postal carrier.

12.5.3 Distribution

BPRS return labels may be distributed to customers as an enclosure with merchandise, as a separate item, as a facsimile transmission (fax), or as an electronic transmission for customer downloading and printing. Regardless of distribution method, all standards in 12.5.2 and 12.6 must be met. An electronic file must include instructions that explain how to affix the label securely to the parcel as required in 12.5.2.

12.6 Format

12.6.1 General

The BPRS label contents and format must meet all applicable standards before the label may be distributed for use. Format requirements are shown in Exhibit 12.6.9.

12.6.2 Postage Guarantee

The endorsement "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES" must be printed in the upper right corner of the face of the piece. The endorsement must not extend more than 1-3/4 inches (1.75 inches) from the right edge of the label.

12.6.3 Horizontal Bars

To facilitate recognition of BPRS parcels, a series of horizontal bars parallel to the label length must be printed directly below the endorsement "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES:"

- a. The bars must be uniform in length, at least 1 inch long and 1/16 inch (0.0625 inch) to 3/16 inch (0.1875 inch) thick, and evenly spaced.
- b. There must be at least a 1/2 inch (0.500 inch) clearance between the right edge of the ZIP Code in the delivery address and the left edge of the horizontal bars.
- c. The bottom bar in the series must be above (not on or below) the top of the delivery address line (the next-to-last line in the address, just above the line with the city, state, and ZIP Code).
- d. Do not use a facing identification mark (FIM) on this label.

12.6.4 Class Endorsement

The "STANDARD MAIL" class endorsement must be at least 1/4-inch (.25 inch) high and shown in capital letters to the left of the postage guarantee endorsement.

12.6.5 Bulk Parcel Return Service Legend

The "BULK PARCEL RETURN SERVICE" legend must be placed above the return delivery address on all BPRS parcels. The legend means that the BPRS permit holder guarantees payment of postage and fees on all returned Standard Mail parcels. The following information must be enclosed in a rectangle:

507.12.6.6

- a. Line 1: Show the words "BULK PARCEL RETURN SERVICE" in capital letters at least 3/16 inch (0.1875 inch) high, enclosed in a rectangle.
- b. Line 2: The name of the BPRS permit holder must also be printed in capital letters in the rectangle directly below the words "BULK PARCEL RETURN SERVICE."
- c. The permit holder's city, state, and ZIP Code must appear in capital letters and must be located on the same line as the company name.
- d. The Post Office box number and/or street address must appear in capital letters on the line beneath this information.

12.6.6 Delivery Address

A complete delivery address (city, state, ZIP Code) specified by the Post Office that issued the BPRS permit and to which parcels are returned must be printed in capital letters at least 3/16 inch (0.1875) high below the "BULK PARCEL RETURN SERVICE" rectangle and at least 1 inch from the left edge of the label. There must be at least a 1/2-inch (0.50 inch) clearance between the ZIP Code and the horizontal bars.

12.6.7 Customer's Return Address

The complete return address (street, city, state, ZIP Code) of the customer mailing the article back to the permit holder must be shown in the upper left corner of the label. Space must be provided for the customer's return address if it is not preprinted by the permit holder.

12.6.8 Optional Information

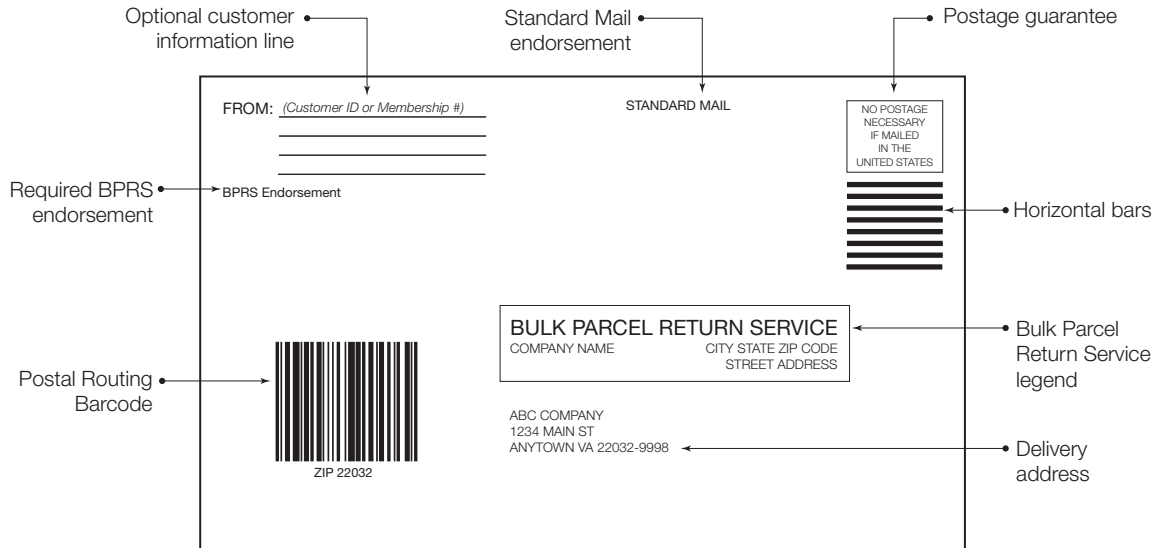

At the option of the permit holder, a single line above the top line of the customer return address may be used for customer account or other information.

12.6.9 Postal Routing Barcode

Every BPRS label must include a properly prepared barcode that represents the correct ZIP Code information for the delivery address of the returned parcel plus the appropriate verifier character suffix or application identifier prefix characters appropriate for the barcode symbology as described in [402.4.0, General Barcode Placement for Parcels](#), for machinable parcels. In addition to the barcode requirements in [402.4.0](#), the following requirements must be met in preparing BPRS labels:

- a. Barcode Location. The barcode must be placed on the label immediately adjacent to the address and the label must be located on the parcel so the barcode is at least 1 inch from the parcel edge.
- b. Barcode Clear Zone. No printing may appear in the area 1/8 inch (0.125 inch) above and below the barcode regardless of location on the label. A minimum clear zone equal to 10 times the average measured narrow element (bars or space) width must be maintained to the left and right of the barcode.
- c. Human-Readable Barcode Information. The human-readable equivalent of the ZIP Code or ZIP+4 code encoded in the barcode as referenced in [402.4.0](#) may be omitted.

Exhibit 12.6.9 Bulk Parcel Return Service Label

13.0 Parcel Return Service

13.1 Basic Information

13.1.1 Description

The Parcel Return Service (PRS) standards in 13.0 apply to parcels that are retrieved in bulk by authorized permit holders or their agents. The permit holder guarantees payment of postage and retrieval of all PRS parcels mailed with a PRS label. When a merchant or other party provides an approved PRS label to its customers or others, the merchant or other party designates the permit holder identified on the label as their agent for receipt of mail bearing that label, and authorizes the USPS to provide that mail to the permit holder or its designee. The permit holder has the option of retrieving parcels at a designated return delivery unit (a postal facility designated as a pickup location for PRS parcels, also known for PRS purposes as an “RDU”) or at the return bulk mail center (also known for PRS purposes as an “RBMC”) that serves the Post Office where returned parcels are deposited by customers. Payment for parcels returned under PRS is deducted from a separate advance deposit (postage-due) account funded through the Centralized Account Processing System (CAPS).

13.1.2 Conditions for Mailing

Parcels may be mailed as PRS when all of the following conditions apply:

- a. Parcels contain eligible matter as described in 153.3.0 and 153.4.0.
- b. Parcels bear a PRS label that meets the standards in 13.4.
- c. Parcels show the permit number, and the permit holder has paid the annual PRS permit fee and the annual PRS account maintenance fee.

507.13.1.3

13.1.3 Services

Pieces using PRS may not bear an ancillary service endorsement (see [102.4.0](#) and [507.1.5](#)). Only a Certificate of Mailing, when the fee is paid by the mailer returning the parcel, is available as an extra service.

13.1.4 Customer Mailing Options

Returned parcels may be deposited as follows:

- a. At any Post Office, station, or branch.
- b. In any collection box (except an Express Mail box).
- c. With any letter carrier.
- d. As part of a collection run for other mail (special arrangements may be required).
- e. At any place designated by the postmaster for the receipt of mail.

13.1.5 Application

Companies who wish to participate in PRS must send a request on company letterhead to the manager, Business Mailer Support (see [608.8.0](#) for address). The request must contain the following information:

- a. Company name and address.
- b. An individual's contact name, telephone number, fax number, and e-mail address.
- c. The price category or categories to be used, and the proposed retrieval locations (delivery units and bulk mail centers).
- d. A description of the electronic returns manifesting system to be used to document returns listed by location and price eligibility.

13.1.6 Approval

The manager, Business Mailer Support reviews each request and proceeds as follows:

- a. If the applicant meets the criteria, the manager, Business Mailer Support approves the letter of request. The USPS will require the customer to enter into a service agreement, may require additional documentation, and may conduct periodic review and inspection of each participant's PRS processing and accounting operations.
- b. If the application does not meet the criteria, the manager, Business Mailer Support denies the request and sends a written notice to the applicant with the reason for denial.

13.1.7 Cancellation

USPS may cancel a PRS permit for any of the following reasons:

- a. The permit holder fails to pay the required postage and fees for returned parcels.
- b. The permit holder does not maintain adequate available funds to cover postage and fees for returned parcels.
- c. The permit holder does not fulfill the terms and conditions of the PRS permit authorization.
- d. The return labels do not conform to the specifications in [13.4](#).

13.1.8 Reapplying After Cancellation

To receive a new PRS permit after cancellation under [13.1.7](#) the mailer must:

- a. Submit a letter to the manager, Business Mailer Support requesting a permit and a new agreement.
- b. Pay a new permit fee.
- c. Provide evidence showing that the reasons for cancellation no longer exist.
- d. Maintain adequate available funds to cover the expected number of returns.

13.1.9 Pickup Schedule

Permit holders or their agents must set up a recurring or standing appointment to retrieve PRS parcels. If the permit holder (or their agent) already has existing appointments to deliver Parcel Select parcels to a destination bulk mail center or to a destination delivery unit, those same appointments can be used for retrieving PRS parcels. Permit holders or their agents must retrieve parcels on a regular schedule as follows:

- a. From RBMCs, at a minimum of every 48 hours, excluding Sundays and USPS holidays.
- b. From RDUs, according to the service agreement.

13.1.10 Parcels Endorsed Hold for Pickup

PRS participants must pay the appropriate Parcel Return Service RDU price under [13.3](#) for any unclaimed, refused, undeliverable as addressed, or recalled parcels that are endorsed "Hold For Pickup" (under [455.4.1.4](#) and [508.1.3](#)) and that bear the marking "PARCEL RETURN SERVICE REQUESTED" or "PRS REQUESTED" followed by a unique 569 prefix ZIP Code.

13.2 Postage and Fees**13.2.1 Postage**

There are two PRS price categories:

- a. Parcel Return Service — RDU. Parcels returned as Parcel Post to, and retrieved in bulk from, a designated delivery unit.
- b. Parcel Return Service — RBMC. Parcels returned as Parcel Post to, and retrieved in bulk from, a designated BMC.

13.2.2 Permit Fee

The participant must pay a \$180.00 permit fee annually at the Post Office where the PRS permit is held.

13.2.3 Advance Deposit Account and Annual Account Maintenance Fee

The participant must pay postage through an advance deposit account and must pay an annual account maintenance fee of \$565.00.

507.13.3

13.3 Prices**13.3.1 Parcel Return Service—Machinable**

RBMC parcels that weigh less than 20 pounds but measure more than 84 inches in combined length and girth are charged the applicable price for a 20-pound parcel (balloon price). Regardless of weight, any parcel that measures more than 108 inches (but not more than 130 inches) in combined length and girth must pay the oversized price. See [Exhibit 13.3.1, Parcel Return Service—Return BMC Machinable](#)

1. Parcels that measure in combined length and girth:
 More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound prices (balloon price).
 More than 108 inches but not more than 130 inches, use oversized prices (regardless of weight).

507.13.4

13.4 Label Formats

13.4.1 Label Preparation

PRS labels must be certified by the USPS for use prior to distribution as defined in the service agreement. In addition, permit holders must obtain USPS certification for barcode symbologies. Any photographic, mechanical, or electronic process or any combination of these processes may be used to produce PRS labels. The background of the label may be any light color that allows the address, barcodes, and other required information to be easily distinguished. If labels are electronically transmitted to customers for their local printing, the permit holder must advise customers of these printing requirements as part of the instructions in [13.4.3](#).

13.4.2 Labeling Methods

If all applicable contents and formats are approved (including instructions to the user), permit holders or their agents may distribute a PRS label by any of the following methods:

- a. As an enclosure with merchandise when initially shipped as part of the original invoice accompanying the merchandise, or as a separate label preprinted by the permit holder. If the reverse side of the label bears an adhesive, it must be strong enough to bond the label securely to the mailpiece.
- b. As an electronic file created by the permit holder for local printing by the customer.

13.4.3 Instructions

Regardless of label distribution method, permit holders or their agents must always provide written instructions to the user of the PRS label that, at a minimum, direct the user to do the following:

- a. "If your name and address are not already printed in the return address area, please print them neatly in that area or attach a return address label there."
- b. "Attach the label provided by the merchant squarely onto the largest side of the mailpiece, unless you need to use another side to make the parcel more stable. Place the label at least 1 inch from the edge of the parcel, so that it does not fold over to another side. If you are using tape to attach the new label, do not put tape over any barcodes on the label, even if the tape is clear."
- c. "If you are reusing the original container to return the merchandise, use the label to cover your original delivery address, barcodes, and any other postal information on the container. If it is not possible to cover all that information with the label, remove the old labels, mark them out completely with a permanent marker, or cover them completely with blank labels or paper that cannot be seen through. If that cannot be done, or if the original container is no longer sound, please use a new box to return the merchandise and attach the return label to the new box."
- d. "Once repackaged and labeled, mail the parcel at a Post Office, deposit it in a collection box, or leave it with your letter carrier."

13.4.4 Label Format Elements

There is no minimum size for PRS labels; however, the label must be big enough to accommodate all of the label elements and standards in this section. All PRS label elements must be legible. Except where a specific type size is required, elements must be large enough to be legible from a normal reading distance and be separate from other elements on the label. See the PRS label format examples in [13.4.5a](#) and [13.4.5b](#). The following elements are required:

- a. *Postage guarantee.* The imprint “No Postage Necessary If Mailed in the United States” must appear in the upper right corner.
- b. *Horizontal bars.* A minimum of three horizontal bars must appear directly below the imprint in the upper right corner. The bars must be uniform in length, at least 1 inch long, 1/16 inch thick, and evenly spaced.
- c. *Parcel Return Service legend.* The legend must be placed directly above the address and must include:
 1. Line 1: In capital letters at least 3/16” high, “PARCEL SELECT RETURN SERVICE” (or “PARCEL SELECT RTN SVC”).
 2. Line 2: In all capital letters, the permit holder's name, left justified, followed by “PERMIT NO.,” followed by the actual permit number.
- d. *Customer's return address.* The return address of the customer using the label to mail the parcel back to the permit holder must appear in the upper left corner. If it is not preprinted by the permit holder or merchant, space must be provided for the customer to enter the return address.
- e. *Address for Parcel Return Service labels.* The address must contain the unique PRS ZIP Code (569 prefix) assigned by the USPS to the particular customer or agent. The address must consist of two or three lines in all capital letters, as specified below. The ZIP Code must be printed in at least 12-point type on a line directly below the Parcel Return Service line.
 1. Line 1: PRS AGENT'S OR MERCHANT'S NAME.
 2. Line 2: “PARCEL RETURN SERVICE” (or “PARCEL RETURN SVC”).
 3. Line 3: The unique PRS 569## ZIP Code assigned by the USPS in the service agreement. The unique ZIP Code alternatively may be located as part of the second line of the address.
- f. *Parcel Return Service barcode.* A PRS barcode must be printed directly on the label. The barcode may appear in any location on the label except the upper left, upper right, and lower right corners. The barcode must meet the standards for barcodes in Publication 91, *Confirmation Services Technical Guide*, with the following exceptions:
 1. The barcode must be produced using the UCC/EAN Code 128 barcode symbology.
 2. The service type code (STC) contained in the barcode on PRS labels must contain the value “58.”

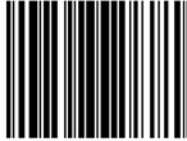

507.13.4.5

3. Text above the barcode must read “USPS PARCEL RETURN SERVICE” (or “USPS PARCEL RTN SVC”). If the barcode is a single concatenated barcode with the postal routing code described in [13.4.4g](#), the text above the barcode must read “BMC ZIP - USPS PARCEL RETURN SERVICE” (or “BMC ZIP - USPS PARCEL RTN SVC”). In the text below the barcode, the leading application identifier (“420”), ZIP Code information, and subsequent numbers must be parsed as shown in [13.4.5b](#).
 4. The clear zone between the barcode, the human-readable text, and the horizontal bar above and below the barcode must be at least 1/16 inch.
- g. *Postal routing barcode.* If a single concatenated barcode is not used for the PRS barcode, a postal routing barcode also must be printed directly on the label. The barcode may appear in any location on the label, except the upper left, upper right, and lower right corners. Postal routing barcodes must meet the standards in [708.5.0](#), except that the text below the barcode must read “BMC ZIP -,” followed by the unique PRS ZIP Code assigned by USPS in the service agreement.
- h. *Mailer identification (ID).* The permit holder assigns a mailer ID to each individual client (merchant). An individual mailer ID must appear in the lower right corner as follows:
1. The mailer ID must consist of a single, uppercase alpha character followed by a two-, three-, or four-digit number, with no spaces or dashes. For example: X0123.
 2. The mailer ID must be at least 3/16 inch high and be surrounded by a box, with a clearance of at least 3/16 inch between the mailer ID characters and the edges of the box.
 3. The mailer ID may be reverse-printed.
- i. *Additional information.* Additional information (e.g., company logo, return authorization number, inventory barcode) is permitted on the PRS label if it does not interfere with any required format elements. Inventory barcodes must not resemble the barcodes described in [708.5.0, Standards for Postal Routing Barcodes](#).

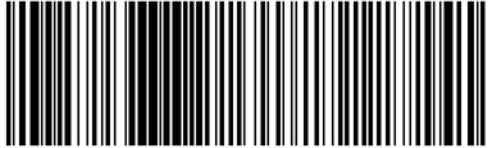

13.4.5 PRS Label Format Examples

The following are PRS label format examples. Note: The ZIP Code 56999 appears in each example for demonstration purposes only.

- a. Parcel Select Return Service label using a separate PRS barcode and postal routing barcode.

508 Recipient Services

Overview

- 1.0 Recipient Options
- 2.0 Conditions of Delivery
- 3.0 Customer Mail Receptacles
- 4.0 Post Office Box Service
- 5.0 Caller Service
- 6.0 General Delivery
- 7.0 Firm Holdout
- 8.0 Pandering Advertisements
- 9.0 Sexually Oriented Advertisements

1.0 Recipient Options

1.1 Basic Recipient Concerns

1.1.1 Delivery to Addressee

Addressees may control delivery of their mail. Without a contrary order, the mail is delivered as addressed. Mail addressed to several persons may be delivered to any one of them.

1.1.2 Refusal at Delivery

The addressee may refuse to accept a mailpiece when it is offered for delivery.

1.1.3 Refusal After Delivery

After delivery, an addressee may mark a mailpiece “Refused” and return it within a reasonable time, if the piece or any attachment is not opened. Mail that may not be refused and returned unopened under this provision may be returned to the sender only if it is enclosed in a new envelope or wrapper with a correct address and new postage. The following may not be refused and returned postage-free after delivery:

- a. Pieces sent as Registered Mail, insured, Certified Mail, collect on delivery (COD), and return receipt for merchandise.
- b. Response mail to the addressee’s sales promotion, solicitation, announcement, or other advertisement that was not refused when offered to the addressee.

1.1.4 Mail Withheld From Delivery

An addressee may request the postmaster, in writing, to withhold from delivery for a period not to exceed 2 years any foreign letter or printed matter with a specified name or address on the outside.

1.1.5 Addressee Identification

If a person claiming to be the addressee of certain mail is unknown to the delivery employee, the mail may be withheld pending identification of the claimant.

1.1.6 Remailing Returned Mail

Generally, a returned mailpiece that was undeliverable-as-addressed or refused by the addressee may not be remailed unless it is placed in a new envelope or wrapper with a correct address and new postage. A returned shortpaid mailpiece can have the necessary additional postage affixed to the original piece and does not have to be placed in a new envelope or wrapper.

1.1.7 Express Mail and Accountable Mail

The following conditions also apply to the delivery of Express Mail and accountable mail (Registered Mail, Certified Mail, insured for more than \$200.00, or COD, as well as mail for which a return receipt or a return receipt for merchandise is requested or for which the sender has specified restricted delivery):

- a. The recipient (addressee or addressee's representative) may obtain the sender's name and address and may look at the mailpiece while held by the USPS employee before accepting delivery and endorsing the delivery receipt.
- b. The mailpiece may not be opened or given to the recipient before the recipient signs and legibly prints his or her name on the delivery receipt (and return receipt, if applicable) and returns the receipt(s) to the USPS employee.
- c. Suitable identification can be required of the recipient (if not known to the USPS employee) before delivery of the mailpiece.
- d. When delivery is not restricted at the sender's request, mail addressed to a person at a hotel, apartment house, etc., may be delivered to any person in a position to whom mail for that location is usually delivered.
- e. USPS responsibility ends when the mailpiece is delivered to the recipient (or another party, subject to [1.1.7d](#) and [1.0](#)).
- f. A notice is left for a mailpiece that cannot be delivered. If the piece is not called for or redelivery is not requested, the piece is returned to the sender after 15 days (5 days for Express Mail, 30 days for COD) unless the sender specifies fewer days on the piece.
- g. A hand stamp approved by the postmaster may be used to provide the signature and name of the individual or organization receiving the mailpiece. In accordance with the electronic signature capture process, the hand stamp must be sized to fit within the Signature and Printed Name blocks on Form 3849. The stamp must not overlap into the delivery office information section or the Delivery Address block of the form. To obtain approval for such a stamp, the company must submit a written statement to the postmaster that the person whose name appears on the stamp is the person authorized to accept accountable mail, accompanied by a sample of the authorized employee's signature that can be verified against the signature on the stamp. After approval, the stamped signature and name are acceptable only if a clean, legible impression is provided within the Signature and Printed Name blocks on Form 3849. On mail addressed to a federal or state official, the stamp need show only the name and location of the accepting organization. In these cases, the stamp should fit within the Printed Name and Delivery Address block of Form 3849 but must not overlap into the Signature block or barcode sections.

1.2 Carrier Release for Uninsured Parcels

An uninsured parcel may not be left in an unprotected place, such as a porch or stairway, unless the addressee has filed a written order, or the mailer has endorsed the parcel “Carrier—Leave If No Response.” The endorsement must appear directly below the return address as specified in [402.2.0](#) and [402.3.0](#).

1.3 Parcel Select DDU Hold For Pickup Endorsement

Only parcels mailed under [455.4.1.4](#) are eligible for the “Hold For Pickup” endorsement. Parcels endorsed Hold For Pickup must be picked up at designated Post Offices by the addressee within 10 calendar days. Contact the Hold For Pickup program manager at Hold_for_Pickup@usps.gov for a complete listing of designated Post Offices.

1.4 Jointly Addressed

For mail that is jointly addressed:

- a. Such as “Mr. and Mrs. John Doe,” or “John and Jim Doe,” neither party is entitled to control delivery of such mail over the objection of the other.
- b. To husbands or wives, neither party may control delivery of mail addressed to the other.

1.5 Delivery to Addressee’s Agent**1.5.1 Basic Standard**

Unless otherwise directed, an addressee’s mail may be delivered to an employee, to a competent member of the addressee’s family, or to any person authorized to represent the addressee. A person or several persons may designate another to receive their mail.

1.5.2 Minor

A minor’s guardian may control delivery of mail addressed to the minor. If there is no guardian and the minor is unmarried, either parent may receive delivery of the minor’s mail.

1.5.3 Incompetent Person

Mail may be delivered under the order of the guardian or conservator for a person legally declared incompetent. If there is no legal representative, the mail is delivered as addressed.

1.5.4 Deceased Person

Mail addressed to a deceased person may be received at the address of the deceased by anyone who would normally receive the addressee’s mail at that address. The mail may also be forwarded to a different address, such as that of an appointed executor or administrator, if an order of request is filed at the Post Office.

1.6 Delivery to Individual at Organization**1.6.1 To Address**

All mail addressed to a governmental or nongovernmental organization or to an individual by name or title at the address of the organization is delivered to the organization, as is similarly addressed mail for former officials, employees,

508.1.6.2

contractors, agents, etc. If disagreement arises where any such mail should be delivered, it must be delivered under the order of the organization's president or equivalent official.

1.6.2 Not to Address

Mail addressed to a governmental or nongovernmental official by title or by organization name, but not to the address of the organization, is delivered to the organization if the organization so directs.

1.7 Delivery at Hotels, Institutions, Schools, and Similar Places**1.7.1 Patient or Inmate**

Mail addressed to a patient or inmate at an institution is delivered to the institution authorities. If the addressee is no longer at that address, the mail must be redirected to the current address, if known, or endorsed appropriately and returned by the institution to the Post Office.

1.7.2 Hotel or School

Mail addressed to a person at a hotel, school, or similar place is delivered to the hotel, school, etc. If the addressee is no longer at that address, the mail must be redirected to the current address, if known, or endorsed appropriately and returned by the institution to the Post Office.

1.7.3 Prisoner

Mail addressed to a prisoner is subject to the mail security standards in the *Administrative Support Manual*.

1.7.4 Registered Mail Addressed to Hotel or Apartment House

Registered Mail addressed to a person at a hotel or apartment house is delivered to the persons designated by the management of the hotel or apartment house in a written agreement with the USPS (Form 3801-A). If the sender restricts delivery of the Registered Mail, it may not be delivered to that designated person, unless the addressee authorized that person in writing to receive restricted-delivery mail.

1.8 Conflicting Delivery Orders**1.8.1 Delivery to Third Party**

If persons make conflicting orders for delivery of the same mail, and they cannot agree among themselves who should receive the mail, the mail may be delivered to a named receiver or third party unanimously agreed to by the disputing parties.

1.8.2 Receiver in Dispute

If the disputing parties are unable to select a receiver, they must furnish the postmaster all available evidence on which they rely to exercise control over the disputed mail. The USPS may hold or return mail pending resolution of the dispute.

1.8.3 Court Order

Mail is delivered under a court order issued for mail claimed by different persons.

1.9 Commercial Mail Receiving Agencies**1.9.1 Procedures**

The procedures for establishing a commercial mail receiving agency (CMRA) are as follows:

- a. An addressee may request mail delivery to a CMRA. The CMRA accepts delivery of the mail and holds it for pickup or remails it to the addressee, prepaid with new postage.
- b. Each CMRA must register with the Post Office responsible for delivery. Any person who establishes, owns, or manages a CMRA must provide Form 1583-A to the postmaster (or designee) responsible for the delivery address. The CMRA owner or manager must complete all entries and sign the Form 1583-A. The CMRA owner or manager must furnish two items of valid identification; one item must contain a photograph of the CMRA owner or manager. The identification presented must be current. It must contain sufficient information to confirm that the applicant is who he or she claims to be and is traceable to the bearer. The postmaster (or designee) may retain a photocopy of the identification for verification purposes and must list and record sufficient information to identify the two types of identification on Form 1583-A (block 10). Furnishing false information on the application or refusing to give required information is reason for denying the application. When any information required on Form 1583-A changes, the CMRA owner or manager must file a revised application (write "revised" on the form) with the postmaster. Social Security cards, credit cards, and birth certificates are unacceptable as identification. The following are acceptable identification:
 1. Armed forces, government, university, or recognized corporate identification card.
 2. Passport, alien registration card, or certificate of naturalization.
 3. Current lease, mortgage, or deed of trust.
 4. Voter or vehicle registration card.
 5. Home or vehicle insurance policy.
- c. The postmaster (or designee) must verify the documentation to confirm that the CMRA owner or manager resides at the permanent home address shown on Form 1583-A; witness the signature of the CMRA owner or manager; and sign Form 1583-A. The postmaster must provide the CMRA with a copy of the DMM regulations relevant to the operation of a CMRA. The CMRA owner or manager must sign the Form 1583-A acknowledging receipt of the regulations. The postmaster must file the original of the completed Form 1583-A at the Post Office and provide the CMRA with a duplicate copy.
- d. A CMRA is authorized to accept the following accountable mail from their customers for mailing at the Post Office: insured, COD, Express Mail, Certified Mail, Delivery Confirmation, and Signature Confirmation mail. The sender (CMRA customer) must present accountable mail items not listed to the Post Office for mailing.

1.9.2 Delivery to CMRA

Procedures for delivery to a CMRA are as follows:

- a. Mail delivery to a CMRA requires that the CMRA owner or manager and each addressee complete and sign Form 1583. Spouses may complete and sign one Form 1583. Each spouse must furnish two items of valid identification. If any

508.1.9.2

information that is required on Form 1583 is different for either spouse it must be entered in the appropriate box. A parent or guardian may receive delivery of a minor's mail by listing the name(s) of each minor on Form 1583 (block 12). The CMRA owner or manager, authorized employee, or a notary public must witness the signature of the addressee. The addressee must complete all entries on Form 1583. The CMRA owner or manager must verify the documentation to confirm that the addressee resides or conducts business at the permanent address shown on Form 1583. The address is verified if there is no discrepancy between information on the application and the identification presented. If the information on the application does not match the identification, the applicant must substantiate to the CMRA that the applicant resides or conducts business at the address shown. A document from a governmental entity or recognized financial institution or a utility bill with the applicant's name and current permanent address may be used for such purpose. If the applicant is unable to substantiate the address, the CMRA must deny the application. Furnishing false information on the application or refusing to give required information is reason for withholding the addressee's mail from delivery to the agent and returning it to the sender. When any information required on Form 1583 changes, the addressee must file a revised application (write "revised" on the form) with the CMRA. The addressee must furnish two items of valid identification; one item must contain a photograph of the addressee. The identification presented must be current. It must contain sufficient information to confirm that the applicant is who he or she claims to be and is traceable to the bearer. The CMRA owner or manager may retain a photocopy of the identification for verification purposes. The CMRA owner or manager must list and record sufficient information to identify the two types of identification on Form 1583 (block 8) and write the complete CMRA delivery address used to deliver mail to the addressee on Form 1583 (block 3). Social Security cards or credit cards and birth certificates are unacceptable as identification. The following are acceptable identification:

1. Valid driver's license or state non-driver's identification card.
 2. Armed forces, government, university, or recognized corporate identification card.
 3. Passport, alien registration card, or certificate of naturalization.
 4. Current lease, mortgage, or deed of trust.
 5. Voter or vehicle registration card.
 6. Home or vehicle insurance policy.
- b. A CMRA must not modify or alter Form 1583 or Form 1583-A. Modified or altered forms are invalid and the addressee's mail must be returned to sender in accordance with USPS regulations.
- c. The CMRA must provide the original of completed Forms 1583 to the postmaster. This includes revised Forms 1583 submitted by an addressee based on information changes to the original Form 1583 (write "revised" on form). The CMRA must maintain duplicate copies of completed Forms 1583 on file at the CMRA business location. The Forms 1583 must be available at all

- times for examination by postal representatives and postal inspectors. The postmaster must file the original Forms 1583 first by CMRA and then alphabetically by the addressee's last name at the station, branch, or Post Office. The postmaster files the original Forms 1583 without verifying the address of residence or firm shown on Forms 1583. The postmaster is required to verify only when the postmaster receives a request by the Postal Inspector in Charge, or when there is reason to believe that the addressee's mail may be, or is being, used for unlawful purposes.
- d. When the agency relationship between the CMRA and the addressee terminates, the CMRA must write the date of termination on its duplicate copy of Form 1583. The CMRA must notify the Post Office of termination dates through the quarterly updates (due January 15th, April 15th, July 15th, and October 15th) of the alphabetical list of customers cross-referenced to the CMRA addressee delivery designations. The alphabetical list must contain all new customers, current customers, and those customers who terminated within the past 6 months, including the date of termination. The CMRA must retain the endorsed duplicate copies of Forms 1583 for at least 6 months after the termination date. Forms 1583 filed at the CMRA business location must be available at all times for examination by postal representatives.
 - e. A CMRA must represent its delivery address designation for the intended addressees by the use of "PMB" (private mailbox) or the alternative "#" sign. Mailpieces must bear a delivery address that contains at least the following elements, preferably in the following format:
 1. Line 1: Intended addressee's name or other identification. *Examples: JOE DOE or ABC CO.*
 2. Line 2: "PMB" and number or the alternative "#" (pound sign) and number. *Examples: PMB 234 or #234.*
 3. Line 3: Street number and name or Post Office box number or rural route designation and number. *Examples: 10 MAIN ST STE 11 or PO BOX 34 or RR 1 BOX 12.*
 4. Line 4: City, state, and ZIP Code (5-digit or ZIP+4). *Example: HERNDON VA 22071-2716.*
 - f. As an alternate to the format presented in e., the following format may be used:
 1. Line 1: Intended addressee's name or other identification. *Examples: JOE DOE or ABC CO.*
 2. Line 2: Street number and name or Post Office box number and "PMB" and number or the alternative "#" (pound sign) and number. *Examples: 10 MAIN ST PMB 234 or #234 or PO BOX 34 PMB 234 or #234.*
 3. Line 3: City, state, and ZIP Code (5-digit or ZIP+4). *Example: HERNDON VA 22071-2716.*
 - g. As an exception to the formats presented in e. and f., when the CMRA's physical address contains a secondary address element (e.g., rural route box number, "suite," "#," or other term), the CMRA customer must use "PMB" in the three-line format. It is not permissible to combine the secondary address

508.1.9.3

element of the physical location of the CMRA address and the CMRA customer private mailbox number, e.g., 10 MAIN ST STE 11-234. The CMRA must write the complete CMRA delivery address used to deliver mail to each individual addressee or firm on the Form 1583 (block 3). The USPS may return mail without a proper address to the sender endorsed "Undeliverable as Addressed, Missing PMB or # Sign." The three-line format must be as follows:

1. JOE DOE
10 MAIN ST STE 11 PMB 234
HERNDON VA 22071-2716
 2. JOE DOE
RR 12 BOX 512 PMB 234
HERNDON VA 22071-2716
- h. The CMRA must be in full compliance with 1.9.1 through 1.9.3 and other applicable postal requirements to receive delivery of mail from the Post Office.
- i. The postmaster may, with the next higher level approval and notification to the Postal Inspector-In-Charge, suspend delivery to a CMRA that, after proper notification, fails to comply with 1.9.1 through 1.9.3 or other applicable postal requirements. The proper notification must be in writing outlining the specific violation(s) with a reasonable time to comply.
- j. With the approval of suspension of delivery, the postmaster must provide the CMRA with written notification of the effective date and the reason(s). If the CMRA fails to comply by the effective date, return mail to the sender endorsed "Delivery Suspended to Commercial Mail Receiving Agency."

1.9.3 Addressee and CMRA Agreement

In delivery of the mail to the CMRA, the addressee and the CMRA agree that:

- a. When the agency relationship between the CMRA and the addressee terminates, neither the addressee nor the CMRA will file a change-of-address order with the Post Office.
- b. The CMRA must remail mail intended for the addressee (customer) for at least 6 months after the termination date of the agency relationship between the CMRA and addressee. Mail that is remailed by the CMRA requires new postage. This remailing obligation need not be fulfilled if the CMRA customer provides written instructions to the CMRA that the mail (or specific types of mail) not be remailed upon termination of the relationship. This instruction may be provided in an internal service agreement between the customer and CMRA or by a separate document. Written instructions from the customer regarding the handling of this mail must not stipulate that the CMRA refuse mail or return it to sender, or hold the mail during the 6-month remail period and return it to the Post Office, or redeposit mail in the mails without new postage. At the end of the 6-month remail period the CMRA may return to the Post Office only First-Class Mail, Priority Mail, Express Mail, accountable mail, or Parcel Post received for the former addressee (customer). The CMRA must return this mail to the Post Office the next business day after receipt with this endorsement: "Undeliverable, Commercial Mail Receiving Agency, No Authorization to Receive Mail for this Addressee." This mail is returned to the Post Office without

new postage. The CMRA must not deposit return mail in a collection box. The CMRA must give the return mail to the letter carrier or return it to the Post Office responsible for delivery to the CMRA. Upon request, the agent must provide to the USPS all addresses to which the CMRA remails mail.

- c. If mail is remailed by the CMRA to the address of a former customer during the 6-month remail period and returned by the USPS endorsed "Moved, Left No Address," then the CMRA may return that mail to the Post Office with the approval of the postmaster or station manager. The approval is subject to evidence that the mail was remailed with new postage to the former customer at the address provided when the relationship was terminated and/or the verified home or business permanent address provided on the customer's Form 1583. Upon approval, the CMRA may return to the Post Office only First-Class Mail, Priority Mail, Express Mail, accountable mail, and Parcel Post received for the former customer. The CMRA must return this mail to the Post Office the next business day after receipt without new postage.
- d. The CMRA must provide to the postmaster a quarterly list (due January 15th, April 15th, July 15th, and October 15th) of its customers in alphabetical order cross-referenced to the CMRA addressee delivery designation. The alphabetical list must contain all new customers, current customers, and those customers who terminated within the past 6 months, including the date of termination.
- e. A CMRA may not refuse delivery of mail if the mail is for an addressee who is a customer or former customer (within the past 6 months). The agreement between the addressee and the CMRA obligates the CMRA to receive all mail, except restricted delivery, for the addressee. The addressee may authorize the CMRA in writing on Form 1583 (block 5) to receive restricted delivery mail for the addressee.
- f. If the CMRA has no Form 1583 on file for the intended addressee, the CMRA must return that mail to the Post Office responsible for delivery with this endorsement: "Undeliverable, Commercial Mail Receiving Agency, No Authorization to Receive Mail for this Addressee." This mail is returned to the Post Office without new postage. The CMRA must return misdelivered mail the next business day after receipt.
- g. The CMRA must not deposit return mail in a collection box. The CMRA must give the return mail to the letter carrier or return it to the Post Office responsible for delivery to the CMRA.

1.9.4 Office Business Center Acting as a CMRA

The procedures for an office business center (OBC) or part of its operation acting as a CMRA for postal purposes are as follows:

- a. An OBC is a business that operates primarily to provide private office facilities and other business support services to individuals or firms (customers). OBCs receive single-point delivery. OBC customers that receive mail at the OBC address will be considered CMRA customers for postal purposes under the standards set forth in [1.9.4b](#). Parties considered CMRA customers under this provision must comply with the standards set forth in [1.9.1](#) through [1.9.3](#). An

508.2.1

OBC must register as a CMRA on Form 1583-A and comply with all other CMRA standards if one or more customers receiving mail through its address is considered a CMRA customer.

- b. An OBC customer is considered to be a CMRA customer for postal purposes if its written agreement with the OBC provides for mail service only or mail and other business support services (without regard for occupancy or other services that the OBC might provide). Additionally, an OBC customer receiving mail at the OBC address is considered to be a CMRA customer for postal purposes if each of the following is true:
 1. The customer's written agreement with the OBC does not provide for the full-time use of one or more of the private offices within the OBC facility.
 2. The customer's written agreement with the OBC does not provide all of the following: (a) the use of one or more of the private offices within the facility for at least 16 hours per month at market price for the location; (b) full-time receptionist service and live personal telephone answering service during normal business hours and voicemail service after hours; (c) a listing in the office directory in the building in which the OBC is located; (d) use of conference rooms and other business services on demand, such as secretarial services, word processing, administrative services, meeting planning, travel arrangements, and video conferencing.
- c. Notwithstanding any other standards, a customer whose written agreement provides for mail services only or mail and other business support services will not be considered an OBC customer (without regard for occupancy or other services that an OBC may provide and bill for on demand).
- d. The USPS may request from the OBC copies of written agreements or any other documents or information needed to determine compliance with these standards. Failure to provide requested documents or information might be basis for suspending delivery service to the OBC under the procedures set forth in [1.9.2](#).

2.0 Conditions of Delivery

2.1 City Delivery Service

2.1.1 Establishment

City delivery is provided according to USPS policies and procedures, the characteristics of the area to be served, and the methods needed to provide adequate service. Requests or petitions to establish, change, or extend city delivery service must be made to the local postmaster.

2.1.2 Accommodating Customer Hardship

Changes in the type of delivery authorized for a delivery point may be considered if service by existing methods imposes an extreme physical hardship on the customer.

2.1.3 Customer Maintenance of Receptacles

Customers must provide authorized mail receptacles or door slots, except for mail receptacles authorized by the USPS to be owned and maintained by the USPS. The purchase, installation, maintenance, and replacement of mail receptacles used by customers for mail delivery are not the responsibility of the USPS. However, the USPS may authorize neighborhood delivery and collection boxes and parcel lockers to be purchased, installed, maintained, or replaced by the USPS.

2.1.4 Businesses

Mail receptacles or door slots are not required at businesses and offices that are open and have someone on hand to receive the mail when the carrier calls.

2.1.5 Receptacles With Locks

If a lock is used on a mail receptacle, the receptacle must have a slot large enough to accommodate the normal daily mail volume.

2.1.6 Door Slot

A door slot for mail must meet specific criteria:

- a. The clear rectangular opening in the outside slot plate must be at least 1-1/2 inches wide and 7 inches long.
- b. The slot must have a flap, hinged at the top if placed horizontally, or hinged on the side away from the hinge side of the door if placed vertically.
- c. When an inside hood is used to provide greater privacy, the hooded portion must not be below the bottom line of the slot in the outside plate if placed horizontally, or beyond the side line of the slot in the outside plate nearest the hinge edge of the door if placed vertically.
- d. The hood at its greatest projection must not be less than 2-1/16 inches beyond the inside face of the door.
- e. The bottom of the slot must be at least 30 inches above the finished floor line.

2.1.7 Apartment Mail Receptacles

Apartment house mail receptacles must be approved by the USPS. The purchase, installation, maintenance, and replacement of mail receptacles, boxes, or parcel lockers are not the responsibility of the USPS except for neighborhood delivery and collection boxes and parcel lockers authorized by the USPS to be owned and maintained by the USPS. When apartment buildings are substantially renovated or remodeled to provide additional apartments, or a material change is made in the location of boxes, obsolete receptacles must be replaced by currently approved receptacles.

2.2 Rural Delivery Service**2.2.1 Establishment**

Rural stations and branches are established, and rural delivery is provided, according to USPS policies and procedures, the characteristics of the area to be served, and the methods needed to provide adequate service. Requests or petitions to establish, change, or extend rural delivery service, signed by the heads of families wanting this service, must be given to the postmaster of the Post Office from which delivery service is desired, or from which the route operates, as applicable.

508.2.2.2

2.2.2 Accommodating Customer Hardship

On the customer's written request, the postmaster may approve an exception to the currently authorized method of delivery, if the type of rural delivery authorized imposes an extreme physical hardship.

2.2.3 Parcel Delivery

An ordinary parcel too large to fit into a customer's mailbox is not left unless the customer has filed a written order with the postmaster relieving the USPS and carriers of all responsibility in case of loss or depredation of any such parcel left outside the box.

2.2.4 Delivery to Recipient With Contagious Disease

Mail is delivered to a customer's mailbox if a quarantined disease exists, provided that delivery can be made without exposure to contagion. No mail is collected from such box while the quarantine is in force.

2.2.5 Insufficient Postage/ Mailable Matter

Generally, mailable matter is collected from a rural mailbox if postage is fully prepaid or money equal to the required postage is left in the mailbox. Money in a rural box is left at the customer's risk. When postage or money is insufficient to cover postage, the mail is not collected, or if the sender cannot be identified, the mail is treated as unpaid mail. Mailable matter not bearing postage found in, placed on, attached to, supported by, or hanging from rural boxes is handled under the applicable standards.

2.3 Highway Contract Delivery Service**2.3.1 Establishment**

Highway contract routes are established, and delivery service on such routes is provided, according to USPS policies and procedures, the characteristics of the area to be served, and the methods needed to provide adequate service. Requests or petitions for new routes, or for extensions of service or changes in the line of travel or schedule of highway contract service, must be directed to the USPS distribution networks office with supervision over the transportation of mail in the area involved.

2.3.2 Parcel Delivery

An ordinary parcel too large to fit into a customer's mailbox is not left unless the customer has filed a written order with the postmaster relieving the USPS and carriers of all responsibility in case of loss or depredation of any such parcel left outside the box.

2.3.3 Mail Collection

Generally, mailable matter is collected from a mailbox if postage is fully prepaid or money equal to the required postage is left in the mailbox. Money in a mailbox is left at the customer's risk. When postage or money is insufficient to cover postage, the mail is not collected, or if the sender cannot be identified, the mail is treated as unpaid mail. Mailable matter not bearing postage found in, placed on, attached to, supported by, or hanging from boxes is handled under the applicable standards.

2.3.4 Mailbox Location

Curbside mailboxes meeting the applicable standards in [3.0](#) must be placed where they protect the mail and can be conveniently served by carriers without leaving their vehicles. These boxes must be on the right side of the road in the direction of travel when required by traffic conditions or when driving to the left to reach the boxes would violate traffic laws by the carrier.

3.0 Customer Mail Receptacles

3.1 Basic Information for Customer Mail Receptacles

3.1.1 Authorized Depository

Except as excluded by [3.1.2](#), every letterbox or other receptacle intended or used for the receipt or delivery of mail on any city delivery route, rural delivery route, highway contract route, or other mail route is designated an authorized depository for mail within the meaning of 18 USC 1702, 1705, 1708, and 1725.

3.1.2 Exclusions

Door slots and nonlockable bins or troughs used with apartment house mailboxes are *not* letterboxes within the meaning of 18 USC 1725 and are *not* private mail receptacles for the standards for mailable matter not bearing postage found in or on private mail receptacles. The post or other support is *not* part of the receptacle.

3.1.3 Use for Mail

Except under [3.2.11](#), *Newspaper Receptacle*, the receptacles described in [3.1.1](#) may be used only for matter bearing postage. Other than as permitted by [3.2.10](#), *Delivery of Unstamped Newspapers*, or [3.2.11](#), no part of a mail receptacle may be used to deliver any matter not bearing postage, including items or matter placed upon, supported by, attached to, hung from, or inserted into a mail receptacle. Any mailable matter not bearing postage and found as described above is subject to the same postage as would be paid if it were carried by mail.

3.1.4 Clear Approach

Customers must keep the approach to their mailboxes clear of obstructions to allow safe access for delivery. If USPS employees are impeded in reaching a mail receptacle, the postmaster may withdraw delivery service.

3.2 Curbside Mailboxes

3.2.1 Manufacturer Specifications

Manufacturers of all mailboxes designed and made to be erected at the edge of a roadway or curbside of a street and to be served by a carrier from a vehicle on any city route, rural route, or highway contract route must obtain approval of their products under USPS Standard 7, *Mailboxes, City and Rural Curbside*. To receive these construction standards and drawings or other information about the manufacture of curbside mailboxes, write to USPS Engineering (see [608.8.0](#) for address).

508.3.2.2

3.2.2 Custom-Built Mailbox

The local postmaster may approve a curbside mailbox constructed by a customer who, for aesthetic or other reasons, does not want to use an approved manufactured box. The custom-built box must generally meet the same standards as approved manufactured boxes for flag, size, strength, and quality of construction.

3.2.3 Locked Box

A mailbox with a lock must have a slot that is large enough to accommodate the customer's normal daily mail volume. The USPS neither opens a locked box nor accepts a key for this purpose.

3.2.4 Mailbox Post

The post or other support for a curbside mailbox must be neat and of adequate strength and size. The post may not represent effigies or caricatures that tend to disparage or ridicule any person. The box may be attached to a fixed or movable arm.

3.2.5 Advertising

Any advertising on a mailbox or its support is prohibited.

3.2.6 Location

Subject to state laws and regulations, a curbside mailbox must be placed to allow safe and convenient delivery by carriers without leaving their vehicles. The box must be on the right-hand side of the road in the direction of travel of the carriers on any new rural route or highway contract route, in all cases where traffic conditions are dangerous for the carriers to drive to the left to reach the box, or where their doing so would violate traffic laws and regulations.

3.2.7 Address Identification

Every curbside mailbox must bear the following address information:

- a. A box number, if used, inscribed in contrasting color in neat letters and numerals at least 1 inch high on the side of the box visible to the carrier's regular approach, or on the door if boxes are grouped.
- b. A house number if street names and house numbers have been assigned by local authorities, and the postmaster authorizes their use as a postal address. If the box is on a different street from the customer's residence, the street name and house number must be inscribed on the box.

3.2.8 Owner's Name

The mailbox may bear the owner's name.

3.2.9 More Than One Family Sharing a Receptacle

If more than one family wishes to share a mail receptacle, the following standards apply:

- a. Route and Box Number Addressing. On rural and highway contract routes authorized to use a route and box numbering system (e.g., RR 1 BOX 155), up to five families may share a single mail receptacle and use a common route and

box designation. A written notice of agreement, signed by the heads of the families or individuals who want to join in the use of such box, must be filed with the postmaster at the delivery office.

- b. Conversion to Street Name and Number Addressing. When street name and numbering systems are adopted, those addresses reflect distinct customer locations and sequences. Rural and highway contract route customers who are assigned different primary addresses (e.g., 123 APPLE WAY vs. 136 APPLE WAY) should erect individual mail receptacles in locations recommended by their postmasters and begin using their new addresses. Customers having different primary addresses who wish to continue sharing a common receptacle must use the address of the receptacle's owner and the "care of" address format:

JOHN DOE
C/O ROBERT SMITH
123 APPLE WAY

Customers having a common primary address (e.g., 800 MAIN ST) but different secondary addresses (e.g., APT 101, APT 102, etc.) may continue to share a common receptacle if single-point delivery is authorized for the primary address. Secondary addresses should still be included in all correspondence.

3.2.10 Delivery of Unstamped Newspapers

Generally, curbside mailboxes are to be used for mail only. However, publishers of newspapers regularly mailed as Periodicals may, on Sundays and national holidays only, place copies of the Sunday or holiday issues in the rural route and highway contract route boxes of subscribers if those copies are removed from the boxes before the next scheduled day of mail delivery.

3.2.11 Newspaper Receptacle

A receptacle for newspaper delivery by private carriers may be attached to the post of a curbside mailbox used by the USPS if the receptacle:

- a. Does not touch the mailbox or use any part of the mailbox for support.
- b. Does not interfere with the delivery of mail, obstruct the view of the mailbox flag, or present a hazard to carrier or vehicle.
- c. Does not extend beyond the front of the mailbox when the box door is closed.
- d. Does not display advertising, except the publication title.

3.3 Wall-Mounted Centralized Mail Receptacles

3.3.1 Manufacturer Requirements

Manufacturers of wall-mounted centralized mail receptacles used for mail delivery must receive approval under the specifications and procedures in USPS Standard 4. The specifications and other information can be obtained by writing to USPS Engineering (see [608.8.0](#) for address).

3.3.2 Customer Requirements

The installation of proper equipment is required for delivery service. The type of equipment must be approved by the USPS under 3.3.1 and must be appropriate for the structure. Customers should discuss the types of approved equipment permitted for their structures with their postmaster before purchasing and installing delivery equipment.

4.0 Post Office Box Service

4.1 Fees for Post Office Box Service

Fee Group	Box Size and Fee per Semiannual (6-month) Period				
	1	2	3	4	5
1	\$43.00	\$66.00	\$120.00	\$247.00	\$398.00
2	36.00	56.00	95.00	187.00	333.00
3	29.00	47.00	85.00	153.00	255.00
4	21.00	35.00	53.00	104.00	200.00
5	19.00	27.00	49.00	90.00	151.00
6	13.00	21.00	36.00	63.00	112.00
7	10.00	16.00	29.00	49.00	87.00
E ¹	0.00	0.00	0.00	0.00	0.00

Additional Fees and Services	
Deposit per key issued	\$1.00
Key duplication or replacement (after first 2 keys), each	6.00
Post office box lock replacement, each	14.00

1. Eligibility and location determined by USPS.

4.2 Basic Information for Post Office Box Service

4.2.1 Purpose

Post Office box service is a premium service offered for a fee to any customer requiring more than free carrier delivery or general delivery and for no fee to customers who are not eligible for carrier delivery. The service allows a customer to obtain mail during the hours the box lobby is open or access is otherwise available. Post Office box service is provided only through receptacles owned or operated by the USPS or its agents. Post Office box service does not include alternate means of delivery established to replace, simplify, or extend carrier delivery service. A postmaster and a box customer may not make any agreement that contravenes the regulations on Post Office box service or its fees.

4.2.2 Definition

The term *Post Office box* (or its address abbreviation *PO BOX*) designates this service in an address. The term *box customer* applies only to the person who signs the application as an individual or to the organization on whose behalf an individual signs the application.

4.2.3 Box Size

There are five box sizes. A facility might not have each size. A customer is assigned a box size based on the customer's needs and the availability of boxes. The postmaster may require a customer to use a larger size box if the customer's mail volume increases beyond the capacity of the present box.

4.2.4 Number Assignment

A number is assigned to each Post Office box. Mail intended for delivery through a box must show the assigned Post Office box number in the address immediately above the city, state, and ZIP Code.

4.2.5 Box Availability

[8-14-08] When no box of the appropriate size is available, an application for box service may be handled, at the postmaster's discretion, in any one or more of the following ways:

- a. By referring the customer to another postal facility with available capacity.
- b. By placing the customer's name on a waiting list for box service.
- c. By providing general delivery service until an appropriate size box becomes available.
- d. By offering a smaller or larger box at its applicable fee.
- e. By offering caller service at its applicable fee.

4.2.6 Unavailable Box

[8-14-08] Online customers cannot apply for a box that is not available but can place themselves on a waiting list for the box; search online for another available box at that facility; or, at another facility close to a specific address or ZIP Code area. Customers must pay the correct fee for the service they receive, regardless of the box size applied for.

4.2.7 Service Period

[8-14-08] Post Office box service is provided in 6- or 12-month prepaid periods.

4.2.8 Limitation on Service

The postmaster may require a box customer to use caller service under [5.0, Caller Service](#), based on the volume of mail received by the customer, the level of service requested by the customer, or the availability of boxes to meet demand. Existing box customers will not be allowed to use additional boxes at Post Offices having a waiting list for Post Office boxes. Not more than once per semiannual payment period, a customer who was required to use caller service based on the volume of mail may submit a written request to the postmaster for a new determination of whether sufficient volume remains to require caller service.

4.3 Service

4.3.1 Application

[8-14-08] Procedures for applying for Post Office box service are as follows:

- a. Applying at a Post Office:

508.4.3.2

1. The applicant must complete all required items on PS Form 1093, *Application for Post Office Box Service*, and submit it to any postal facility that provides window service to the public. The facility need not be where box service is desired. Furnishing false information on the application or refusing to furnish required information may be sufficient reason for denial of the application or discontinuance of service.
 2. Spouses may complete and sign one PS Form 1093. Each spouse must present two forms of valid identification. A parent or guardian may receive delivery of a minor's mail by listing the name(s) of each minor on PS Form 1093. Other adult persons who receive mail in the Post Office box of an individual box customer must be listed on PS Form 1093 and must present two forms of valid identification to the Post Office.
 3. Employees or other representatives of organizations who receive mail in the Post Office box must be listed on PS Form 1093. Each person must have verifiable identification and, upon request, present this identification to the USPS.
 4. When any information required on PS Form 1093 changes, the box customer must update the application on file at the Post Office.
- b. Applying Online:
1. An applicant searches for and selects a box, including size and Post Office location, and the service time period.
 2. The applicant must complete all required items on the online application, PS Form 1093, and read the Privacy Act statement.
 3. The applicant must complete the payment information.
 4. The applicant must present an unsigned printout of the online application (PS Form 1093) in person to the Post Office along with two forms of valid identification, as stated in 4.3.2, to complete the application process and, upon approval, receive the box number and keys or lock combination.
 5. Spouses may complete one online application. Each spouse must present two forms of valid identification. A parent or guardian may receive delivery of a minor's mail by listing the name(s) of each minor on the online application. Other adult persons who receive mail in the Post Office box of an individual box customer must be listed on the online application and must present two forms of valid identification to the Post Office upon request. Additional box users authorized to pick up mail from the box may be added to the printed copy of the application at the Post Office and must have two forms of valid identification.
 6. When any information on the online application changes, the box customer must update the application on file at the Post Office.

4.3.2 Verification

[8-14-08] An application for Post Office box service may not be approved until the applicant's identity and current permanent physical address where he or she resides or conducts business is verified. Customers who apply online for a Post

Office box do not receive their box number and keys (or combination number) until verification is complete and the application is approved. Verification criteria are as follows:

- a. At the time of application, applicants must present two items of valid identification; one item must contain a photograph of the applicant. Social Security cards or credit cards and birth certificates are unacceptable as identification. The following are acceptable identification:
 1. Valid driver's license or state non-driver's identification card.
 2. Armed forces, government, university, or recognized corporate identification card.
 3. Passport, alien registration card, or certificate of naturalization.
 4. Current lease, mortgage, or deed of trust.
 5. Voter or vehicle registration card.
 6. Home or vehicle insurance policy.
- b. The identification presented must be current. It must contain sufficient information to confirm that the applicant is who he or she claims to be and must be traceable to the bearer.

4.3.3 Transferring Service

Post Office box service may be transferred, without payment of an additional fee, to any box of the same size and fee group at a different facility of the same Post Office. To transfer service, the box customer must submit a new application either to the facility where service is currently provided or to the facility where service is desired. A box customer may transfer service no more than once in any semiannual payment period and must submit a completed Form 3575 at the time of transfer.

4.3.4 Minor

[8-14-08] Post Office box service may be provided to a minor (a person under 18 years of age) unless the minor's parent or guardian submits a written objection to the appropriate postmaster. Minors are not eligible to apply for Post Office box service online.

4.4 Conditions of Use

4.4.1 Mail Receipt

In accordance with the application and verification standards in 4.3, any individual box customer or organization may receive through the box any mail properly addressed to the box number.

4.4.2 Mail Only

Only mail and official USPS notices may be placed into a Post Office box.

4.4.3 Accumulation of Mail

A box customer must remove mail promptly from the box. If mail will not be removed from the box for more than 30 days and an overflow condition is probable, the customer must make prior arrangements with the postmaster.

4.4.4 Overflow

[8-14-08] When mail for a customer's Post Office box(es) exceeds the capacity of the box(es) on 12 of any 20 consecutive business days (excluding Saturdays, Sundays, and national holidays), the customer must use caller service, change to a larger box, or use one or more additional boxes (subject to availability) to which mail will be addressed. Customers whose box is in an overflow condition may not be eligible to make payment renewals at Automated Postal Centers (APCs) or online.

4.4.5 Unlawful Activity

A Post Office box may not be used for, or in connection with, a scheme or enterprise that violates any federal, state, or local law; breaches an agreement with a federal, state, or local agency whereby the box customer has agreed to discontinue a specified activity; or violates or attempts to evade any order of a court or administrative body.

4.4.6 Forwarding

A Post Office box may not be used when the primary purpose is to have the USPS forward or transfer mail to another address free of charge.

4.4.7 Address Change

Customers may file change-of-address orders as follows:

- a. Organizations. Only the box customer or authorized representatives of the organization listed on the Form 1093 may file change-of-address orders. The organization is responsible for forwarding mail to other persons receiving mail at the box.
- b. Residential box customers, Fee Groups 1 through 7. Only the box customer listed on the Form 1093 may file change-of-address orders. The box customer is responsible for forwarding mail to other persons receiving mail at the box.
- c. Residential box customers, Fee Group E. The box customer or any other person listed on the Form 1093 may file an individual change-of-address order. Only the box customer may file a change-of-address order for the entire family.

4.5 Basis of Fees and Payment**4.5.1 General**

Post Office box fees are based on the size of the box provided and the fee group to which the box's 5-digit ZIP Code is assigned.

4.5.2 Box Size

Box sizes are standardized and the fees for boxes increase with box size. The following chart describes approximate box capacities and frontal dimensions.

BOX SIZE	CAPACITY (Cubic Inches)	WIDTH AND HEIGHT (Inches)
1	Under 296	3 by 5.5
2	296 through 499	5 by 5.5
3	500 through 999	11 by 5.5
4	1,000 through 1,999	11 by 11
5	2,000 or more	22.5 by 12

4.5.3 Fee Changes

A change in Post Office box service fees applicable to a given 5-digit ZIP Code can arise from a general fee change. In addition, the manager, Special Services, can assign a fee group to a new ZIP Code, and may authorize the reassignment of one or more 5-digit ZIP Codes to the next higher or lower fee group if the past fee group assignments were in error. The USPS also may regroup 5-digit ZIP Codes. No ZIP Code may be moved more than once a calendar year and a ZIP Code may be moved only into the next higher or lower fee group. Any change in Post Office box service fees takes effect on the date of the action that caused the change unless an official announcement specifies another date. If Post Office box service fees are increased, no customer must pay the new price until the end of the current service period, and no retroactive adjustment is to be made for a payment received before the date of the change. The fee charged is that in effect on the date of payment.

4.5.4 Payment

[8-14-08] All fees for Post Office box service are for 6- or 12-month prepaid periods, except as noted under 4.5.6, 4.5.7, and 4.5.10. The fee may be paid up to 1 year in advance, but not more. The fee that is in effect on the day that the fee is paid applies for either the 6- or 12-month period. Customers may pay the Post Office box fee using any of the following methods:

- a. In person using cash, credit or debit card, or check or money order payable to the postmaster.
- b. By mail using check or money order payable to the postmaster. A mailed payment must be received by the postmaster on or before the due date.
- c. At any APC nationwide using a credit or debit card.
- d. Online at www.usps.com/poboxes using a credit card.
- e. Automatic PO box renewal available online at www.usps.com/poboxes with a credit card.

4.5.5 Payment Period

Except under 4.5.7, the beginning date for a box fee payment period is determined by the approval date of the application. The period begins on the first day of either the same month if the application is approved on or before the 15th of the month, or the next month if approved after the 15th of the month. After that, box fees for service renewal may be paid any time during the last 30 days of the service period, but no later than the last day of the service period.

4.5.6 U.S. Agencies

Federal agencies whose payment period coincides with the federal fiscal year may pay their box fees during the first quarter rather than in advance.

4.5.7 Exception

Postmasters at offices with fewer than 500 Post Office boxes may set April 1 and October 1 as the beginning of payment periods for box customers in their offices. Payment periods beginning other than April 1 or October 1 are brought into alignment with these respective dates by adjusting fees as follows:

508.4.5.8

- a. New service, one-sixth of the semiannual fee is charged for each remaining month between the beginning of the new payment period and the next April 1 or October 1.
- b. Existing service, one-sixth of the semiannual fee is charged for each remaining month between the end of all currently paid periods and the next April 1 or October 1.
- c. Next one or two semiannual payment periods, an adjustment may be accepted in addition to fees.

4.5.8 Change of Payment Period

Except for customers at Post Offices subject to 4.5.7, a box customer of record may change the payment period by submitting a new application noting the month to be used as the start of the revised payment period. The date selected must be before the end of the current payment period. The unused fee for the period being discontinued may be refunded under 4.7, and the fee for the new payment period must be fully paid in advance. A change of payment period date may not be used to circumvent a change in box fees.

4.5.9 Academic Institutions

The USPS does not set or collect fees for boxes owned by an academic institution if the boxes are separate from designated USPS areas and serviced by employees or agents of the institution.

4.5.10 Adjusting Fees

In postal facilities primarily serving academic institutions or their students, box fees may be adjusted to fit the semester schedules, using the matrix below. Charges are rounded up to the next multiple of \$0.10. No refund is made for discontinued service when a box is obtained under this standard.

SERVICE PERIOD	ADJUSTED FEE
95 days or less	1/2 semiannual fee
96 to 140 days	3/4 semiannual fee
141 to 190 days	Full semiannual fee
191 to 230 days	1-1/4 semiannual fee
231 to 270 days	1-1/2 semiannual fee
271 days to full year	2 semiannual fees

4.6 Fee Group Assignments**4.6.1 Regular Fee Groups**

Post Office boxes are assigned to fee groups listed in 4.1 based upon cost estimates of the facility space for Post Office boxes in each 5-digit ZIP Code. Local Post Offices can provide information about fees for a particular ZIP Code.

4.6.2 Free Box Service (Group E)

Customers may qualify for free (Group E) Post Office box service if their physical address or business location meets all of the following criteria:

- a. The physical address or business location is within the geographic delivery ZIP Code boundaries administered by a Post Office.

- b. The physical address or business location constitutes a potential carrier delivery point of service.
- c. The USPS chooses not to provide carrier delivery to the physical address or business location.
- d. The customer does not receive carrier delivery via an out-of-bounds delivery receptacle.

4.6.3 Additional Standards for Free Box Service

[8-14-08] Only one free (Group E) Post Office box may be obtained for each potential carrier delivery point of service. Group E customers are assigned the smallest available box that will reasonably accommodate their daily mail volume. Eligibility for Group E boxes does not extend to individual tenants, contractors, employees, or other individuals receiving or eligible to receive single-point delivery such as delivery to a hotel, college, military installation, or transient trailer park. A customer must pay the applicable fee for each additional box requested beyond the initial box obtained at the Group E fee. The online application tools described in [4.3.1b](#) cannot be used for free Post Office box service.

4.7 Fee Refund

4.7.1 Calculation

When Post Office box service is terminated or surrendered by the customer, the unused portion of the fee may be refunded as follows:

- a. If service is discontinued any time within the first 3 months of the service period, then one-half of the fee is refunded.
- b. If service is discontinued after the beginning of the fourth month of the service period, then none of the fee is refunded.
- c. If service is discontinued and the customer has prepaid for the next semiannual service period, then the entire fee for that next period is refunded.

4.7.2 Discontinued Postal Facility

When a postal facility is discontinued or relocated, a box customer at that facility may obtain a refund of unused box fees if box service at that location is discontinued and additional travel of 1/4 mile or more (from the physical address on the customer's Form 1093) is required to obtain equivalent service. For this purpose, one-sixth of a semiannual fee is refunded for each month left in the payment period. The refund is computed from the first day of that month (if the effective date of the facility discontinuance is on or before the 15th of the month) or from the first day of the next month (if the effective date is after the 15th of the month).

4.8 Keys and Locks

4.8.1 Key Deposit

Two Post Office box keys are initially issued to each new box customer. Box customers must pay a refundable key deposit on each of these keys. The refundable key deposit must be paid on each additional key requested under [4.8.2](#). When box service is terminated, the key deposit is refunded to the customer for each key (including additional or replacement keys in [4.8.2](#)) that is returned to the Post Office where the box was issued.

508.4.8.2

4.8.2 Additional Key Fee

A box customer may obtain additional or replacement keys by submitting Form 1094 and paying the refundable key deposit (see [4.8.1](#)) and the key fee in [4.3b](#). The key fee for additional or replacement keys is not refundable. Worn or broken keys are replaced without charge when returned to the Post Office where the box is located.

4.8.3 Restrictions

A customer using a Post Office box may not obtain or use keys other than those issued by the USPS.

4.8.4 Lock Replacement

The primary box customer (box applicant) may request that the Post Office box lock be changed. To change the lock, the customer must first pay the applicable lock fee in [4.1](#). Lock fees are charged for replacing keyed locks and combination locks and for re-setting combination locks. Lock fees are not refundable. Customers may turn in Post Office box keys for the old lock and get a refund of the key deposit. Two keys are provided with the new lock, with a refundable deposit for each key charged under [4.8.1](#). Customers may obtain additional keys for the new lock under [4.8.2](#).

4.9 Service Refusal or Termination**4.9.1 Refusal**

A postmaster may refuse to approve Post Office box service if: the applicant submits a falsified or incomplete application for box service; within the 2 years immediately before submitting the application, the applicant physically abused a box or violated a standard on the care or use of a box; or there is substantial reason to believe that the box is to be used for activities as described in [4.4.5, Unlawful Activity](#), or [4.4.6, Forwarding](#).

4.9.2 Termination

A postmaster may terminate Post Office box service, including that of a customer paying a Group E fee, if the box customer or its representative falsifies the application for the box; physically abuses the box; refuses to update information on the box application; violates any standard on the care or use of the box; conducts himself or herself in a violent, threatening, or otherwise abusive manner on postal premises; or uses it for any unlawful activity as described in [4.4.5](#). The customer is notified of the postmaster's determination to refuse or terminate service and of the appeal procedures for that determination.

4.9.3 Customer Appeal

The applicant or box customer may file a petition appealing the postmaster's determination to refuse or terminate service within 20 calendar days after notice as specified in the postmaster's determination. The filing of a petition prevents the postmaster's determination from taking effect and transfers the case to the USPS Consumer Advocate. The Consumer Advocate's decision constitutes the final agency decision.

4.9.4 Surrendered Box

A Post Office box is surrendered if:

- a. A box customer refuses or fails to pay the proper fees by the due date.

- b. A box customer submits a written notice to discontinue service.
- c. Any person other than the box customer attempts to renew service at the end of the period for which the box is issued.
- d. A box customer, or an appointed executor or administrator of a deceased box customer, submits a permanent change-of-address order, except as provided in [4.9.5d](#).
- e. A Group E residential box customer files a permanent change-of-address order and no other person listed on the Form 1093 files a new Form 1093 to become the box customer.

4.9.5 Boxes Not Surrendered

A Post Office box is not surrendered if:

- a. A box customer dies or disappears before the end of the period for which the box is issued.
- b. A box customer submits a temporary change-of-address order.
- c. Except as provided in [4.9.5d](#) below, a change-of-address order is submitted by any person other than the box customer, or an appointed executor or administrator of a deceased box customer, for mail going to the box.
- d. A Group E residential box customer files a permanent change-of-address order and another person listed on the Form 1093 files a new Form 1093 to become the box customer.

508.5.1

5.0 Caller Service

5.1 Caller Service Fees

Fees are charged as follows:

Fee Group	For Each Separation Provided Per Semiannual (6-month) Period
	Fee
1	\$644.00
2	562.00
3	495.00
4	487.00
5	476.00
6	425.00
7	379.00
Additional Fees and Services	
For each reserved call number, per calendar year	\$39.00

5.2 Basic Information

5.2.1 Purpose

[6-5-08] Caller service is a premium service available for a fee to any customer who:

- Requires more than free carrier service,
- Receives more mail than can be delivered to the largest installed Post Office box at the postal facility to which the caller's mail is addressed,
- Is required to use caller service by standard.

5.2.2 Pickup

[6-5-08] Caller service does not include general delivery service. Customers who use this service pick up their mail at the Post Office call window or loading dock during the time period designated by the postmaster. Customers who receive mail for clients may participate in caller service subject to [1.0, Recipient Options](#), and [2.0, Conditions of Delivery](#). Agreements between a postmaster and a caller that contravene the standards for caller service or its fees are not valid.

5.2.3 Caller

[6-5-08] A caller is an individual, or the organization represented by the individual, signing the application.

5.2.4 Service Types

[6-5-08] Reservation of caller numbers makes it possible for the caller of record to hold caller numbers for future use. Destination caller service is caller service provided at the postal facility to which the caller's mail is addressed. Origin caller service (accelerated reply mail) is described in [5.8](#).

5.2.5 Caller Service Number

[6-5-08] The Address Management Service System (AMS) office assigns caller numbers. Customers may reserve caller numbers for future use or obtain caller services by paying the reserved caller number fee or caller service fee in [5.1](#).

Subsequently, the postmaster or his designee will contact AMS which will issue the number. Availability of this service may be restricted and numbers are not issued immediately upon payment of the fee.

5.2.6 Caller Service Number—Address Element

[6-5-08] Except under [5.2.7, Exemption](#), caller service customers must use their assigned caller service number in their mailing address as their “Post Office Box” (PO Box) number, which should be placed immediately above the city, state, and ZIP+4 Code.

5.2.7 Exemption

A postmaster may exempt any customer continuously receiving firm holdout service since July 3, 1994, from the standard in [5.2.6](#) that correspondents must use the assigned Post Office box (caller service) number in the address.

5.2.8 Restriction

The USPS may restrict caller service if such service adversely affects postal operations.

5.2.9 Required Use

When mail for a customer’s Post Office box(es) exceeds the capacity of the box(es) on 12 of any 20 consecutive business days (excluding Saturdays, Sundays, and national holidays), or when the customer seeks multiple caller service separations, the postmaster can require the customer to use caller service, change to a larger box, or use one or more additional boxes (subject to availability) to which mail will be addressed. A customer required to use caller service because of the mail volume received may, once per semiannual payment period, make a written request to the postmaster for a new determination of whether current mail volume requires continued use of caller service.

5.2.10 U.S. Agencies and Schools

Federal agencies and the various schools and departments within educational institutions are considered separate customers for [5.2.9](#).

5.2.11 Eligible Customers

Caller service may be provided to the following:

- a. A new customer planning to receive an incoming volume of mail that cannot fit into the largest available Post Office box.
- b. A customer wanting a Post Office box when a box is unavailable, and the postmaster determines that such service does not adversely affect postal operations.
- c. A customer formerly receiving firm holdout service.

5.3 Service

5.3.1 Application

[6-5-08] To reserve a caller number for future use or to apply for caller service, the applicant must complete all relevant spaces on Form 1093, Application for Post Office Box or Caller Service, and submit it to any postal facility that provides public window service. The facility need not be the one where destination caller service is

508.5.3.2

desired. An incomplete or falsified application is sufficient reason to deny or discontinue service. An application is not considered approved until the USPS verifies the applicant's identity.

5.3.2 Transferring Service

Caller service may be transferred, without payment of an additional fee, to a different facility of the same Post Office if that facility has caller service. To transfer service, the caller must submit a new application either to the facility where service is currently provided or to the facility where service is desired. A caller may transfer service no more than once in any semiannual payment period and must submit a completed Form 3575 at the time of transfer.

5.3.3 Minor

Caller service may be provided to a minor (a person under 18 years of age) unless the minor's parent or guardian submits a written objection to the postmaster.

5.4 Conditions of Use**5.4.1 Mail Receipt**

An individual caller or organization may receive mail properly addressed to the caller number. Mail addressed only to a caller number is delivered to the caller so long as no improper or unlawful business is conducted. A caller who, as a regular practice, wants to call for mail at a postal facility more than once in any 24-hour period must obtain the postmaster's approval of the pickup schedule.

5.4.2 Updating

When any information required to be provided by the caller on Form 1093 changes, the caller must notify the Post Office of such changes.

5.4.3 Unlawful Activity

Caller service may not be used for, or in connection with, a scheme or enterprise that violates any federal, state, or local law; breaches an agreement between the caller and a federal, state, or local agency for the caller to discontinue a specified activity; or violates or attempts to evade any order of a court or administrative body.

5.4.4 Forwarding

Caller service may not be used when the primary purpose is to have the USPS forward or transfer mail to another address free of charge.

5.5 Basis of Fees and Payment**5.5.1 Caller Service Fee**

[6-5-08] Customers must pay the caller service fee listed in 5.1. The fee must be paid for each caller number or separation used, with the following exceptions:

- a. If a caller receives mail addressed to many caller numbers but receives a bulk delivery of mail not separated to those numbers, the caller service fee is charged for the number to which the separation of mail is made. Reserved caller number fees are charged for all the remaining caller numbers to which mail is addressed.

- b. When a Post Office box service applicant is provided a single caller service separation because of a shortage of available Post Office boxes, then the fee charged is the fee for the largest installed Post Office box. In this instance, neither the caller service fee nor the reserved caller number fee is charged.

5.5.2 Reserved Caller Number Fee

[6-5-08] Customers must pay the annual reserved caller number fee in 5.1 once each calendar year for each number reserved, subject to the following:

- a. Reserved caller number fees are not prorated. Customers who continue to reserve caller numbers for a new calendar year must make renewal payments before January 1st of the new calendar year.
- b. If a caller has reserved a number and subsequently receives mail separated to that number or otherwise notifies the Post Office that they intend to begin receiving mail addressed and separated to that number, the appropriate semi-annual fee for caller service will be charged. No refund for the reserved caller number fee will be made. If the customer continues to receive mail addressed for separation to the caller number, no reserved caller number fee will be charged for the following year.

5.5.3 Fee Changes

A change in caller service fees (including reserved number fees) can arise from a general fee change. Any change in caller service fees takes effect on the date of the action that caused the change unless an official announcement specifies another date. If a caller service fee is increased, no customer must pay at the new price until the end of the current service period, and no retroactive adjustment is to be made for a payment received before the date of the change. The fee charged is that in effect on the date of payment.

5.5.4 Box Number

If a caller uses a physical Post Office box to obtain a caller number, the applicable fees for both Post Office box service and caller service must be paid.

5.5.5 Payment

The basic caller service fee is for a 6-month period. The fee must be paid in advance for each 6-month period. The fee may be paid for two periods at a time (i.e., up to 1 year in advance), but not more. The fee that must be paid is the one that is in effect on the day that the fee is paid. Fees may be paid using cash, credit or debit card, or check or money order payable to the postmaster. A mailed payment must be received by the postmaster on or before the due date.

5.5.6 Caller Service Fee Payment Period

Except under 5.5.8, the beginning date for a caller fee payment period is determined by the approval date of the application. The period begins on the first day of either the same month if the application is approved on or before the 15th of the month, or the next month if approved after the 15th of the month. After that, caller fees for renewal of service may be paid any time during the last 30 days of the service period, but no later than the last day of the service period.

508.5.5.7

5.5.7 Change of Caller Service Fee Payment Period

A caller of record may change the payment period by submitting a new application noting the month to be used as the start of the revised payment period. The date selected must be before the end of the current payment period. The unused fee for the period being discontinued may be refunded under 5.6, and the fee for the new payment period must be fully paid in advance. A change of payment period date may not be used to circumvent a change in caller service fees.

5.5.8 Exception

Postmasters at offices with fewer than 500 Post Office boxes may set April 1 and October 1 as the beginning of payment periods for caller service customers in their offices. Payment periods beginning other than April 1 or October 1 are brought into alignment with these respective dates by adjusting fees as follows:

- a. New service, one-sixth of the semiannual fee is charged for each remaining month between the beginning of the new payment period and the next April 1 or October 1.
- b. Existing service, one-sixth of the semiannual fee is charged for each remaining month between the end of all currently paid periods and the next April 1 or October 1.
- c. Next one or two semiannual payment periods, an adjustment may be accepted in addition to fees.

5.6 Fee Refund**5.6.1 Discontinued Number**

When caller service is terminated or surrendered by the customer, the unused portion of the fee may be refunded as follows:

- a. If service is discontinued any time within the first 3 months of the service period, then one-half of the fee is refunded.
- b. If service is discontinued after the beginning of the fourth month of the service period, then none of the fee is refunded.
- c. If service is discontinued and the customer has prepaid for the next semiannual service period, then the entire fee for that next period is refunded.

5.6.2 Discontinued Postal Facility

When a postal facility is discontinued or relocated, a caller service customer at that facility may obtain a refund of unused caller service fees if caller service at that location is discontinued and additional travel of 1/4 mile or more (from the physical address on the caller's Form 1093) is required to obtain equivalent service. For this purpose, one-sixth of a semiannual fee is refunded for each month left in the payment period. The refund is computed from the first day of that month (if the effective date of the facility discontinuance is on or before the 15th of the month) or from the first day of the next month (if the effective date is after the 15th of the month).

5.6.3 Reserved Number Fee

The reserved number fee is not refundable.

5.7 Service Refusal or Termination

5.7.1 Refusal

A postmaster may refuse to approve caller service if the applicant submits a falsified or incomplete application for caller service; within the 2 years immediately before submitting the application, the applicant violated a standard on the use of the service; or there is substantial reason to believe that the service is to be used for activities described in [5.4.3, Unlawful Activity](#), or [5.4.4, Forwarding](#).

5.7.2 Termination

A postmaster may terminate caller service if the caller or its representative falsifies the application for the service; refuses to update information on the application; violates any standard on the use of the service; conducts himself or herself in a violent, threatening, or otherwise abusive manner on postal premises; or uses it for any unlawful activity as described in [5.4.3](#). The caller is notified of the postmaster's determination to refuse or terminate service and of the appeal procedures to that determination.

5.7.3 Customer Appeal

The applicant or caller may file a petition opposing the postmaster's determination to refuse or terminate service within 20 calendar days after notice, as specified in the postmaster's determination. The filing of a petition prevents the postmaster's determination from taking effect and transfers the case to the USPS Consumer Advocate. The Consumer Advocate's decision constitutes the final agency decision.

5.7.4 Surrendered Service

Caller service is deemed surrendered if the caller submits a permanent change-of-address order, fails or refuses to pay the appropriate fees by the due date, or submits a written notice to discontinue service.

5.8 Accelerated Reply Mail (ARM)

5.8.1 Purpose

Accelerated reply mail (ARM) is *origin caller service* provided at a postal facility other than the one to which the caller's mail is addressed. ARM is subject to the applicable standards for caller service and the additional standards in [5.8](#).

5.8.2 Applicability

ARM must be obtained at an originating mail processing facility that is fully automated to process prebarcoded mail.

5.8.3 Barcoding

The caller's mail must meet the standards for barcoded First-Class Mail and must be certified by the mailpiece design analyst at the origin facility where ARM service is requested. The barcode on the mailpiece must represent the ZIP+4 code or the mailer's unique 5-digit ZIP Code printed on the mailpiece.

5.8.4 FIM A

The caller's mail must bear facing identification mark (FIM) A.

5.8.5 Caller Service

Caller service must also be obtained at the destinating postal facility. The address on all mailpieces to be received through ARM must be the Post Office box address assigned where destination caller service is authorized. Mailpieces that show a dual address must show only the Post Office box on the line immediately above the city, state, and ZIP Code line.

5.8.6 Mailer Receipt

The mailer may either pick up ARM at the origin facility caller service window or have it reshipped, through Express Mail Custom Designed Service, to the destination caller service address or to another address specified by the mailer in the Custom Designed Service Agreement. To change the destination address on the Custom Designed Service Agreement, the mailer must provide a 30-day advance notice and submit an amended ARM application, completing only the "Applicant Information" and "Express Mail Reship."

5.8.7 CMRA

An applicant who is a commercial mail receiving agent (CMRA) must also meet the applicable standards in [1.0, Recipient Options](#), and [2.0, Conditions of Delivery](#).

5.8.8 Mailer Compliance

An applicant for ARM must meet the application procedures in [5.3](#). Besides completing Form 1093, an applicant for ARM must also complete Form 8061 and submit both forms to the facility where ARM service is desired.

5.8.9 USPS Actions

ARM service is not provided until the USPS verifies the applicant's identity and service availability at the requested facility, and makes scheme preparations.

5.8.10 ARM Assignment

When the application is approved and the caller service fee received, an ARM number is assigned. A separate basic fee must be paid for each facility where ARM service is provided.

5.8.11 Transfer

An ARM authorization may not be transferred to another facility.

5.8.12 Past-Due Caller Fee

Payments for ARM service must be received at least 45 days before the applicable semiannual period. Payment of the renewal fee is due at least 45 days before the last day of the last month of the current period. Payment may be made for the next semiannual or annual period, as appropriate. If, on notice, the customer does not pay the fee by the 30th day before the end of the current payment period, the barcode sortation scheme is revised to remove the separation for the caller. Once that change is made, the caller must reapply to obtain further ARM service.

5.8.13 Refund

A refund is made only for future prepaid periods if a caller discontinues ARM service. No refund is made for the remaining part of the current fee period.

6.0 General Delivery

6.1 Purpose

General delivery is intended primarily as a temporary means of delivery:

- a. For transients and customers not permanently located.
- b. For customers who want Post Office box service when boxes are unavailable.

6.2 Service Restrictions

General delivery is available at only one facility under the administration of a multifacility Post Office. A postmaster may refuse or restrict general delivery:

- a. To a customer who is unable to present suitable identification.
- b. To a customer whose mail volume or service level (e.g., mail accumulation) cannot reasonably be accommodated.

6.3 Delivery to Addressee

A general delivery customer can be required to present suitable identification before mail is given to the customer.

6.4 Holding Mail

General delivery mail is held for no more than 30 days, unless a shorter period is requested by the sender. Subject to 6.2, general delivery mail may be held for longer periods if requested by the sender or addressee.

7.0 Firm Holdout

7.1 Purpose

Firm holdout service allows a customer to obtain street-addressed mail from the Post Office when the customer normally receives 50 letters or more on the first delivery trip, or when the customer is a news agent or publisher's representative and receives publications that qualify for newspaper treatment.

7.2 Obtaining and Using Service

To obtain firm holdout service, a customer must fill out Form 3801. The form must include the signature of each employee or agent authorized to pick up the mail. There is no fee for firm holdout service. On the postmaster's approval, based on the availability of resources, the customer may pick up mail at a postal unit once each delivery day at the time and place of delivery specified by the postmaster.

7.3 Service Cancellation

A customer may cancel a firm holdout at any time. The postmaster may cancel firm holdout service when the mail volume falls below the 50-piece requirement on each delivery day over a 30-day period. The postmaster may also cancel the service when the mail is not picked up for 10 consecutive days and the customer does not arrange with the postmaster to hold the mail. A customer may not request restoration of the service for 1 year after its cancellation.

508.8.1

8.0 Pandering Advertisements

8.1 Prohibitory Order

8.1.1 Initiation by Addressee

Pursuant to 39 USC 3008, an addressee who receives a solicited or unsolicited advertisement offering for sale matter that, in the addressee's sole discretion, is "erotically arousing or sexually provocative," may, by completing Form 1500, obtain a prohibitory order directing the mailer of the advertisement to refrain from making further mailings to that addressee. Using this form is not mandatory if the information that the form solicits is in a signed written statement.

8.1.2 Deceased

A person entitled to receive mail addressed to a deceased person is regarded as the addressee of such mail for obtaining a prohibitory order in the name of the deceased.

8.1.3 Addressed to Job Title

A person authorized to receive mail addressed to a job title (e.g., sales manager) of any business, government agency, or institution, is regarded as the addressee of such mail for obtaining a prohibitory order covering such job title.

8.1.4 Apparent Authority

Any person with apparent authority to act for a business, governmental, or institutional addressee is regarded as the addressee of such organization's mail for obtaining a prohibitory order in the name of such organization.

8.1.5 Applying for Order

The application for prohibitory order may be submitted at any Post Office and must be accompanied by the advertisement on which the application is based, and its opened envelope or other cover or wrapper. When applying for a prohibitory order, if the addressee receives mail at more than one address, the addressee should complete an additional Form 1500 for each address.

8.1.6 Applying for Order On Behalf of Children

An addressee who is the parent of one or more children less than 19 years of age residing with that parent may request an order on behalf of any or all such children. If the parent of any such child determines that matter offered for sale in an advertisement addressed to the child is "erotically arousing or sexually provocative," the parent may request issuance of an order prohibiting further mailings to such child. This order is not enforced for mailings received by such person after that person reaches 19 years of age. Such person, however, may ratify the order by giving written notice to the manager of the Prohibitory Order Processing Center (see [608.8.0](#) for address) that the order is to continue in effect for himself or herself.

8.1.7 Effects of Prohibitory Order

The prohibitory order forbids the mailer, his or her agents, or assigns from making further mailings to the designated addressees, effective on the 30th calendar day after the mailer's receipt of the order; directs immediate deletion of such addressees from all mailing lists owned or controlled by the mailer, his or her agents, or assigns;

and prohibits any sale, rental, exchange, or other transaction by the mailer, his or her agents, or assigns, involving mailing lists bearing the names of the designated addressees.

8.1.8 Continuing Order With Address Change

An addressee protected by a prohibitory order who has a permanent change of mailing address may continue the protection provided by the order by notifying the mailer of his or her change of address and desire to have the order honored for the new address. The notification must be sent by Certified Mail, return receipt requested. To enforce any violation of the order at the new address, a copy of the notification and return receipt must be submitted to the manager of the Prohibitory Order Processing Center (see [608.8.0](#) for address). Such written notification must modify the order by substituting the new address for the address designated in the original or previously modified order. An order thus modified takes effect in the same manner as the original order.

8.1.9 Denying Application

A prohibitory order is not issued when the application is based on any of these:

- a. The request of a person who the USPS finds does not qualify under any of the foregoing paragraphs of this section.
- b. A mailpiece that the USPS finds does not offer matter for sale.
- c. A mailpiece not originating with the person against whom the order is sought (e.g., a newspaper or magazine not mailed by the person on whose advertisement the application is based).
- d. A mailpiece received by a foreign addressee who has no regular mailing address at which mail is delivered directly by the USPS.
- e. A mailpiece sent by a mailer not subject to U.S. jurisdiction.
- f. A basis in any other way insufficient under the statute.

8.1.10 Abandoned Applications

An applicant for a prohibitory order or its enforcement is deemed to have abandoned the application if the applicant fails to comply, within 60 days, with any USPS request to supplement, correct, or complete the application. The USPS does not keep abandoned applications.

8.1.11 Voiding Orders

A prohibitory order is considered void on expiration of 5 years from the date of issuance, except that, when application for enforcing a prohibitory order is made, it is not considered void until expiration of 5 years from the last application for enforcement. USPS files on such void orders may be disposed of, if a record is kept of the disposal of each such file and the reason for the disposal.

8.1.12 Availability of Remedies

The fact that a name and address is on the USPS list of persons not wanting to receive sexually oriented advertisements through the mail does not limit or affect the authority of the USPS to issue a prohibitory order protecting such name and

508.8.2

address. The issuance of a prohibitory order also does not limit or affect the authority of the USPS to list, under 9.0, the name and address protected by such prohibitory order.

8.2 Taking Action Against Violations

8.2.1 Requesting Enforcement

If a person protected by a prohibitory order who receives a mailpiece apparently in violation of such order opens the envelope or other outside cover of such piece and writes on it the identifying number of the prohibitory order (if known) and a statement indicating receipt by mail and the date of receipt (for example, "I received this mailpiece on [date]."), followed by the person's signature. The person submits the piece directly, or through a Post Office, to the Prohibitory Order Processing Center. Such submission constitutes an application for enforcing the order.

8.2.2 Enforcement

When the USPS finds, after appropriate administrative proceedings under prohibitory order Standard Operation Procedures (formerly Notice 241) and 39 CFR 963, that enforcement is warranted, it requests the U.S. Department of Justice to seek a court order directing compliance with the prohibitory order.

9.0 Sexually Oriented Advertisements

9.1 Basic Information for Sexually Oriented Advertisements

9.1.1 Definition

39 USC 3010(d) defines *sexually oriented advertisement* as "any advertisement that depicts, in actual or simulated form, or explicitly describes, in a predominantly sexual context, human genitalia, any act of natural or unnatural sexual intercourse, any act of sadism or masochism, or any other erotic subject directly related to the foregoing." It also provides that "material otherwise within the definition of this subsection shall be deemed not to constitute a sexually oriented advertisement if it constitutes only a small and insignificant part of the whole of a single catalog, book, periodical, or other work the remainder of which is not primarily devoted to sexual matters."

9.1.2 Legal Means

Section 3010 of Title 39 USC provides members of the public with a means to protect themselves and their minor children from receiving unsolicited sexually oriented advertisements through the mail. This section permits any person served by the USPS to file with the USPS a statement that he or she does not want to receive such advertisements through the mail. Any mailer who sends that person an unsolicited sexually oriented advertisement more than 30 days after the date when the USPS adds that person's name to its reference list of those who want this protection may be subject to civil and criminal sanctions, under 39 USC 3011 and in 18 USC 1735-37.

9.1.3 Mailer Responsibility

The responsibility for ensuring that no unsolicited sexually oriented advertisement is sent through the mail to any person in violation of section 3010 is placed by that section on the mailer of such advertisements. No USPS regulations may be used to place this responsibility on the USPS.

9.1.4 Complying With Law

A person who mails sexually oriented advertisements only to persons who request to receive them does not violate the statute or regulations, if otherwise in compliance with the law whether buying and using the USPS list.

9.2 Applying for Listing**9.2.1 USPS Form**

A person may invoke the protection of section 3010 by completing and filing, with any postmaster or designated USPS representative, Form 1500, available at Post Offices.

9.2.2 Authorized Filers

A person may file in his or her own behalf and in behalf of any of that person's children under the age of 19 years who reside with that person or are under his or her care, custody, or supervision. An authorized officer, agent, fiduciary, surviving spouse, or other representative, may file in behalf of a corporation, firm, association, estate, or deceased or incompetent addressee.

9.2.3 Five-Year Retention on List

A person's name and address are kept on the list for 5 years, unless a request for revocation is filed sooner by that person. A person must file a new application at the end of the 5-year period to keep his or her name on the list. The names and addresses of minor children are removed from the list after the 5-year period or when they reach 19 years of age, whichever comes first. A minor must file an original application in his or her own behalf if the minor wants his or her name to remain on the list after reaching 19 years of age.

9.2.4 Applications for Different Addresses

The filing of a single application results in the listing of a single address for the person filing. A person who moves must file a new Form 1500 to receive the protection of section 3010 at his or her new address. Form 3575 may not be used for this purpose.

9.2.5 Using Listed Addresses

It is not a violation of section 3010 to mail a sexually oriented advertisement to a person at an address other than that which is shown for that person on the list. It is a violation to mail such an advertisement to that person at the address shown for that person even though he or she has moved from that address.

9.3 Requesting Removal From List**9.3.1 Removal**

A person, at any time, may request the removal of his or her name and address, or that of one or more of his or her minor children, from the list by notifying the manager of the Prohibitory Order Processing Center (see [608.8.0](#) for address).

508.9.3.2

9.3.2 Receipt After Removal

It is not evidence of a violation of section 3010 if a person (or that person's minor child) receives a sexually oriented advertisement in the mail on or after the date he or she requests the removal of his or her name from the list or his or her minor child's name.

9.4 Availability of USPS Lists**9.4.1 General**

Copies of the list and/or periodic amendments to the list are available to any person paying the annual service fee. The list is provided on a CD-ROM. Information about or requests for the list must be submitted to the manager of the Prohibitory Order Processing Center (see [608.8.0](#) for address). A certified or cashier's check made payable to the USPS must be received in payment before the list is provided to the buyer. More information on CD-ROM format can be obtained from the manager.

9.4.2 Annual Service Fee

The annual service fee is determined by dividing the number of buyers for the previous calendar year into the total cost to the USPS of compiling, processing, printing, and distributing the list.

9.4.3 Using Lists

This list may be used by a mailer only to protect persons whose names appear on it from receiving unwanted sexually oriented advertisements through the mail. No person, including a subscriber to the list, may use the list for any other purpose, and no person may sell, lease, rent, lend, exchange, or license another to use this list for any other purpose, including its use by another to remove names from a list of persons to whom sexually oriented advertisements are to be sent. No person may use the list or a copy of the list for preparing mailings or other lists for sale, lease, rent, loan, exchange, or use by another. Violators are subject to criminal prosecution.

9.5 Envelope Marking

Section 3010(a) authorizes and directs the USPS to provide a mark or notice that must be placed on the envelope or cover of any sexually oriented advertisement sent through the mail, with the sender's name and address. The following provisions implement this authority and direction:

- a. Any person who mails or causes to be mailed any sexually oriented advertisement must place in the upper left corner of the exterior face of the mailpiece, whereon appear the address designation and postmarks, postage stamps, or indicia thereof, the sender's name and address. In the right portion below the postage stamp, or indicia thereof, and above the addressee designation, there must be placed "Sexually Oriented Ad." The words "Sexually Oriented Ad," however, need not be placed on the exterior envelope or cover of a mailpiece containing such an advertisement, if the contents of the mailpiece are enclosed in a sealed envelope or cover, inside the exterior envelope or cover, and the sealed envelope or cover bears conspicuously the words "Sexually Oriented Ad."

- b. The name and address of the sender and the required legend, if it is placed on the exterior face of the mailpiece, must be printed in a type size no smaller than that used for any other word on the envelope or other cover, and never smaller than 12-point type. Such type must be no less conspicuous than the boldest type used to print other words on the exterior face of the mailpiece.
- c. The contrast between the background and printing of the sender's name and address and the contrast between the background and the printing of the required notice must be no less than the contrast between the background and printing of any other word on the envelope or other wrapper.
- d. A clear space no less than 1/4 inch wide must surround the sender's name and address and the required notice, separating each from any other matter on the same envelope or cover.

9.6 Violations

This is a partial list of conduct that may violate 39 USC 3010 or 18 USC 1735:

- a. The mailing of a sexually oriented advertisement in an envelope or other wrapper that does not bear the name and address of the sender and the legend "Sexually Oriented Ad," under [9.5](#).
- b. The mailing directly or indirectly of a sexually oriented advertisement to a person whose name and address are on the list for more than 30 days.
- c. The sale, loan, lease, or licensing of the use of the list or a copy thereof in whole or in part.
- d. The use of the list or a copy of it in whole or in part for any purpose other than to ensure that no mailings of sexually oriented advertisements are made to persons on the list.

9.7 Reporting Unsolicited Advertisements

9.7.1 Submitting a Report

Anyone who wants to report receipt of an unsolicited sexually oriented advertisement after an addressee's name and address are on the list for more than 30 days should submit to any postmaster, or directly to the Prohibitory Order Processing Center manager, the entire mailpiece, including the envelope or other wrapper. The piece must have been opened by the addressee. When submitting the piece, the addressee must endorse the envelope or other wrapper and also the inside contents in substance as follows: "I received this mailpiece on [date]," and sign the statement. If received by the postmaster, the piece must be forwarded promptly to the Prohibitory Order Processing Center manager. The manager then forwards the piece to the appropriate Inspection Service Field Division Office.

9.7.2 Verifying Inclusion on List

A customer wanting to verify inclusion on the list should write to the Prohibitory Order Processing Center (see [608.8.0](#) for address).

509 Other Services

Overview

- [1.0 Address Information System Products](#)
- [2.0 Nonpostal Services](#)

1.0 Address Information System Products

1.1 Delivery Statistics File

Delivery statistics for all city carrier routes, rural routes, highway contract routes, general delivery units, and Post Office box sections are included in the Delivery Statistics File. This database is available on CD-ROM or cartridge for the entire nation. Information by states also is available on CD-ROM. The information is updated monthly through transaction files and can be ordered either with a single base file in the initial shipment or with a base file provided bimonthly. For information on charges and an order form, call 1-800-238-3150. To order the products, send a written request and appropriate payment to the USPS Delivery Statistics File, National Customer Support Center (see [608.8.0](#) for address).

1.2 AIS Database Products

Customers may use USPS Address Information System (AIS) products to obtain correct 5-digit ZIP Codes for the addresses on their mailing lists. These products generally are more economical than mailing list services. Customers with computerized address lists may obtain the City State Product, Five-Digit ZIP Code File, enhanced Line of Travel (eLOT) information, Z4CHANGE File, ZIPMOVE File, Carrier Route File, and ZIP+4 tapes. Information about ordering and using these products is available by calling 1-800-238-3150.

1.3 AIS Database Products

1.3.1 Descriptions

The following products may be ordered from the USPS:

- a. Database Cartridge and Bimonthly Cumulative Updates, which contain a master copy plus bimonthly updates of all add, change, or delete actions that have occurred within the database since the last release date.
- b. Database Cartridge and Monthly Transactions, which contain a master copy plus monthly updates of all add, change, or delete actions that have occurred within the database since the last release date.
- c. Technical Guide, a printed (paper) document that provides data formats and field definitions of the records in AIS products. The guide accompanies any product ordered, but may also be ordered separately or accessed at www.usps.com.

1.3.2 Ordering

The products in [1.3.1](#) may be obtained by sending a written request and appropriate payment to the National Customer Support Center. For information on charges, call 1-800-238-3150.

1.3.3 Specifications

In the written request, mailers must specify the name of the product needed. The request must specify CD-ROM, ASCII, or EBCDIC cartridge at 38K BPI.

1.4 Carrier Route Schemes

Under [507.7.0, Mailing List Services](#), a mailer may ask for a copy of the city scheme used by clerks for sorting mail. The mailer may also ask that the USPS sort address cards, plates, or stencils by carrier routes. However, the mailer is responsible for sorting under the latest bimonthly Carrier Route File scheme. The mailer is considered to have made a sorting error only if the mail was not sorted according to the latest bimonthly Carrier Route File scheme.

1.5 Delivery Statistics

In Post Offices with rural delivery, highway contract box delivery, and Post Office box delivery, postmasters must provide, at no charge, the following information for their respective offices:

- a. Number of Post Office boxes rented.
- b. Route numbers, number of boxes, and number of families on each rural and highway contract box delivery route (including seasonal data, if applicable).
- c. Number of families served or number of business places served by rural or highway contract box delivery routes within the total delivery area.

1.6 Computerized Delivery Sequence (CDS)

The Computerized Delivery Sequence (CDS) file is a 5-digit ZIP Code-based electronic customer product that provides and updates delivery sequence address information by carrier route for qualified mailers. Mailers must first qualify for CDS information through the sequencing described in [507.8.0](#). Once a mailer has qualified for a 5-digit ZIP Code area, delivery sequence information is made available via electronic media. The CDS file is updated bimonthly.

1.7 Delivery Sequence File² (DSF²)

The Delivery Sequence File² (DSF²) is a computerized file that contains information on all delivery point addresses serviced by the USPS, with the exception of general delivery. Each matching address record is assigned the ZIP+4 code, carrier route code, delivery sequence, delivery type, and seasonal delivery information. The DSF² is updated monthly and is available through licensees approved by the USPS. A list of licensees is available at www.ribbs.gov or by contacting the National Customer Support Center (see [608.8.0](#) for address).

1.8 Enhanced Line-of-Travel (eLOT) Product

The USPS provides an electronic product called "eLOT." The USPS requires address lists to be processed through CASS-certified ZIP+4 address-matching software before being processed against an eLOT product. Records that are not ZIP+4-coded may not be used with this product. eLOT products are updated bimonthly and are available for purchase from the National Customer Support Center (see [608.8.0](#) for address).

2.0 Nonpostal Services

2.1 **Bird Hunting Stamps**

Migratory bird hunting and conservation stamps (“bird stamps”) are required by federal law for the hunting of migratory birds, such as ducks and geese. As a public convenience, these stamps are sold at all Post Offices in CAGs A through J and, based on demand, at designated offices in CAGs K and L. These Post Offices act as agents of the federal government for this function. Migratory bird stamps are nonredeemable and all sales are final.

2.2 **U.S. Savings Stamps**

Post offices no longer redeem U.S. savings stamps posted in albums, previously acceptable as postal funds. Customers should contact a Federal Reserve Bank or branch, or mail albums at their own risk to the Bureau of the Public Debt, U.S. Department of the Treasury.

2.3 **U.S. Savings Bonds**

The USPS discontinued over-the-counter sales of U.S. savings bonds on March 26, 1977, at the request of the Treasury Department. Inquiries should be made to local financial institutions or the Treasury Department.

2.4 **Postal Savings**

The Postal Savings System was discontinued by Public Law 89-377, approved March 28, 1966. The effective date for closing the system was April 27, 1966. The final expiration date was July 13, 1985, for inquiries that could lead to recovery of money invested in Postal Savings Accounts and/or Postal Savings Certificates.

- 9.0 Perishables
- 10.0 Hazardous Materials
- 11.0 Other Restricted and Nonmailable Matter
- 12.0 Written, Printed, and Graphic Matter Generally

1.0 General Standards

1.1 Determining Mail Processing Categories

There are five mail processing categories for mailpieces: letter, flat, machinable parcel, irregular parcel, and outside parcel. USPS assigns each mailpiece to one of these categories based on the physical dimensions and characteristics of the mailpiece using the longest dimension as the length, regardless of the placement or orientation of the delivery address on the piece. For example, a mailpiece that is 5 inches by 8 inches and at least 0.007 inch thick is within the range of letter-size dimensional standards in [101](#) and [201](#). See the physical standards for processing categories in [101](#) for retail (single-piece price) mail, [201](#) for discount letters, [301](#) for discount flats, and [401](#) for discount parcels.

1.2 Minimum Dimensions

For mailability, the following standards apply:

- a. All mailpieces must be at least 0.007 inch thick.
- b. All mailpieces (except keys and identification devices) that are 1/4 inch thick or less must be:
 1. At least 3-1/2 inches high and at least 5 inches long.
 2. Rectangular, with four square corners and parallel opposite sides (see [Exhibit 1.2b2](#)), or with finished corners and parallel opposite sides under [1.2b3](#) or [1.2b4](#), unless prepared as Customized Market Mail under [705.1.0](#).

601.1.2

Exhibit 1.2b2 Minimum Dimensions, Pieces 1/4" Thick or Less

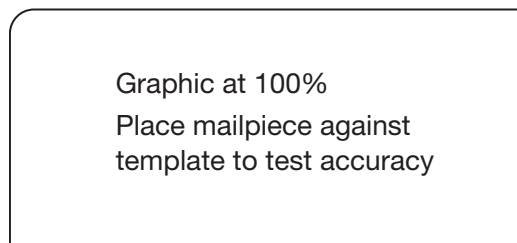

Minimum thickness = 0.007"

3. Letter-size, card-type mailpieces made of cardstock and flat-size mailpieces may have finished corners that do not exceed a radius of 0.125 inch (1/8 inch). See [Exhibit 1.2b3](#).

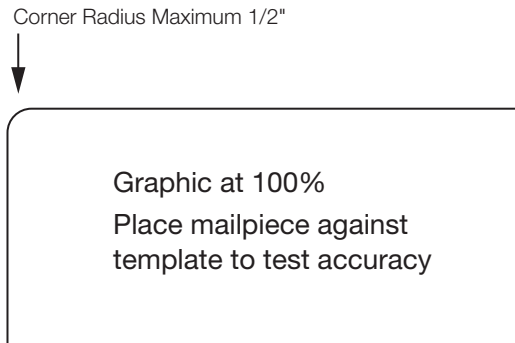

Exhibit 1.2b3 Maximum Corner Radius

Corner Radius Maximum 1/8"

4. Except for machinable parcels described in [401.1.5.2](#), pieces mailed at parcel prices or Not-Flat Machinable prices may have finished corners that do not exceed a radius of 0.5 inch (1/2 inch). See [Exhibit 1.2b4](#).

Exhibit 1.2b4 Maximum Corner Radius for Parcels

1.3 Maximum Dimensions and Weight

No mailpiece may weigh more than 70 pounds. Except for Parcel Post, no mailpiece may measure more than 108 inches in length and girth combined. For parcels, length is the distance of the longest dimension and girth is the distance around the thickest part.

1.4 Length and Height

Determine the processing category (see [1.1](#)) based on the physical dimensions and characteristics of the mailpiece, without regard to address placement. Then, determine length and height as follows:

- a. *Letter-size pieces.* For the purpose of determining mailability or machinability (see [1.5](#)), the *length* is the dimension parallel to the delivery address as read; the *height* is the dimension perpendicular to the length.
- b. *Flat-size pieces.* The *length* of a flat-size mailpiece is the longest dimension. The *height* is the dimension perpendicular to the length.
- c. *Parcels and Not Flat-Machinable pieces.* The *length* is the longest dimension.
- d. *Customized MarketMail pieces.* See [705.1.0](#).

1.5 Nonmailable and Nonmachinable Placement of Address

The placement of the address on a letter-size mailpiece may render a piece nonmailable or nonmachinable. If the length (the dimension parallel to the address) of a letter-size mailpiece is not at least 5 inches, it is nonmailable. If the height (the dimension perpendicular to the length) of a letter-size mailpiece is not at least 3-1/2 inches, it is nonmailable. If the aspect ratio (length divided by height) is not within 1.3 to 2.5 (inclusive), the piece is a nonmachinable letter. For example:

- a. For a letter-size piece that is 4 inches by 6 inches, if the address is parallel to the 4-inch dimension, it is 4 inches long, which is less than the minimum length of 5 inches required in [1.2](#). Therefore, this piece is nonmailable.

- b. Following the process in 1.1, a piece that is 5 inches by 8 inches (and within letter-size thickness dimensions) is a letter. If the address is parallel to the 8-inch dimension, the piece is 8 inches long and 5 inches high. The aspect ratio of this piece is 1.6, so it is a mailable letter within machinable dimensions for length and height.
- c. For a letter-size piece that is 5 inches by 8 inches, if the address is parallel to the 5-inch (shorter) dimension, the piece is 5 inches long and 8 inches high. The aspect ratio of this piece is 0.625, which is not within 1.3 to 2.5, so it is mailable as a nonmachinable letter.

1.6 General Mailability and Right of Refusal

Articles presented for mailing must be prepared under the general and specific standards in this document. The USPS accepts properly packaged and marked parcels but reserves the right to refuse nonmailable or improperly packaged articles or substances. Additional or other standards can apply to overseas military Post Offices and international mail.

1.7 Mailer's Responsibility

It is the mailer's responsibility to refrain from depositing nonmailable matter in the mail. The mailer must comply with applicable postal laws and regulations governing mailability and preparation for mailing, as well as nonpostal laws and regulations on the possession, treatment, transmission, or transfer of particular matter. Information about USPS standards is available from postmasters, business mail entry managers, and the PCSC manager (see [608.8.0, USPS Contact Information](#)).

2.0 Packaging

2.1 General

Mailers must package mailpieces to withstand normal transit and handling without content or package breakage, injury to USPS employees, or damage to other mail. Mailers also must package contents to prevent their deterioration. See [2.2](#) through [2.8](#) for specific types of items. Mailers must follow these additional general standards for packaging:

- a. Cushion fragile items to withstand handling in processing, transportation, and delivery.
- b. Package contents so they do not shift within the mailing container.
- c. Brace and cushion heavy items to prevent damage to other mailpieces.

2.2 Stationery

Stationery-type items thicker than 1 inch or heavier than 1 pound are not accepted in letter-style envelopes. The contents of these packages must be secured by tying, banding, or using partitions on close-fitting interior containers to prevent shifting.

2.3 Odd-Shaped Items in Paper Envelopes

Pens, pencils, key rings, bottle caps, and other similar odd-shaped items are not permitted in letter-size or flat-size paper envelopes unless they are wrapped within the other contents of the envelope to streamline the shape of the mailpiece and

prevent damage during postal processing. If an odd-shaped item is not properly wrapped, it could burst through the envelope and cause injury to employees and damage to USPS processing equipment. Odd-shaped items that are properly wrapped within paper envelopes and sent at letter prices may be subject to the nonmachinable surcharge under [133.1.10](#) or [233.4.3](#) for First-Class Mail letters, or the nonmachinable prices under [243.5.5](#) for Standard Mail letters. Certain types of odd-shaped items, when properly wrapped, are permitted as automation price letter-size mail subject to the standards in [201.3.0](#). Flat-size automation price mail is subject to the uniform thickness requirement in [301.3.0](#).

2.4 Liquids

Mailers must mark the outer container of a mailpiece containing liquid to indicate the nature of the contents. Mailers must package and mail liquids under the following conditions:

- a. Use screw-on caps, soldering, clips, or similar means to close mailpieces containing liquids. Do not use only friction-top closures (push-down types).
- b. Liquids in steel pails and drums with positive closures, such as locking rings or recessed spouts under screw-cap closures, may be mailed without additional packaging.
- c. Package glass and other breakable containers of liquid with a capacity of more than 4 fluid ounces according to the following requirements:
 1. Cushion the primary container with material sufficient to absorb all leakage in case of breakage.
 2. Place the primary container inside another sealed, leakproof container (secondary container), such as a can or plastic bag.
 3. Use an outer mailing container that is strong enough to protect the contents.
- d. As an alternative to [2.4c](#) above, mailers may use containers certified by the International Safe Transit Association (ISTA) that passed ISTA's Test Procedure 3A. Mailers must provide their ISTA 3A Package-Product Certification Notice at the time of mailing as verification that the mailpieces they are submitting passed the required performance test.

2.5 Aerosols

Aerosols (containers under pressure) are hazardous materials and must be constructed to prevent accidental discharge of the contents during postal handling. Mailable aerosol containers must be packaged under [10.12](#).

2.6 Perishable, Hazardous, and Restricted Items

Mailpieces containing perishable, hazardous (including infectious substances), biological, or restricted materials are subject to standards in [8.0](#) through [11.0](#).

2.7 High-Density Items

High-density items are solid objects (such as tools, hardware, and machine and auto parts) whose weights are comparatively high for their volumes. Package high-density items weighing more than 15 pounds so that the contents do not exert more than 60 pounds per square foot on the smallest side of the mailing container.

601.2.8

2.8 Load Type

The following three terms describe types of loads, based on content, degree of protection, and strength of the mailing container.

- a. An *easy load* contains items of moderate density that either completely fill the mailing container or are packaged in interior containers that completely fill the mailing container. Easy load items are not easily damaged by shock, compression, or puncture.
- b. An *average load* contains moderately concentrated items packaged directly into a mailing container. Mailers can prepackage average load contents by nesting items within partitions or in separate paperboard boxes to stabilize items to prevent shifting and damage.
- c. A *difficult load* contains items that require a high degree of protection to prevent shock, puncture, or distortion to the items or the mailing container. The Postal Service does not accept in paperboard boxes, bags, or wraps difficult loads such as fragile items; delicate instruments; and high-density, small-bulky items.

3.0 Acceptable Mailing Containers**3.1 Envelopes**

Mailers must prepare envelopes according to the following weight limits and conditions:

- a. For mailpieces weighing no more than 1 pound and measuring no more than 1 inch thick, mailers may use letter-style (flat, nonreinforced) envelopes for stationery and similar nonrigid material.
- b. For mailpieces weighing more than 1 pound up to 5 pounds or measuring more than 1 inch thick, mailers may use envelopes if they are sturdier than nonreinforced letter-style envelopes. Acceptable envelopes include those made either from paper equivalent to 28-pound basis weight (or greater) or from extra-strength materials with a Mullen strength of more than 90 pounds per square inch.
- c. Mailers may use envelopes for odd-shaped items if the mailpiece meets the standards for the class of mail (see [2.3](#)).
- d. Envelopes for photographic film are acceptable if made from paper equivalent to 24-pound basis weight or greater.

3.2 Boxes

Boxes are acceptable, subject to these standards:

- a. Paperboard boxes may be used for easy and average loads to 10 pounds.
- b. Metal-stayed paperboard boxes may be used for easy and average loads to 20 pounds.

- c. Solid and corrugated fiberboard boxes may be used according to the limits in the following chart, unless otherwise specified. *The first maximum reached governs the grade of the box used.*

MAXIMUM WEIGHT OF BOX AND CONTENT (pounds)			
Easy or Average Load	Difficult Load	MAXIMUM LENGTH AND GIRTH (inches)	BOX GRADE
20	—	67	12 5
40	20	100	175
65	45	108	200
70	65	108	275
—	70	108	350

- d. Wood, metal, or plastic boxes may be used for all types of loads, assuming adequate construction.
- e. The size of the box must be adequate to contain the items and provide enough space for cushioning material.
- f. Good, rigid, used boxes with all flaps intact are acceptable.
- g. Boxes with difficult loads to out-of-town destinations must be reinforced with banding about every 8 inches in each direction around the package.

3.3 Fiberboard Tubes and Similar Long Containers

Mailers may use fiberboard tubes and similar lengthy containers for mailing if the containers meet the following requirements:

- The length must not exceed 10 times the girth.
- When using friction slide closures as end caps, reinforce closures by encircling all seams with tape. Crimped or taped end closures are acceptable only for lightweight rolled items (such as posters or charts).
- The strength of the tube ends must be at least equal to the tube sidewall strength, unless the contents are lightweight rolled items.
- Sidewall strength of tubes must be equal to solid fiberboard that is:
 - At least 1/16 inch thick for tubes less than 18 inches long.
 - At least 3/32 inch thick for tubes 18 to 32 inches long.
 - At least 5/32 inch thick for tubes more than 32 inches long.

3.4 Paper Bags and Wraps

For easy loads of up to 5 pounds, paper bags and wraps are acceptable when at least of a 50-pound basis weight (the strength of an average large grocery bag) and the items are immune from impact or pressure damage. A combination of plies adding up to or exceeding 50-pound basis weight is not acceptable. For easy and average loads of up to 20 pounds, reinforced bags or bags with a minimum of

601.3.5

70-pound basis weight are acceptable. Nonreinforced loose-fill padded bags are not acceptable as exterior containers, unless the exterior ply is at least 60-pound basis weight.

3.5 Plastic Bags

Plastic bags must be at least 2 mil thick polyethylene or equivalent for easy loads up to 5 pounds; 4 mil thick for easy loads up to 10 pounds.

3.6 Plastic Film

Heat-shrinkable plastic film—either irradiated polyethylene, linear low-density polyolefin, or copolymer—may be used as packaging for mailpieces under the following conditions only:

- a. Film must be at least 3/4 (0.75) mil thick for an easy load up to 5 pounds.
- b. Film must be at least 1-1/4 (1.25) mil thick for an average load up to 5 pounds.
- c. Film must be at least 1-1/2 (1.5) mil thick for an average load parcel up to 10 pounds, only when mailers prepare the parcels on 5-digit/scheme, merged 5-digit/scheme, or finer level pallets.
- d. When requested, mailers must provide written certification that these types of film are being used.

3.7 Cloth Bags

Cloth bags are acceptable for easy and average loads of up to 10 pounds, if the seams of the bags equal the strength of the basic material.

3.8 Difficult Load

The USPS does not accept bags, bales, or wraps with difficult loads. The contents in bags, bales, and wraps must be compressed when possible.

3.9 Bales

Bales are acceptable within postal weight limits, if adequately compressed and reinforced to contain the material.

3.10 Cans and Drums

Mailers may mail items in cans and drums with positive closures (such as clips). Friction closures alone are not acceptable. Mailers must shield protruding devices, such as locking rings, with padding material to prevent injury to USPS employees and damage to equipment or other mail.

4.0 Cushioning, Closure, and Reinforcement**4.1 Volume**

Loose-fill cushioning must overfill the container before closure to hold the item and prevent its movement to an outside surface of the container or to other items in the package. Shock and pressure forces must be dissipated over as much of the surface of the item as possible.

4.2 Multiple Items Within Container

When multiple items are inside a single mailing container, mailers must cushion items to protect them from each other as well as from external forces. Do not package high-density heavy items with fragile items unless extreme care is taken to separate them from each other. Mailers must adequately stabilize heavy items within the package.

4.3 Tape

Cellophane and masking tape may not be used for closure or reinforcement of packages but may be used to augment adhesive closures on envelopes or to cover staples on bags.

4.4 Paper Tape

Paper tape must be at least 60-pound basis weight kraft. The adhesives on gummed tapes must be adequately activated before application and firmly applied with the tape extending at least 3 inches over the adjoining side of the box.

4.5 Tape Size

Except for pressure-sensitive filament tape, tapes used for closure and reinforcement may not be less than 2 inches (or 48 mm metric) wide. Nonreinforced plastic tapes must be at least as strong in the cross direction as in the machine (long) direction.

4.6 Adhesive

Adhesives used for closure on box flaps or on tapes must remain serviceable from -20 degrees to +160 degrees Fahrenheit. When using hot-melt adhesive, apply adhesive using one of these methods:

- a. Apply hot-melt adhesive to 25% of the area where the outer flap lies over the inner flap.
- b. Apply at least four strips of hot-melt adhesive on each part of the box flap where the outer flap overlays the inner flap as follows:
 1. Use strips at least 3/16 inch wide after compression.
 2. Place the strips not more than 1-1/2 inches apart, with the first strip no more than 1/2 inch from the center seam.
 3. Place all strips along the full width of the inner flap.

4.7 Banding

When banding is used for closure and reinforcement, it must encircle the length and girth of the package at least once. If twine or cord is used for closure and reinforcement, it must be at least 20-pound tensile strength and secured at an intersection at least once on each side. Loose strapping and metal strapping are not acceptable.

4.8 Staples and Steel Stitching

Mailers may use staples or steel stitching to close boxes as follows:

- a. Place the staples or stitching within 1-1/4 inches from the ends of the box.

601.5.1

- b. Space staples or steel stitches not more than 5 inches apart for easy and average loads and not more than 2-1/2 inches apart for difficult loads. If placing staples farther apart, apply strips of 3-inch-wide reinforced tape in the gaps between the staples.
- c. Tightly clinch staples to prevent protrusions. Mailers must remove and replace inadequately clinched staples before mailing.

5.0 Handling, Content, and Extra Service Markings

5.1 Handling, Content, and Extra Service

Certain markings may be used to identify handling, content, and extra service. Unauthorized markings not designating price, class, address, handling, content, or extra service are not permitted. Extraneous information, which can be confused with ZIP Codes, may not be placed next to or directly under the last line of the delivery address. Any obsolete marking on a container to be reused for mailing must be obliterated. The following markings must be placed in an area below the postage and above the addressee's name in the delivery address and to the right of the return address:

- a. Handling markings such as "Fragile" must be applied only to packages containing delicate items such as glass and electrical appliances.
- b. Content markings such as "Perishable" must be applied to any package containing items or substances that can degrade or decompose rapidly such as meat, produce, plants, or certain chemical and hazardous materials samples. Restricted and hazardous articles must be marked and labeled under applicable standards. A container improperly identified by content is not acceptable for mailing (e.g., a box marked "Art Supplies" that contains flammable liquid or a box marked "Bleach" that contains clothing).
- c. Extra service markings such as "Return Receipt Requested" must use the wording or label required by the applicable extra service standards.

5.2 Method

The mailer must mark the package using material that is not readily water soluble or easily smeared or rubbed off. The marking must be readable at a distance of 30 inches. Marking methods or surfaces must permit application and retention of adhesive stamps, postage meter impressions, and postal endorsements made with hand stamp, ballpoint pen, or Number 2 pencil. Any address label or envelope must be firmly affixed to the mailing container, with no more than an 1/8-inch separation between the ends of the label or envelope and the container.

6.0 Mailing Containers—Special Types of Envelopes and Packaging

6.1 Express Mail and Priority Mail Packaging

Express Mail and Priority Mail packaging provided by the USPS must be used only for Express Mail or Priority Mail, as applicable. Regardless of how the packaging is reconfigured or how markings may be obliterated, any matter mailed in USPS-provided Express Mail or Priority Mail packaging is charged the appropriate Express Mail or Priority Mail price.

6.2 Green Diamond Border Envelope

An envelope or card bearing a green diamond border must be used only for First-Class Mail. Any envelope or card bearing a green diamond border is charged the appropriate First-Class Mail price, regardless of mail content or of requested class or service. When printed on letter-size mail, the border must not enter the OCR read area or barcode clear zone unless a delivery point barcode appears in the address block as described in [202.5.7](#).

6.3 Window Envelope

For all letter-size and flat-size mail in window envelopes, every character in the delivery address, including any postal barcode, marking, or endorsement, must be completely visible through the window throughout the full range of movement of the insert bearing the delivery address. Any window envelope used for letter-size or flat-size mail claimed at automation prices or for letter-size mail claimed at Enhanced Carrier Route high density or saturation prices must also meet the barcoding standards for letters and flats in [708.4.0](#). Any window envelope used for letter-size or flat-size mail must meet the following additional standards:

- a. The address and any barcode visible through the window must be printed on white paper or paper of a very light color.
- b. A clear space of at least 1/8 inch is required between the address block, which includes any optional endorsement line, and the top, bottom, and left and right edges of the address window, and must remain when the insert is moved to its full limits in each direction within the envelope to ensure efficient processing and delivery. See [202.5.7](#) (letters) or [302.4.6](#) (flats) for barcode clearances when the address block contains a barcode. For nonautomation price mail, the bottom edge of the address window must not extend more than 1/8 inch into the barcode clear zone as defined in [202.5.1](#). Any letter-size envelope containing a window that intrudes into the barcode clear zone is not eligible for MLOCR or RVE *FASTforward* processing options for the Move Update standard in [233.3.5](#).
- c. Window cover material, if used over the address window, must be made of a nontinted clear or transparent material (e.g., cellophane or polystyrene) and must permit the address, as viewed through the window material, to meet the print contrast ratio (PRC) standards in [708.4.0](#) to ensure efficient processing and delivery. Glassine may be used for window cover material. All edges of the window cover material must be glued securely to the envelope. The bottom edge of an address window must be at least 1/2 inch from the bottom edge of the envelope.

601.6.4

- d. For letter-size mail, the delivery address window must be parallel with the longest edge of the envelope. For flat-size mail, the address window may be parallel with any edge of the envelope.
- e. For Registered Mail, the opening on a window envelope must be covered as described in [503.2.4.8](#).

6.4 Reusable Mailpiece

A reusable mailpiece is an envelope, self-mailer, or similar mailpiece designed for two-way mailing. The recipient removes part of the original mailpiece or refolds the piece to cover the delivery address of the recipient and reveal the delivery address of the originator (sender) for return. Except for reusable mailpieces that originate as permit imprint mailings, the piece must meet these standards:

- a. **Basic Design.** The piece must be designed and constructed to allow the recipient to reconfigure or modify the piece to remove or obscure the address, POSTNET barcode, postage, and any marking or endorsement that applied to the piece when it was originally mailed so that these elements are not mistaken by USPS employees or mail processing equipment as applying to the returned piece. The instructions on the piece must ensure that the recipient can prepare the piece correctly for remailing. If a reusable mailpiece does not meet the applicable standards, the piece must be re-enveloped and new postage affixed before distribution by the originator.
- b. **Distribution.** When the piece is mailed by the originator, the piece must show only one complete delivery address and, if used, the corresponding barcode; the appropriate postage; and any required marking or endorsement. The originator's address and barcode for returning the piece and any postage, marking, endorsement, and facing identification mark (FIM) provided for that purpose must be obscured so that they are not mistaken by USPS employees or postal mail processing equipment as applying to the originating piece.
- c. **Return.** When the piece is reconfigured for return from the recipient to the originator, the piece must show only one complete delivery address and, if used, the corresponding barcode; the appropriate postage; and any required marking, endorsement, and FIM. If a reusable mailpiece does not meet the applicable standards, the piece must be re-enveloped and new postage affixed before return by the recipient.

6.5 Reusable Mailpieces That Originate as Permit Imprint Mailings

As an alternative to the standards in [6.4](#), reusable mailpieces that originate as permit imprint mailings may meet these standards:

- a. **Basic Design.** The piece must be designed and constructed so that the recipient may reconfigure or modify it to remove or obscure the address that applied to the piece when it was originally mailed. The instructions on the piece must ensure that the recipient can prepare the piece correctly for remailing. If a reusable piece does not meet the applicable standards, the piece must be re-enveloped and new postage affixed before distribution by the originator.
- b. **Distribution.** When reusable mailpieces are originally mailed, postage must be paid with permit imprint and a complete address and corresponding barcode must be located in the address block. Reusable pieces must be entered at a

postal facility as part of a permit imprint mailing. On mailpieces other than window envelopes, the address block for return of the piece (including the delivery address and a corresponding barcode) will be located on the reverse side. If included, prepaid reply postage must be located or obscured so that it is not mistaken by postal mail processing equipment or employees as applying to the originating piece.

- c. Return. When the piece is reconfigured for return from the recipient to the originator, only one complete address with a corresponding barcode located in the address block and a FIM must be visible on the piece. If a reusable mailpiece does not meet the applicable standards, the piece must be re-enveloped and new postage affixed before return by the recipient.

7.0 Packaging Standards for Mail Processed at Bulk Mail Centers

7.1 High-Density Items

High-density items (see [2.7](#)) weighing from 20 to 45 pounds must be packaged in fiberboard boxes constructed of a minimum 200-pound test board or equivalent wood, metal, or plastic containers. Plastic, metal, and similar hard containers must be packaged, treated, or otherwise prepared so that their coefficient of friction or ability to slide on a smooth, hard surface is similar to that of a domestic-class fiberboard box of the same approximate size and weight. Closure must be done by staples, heat-shrinking, adhesives, or tape. Boxes without inner packing or containing loose material must be reinforced or banded with reinforced paper or plastic tape, pressure-sensitive filament tape, or firmly applied nonmetallic banding. Internal blocking and bracing, including the use of interior containers, cut forms, partitions, dunnage, and liners, must be used as required so that packages are capable of maintaining their integrity without damage to the contents if dropped once on one of their smallest sides on a solid surface from a height of 3 feet. These items from 45 to 70 pounds must be similarly packaged, closed, and reinforced, except that exterior containers must be a minimum of 275-pound test fiberboard or equivalent.

7.2 Books

Books with 24 pages or more, fastened together along one edge between hardback, paperback, or self-covers, and more than 1 inch thick or 1 pound must not be accepted in letter-style nongusseted, flat envelopes. Envelopes meeting the standards in [3.1b](#), or other appropriate packaging materials in [3.0](#), must be used. Void spaces within multiple book containers must be filled with dunnage or otherwise stabilized to prevent shifting or damage to the contents or container. Shipments of books are packaged according to these weight categories:

- a. Up to 5 pounds, closure must be by multiple friction closures, completely clinched staples, heat-sealing, adhesives, tape, or nonmetallic banding. Although shrinkwrap is not acceptable as the only packaging for hardback books exceeding 1 pound or 1 inch thick, it may be used on the exterior of otherwise acceptable containers. Shrinkwrap may be used as the only method of packaging for paperback books up to 3 pounds.

601.7.3

- b. From 5 to 10 pounds, closure must be by tape, nonmetallic banding, or adhesives. Reinforced tape or nonmetallic banding is adequate for both closure and reinforcement. Nonmetallic banding must be firmly applied to the point that the straps must be tightened until they depress the carton at the edges.
- c. From 10 to 25 pounds, reinforced tape or nonmetallic banding is adequate for closure and reinforcement. Nonmetallic banding must be firmly applied to the point that the straps tighten until they depress the carton at the edges.
- d. From 25 to 50 pounds, hardbound books must be packaged in 275-pound test fiberboard boxes and paperback books must be packaged in 200-pound test fiberboard boxes.
- e. From 50 to 70 pounds, hardbound books must be packaged in 350-pound test fiberboard boxes and paperback books must be packaged in 275-pound test fiberboard boxes.

7.3 Soft Goods

Boxes containing soft goods (e.g., textiles, clothing, sheets, blankets, pillows and pillowcases, draperies, cloth, and any wearing apparel) weighing up to 5 pounds must be filled to capacity. Soft goods between the weight range of 5 to 20 pounds must be packaged in material with a minimum 70-pound outer ply basis weight. Closure of bags must be by completely clinched staples, heat-sealing, adhesives, sewing, or tape. Improperly clinched staples must be removed. Shrinkwrapping is not acceptable as the only packaging. Fiberboard containers must be made of at least 200-pound test board for soft goods weighing from 20 to 45 pounds and at least 275-pound test board for soft goods weighing from 45 to 70 pounds.

7.4 Sound Recordings

Shipments of recordings (e.g., records and cassette tapes in paper sleeves, paperboard, or chipboard shells) weighing up to 10 pounds must be packed in 70-pound basis weight envelopes for weights up to 3 pounds, or outer corrugated, fiberboard containers for weights up to 10 pounds. When shipments weigh from 20 to 40 pounds, multiple shell containers must be packaged in 175-pound test fiberboard containers or equivalent and closed and reinforced by adhesives, kraft paper tape, equivalent plastic tape, or staples. When shipments weigh from 40 to 65 pounds, multiple shell containers up to 65 pounds must be packaged in 200-pound test fiberboard containers or equivalent and closed and reinforced as described for 20- to 40-pound containers, except that containers must be reinforced about every 8 inches around the package. Shipments weighing more than 65 pounds must be packaged in 275-pound test fiberboard containers or equivalent.

7.5 Magnetic Tapes

Shipments of multiple magnetic tapes and cartridges up to 5 pounds must be packed in outer fiberboard containers or chipboard containers (minimum 0.022 mil). Closure must be by multiple friction closures, completely clinched staples, heat-shrinking or adhesives, or by tape. Paper tape must be a minimum of 60-pound basis weight kraft. Shrinkwrapping is acceptable on the exterior of otherwise acceptable boxes of multiple tape shipments. Standards for shipments weighing from 5 to 20 pounds are similar, except that closure must be only by the

use of adhesives, tape, or staples. Standards are also similar for shipments weighing from 20 to 40 pounds, except that the contents must be placed in 175-pound test containers that are banded or reinforced at two points with reinforced paper or plastic tape, pressure-sensitive filament tape, or firmly applied nonmetallic banding. Shipments from 40 to 65 pounds must be similarly packaged, except that fiberboard containers of at least 200-pound test board or equivalent must be used. Shipments weighing more than 65 pounds must be packaged in 275-pound test fiberboard containers or equivalent.

8.0 Nonmailable and Restricted Articles and Substances Generally

8.1 Nonmailable Matter—General

Certain potentially undesirable, harmful, or dangerous matter is nonmailable by statute or regulation. The standards for nonmailable articles and substances and the special conditions under which certain of these articles and substances may be mailed are in 8.0 through 10.0 and 11.0. The standards in 12.0, *Written, Printed, and Graphic Matter Generally*, 508.8.0, *Pandering Advertisements*, and 508.9.0, *Sexually Oriented Advertisements*, apply to nonmailable matter in written, printed, or graphic form and contain the rules on advising mailers of matter covered in 8.0 through 12.0, 508.8.0, and 508.9.0. The standards in 8.0 through 10.0 and 11.0 apply to the military postal system, its employees, and undelivered mail that is or has been in the official custody of this system and its employees. References to Inspection Service apply to the Postal Inspection Service and authorized employees, not military investigative services.

8.2 Basic Premise

The basic premise of the postal mailability statutes is that anything “which may kill or injure another, or injure the mails or other property...” is nonmailable. Several statutory exceptions to this rule permit mailings of otherwise nonmailable matter under specified conditions. Statutory exceptions apply to live scorpions, poisonous drugs and medicines, poisons for scientific use, switchblade knives, firearms, motor vehicle master keys, locksmithing devices, and abortive and contraceptive devices. The statutes also provide that the USPS may, by regulation, permit the mailing, under required conditions of preparation and packing, of potentially harmful matter not “outwardly or of [its] own force dangerous or injurious to life, health, or property.” The standards in 8.0 summarize the statutory prohibitions and exceptions. The mailability standards that apply to perishable, hazardous, and restricted matter are detailed in 9.0, 10.0, and 11.0, respectively. Publication 52, *Hazardous, Restricted, and Perishable Mail*, contains additional clarification and further describes the conditions of preparation and packaging under which the USPS accepts for mailing potentially harmful matter that is otherwise nonmailable. Publication 52 also contains detailed information on the mailability of specific hazardous materials.

8.3 Other Nonmailable Matter

Matter is nonmailable also when it cannot be delivered because of an illegible, incorrect, or insufficient address, or when it does not meet USPS standards for mail preparation, classification, postage prices, size, or weight.

601.8.4

8.4 Restricted Matter—General

Restricted matter is an article or substance prohibited or limited by Title 18, U.S. Code (liquors, abortive and contraceptive devices, odd-shaped items in envelopes, motor vehicle master keys, and locksmithing devices). It also includes matter not otherwise described in 8.0 through 10.0 and 11.0 that is restricted by 18 USC 1716(a) because it may, under conditions encountered in the mail, be injurious to life, health, or property (obnoxious odors, liquids, powders, and battery-powered devices).

8.5 Harmful Matter—General

Except as provided in this document, any article, composition, or material is nonmailable if it can kill or injure another or injure the mail or other property. Harmful matter includes, but is not limited to:

- a. All types and classes of poisons, including controlled substances.
- b. All poisonous animals except scorpions mailed for medical research purposes or for the manufacture of antivenom; all poisonous insects; all poisonous reptiles; and all types of snakes, turtles, and spiders.
- c. All disease germs or scabs.
- d. All explosives, flammable material, infernal machines, and mechanical, chemical, or other devices or compositions that may ignite or explode.

8.6 Hazardous Materials

Harmful matter also includes regulated hazardous materials as defined in 10.0 that are likely to harm USPS employees or to destroy, deface, or otherwise damage mail or postal equipment. This includes materials such as caustic poisons (acids and alkalies), oxidizers, or highly flammable liquids, gases, or solids; or materials that are likely, under conditions incident to transportation, to cause fires through friction, absorption of moisture, or spontaneous chemical changes or from retained heat from manufacturing or processing, including explosives or containers previously used for shipping high explosives with a liquid ingredient (such as dynamite), ammunition, fireworks, radioactive materials, matches, or articles emitting obnoxious odors.

8.7 Marking of Restricted Articles or Substances**8.7.1 Content**

Except for firearms and switchblade knives, controlled substances, radioactive materials, and motor vehicle master keys and locksmithing devices, the identity of the content of anything mailed under 8.0 through 10.0 and 11.0 must be plainly and durably marked on the address side of each mailpiece as a condition of mailing. When the content is a hazardous material as defined in 49 CFR, each mailpiece must be marked as required in 10.0.

8.7.2 Addressing

For any matter mailed under the provisions in 8.0 through 10.0 and 11.0, the recipient's name and address must be affixed or applied directly to the mailpiece using a material or method that is not water-soluble and not easily smeared or rubbed off. Except for diagnostic specimen mailpieces using a business reply mail format and nonregulated materials, a return address that includes the sender's

name and address must appear on all matter mailed under 8.0 through 10.0 and 11.0. The return address, when required, must be applied using a material or method that is not water-soluble and not easily smeared or rubbed off.

8.7.3 Warning Label

Except for controlled substances mailed under 11.0, any label or other marking required by federal law or the regulation of any federal agency must be securely affixed or applied to the address side of each mailpiece. See 10.0 for the warning label requirements that apply to the mailing of hazardous materials.

8.8 Mailer Responsibility

The mailer must comply with applicable postal laws and regulations governing mailability and preparation for mailing, as well as nonpostal laws and regulations on the shipment of particular matter.

8.9 Statutory System

18 USC 2510, et seq., constitutes a statutory system of regulating interception of wire, oral, or electronic communications. Any person contemplating the mailing of a device primarily useful for surreptitiously effecting such interception should consider the provisions of 18 USC 2510, et seq., particularly section 2512. This statute makes it a crime, except as otherwise provided in 18 USC 2510, et seq., for a person intentionally to send through the mail any device whose design that person knows, or has reason to know, renders the device primarily useful for surreptitious interception of wire, oral, or electronic communications. The statute does not declare that such a device in itself constitutes nonmailable matter but, as indicated, provides criminal penalties for the act of intentionally mailing it.

8.10 Other Laws and Regulations

Particular matter may be mailable under postal statutes and regulations, but customers may have responsibilities under nonpostal statutes and regulations concerned with possession, treatment, transmission, or transfer of such matter (e.g., 49 CFR 100-185 (Department of Transportation Regulations); the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Public Law 91-513), 21 USC 801, et seq.; and the Gun Control Act of 1968 (Public Law 90-618), 18 USC 921, et seq.).

8.11 Refusal of Nonmailable Matter

USPS employees may refuse an article for mailing if the content of the article is described by the mailer or otherwise revealed to be nonmailable.

8.12 Authorizing Mailability

A postmaster may decide whether articles and substances other than written, printed, or graphic matter are nonmailable and, where appropriate, is authorized to refuse to accept for mailing such matter determined to be nonmailable. The mailer may seek a review of the postmaster's decision by the PCSC. The mailer may file a written appeal of the PCSC ruling with the USPS Recorder, Judicial Officer, with a copy or description of the determination or ruling. The rules of procedure for the determination of such appeals are in 39 CFR 953.

601.8.13

8.13 Protecting Employees

A postmaster may take any step reasonable and necessary to protect USPS employees and equipment from potentially dangerous or injurious materials or substances found in the mail.

8.14 Applicability to Military Postal System

[8.0](#) through [10.0](#) and [11.0](#) applies to the military postal system, its personnel, and undelivered mail that is or has been in the official custody of that system and its personnel. References to the Inspection Service refer to the Postal Inspection Service and its authorized employees, not to military investigative services.

9.0 Perishables**9.1 Time Factor**

Mailable perishable matter may be sent through the mail only if it can reach its destination in good condition in the normal transit time between the mailing and address points. Mailable perishable foods that do not rapidly decay or generate obnoxious odors in the mail may be sent at the mailer's risk.

9.2 Preparation of Perishables**9.2.1 Container**

Any container used to mail perishable matter must be constructed to protect and securely contain the contents.

9.2.2 Produce

Fruits and vegetables are not mailable unless presented in dry condition.

9.2.3 Water Ice

Water ice used as a refrigerant must be packed under [2.4](#) as though it were a liquid.

9.2.4 Dry Ice

A parcel containing dry ice (carbon dioxide solid) must be packed in a container that allows the release of carbon dioxide gas. If a fiberboard box is used, enough insulation is necessary to prevent condensation and wetting of the mailing carton.

9.3 Live Animals**9.3.1 Animal Fighting Prohibition**

Under 7 USC 2156, the mailing of a live animal for the purpose of participating in an animal fighting venture is prohibited (regardless of whether such venture is permitted under the laws of the state in which it is conducted). The term *state* means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any U.S. territory or possession. Violators can be subject to the criminal penalties in 7 USC 2156. See [11.20](#) for restrictions on mailing accessories used in animal fighting ventures and [12.5.7](#) for restrictions on mailing printed matter related to animal fighting ventures.

9.3.2 Day-Old Poultry

[8-14-08] Day-old poultry vaccinated with Newcastle disease (live virus) is nonmailable. Live day-old chickens, ducks, emus, geese, guinea fowl, partridges, pheasants (pheasants may be mailed only from April through August), quail, and turkeys are acceptable in the mail only if:

- a. They are not more than 24 hours old and are presented for mailing in the original unopened hatchery box from the hatchery of origin.
- b. The date and hour of hatching is noted on the box by a representative of the hatchery who has personal knowledge thereof. (For COD shipments made by a hatchery for the account of others, the name or initials and address of the hatchery or the Post Office box number and address of the hatchery must be prominently shown for this standard.)
- c. The box is properly ventilated, of proper construction and strength to bear safe transmission in the mail, and not stacked more than 10 units high.
- d. They are mailed early enough in the week to avoid receipt at the office of address, in case of missed connections, on a Sunday, on a national holiday, or on the afternoon before a Sunday or holiday.
- e. They can be delivered to the addressee within 72 hours of the time of hatching, whether the addressee resides in town or on a rural route or highway contract route.
- f. The shipment bears special handling postage in addition to regular postage, unless sent at the First-Class Mail or Priority Mail prices.
- g. When live, day-old poultry is to be transported by aircraft, all provisions of the airline tariffs are met and air carriers have equipment available to safely deliver shipments within the specified time limits, allowing for delays en route in air and ground transportation.
- h. Day-old poultry, originally shipped by air express or air cargo and then presented for mailing, must be in good condition and prepared as specified in [9.3.2a.](#) through [9.3.2e.](#)
- i. Boxes of day-old poultry of about identical size, securely fastened together to prevent separation in transit, may be accepted for mailing as a single parcel, if such parcel is not more than 100 inches in length and girth combined.

9.3.3 Small Cold-Blooded Animals

Small, harmless, cold-blooded animals (except snakes and turtles) that do not require food or water or attention during handling in the mail and that do not create sanitary problems or obnoxious odors are mailable (e.g., baby alligators and caimans not more than 20 inches long, bloodworms, earthworms, mealworms, salamanders, leeches, lizards, snails, and tadpoles).

9.3.4 Adult Fowl

Disease-free adult fowl may be mailed domestically when shipped under applicable law in accordance with [1.7.](#) Adult chickens, turkeys, guinea fowl, doves, pigeons, pheasants, partridges, and quail as well as ducks, geese, and swans are mailable as follows:

- a. The mailer must send adult fowl by Express Mail in secure containers approved by the manager of Mailing Standards (see [601.8.0](#) for address).
- b. The number of birds per parcel must follow the container manufacturer limits and each bird must weigh more than 6 ounces.
- c. Indemnity may be paid only for loss, damage, or rifling, and not for death of the birds in transit if there is no visible damage to the mailing container.

9.3.5 Warm-Blooded Animals

Warm-blooded animals, except the specified birds under specific conditions in this section, are not mailable (e.g., hamsters, mice, rats, guinea pigs, rabbits, cats, dogs, squirrels, parakeets, and canaries).

9.3.6 Mailed to the Pacific Islands

Animals mailed to the Republic of Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia require a permit issued by the government of the destination country.

9.3.7 Bees

Bees are acceptable in the continental surface mail when shipped under federal and state regulations to ensure that they are free of disease. Packages of honeybees must bear special handling postage, except those sent at a First-Class Mail price. Only queen honeybees may be shipped via air transportation. Each queen honeybee shipped via air transportation may be accompanied by up to eight attendant honeybees.

9.3.8 Other Insects

Other live, nonpoisonous, and nondisease-conveying insects, including flies of the family Drosophilidae, may be sent through the mail when properly prepared for mailing and when shipped under regulations of the U.S. Department of Agriculture. Such insects mailed to the Republic of Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia are also subject to the regulations of the destination country.

9.3.9 Live Scorpions

Live scorpions that are to be used for medical research or the manufacture of antivenin are accepted only in the continental surface mail when packaged in a double mailing container, both parts of which are closed or fastened to prevent escape of the scorpions. The inner container must be of material that cannot be punctured by the scorpions and must be plainly marked "Live Scorpions." Cushioning material must be used when necessary to prevent shifting of the inner container. The outer container must be strong enough to prevent crushing of the package or exposure of the contents during normal handling in the mail. The outer container must be plainly marked "Live Scorpions."

9.3.10 Packaging

Any mailing container used for mailable animals must be made of at least 275-pound test, double wall, corrugated, weather-resistant fiberboard (W5c) or equivalent and must be adequately ventilated. The container must be constructed to prevent escape of the animals while in the mail and to preclude the container and

its contents from being crushed in normal handling. The outside of the container must include a return address and a description of the contents. A container marked "If Undeliverable, Abandon" is not accepted.

9.3.11 Acceptance

The USPS does not accept any shipment of animals that the USPS reasonably believes cannot reach its destination in a viable condition. Such a determination is based on factors including the expected temperatures (weather conditions) while the shipment is in the mail; the types of vehicles on which the shipment is to be transported; the expected transit time; and the types of packaging used for protection against suffocation, crushing, and handling.

9.3.12 Disposal

Any parcel of live animals that cannot be delivered to the addressee or returned to the sender within 72 hours (for live day-old poultry) or within the delivery period marked on the parcel (for other animals) is immediately disposed of under the relevant standards. A parcel not marked with the delivery period is disposed of immediately if it reasonably appears that the animals cannot be returned to the sender in a viable condition.

9.4 Dead Wild Animals

The dead bodies, or parts thereof, of any wild animals, wild birds, or eggs are acceptable for mailing only when they are lawfully killed or taken, and their shipment is not prohibited by law of the United States or of the state, territory, district, or foreign country or subdivision thereof in which killed or taken or offered for shipment. Mailing of fresh game is also subject to these standards.

9.5 Furs, Hides, Skins, And Pelts

A parcel containing the fur, hide, skin, or pelt of a wild animal is mailable only if the matter is properly dried or cured and has no offensive odor, and only if the parcel is plainly marked, labeled, or tagged on the outside with the names and addresses of the shipper and addressee. The parcel must bear any endorsement required by state laws. Hides and pelts must be wrapped when necessary to prevent damage to other mail.

9.6 Mailing Plants

9.6.1 Mailability

In general, plants and plant products are mailable within the United States and its territories and possessions, subject to certain prohibitions imposed under U.S. agriculture and conservation statutes. To the extent specified below, when such prohibitions make shipment of plants or plant products unlawful, those articles constitute nonmailable matter. More detailed information is in Publication 14, *Prohibitions and Restrictions on Mailing Animals, Plants, and Related Matter*.

9.6.2 Nonmailable Quarantined Matter

Under 39 USC 3014(b), any plant, plant product, or other article capable of carrying a dangerous plant disease or insect infestation is nonmailable from a quarantined area, if shipping such item by common carrier is prohibited by a U.S. Department of Agriculture (USDA) quarantine issued under 7 USC 161, except, any such item is mailable from a quarantined area if:

601.9.6.3

- a. Its movement by common carrier is allowed under conditions prescribed in the quarantine notice or in other USDA regulations, issued under 7 USC 161, governing its inspection, disinfection, certification, and other conditions for its movement.
- b. Its movement by mail complies with all such conditions.

9.6.3 Additional Quarantined Matter

Any plant, article, or matter, the importation or interstate shipment of which is prohibited under the Act of August 20, 1912 (37 Stat. 315, chapter 308; 7 USC 151 et seq.), commonly known as the Plant Quarantine Act, is made nonmailable by 39 USC 3015(c).

9.6.4 Illegally Taken Plants

Any plant, the conveyance of which is prohibited under section 3 of the Lacey Act Amendments of 1981 (16 USC 3372), is made nonmailable by 39 USC 3015(d).

9.6.5 Criminal Penalties

18 USC 1716B provides criminal penalties for mailing anything nonmailable under 39 USC 3014(b), unless the item is excepted under USPS regulations. 18 USC 1716D provides criminal penalties for mailing anything nonmailable under 39 USC 3015(c) and (d).

9.6.6 USDA Notices and Regulations

USDA quarantine notices, issued under 7 USC 161, are published in the *Federal Register* and codified in 7 CFR (e.g., 7 CFR 301 and 318). Details on these and other USDA regulations may be obtained by writing to the USDA Animal and Plant Health Inspection Service (APHIS) Plant Protection and Quarantine (PPQ) Programs (see [608.8.0](#) for address).

9.7 Nonmailable Plant Pests, Injurious Animals, and Illegally Taken Fish or Wildlife**9.7.1 Nonmailable Matter**

More detailed information is in Publication 14. Under the respective provisions of 39 USC 3015(a), (b), and (d), the following items are nonmailable:

- a. Any injurious animal, the importation or interstate shipment of which is prohibited under 18 USC 42.
- b. Any plant pest, the movement of which is prohibited under section 103 or 104 of the Federal Plant Pest Act (7 USC 150bb or 150cc).
- c. Any fish or wildlife, the conveyance of which is prohibited under section 3 of the Lacey Act Amendments of 1981 (16 USC 3372).

9.7.2 Criminal Penalties

18 USC 1716D provides criminal penalties for mailing anything nonmailable under 39 USC 3015(a), (b), or (d).

10.0 Hazardous Materials**10.1 Definitions**

The following definitions apply:

- a. *Hazardous material* is any article or substance designated by the U.S. Department of Transportation (DOT) as being capable of posing an unreasonable risk to health, safety, and property during transportation. In international commerce, hazardous materials are known as “dangerous goods.”
- b. *Limited quantity* is the maximum amount of a specific hazardous material that is exempted from the labeling or packaging requirements in 49 CFR. Not every hazardous material is eligible to be shipped as a limited quantity. Almost all limited quantity materials are nonmailable.
- c. *ORM-D (Other Regulated Material) material* is a limited quantity of a hazardous material that presents a limited hazard during transportation due to its form, quantity, and packaging. In almost all instances, the proper shipping name for an ORM-D material is consumer commodity. Not all hazardous material permitted to be shipped as a limited quantity can qualify as an ORM-D material. ORM-D materials having the proper shipping name of “consumer commodity” are mailable subject to USPS quantity and packaging standards.
- d. *Consumer commodity* is a hazardous material that is packaged and distributed in a quantity and form intended or suitable for retail sale and designed for consumption by individuals for their personal care or household use purposes. This term can also include certain drugs or medicines. Not all hazardous material permitted to be shipped as a limited quantity can qualify as a consumer commodity.
- e. *Air transportation requirements*, for the purposes of [10.0](#) only, apply to all mailable hazardous materials sent at the First-Class Mail, Priority Mail, or Express Mail prices. All mailable hazardous materials sent at those prices must meet the requirements that apply to air transportation. Mailable hazardous materials sent at any of those prices may or may not be transported via air depending on the distance between the point of origination and the point of destination, and the ability of the USPS to obtain an air carrier between those points.
- f. *Surface transportation requirements*, for the purposes of [10.0](#) only, apply to all mailable hazardous materials sent at the Standard Mail or Package Services prices. All mailable hazardous materials sent at the Standard Mail or Package Services prices must meet the requirements that apply to surface transportation.
- g. *Primary receptacle* is the container (e.g., tube, vial, bottle) that holds the hazardous material.
- h. *Secondary container* is the packaging component into which the primary receptacle(s) and any required absorbent and cushioning material is securely placed. The packaging of certain mailable hazardous materials does not require the use of a secondary container.

601.10.2

- i. *Outer shipping container* is the exterior packaging component into which a primary receptacle, along with any required absorbent and cushioning material, and the secondary container (if required) are securely placed. The outer shipping container bears the addressing information along with all required markings.

10.2 U.S. Department of Transportation Regulations of Hazardous Material

The U.S. Department of Transportation (DOT) regulates the surface and air carriage of hazardous materials within the United States via any means of transportation. The DOT regulations for the transport of hazardous materials are codified in Title 49, Code of Federal Regulations (49 CFR) 100–185. USPS mailing standards for hazardous materials generally adhere to 49 CFR, but also include many additional limitations and prohibitions.

10.3 USPS Standards for Hazardous Material

The USPS standards generally restrict the mailing of hazardous materials to ORM-D materials with the proper shipping name of “consumer commodity” that meet USPS quantity limitations and packaging requirements. The few non-ORM-D materials permitted to be mailed are subject to the standards in [10.0](#). Detailed information on the mailability of specific hazardous materials is contained in Publication 52, *Hazardous, Restricted, and Perishable Mail*.

10.4 Hazard Class

Every hazardous material is assigned to one of nine hazard classes identified in 49 CFR 172.101 and 173. Some hazard classes are further separated into divisions based on their physical or chemical properties. For postal purposes, [Exhibit 10.4](#) generally summarizes the mailability of hazardous materials by hazard class.

Exhibit 10.4 DOT Hazard Classes and Mailability Summary

CLASS	HAZARD CLASS NAME AND DIVISION	TRANSPORTATION METHOD		
		Domestic Mail Air Transportation	Domestic Mail Surface Transportation	International Mail
1	Explosives Division - 1.1 Mass Explosive Hazard 1.2 Projection Hazard 1.3 Fire Hazard and/or Minor Blast/Minor Projection Hazard 1.4 Minor Blast Hazard 1.5 Very Insensitive With Mass Explosion Hazard 1.6 Extremely Insensitive With No Mass Explosion Hazard	Prohibited	Prohibited except with written permission as allowed in 10.11.2	Prohibited
2	Gases Division - 2.1 Flammable Gases 2.2 Nonflammable, Nontoxic Gases 2.3 Toxic Gases	<i>Division 2.1 and 2.3:</i> Prohibited. <i>Division 2.2:</i> Only ORM-D material per 10.12.2	<i>Divisions 2.1 and 2.2:</i> Only ORM-D material per 10.12.2 . <i>Division 2.3:</i> Prohibited	Prohibited
3	Flammable and Combustible Liquids	<i>Flammable liquids:</i> Prohibited. <i>Combustibles:</i> Only ORM-D material per 10.13.3	<i>Flammable liquids:</i> Only ORM-D material per 10.13.2 . <i>Combustibles:</i> Only ORM-D material per 10.13.3	Prohibited
4	Flammable Solids Division - 4.1 Flammable Solids 4.2 Spontaneously Combustible 4.3 Dangerous When Wet	Prohibited	Only ORM-D material per 10.14.2	Prohibited
5	Oxidizing Substances, Organic Peroxides Division - 5.1 Oxidizing Substances 5.2 Organic Peroxides	Only ORM-D material per 10.15.2	Only ORM-D material per 10.15.2	Prohibited
6	Toxic Substances and Infectious Substances Division - 6.1 Toxic Substances 6.2 Infectious Substances	<i>Division 6.1:</i> Only ORM-D material per 10.16.2 . <i>Division 6.2:</i> Only per 10.17	<i>Division 6.1:</i> Only ORM-D material per 10.16.2 . <i>Division 6.2:</i> Only per 10.17	<i>Division 6.1:</i> Prohibited. <i>Division 6.2:</i> Only mailable per IMM 135
7	Radioactive Materials	Prohibited	Only in limits per 9.0 and Publication 52	Only mailable in limits per IMM 135
8	Corrosives	Only ORM-D material per 10.19.2	Only ORM-D material per 10.19.2	Prohibited
9	Miscellaneous Hazardous Materials	Only ORM-D material per 10.20	Only ORM-D material per 10.20	Prohibited, except magnetized materials per IMM 136

601.10.5

10.5 Mailer Responsibility for Mailing Hazardous Materials

Full responsibility rests with the mailer to comply with all postal and nonpostal laws and regulations regarding the mailing of hazardous materials. Anyone who mails, or causes to be mailed, a nonmailable or improperly packaged hazardous material can be subject to legal penalties, including but not limited to those specified in 18 USC.

10.6 Mailability Rulings for Hazardous Materials

Generally, the acceptability for mailing chemicals and other types of hazardous materials depends on container fluid/vapor capacities, the ability of the complete mailpiece to contain the material, and the method of absorbing and containing the product in case of accidental leakage of the primary receptacle. To determine mailability of a specific material, a mailer must submit a material safety data sheet (MSDS) and the following information to the Pricing and Classification Service Center (PCSC):

- a. Name of material, hazard class, and assigned United Nations (UN) or North America (NA) identification number.
- b. Chemical composition by percentage of ingredient.
- c. Flashpoint.
- d. Toxic properties.
- e. Irritant action when inhaled, swallowed, or contacted by eyes or skin.
- f. Special precautions necessary to permit handling without harm to USPS employees or damage to property or other mail.
- g. Explanation of warning labels and shipping papers required by state or federal regulations.
- h. Proposed packaging method, including the addressing and required markings.
- i. Proposed number of pieces to be mailed, class of mail, and Post Office(s) of mailing.

10.7 Warning Labels for Hazardous Materials

With few exceptions as noted in these standards, most hazardous materials acceptable for mailing fall within the Other Regulated Materials (ORM-D) regulations of CFR 49 173.144, which do not require DOT hazard class warning labels. Except for Division 6.2 materials under [10.17.4](#) and dry ice under [10.20.4](#), any hazardous material bearing or required to bear a DOT hazard class warning label under the requirements in 49 CFR is prohibited from mailing. Mailable ORM-D material must be marked as required in [10.8](#). Mailable hazardous material must bear DOT handling labels (e.g., orientation arrows, magnetized materials) when applicable.

10.8 Package Markings for Hazardous Materials

Each mailpiece containing a mailable hazardous material must be plainly and durably marked on the address side with the required shipping name and UN identification number. The UN identification number is not required on a mailpiece that contains an ORM-D material. A mailable ORM-D material must be marked on the address side with "ORM-D" or "ORM-D AIR," as applicable, immediately following or below the proper shipping name. The proper shipping name for a

mailable ORM-D material is “consumer commodity.” The designation “ORM-D” or “ORM-D AIR”, as required, must be placed within a rectangle that is approximately 6.3 mm (1/4 inch) larger on each side than the designation. Mailable ORM-D materials sent as Standard Mail or Package Services must also be marked on the address side as “Surface Only” or “Surface Mail Only.”

10.9 Shipping Papers for Hazardous Materials

A shipper’s declaration for dangerous goods (shipping paper) prepared under 49 CFR 172.200 through 172.205 is required for certain types of hazardous materials when mailed. The shipping paper must be completed and signed in triplicate by the mailer. It must be affixed to the outside of the mailpiece within an envelope or similar carrier that can be easily opened and resealed to allow viewing of the document. Shipping papers are required as follows:

- a. *Air transportation requirements.* Except for nonregulated materials sent under [10.17.3](#) or [10.17.8](#) and diagnostic specimens sent under [10.17.5](#), mailpieces containing mailable hazardous materials sent at the First-Class Mail, Priority Mail, or Express Mail prices must include a shipping paper.
- b. *Surface transportation requirements.* Except for nonregulated materials sent under [10.17.3](#) or [10.17.8](#) and mailable ORM-D materials, mailpieces containing mailable hazardous materials sent at the Standard Mail or Package Services prices must include a shipping paper.

10.10 Air Transportation Prohibitions for Hazardous Materials

All mailable hazardous materials sent at the First-Class Mail, Priority Mail, or Express Mail prices must meet the requirements for air transportation. The following types of hazardous materials that are prohibited from carriage on air transportation must not be sent at the First-Class Mail, Priority Mail, or Express Mail prices:

- a. Anything susceptible to damage or that can become harmful because of changes in temperature or atmospheric pressures unless protected against the effects of such changes.
- b. Magnetic materials that have a field strength sufficient to cause a compass deviation at a distance of 15 feet (4.6 meters) or more from any point on the outer packaging.
- c. Flammable materials (gases, liquids, and solids).
- d. Radioactive materials.
- e. Materials excluded from air shipment by DOT regulations (49 CFR 100-185) or of the applicable state (country) or air carrier operator variations. Certain restricted articles, as described in 49 CFR 100-185 and the operator variations of the air carriers, may be accepted for air transportation if properly packaged. These articles must be labeled and bear a shipper's declaration in triplicate, as required by 49 CFR 172.204, or must be marked according to the air carrier's operator variations. Refer to the technical instruction of the International Civil Aviation Organization (ICAO) for air carrier operator variations.

601.10.11

10.11 Explosives (Hazard Class 1)**10.11.1 Definition**

An *explosive* is any substance, article, or device that is designed to function by explosion (i.e., an extremely rapid release of gas and heat) or that, by chemical reaction within itself, is able to function in a similar manner even if not designed to function by explosion, unless the substance or article is otherwise classed under the provisions in 49 CFR. Hazard class 1 has six divisions as shown in [Exhibit 10.4](#). No further explanation of the six divisions is provided in these standards because explosives are prohibited in the mail except as permitted in [10.11.2](#).

10.11.2 Mailability

Explosives are prohibited in international mail. Explosives are prohibited in the domestic mail via air transportation. For domestic surface transportation, explosives are prohibited except for certain Division 1.4S toy propellant devices and safety fuses specifically approved by the manager of Mailing Standards (see [608.8.0](#) for address) before mailing. A mailable explosive must meet the packaging and marking requirements provided with the manager's approval. A shipping paper is required.

10.12 Gases (Hazard Class 2)**10.12.1 Definition**

Hazard class 2 consists of three divisions:

- a. Division 2.1, Flammable Gases. A material that is a gas at 68°F (20°C) or less and 14.7 psi (101.3 kPa) of pressure. Flammable gases also include materials that have a boiling point of 68°F (20°C) or less at 14.7 psi (101.3 kPa) and that are ignitable at 14.7 psi (101.3 kPa) when in a mixture of 13% or less by volume with air or that have a flammable range at 14.7 psi (101.3 kPa) with air of at least 12% regardless of the lower limit. These conditions must be established in accordance with ASTM E681-85, Standard Test Method for Concentration Limits of Flammability of Chemicals, or other approved equivalent method. The flammability of aerosols must be determined using the tests specified in 49 CFR 173.306(j).
- b. Division 2.2, Nonflammable, Nontoxic Gases. A material that does not meet the definition of Division 2.1 or 2.3 and exerts in its packaging an absolute pressure of 40.6 psi (280 kPa) or greater at 68°F (20°C).
- c. Division 2.3, Toxic Gases. A material that is poisonous by inhalation and is a gas at 68°F (20°C) or less and a pressure of 14.7 psi (101.3 kPa) or a material that has a boiling point of 68°F (20°C) or less at 14.7 psi (101.3 kPa).

10.12.2 Mailability

Gases are prohibited in international mail. Toxic gases in Division 2.3 are prohibited in domestic mail. Flammable gases in Division 2.1 are prohibited in domestic mail via air transportation, but are permitted via surface transportation if the material can qualify as an ORM-D material and meet the standards in [10.12.3](#) and [10.12.4](#). Nonflammable gases in Division 2.2 are generally permitted in the domestic mail via air or surface transportation if the material can qualify as an ORM-D material and meet the standards in [10.12.3](#) and [10.12.4](#).

10.12.3 Container

An other-than-metal primary receptacle containing a mailable gas may be acceptable if the water capacity of the primary receptacle is 4 fluid ounces (7.22 cubic inches) or less per mailpiece and the primary receptacle meets 49 CFR requirements. Mailable nonflammable and flammable compressed gases are acceptable in metal primary receptacles that have a water capacity up to 33.8 fluid ounces (1 liter or 61.0 cubic inches), depending on their internal pressure. A DOT 2P container must be used as the primary receptacle if the internal pressure is from 140 to 160 psi at 130°F (55°C). A DOT 2Q container must be used as the primary receptacle if the pressure is from 161 to 180 psi at 130°F (55°C). A container with an internal pressure over 180 psi at 130°F (55°C) is prohibited from mailing. Mailable flammable compressed gases are restricted to 33.8 fluid ounces (1 liter) per mailpiece. Mailable nonflammable compressed gases are permitted in individual 33.8 fluid ounce (1 liter) containers that must be securely packed within an outer shipping container. Each mailpiece must not exceed a total weight of 25 pounds.

10.12.4 Marking

For surface transportation, packages of mailable gases must be clearly marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name (consumer commodity). For air transportation, packages must be plainly and durably marked on the address side with “ORM-D AIR” immediately following or below the proper shipping name and must also bear a shipper's declaration for dangerous goods.

10.13 Flammable and Combustible Liquids (Hazard Class 3)

10.13.1 Definitions

The terms used in the standards that apply to hazard class 3 are defined as follows:

- a. *Flammable liquid* means a liquid that has a flashpoint of not more than 141°F (60.5°C), or any material in a liquid phase that has a flashpoint at or above 100°F (38°C).
- b. *Combustible liquid* means any liquid that does not meet the definition of any other hazard class and has a flashpoint above 141°F (60.5°C) and below 200°F (93°C). Note: A flammable liquid with a flashpoint at or above 100°F (38°C) that does not meet the definition of any other hazard class may be reclassified as a combustible liquid per 49 CFR 173.120(b).

10.13.2 Flammable Liquid Mailability

Flammable liquid is prohibited in international mail. Flammable liquid with a flashpoint of 20°F (-7°C) or below is prohibited in domestic mail. Other flammable liquid is prohibited in domestic mail via air transportation but is permitted via surface transportation if the material can qualify as an ORM-D material and meet the following conditions as applicable:

- a. The flashpoint is above 20°F (-7°C) but no more than 73°F (23°C); the liquid is in a metal primary receptacle not exceeding 1 quart, or in another type of primary receptacle not exceeding 1 pint, per mailpiece; enough cushioning surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle are packed within a securely sealed secondary container

601.10.13.3

that is placed within a strong outer shipping container; and each mailpiece is plainly and durably marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name.

- b. The flashpoint is above 73°F (23°C) but less than 100°F (38°C); the liquid is in a metal primary receptacle not exceeding 1 gallon, or in another type of primary receptacle not exceeding 1 quart, per mailpiece; enough cushioning surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle are placed within a securely sealed secondary container that is placed within a strong outer shipping container; and each mailpiece is plainly and durably marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name.

10.13.3 Combustible Liquid Mailability

Combustible liquid is prohibited in international mail. Combustible liquid is permitted in domestic mail if the material can qualify as an ORM-D material and meet the following conditions as applicable:

- a. For surface transportation, if the flashpoint is 100°F (38°C) but no more than 141°F (60.5°C); the liquid is in a metal primary receptacle not exceeding 1 gallon, or in another type of primary receptacle not exceeding 1 quart, per mailpiece; enough cushioning surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle are packed in a securely sealed secondary container that is placed within a strong outer shipping container; and each mailpiece is plainly and durably marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name.
